—We tramped on the cores of the *Bulletin* man by the manner of our phrased use and by our opposition to the removal of the county seat. An "honest man with a head and" taking a glance at the map displayed in the first numbers of the *Bulletin*, will see at a glance that the townships of Norwood, Marion, Charlevoix and Hudson will be accommodated by the removal of the county seat to Boyne Falls as Boyne Falls, Hudson, Chandler and Springvale are at present inconvenienced in having it at Charlevoix. We are not opposed to the prosperity of Boyne Falls, or any other portion of Charlevoix county, but we are opposed to the idea that the removal of the county seat to Boyne Falls will be of vital importance to every citizen of the county." It is not a central location, and it will be the means of keeping the subject in an unsettled condition for years. The *only fair* reason that could be offered for the removal from Charlevoix to present to every citizen in the county is a central location. The statement is a fact that from the tops of two or three hills in the centre of the surrounding country can be obtained is not a *good* reason for the change. Because the village is tapped by the railroad is not a good reason for making the change. We understand from the *Bulletin* that Boyne Falls has everything under the sun desirable to make a city dwelling any in the north of the state—everything that the country needs—and with that little consideration they could be "induced to be happy for ever after." We have no doubt but that the real estate holders in Boyne Falls and adjacent villages will be greatly benefitted by such a change; but that every citizen in Charlevoix county will be benefitted by its enormous expenditure. That Hudson must give in to all of the main arguments presented, [illegible] these, and we may [illegible] Hudson [illegible] [illegible] [illegible]

Phrases Used in Wall Street.

Bear market—When the market is heavy and falling, and lower prices are expected, in consequence of the efforts of the "bears."

Bear the market, i. e., operate for a decline. A bear is naturally "short" of stocks and expecting to profit by a decline.

Borrowing and loaning stocks—When a party has sold stock short and has not bought it in by the time delivery must be made, he "borrows" the stock for the purpose of making a delivery, paying the owner the market price at the time and agreeing to return it at the same price on demand or at a fixed time, the lender of the stock paying the borrower a rate of interest on the money, or the borrower paying the lender an agreed premium for the use of the stock, as the case may be.

Corner, to "corner one's shorts"—Where stock has been sold short and the seller buys it in to realize his profit, or to protect himself from loss, or to make his shorts cover, he is "covering short sales."

A ramp—The privilege obtained, for a consideration, of calling for a certain number of shares of stock, at a given price, within a time named.

Carrying stock—Holding stock by a broker for his customers on a margin.

Clique—A combination of operators formed for the purpose of artificially influencing the market by buying and selling.

Operations.

Corner.—When the market is oversold, the shorts, if compelled to deliver, sometimes find themselves in a "corner."

Curbstone brokers—Men who are not members of any regularly organized board and do business mainly upon the sidewalk.

Flyer—Is a small side operation, not employing one's whole capital or not in the line of his ordinary operations.

Lamb—A very green "outsider" who essays stock speculation.

Limited order—An order to buy and sell within a certain fixed price, above or below which the party giving the order does not wish to go.

Margins—Where one buys or sells for speculation, and deposits with his broker a percentage of value to enable the latter to "carry" the stock and protect him against loss from fluctuations in value.

Milking the street—The act of cliques or great operators who hold certain stocks so well in hand that they cause any fluctuations they please. By alternately listing and depressing prices they "milk" the small operators and the outside public.

Put—To buy a "put" is to obtain the right, for a consideration, to deliver a stock at a certain agreed price within a given number of days.

Stop order—An order to sell out a stock in case it should decline to a certain price, or to buy in a short stock in case it should advance to a certain price. A means adopted by a party "long" or "short" of a stock to limit his loss to a certain figure.

Turning stocks—Consists in buying for cash or regular way, and selling a like amount of the same stock at the same time "on options," thereby making six per cent. interest, and any difference that may exist at the time between the market price of the stock for cash and on option, or selling for cash and buying on option, when the stock is hard to carry and the holder, hoping for a rise, does not want to "get out" of it.

Twist on the shorts—A clique phrase used when the shorts have oversold heavily, and the market has been suddenly advanced, compelling them to settle at ruinous rates, or when stocks are withdrawn from the loan market and made difficult to borrow except at a large premium or at a fixed time, the lender of the stock paying the borrower a rate of interest on the money, or the borrower paying the lender an agreed premium for the use of the stock, as the case may be.

Corner, to "corner one's shorts"—Where stock has been sold short and the seller buys it in to realize his profit, or to protect himself from loss, or to make his shorts cover, he is "covering short sales."

A ramp—The privilege obtained, for a consideration, of calling for a certain number of shares of stock, at a given price, within a time named.

Carrying stock—Holding stock by a broker for his customers on a margin.

Clique—A combination of operators formed for the purpose of artificially influencing the market by buying and selling.

Operations.

Corner.—When the market is oversold, the shorts, if compelled to deliver, sometimes find themselves in a "corner."

Curbstone brokers—Men who are not members of any regularly organized board and do business mainly upon the sidewalk.

Flyer—Is a small side operation, not employing one's whole capital or not in the line of his ordinary operations.

Lamb—A very green "outsider" who essays stock speculation.

Limited order—An order to buy and sell within a certain fixed price, above or below which the party giving the order does not wish to go.

Margins—Where one buys or sells for speculation, and deposits with his broker a percentage of value to enable the latter to "carry" the stock and protect him against loss from fluctuations in value.

Milking the street—The act of cliques or great operators who hold certain stocks so well in hand that they cause any fluctuations they please. By alternately listing and depressing prices they "milk" the small operators and the outside public.

Put—To buy a "put" is to obtain the right, for a consideration, to deliver a stock at a certain agreed price within a given number of days.

Stop order—An order to sell out a stock in case it should decline to a certain price, or to buy in a short stock in case it should advance to a certain price. A means adopted by a party "long" or "short" of a stock to limit his loss to a certain figure.

Turning stocks—Consists in buying for cash or regular way, and selling a like amount of the same stock at the same time "on options," thereby making six per cent. interest, and any difference that may exist at the time between the market price of the stock for cash and on option, or selling for cash and buying on option, when the stock is hard to carry and the holder, hoping for a rise, does not want to "get out" of it.

Twist on the shorts—A clique phrase used when the shorts have oversold heavily, and the market has been suddenly advanced, compelling them to settle at ruinous rates, or when stocks are withdrawn from the loan market and made difficult to borrow except at a large premium or at a fixed time, the lender of the stock paying the borrower a rate of interest on the money, or the borrower paying the lender an agreed premium for the use of the stock, as the case may be.

A Big Scheme.

"I've got the biggest scheme of the age," said a man about forty years old, as he dropped into a chair by the city editor's desk in the *Banner* editorial room this morning. He wore a brigadie-colored duster, and his head gear was a rather shiny, bid his ears from view.

"Have, eh?" said the person addressed.

"Yes, sir-ee. Biggest thing you ever heard of. It'll revolutionize the hull country. Make me rich, and you rich, and everybody rich."

"You don't appear to be very rich."

"I don't. Cause why? I've been foolin' away my time just like you are doing now. I've worked harder than a mule for three years, and not a red had up. About three weeks ago an idee struck me kinder sudden-like, and began to think. I laid awake nights and thought. Finally, about four o'clock this morning, while lying in bed thinking, I suddenly riz up, and my wife she says, 'What's the matter? Think you've got a fit?' I told her that I was going to be rich. She called me an awful fool, and turned over and went to sleep. But I was too happy to sleep. I got up and walked around till breakfast, and then I set out for your office. I had heard that you were willing to help the poor, and as I says to myself, I'll confide my secret to the *Banner*."

"Possibly you've found a pot of gold?"

"No; my scheme is this: There are about a million people in this here big country who are rich. There are those who are not rich. Now, my scheme is to have those rich men help the most men to get rich. See? And when we are all rich what a beautiful world we'll have. How do I propose to do this? For instance, I propose that every man interested in the State who can afford it shall give me fifty cents. That will be fifty cents from you, and so on. I take the money and start me a family grocery, and then I—look out, I'll take up a boot-blacker collection for you, and then you are rich. Then with you on our list we'll take up the next man and make him rich, and so on, until every body is on the rich list. See how it works. Beautiful, isn't it?

"I guess it is."

"Oh, it's a boss. It's a wonder somebody didn't think of it before. So simple, you know. Why, we can all be boss-blacker in a few years and own stock in railroads and canals and National banks."

"Well?"

"I want you to publish the scheme and let the people know what we are doing, and tell 'em where to send their fifty cents—Room 9, Cotton Exchange, Nashville, Tenn. You see, I, being the originator of the plan, ought to be made rich first, so as to show 'em how it works. Now, the honor of organizing the first collection is enough for me; so, if you say so, I'll let you have the privilege of paying in the first half dollar, and you can pay it now, and I'll enter your name on the fly-leaf of this book, number four in the list of names."

Clique—A combination of operators formed for the purpose of artificially influencing the market by buying and selling.

Operations.

Corner.—When the market is oversold, the shorts, if compelled to deliver, sometimes find themselves in a "corner."

Curbstone brokers—Men who are not members of any regularly organized board and do business mainly upon the sidewalk.

Flyer—Is a small side operation, not employing one's whole capital or not in the line of his ordinary operations.

Lamb—A very green "outsider" who essays stock speculation.

Limited order—An order to buy and sell within a certain fixed price, above or below which the party giving the order does not wish to go.

Margins—Where one buys or sells for speculation, and deposits with his broker a percentage of value to enable the latter to "carry" the stock and protect him against loss from fluctuations in value.

Milking the street—The act of cliques or great operators who hold certain stocks so well in hand that they cause any fluctuations they please. By alternately listing and depressing prices they "milk" the small operators and the outside public.

Put—To buy a "put" is to obtain the right, for a consideration, to deliver a stock at a certain agreed price within a given number of days.

Stop order—An order to sell out a stock in case it should decline to a certain price, or to buy in a short stock in case it should advance to a certain price. A means adopted by a party "long" or "short" of a stock to limit his loss to a certain figure.

Turning stocks—Consists in buying for cash or regular way, and selling a like amount of the same stock at the same time "on options," thereby making six per cent. interest, and any difference that may exist at the time between the market price of the stock for cash and on option, or selling for cash and buying on option, when the stock is hard to carry and the holder, hoping for a rise, does not want to "get out" of it.

Twist on the shorts—A clique phrase used when the shorts have oversold heavily, and the market has been suddenly advanced, compelling them to settle at ruinous rates, or when stocks are withdrawn from the loan market and made difficult to borrow except at a large premium or at a fixed time, the lender of the stock paying the borrower a rate of interest on the money, or the borrower paying the lender an agreed premium for the use of the stock, as the case may be.

Corner, to "corner one's shorts"—Where stock has been sold short and the seller buys it in to realize his profit, or to protect himself from loss, or to make his shorts cover, he is "covering short sales."

A ramp—The privilege obtained, for a consideration, of calling for a certain number of shares of stock, at a given price, within a time named.

Carrying stock—Holding stock by a broker for his customers on a margin.

Charlevoix Sentinel.

CHARLEVOIX, APRIL 5, 1877.

WILLARD A. SMITH, EDITOR AND PROPRIETOR

The salary of the Czar of Russia is ten million dollars per annum.

A Portland lawyer has sued a man for 37 cents which he had lent him.

Over 400 colonels of the late war are in the insurance or sewing machine business.

According to advices from Europe, a war between Greece and Turkey seems inevitable.

Postmaster Garfield announces positively that on extra session of Congress will be called.

Among the means of torture said to be now applied to the nihilists recently captured in St. Petersburg is electricity.

The emigration from Germany to America is now great that extra steamships have to be chartered to meet the demand.

With a total population of 626,915, the State of West Virginia has but 25,760 negroes, or about one in every thirty-five.

The first thing Wee Sons, Bonnie of Clyde, did after being eaten by Tilden, O., was to petition for a divorce from Mrs. Wee Sons.

The Snow contractor of the Delaware, Lackawanna and Western extension has learned that it will take 264,000 pieces to build a fence from Binghampton to Buffalo.

The wife of Secretary Windom is the daughter of a Congregational clergyman in Massachusetts. In her youth she was a teacher in Ohio, and she now teaches her son children.

The trial of the Barnard-Curtiss murder case is set down for May 2, at Lapeer. No change of venue has been asked. The bail bond for Mrs. Barnard's appearance remains at $15,000.

A corps of physicians and a large squad of sanitary police are investigating the tenement houses of New York City, hoping to exterminate typhus fever, which has become epidemic there.

Hon. E. W. Stoughton formerly minister to Russia, says: "The Nihilists are a parcel of worthies, loathsome, ignorant people, who, like Kearney in this country, have strange ideas of the people's rights.

The Michigan Ex-Prisoners of War Association will meet in Detroit on the 21st, 22d and 23d of June next, which opening every man in the State who was captured during the war, is invited to attend.

The Republican political convention of the 15th Circuit, held at Coldwater, after 329 ineffectual ballots, decided to settle the contest by lot, which resulted in the nomination of Russel R. Peeler, of Three Rivers.

An Indian woman in a village of British Columbia was taken with an infectious fever. The medicine man decided that she must be buried alive to prevent an epidemic, and the decree was carried out literally.

The Arkansas Legislature recently passed a bill making it a misdemeanor to sell in that state a dirk, bowie-knife, sword-cane, or brass knuckles, or plead of any kind, except such as are used in the army or navy.

A violent snow storm swept over Illinois, Indiana and Ohio during the past two or three days, reaching well down into Kentucky. Its course appeared to be along the Ohio river, where snow fell to the depth of two inches or more.

A Frenchman dropped down in New York, just from Paris and fairly out of breath, a request to be allowed to select a site for his restaurant for the World's Fair Grounds. This was an energy that might put the commission to the blush.

The feed of Harrigan gold to this country continues. Four hundred thousand dollars was shipped by a French steamer last Monday, and $750,000 from London the same day. Two million dollars arrived in New York by ocean steamers last Friday.

A deserted husband, of Hudson, Wis., who left his home some twenty years ago for the army, returned to his first love a few weeks ago but alas, he found her wedded to another man. He talked over the matter with his wife, but found matters too complicated for his limited intelligence, and quickly left for unknown parts.

An old looking car line here ran over the Erie Railroad recently. The top of the car was covered with cobwebs and creeping caps, so that it looked like the roof of a signal service station. The object was to test the pressure of the stones piled on cars going at different rates of speed, so as to determine of what stage to make the front of the cars in order that a raise in the passage which is very good.

The man employed at Krupp's gun factory, in Germany, say nothing about and day in supplying orders for big guns from abroad. Roumania has ordered 100, Greece, 70; Sweden, 50; Holland, 120, and Italy, 400. In the presence of facts like these it is a little difficult to perceive from which direction the millennium is approaching.

The Reading, Penn., Times says that there are in the municipals of Mr. Hendon Troxell, in the western part of Salisbury Lehigh county, Penn., a number of chickadees, joined at the sides or three body, yet each having two heads and two tails. They are quite hearty, and fast shake the waters of the "serenity" as lively as the rest of the small fry.

A disastrous freshet is doing much damage in Nebraska. Bridges have been carried away, and extensive tracts of country submerged, drowning many cattle, sheep, swine and other domestic animals on account of the valley of the Platte and its tributaries. Sudden melting of the snow in the regions drained by these streams was what did it.

Trains on the Chicago and Northwestern and the Chicago, Milwaukee and St. Paul railroads finally got through between Chicago and the Mississippi, after the discharge of five days, thawing out the baffling snow blockades which many miles in the region then it was in Minnesota. The work of shoveling out the miles of solidly packed snow was almost equal in that of constructing a new road bed.

The Webster-Ashley homicide. "What's the matter, Jim?" asked uncle Ned on a recent morning. "I feel awful sick up my heart to spit the chicken business. But dont bring a record out here in heaven, and talk of bills and, 'What's my check now?' I am going to go into a decent world if I do suspected, and what' de police won't rather bother me no much." "What business am dat, Jim?" "Gambling." —*Det. News.*

A notorious highwayman and murderer of the Rocky Mountain region, who was under sentence of death, ate mysel to escape from the jail at Rawlins, Wy. T., recently, by knocking the sheriff down with his shackles, which he had managed to get off; but he was foiled by the pluck and liberation of the sheriff's wife, who slammed and locked the door, and thereby summoned help. During the following night people of the town got together, took him out of jail and hanged him "without benefit of clergy."

Two cheese of Joel Lacey, Stony Drayer, and Billy Conners, the robbers of the Northampton bank, was brought about by the return of part of the plunder. The evidence would certainly have convicted them, but when the case went to the grand jury the important witnesses would not testify damagingly, and an indictment could not be found. While justice was being cheated thus in one court of the town, three children were being fined in another for picking up some chips that had been swept out of the factory.

The trial of the son of Rev. and Mayor I. S. Kalloch, of San Francisco, for the murder of Charles De Young, of the San Francisco *Chronicle*, was concluded last Thursday. After being out twenty-five hours, the jury brought in a verdict of not guilty. The verdict was received with much applause by a crowd of loafers in the court room. When Kalloch was discharged and got into a carriage to go home, an immense crowd took the horses from the vehicle and pulled him to the house, some three miles. This making a hero of a cold-blooded assassin is a new phase in the peculiar civilization prevalent in the metropolis of the Pacific coast.

Secretary Ramsdell takes a sensible view of the contested Southern Congressional elections. He thinks the offered frauds should be investigated with great care, so that no injustice may be done to either party. For a remedy, in cases where it becomes evident that there was either an undue election or a dishonest count, he suggests that a new election be ordered. This is the remedy which has already met the approval of many earnest students of the Southern problem. In case the new election is like the old, an fair, still another can be ordered, and so on, until a fair one is secured. In this way the people of the south will be taught that they must either allow their Congressmen to be elected fairly or go unrepresented.

Forepaugh's show is to have a new and rather sensational attraction. Some months ago he advertised for "the most beautiful woman," offering a cash prize of $10,000 for the handsomest woman who should consent to travel with his show the coming season, and good wages besides. Photographs poured in by scores and by hundreds. The examining committee finally awarded the prize to Miss Annie Pauline Scott, of Monongahela City, Pa., and those who witness Forepaugh's "greatest show on earth" this coming season will have an opportunity to behold the beauty. She is a coal miner's wife, and has been raised in humble life, but a newspaper correspondent who has interviewed her since the award, pronounces her the most beautiful woman he ever beheld.

New York Letter.

NEW YORK, March 26, 1877.

Grant has thrown up the presidency of the exhibition commission after all, and I'm afraid that enterprise—or monument of lack of enterprise—is in a bad way. However, we shall see what we shall see. The great commander is going to adorn himself and enjoy the handsome income as kindly raised for him by a few old political friends for a considerable part of the summer at Long Branch, which charming resort, if we may judge from the preparations now being made by the shrewd property owners, them, is going to show with renewed splendor this coming season. Meantime, Grant's on the move to Mexico.

Among all the discontented working-men, whose recurring strikes whenever times seem to grow a little brighter spear one as a check on them, the brewers have little to never been found. In fact they have had little cause to be discontented. Their employers are mostly a kindly set of men of Democratic manners and hearty German habits, and have given the men wages on which they manage to rear large families in very tolerable comfort; and it appears they get about all the beer they can possibly drink free, while they are not obliged to choke themselves drinking it. No sharp time keeper stands ready to dock their earnings, and it is estimated that perhaps three hours a day are spent by the average brewers man at the stand of kegs, where he swallows his frequent potion and discusses things in general with his fellows. They have led a calm, cheerful existence, never hurried, and laugh and grow fat. But the demon of discord has crept in, and in three breweries there was a strike because of the discharge of one or two troublesome hands. The other trades-unions promptly fomented the quarrel, and no less than 6,000 men pledged themselves not to patronize any saloon which sold the beer of these three breweries. In other words, to borrow the term for that sort of thing invented by circumstances in the current troubles in Ireland, the united trades unions of New York proceeded to "Boycott" the sampling saloons. The strike was a short one, and the employers surrendered very speedily.

At the season of the day, when the near approach of May-day, or moving-day as it is more generally known in these parts, forces itself on the attention of the business man as well as the householder, the perpetual change of location or grand the increase of business is apt to suggest, among other things, the purchase of a safe. There are a great many safes, good, bad and indifferent, and as even the poorest variety is by no means an inexpensive piece of furniture, it is quite as well to fore deciding on what particular kind to buy to consider the question with some degree of carefulness. The crudest time which some kinds have stood fast to raise the dishonest of cancer. Of course the safe isn't yet built which burglars can't break into, provided they have sufficient time to use their supreme tools and best ingenuity, but there are some safes an ordinary blacksmith could open in half an hour, and others that a committee of expert engineers would take a week to get at the true inwardness of. Fire is better guarded against in some kinds than burglars can be, and no one unafflicted with crooked ideas of economy need hesitate in selecting a protector for his books and papers of a make known in fire passed the severest ordeals. Those who remember the great Read street fire, when that large and magnificent iron and brick building occupied by several firms of manufacturing jewelers was razed to the ground, may also remember that among the dozens of safes taken from the ruins only those of the Marvin Safe Co. were found to have preserved their precious contents absolutely uninjured, not even the faintest scorchiness of a scorch being perceptible on the thinnest tissue paper inside any of them. The experience of your correspondent with a Marvin safe has been such as to lead him to warmly commend it, and that a good many people agree with him on this point seems very evident from the number of Marvin's safes seen on exhibition with a crowd staring at them as they are hoisted into lofty offices or rolled tenderly into basements for the city.

Did you ever see the elephant? If you'd like to make the acquaintance of the tortuous variety of the beast, you can do it very simply. Just get A. T. & Z. 202, or something of that sort, in Bradstreet's or Dun & Barlow's commercial agency books, and you can see the animal cheap. Hopefully young men, emissaries of great and dignified commission houses send, are the changed conditions of trade nowadays and keen the competition—brave in elegant clothing and much jewelry, stand in clusters ready to pounce on the wayfarer and take him in and do for him. It seems to be of no consequence whatever that a prosperous looking possible buyer should have the slightest previous knowledge of his warm-hearted entertainer. If he only betrays the faintest symptoms of being interested, his new friend will stick closer to him than a brother, and stand in, out of doors, expensive delights as the night wears on to the small hours of a morning. This queer way of doing business seems to have grown up of late from the other generally prevailing custom of giving very small salaries and very liberal commissions to salesmen, so that a self-reliance such and all have to paint their game with the curiosity of fiends. The old plan of getting down solid for customers was more comfortable, but it don't pay nowadays.

The Brooklyn Festival isn't panning out to any considerable extent, and the papers are limiting their descriptions of the rival procedures and methods to the merriment space. Beecher, by the way, has sold the elegant and beautifully situated house on Columbia heights where he has resided so many years, and is going to board during the winters or residing to live on his place on Hooven with one of his sons, and settle for his summers at the superb home he has built at Peekskill. He has made a good deal of money during his life, but he has put through with an awful pile, and to this day a mortgage remains of this Brooklyn property of his of $15,000, which is really all gone as much as it is worth.

Two gentlemen, one native and the other foreign, have been struck recollectedly, it appears, that the converse of Adam before the fall was about comfortable than mother half-a-month. I can't say I agree with them, for the weather has been quite raw and chilly, and I really think good honest wind tents are better than tents in the sweetest shade of lilac and rose opened by an entire British family. However, the other morning South avenue thronged with damsels on their way to shop and factory, and honest clerks and mechanics with a sprinkling of police, carriages, etc., was appalled by the apparition of a gigantic negro clad in the pure simplicity of his own innocence. The latter succeeded, and on a corner view men killed and ran. There was a general stampede. The poor wretch had the small pox. Presently a policeman came along and very bravely grappled the patient, who fought like a tiger, but reinforcements having appeared, was finally conveyed, with a silent escort like, to the station-house and thence to hospital. The other gentleman, genius a Gaul sailor, whose particular dialect no one in creation able to tackle. He was arrested some months ago of having stolen a boat, and has been in jail ever since, awaiting the arrival of some possible interpreter. Having apparently some extenuating circumstances in his favor, he was discharged, and is going to board during the winter, and proceeded to strike out on a pilgrimage, walked a stick via him. It now three men all they could do to keep him from knocking each other down like a mad bull.

BABO.

The Buffalo *Express* pertinently remarks: "Little shipments of hardwood and lumber, etc., are now being made from Chicago to New York, St. Louis and some of the other big cities, who call themselves nihilists and applaud the assassination of the Czar. They have neither the courage nor the courage of the nihilists of Russia, and are more cruel of the cruel."

Russia recently proposed to extirpate the Nihilist conspirators of Europe, whose chief seat is in Switzerland, and the proposition is favorably received by the other European powers. It is probable that the Government of Switzerland will be forced to take rigorous measures against these conspirators, or become involved in a controversy which may result in wiping it from the map of Europe.

Ben Pearson married a quadroon woman in Texas, where intermarriage between whites and those possessing any negro blood is a penal offense. He was convicted and sent to prison for five years. The convict enlisted much sympathy for his wife and family, and his love for her was quite sincere. The case was carried to the Texas Court of Appeals, which now declares the law under which Pearson was convicted to be in conflict with the Southern constitution, and therefore inoperative. Two years of the imprisonment, however, have already been served.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

On the 25th Mr. Voorhees again submitted his resolution declaring that the hostile attitude assumed by the National Banks in refunding the National debt at a lower rate of interest, and their efforts extended to defeat the legislation of Congress, are contemptible in spirit and unpatriotic in purpose, and unworthy of their duties to the people. Mr. Morrill, Maine, raised a question of order, but afterward withdrew it, and the resolution went over under the rules. Mr. Dawes offered a resolution for the election of Senate officers, stating that the candidates selected by the Republican caucus, for the respective offices, were duly elected.

The resolution is framed on the election of officers as called for by Mr. Dawes on the Sen. Mr. Dawes (R.) stated that he should not, he was sure, delay proceeding to the reorganization of the Senate, that he thought the majority which controls the Senate should be entitled to choose the officers of the Senate, and he was willing to say at once that he should not object to such action whenever the majority party should be prepared to take them in such circumstances that the minority would be willing to co-operate in the organization of the Senate. Mr. Anthony, Rhode Island, said that the question of the organization of the Senate was not settled in his opinion by the election last fall, and stated his intention to do there until the country should be settled by the action of the Senate. After remarks by other Senators, Mr. Dawes withdrew his motion, and it went down. Mr. Pendleton introduced a resolution, which was referred to the Committee on Privileges and Elections, declaring that the Senate has the right to judge of the election, returns and qualifications of its own members. Mr. Davis, Illinois, introduced a bill to provide for the payment of arrears of pensions to soldiers who died since the close of the war. Mr. Morrill, Maine, offered a resolution for the election of Senate officers, the pending motion being to continue the proceedings until the first Monday in December. After considerable discussion the resolution was adopted. It sets forth that the Republicans of the Senate are the majority party in the Senate, and are so defeated, generally by votes on, but at such times as many Senators may be present. The Senate then took a recess until 8 o'clock, when a quorum was announced, and an adjournment was agreed to.

Domestic.

A Boston telegram of the 23d says it was quite cool and still the Northampton (Mass.) Bank had received the securities and would reorganize. It has gone in with the exception of $50,000 in coupon Government bonds and $10,000 in bank bills.

The value of the domestic breadstuffs exported from this country for the eight months ended February 28, 1877, was $91,000,000, against $98,000,000 during the eight months ended February 29, 1876, $104,000,000.

The Edison Electric Light Company has been granted permission to lay tubes, wires and conductors in and under the street lamp-posts in New York, with a view to illuminating streets for that purpose.

Miss Ida Bayne, of Chicago, has brought suit against a Chicago physician for the sum of $5,000 because, as she alleges, when she ordered three teeth extracted they administer 31 gas and took out all the teeth in her upper jaw.

A woman of the New York Produce Exchange has been found dealing in adulterated butter, and should have been ordered to leave New York City on the 25th into the matter of the sale and manufacture of imitation butter and cheese. Several dealers in dairy products were examined. All agreed that the manufacture of adulterated articles was extremely offending the trade in genuine dairy products; that the use of the adulterated articles was injurious to health, and that some means should be adopted to restrict the sale of such stuff.

Personal and Political.

R. D. THOMASSON, of Michigan, Commissioner of Indian Affairs, tendered his resignation to Secretary Kirkwood on the 23d, and asked that it be immediately accepted.

Among the nominations sent to the Senate by the President on the 23d were the following: Albert Woodcock, to be Collector of Internal Revenue for the Third District of Illinois; Edward S. Meyer, to be United States Marshal for the Northern District of Ohio; Reuer Fink, to be United States Marshal for the Eastern District of Wisconsin; A. M. Jones, to be United States Marshal for the Northern District of Illinois.

On the 23d the Tennessee bill was passed to a third reading the bill to settle the State debt at par and three per cent. interest.

On the 23d the nominations made by President Garfield on the 22d and 23d were the following: General Stewart L. Woodford, to be District Attorney for the Southern District of New York; General Payne and General Belknapp as United States Marshals at New York; William H. Robertson, Attorney for the Southern District; William Walter Phelps, of New Jersey, Minister to Austria; John A. Merritt, of New York, Consul-General to London; Adam Badeau, of New York, Charge d'Affaires to Denmark; Lewis Cass, Jr., Secretary of Legation to Paraguay and Uruguay; Michael J. Cramer, of Kentucky, Charge d'Affaires to Switzerland; William E. Chandler, of New Hampshire, Solicitor-General; Samuel A. Phillips, Commissioner of Indian Affairs; Edward M. Marble, United States Attorney for the Northern District of Ohio; George W. Atkinson, United States Marshal, West Virginia; Bryan B. Langhorne, Collector of Internal Revenue, Fifth District of Missouri.

The Rhode Island Democratic convention on the 23d and nominated Horace R. Kimball for Governor; W. L. Sayer for Lieutenant-Governor; John G. Perry for Secretary of State; F. L. O'Reilly for Attorney-General; Charge D'Allaire Butterfield

Gossip From Hayes.

Judge Bramhall was in Hayes last week.

Wood sawed at a "raisin" and went on a "picnic."

Mr. Rice has moved into one of J. Bennett's houses.

Geo. W. S. Gregory of Cross Village was visiting at the Grosvenor, W. S. house.

Talk about crops, cows, horses, sheep, &c., soon as a sole Gods' creation will. Green hunters broke just as happy as a "sucking pig" on last Friday's 1st.

And Saturday came as a reparation, for especially the children a little changes of weather.

Mr. Blossom says a cat must certainly have the lugs, as one of our Hayesites is known to study for a divine.

Some of the Editors of the *Bulletin* are wondering what is the name of the Antrim Co. jail bird in Indiana, who escaped from the county jail and left his better half in a boiler on the stove, canary, and just among some other capers, he repented of his sadness and is now only the weak pleading, on his bended knees that he prevailed upon her to return to his fireside, whereupon every thing is now lovely and the land of Roses has again resumed its even tenure.

Card of Thanks.

Please allow us an opportunity to express our gratitude to the citizens of our home town to the friends who gathered in three different places of the 22nd inst., on Tuesday evening, April 1, for our benefit.

As Chas. A. Norman's a pleasant company — on the evening thereof, and so a parting gift, twenty dollars in cash and good pounds.

At the same time a committee was formed of Mr. L. C. Smith, also Ed. Dewire to the amount of eleven dollars, and the next day a package was placed in my house, marked, "Fund equals of same of the first named committee," and contained twenty-eight dollars.

All these points have contributed to our best wishes.

A. M. PARMELEE,
Mrs. PARMELEE.

The Union Choir.

A free and a basket social of the Union for the Hon. L. S. Ingalls, before the Liberal Club, on the evening of Monday last, in support of the spelling reform. The concert was a very able affair, delivered in the church where scores of factories, and scenes of the board placarity in the assembly which for the long adjourned, held a crowded congregation on the large and is spacious auditorium that, notwithstanding the confusion of conclusions, secured the attention of the audience, and the speaker who had previously announced that a subject was to be delivered instantly. The next session before the club will be delivered by S. H. Clark, Esq., on Monday evening, April 18. Subject "Shoddyism." We hospitals for here a general attendance.

R. M.

Land Sales in Presque Isle County.

Friday we chronicled Sheriff Kimball of Presque Isle county, transported to Detroit, charged with having in his custody as county treasurer, a large amount of money belonging to the county. Among the sales of real estate made by the sheriff to satisfy the judgment against him was that of the Island of Presque Isle, containing 1,000 acres, which was sold to Judge Newell Thomas, of this county, now in the village Thursday night and through him we gain the following particulars of the affair: "I went from Detroit to Presque Isle on a two hours train, and started a search, privately and a matter of entertainment. Though a deserted locality by those most of the inhabitants, they being principally fishes, he and the sheriff did not find much very well, and they undertook to buy him off, and gave him another that would be 5,000 dollars more than they would sell for. He went to Rogers City and entered into a agreement with the sheriff of three and sixteen were issued, and a warrant was issued, and a search was made of the premises. I went with the sheriff to the island, and with the sheriff of St. Helena, being with a guard to see the sheriff. I was the best of his interests. I went and pursuits and before him and practiced in counsel on the premises by Gen. L. had to stop each sale. In all I disposed of on them.

Gen. Benjamin Lawton was the Secretary of War. He was appointed in 1801. The last Secretary of War, if not, in point of appointment, was Gen. Lewis Cass, who was appointed in 1831. The last Secretary of War, if not, in point of appointment, was Gen. Lewis Cass, who was appointed in 1831. The last Secretary of War, if not, in point of appointment, was Gen. Lewis Cass, who was appointed in 1831.

Fifty-two men in Williamsburg, N. Y., are to plunder a house in which an agent was robbed. They escaped for the reason that they had not more to actually disarmed. In one night of them was shot by a watchman.

—Mr. Blossom says a cat must certainly have the lugs, as one of our Hayesites is known to study for a divine.

—Some of the Editors of the *Bulletin* are wondering what is the name of the Antrim Co. jail bird in Indiana, who escaped from the county jail and left his better half in a boiler on the stove, canary, and just among some other capers, he repented of his sadness and is now only the weak pleading, on his bended knees that he prevailed upon her to return to his fireside, whereupon every thing is now lovely and the land of Roses has again resumed its even tenure.

—Mr. Rice has moved into one of J. Bennett's houses.

—Wood sawed at a "raisin" and went on a "picnic."

—Judge Bramhall was in Hayes last week.

—Talk about crops, cows, horses, sheep, &c., soon as a sole Gods' creation will. Green hunters broke just as happy as a "sucking pig" on last Friday's 1st.

—And Saturday came as a reparation, for especially the children a little changes of weather.

—Mr. Blossom says a cat must certainly have the lugs, as one of our Hayesites is known to study for a divine.

—Some of the Editors of the *Bulletin* are wondering what is the name of the Antrim Co. jail bird in Indiana, who escaped from the county jail and left his better half in a boiler on the stove, canary, and just among some other capers, he repented of his sadness and is now only the weak pleading, on his bended knees that he prevailed upon her to return to his fireside, whereupon every thing is now lovely and the land of Roses has again resumed its even tenure.

Japanese Fans.—The Manner in Which They are Manufactured.

During the past few years Japanese fans have become so popular in this country that a few brief remarks respecting them and the manner in which they are manufactured, may perhaps prove acceptable. A writer in *Cheap Jack Journal* says: Osaka is the principal city for the manufacture of the cool, or folding fans, which are those almost exclusively imported, all describing those of bamboo kind being made there; the figures, writing, etc., required for their adornament are executed at Kioto. The prices vary from a few pence up to £6 per 100, and even occasionally higher prices are given, though the bulk consists of the cheaper sorts. The superior kind of fan, I may be mentioned parenthetically, which are termed uchiwa by the Japanese, are manufactured at Kioto, and are exclusively used by the better classes of the natives.

The following are the principal features in the account which Mr. Consul Hartley gives of the details connected with ogi or folding fans. As in many other instances, the primary principle of division of labor is carried out in the fan making trade. The bamboo ribs are made in Osaka and Kioto by private individuals in their own houses, and commissioners of the various cities in this lower part are left to one of the workmen, who forms the various patterns of the handle according to plans prepared by the designer. In like manner, the blocks are cut to the engraven patterns which his experience teaches him will be most likely to be saleable during the coming season; and when the different blocks have been cut, it only remains for him to see what colors are to be used for the two sides of each fan. In fact, this official holds it not the least part, to say rate the most important position on the staff in ordinary. Having the various articles which are to form the two sides of the fans have been handed over to the workmen, together with the sets of bamboo slips which mete to form the ribs, his first business is to fold the fan sheets of which the fan is to be composed, so that they will retain the creases, which is done by putting them between two pieces of paper, well saturated with oil, and properly creased. The four are then folded together and placed under a heavy weight.

When sufficient time has elapsed the sheets are taken out and the muddle used again, the released sheets being packed up for at least twenty-four hours in their folds. The next process is to take the ribs, which are temporarily arranged in order on a wire, and "sew" them into their places on one of the sheets, after it has been moved out on a block and pasted. A dish of paste then gives the woodwork a slight wetting, and the last part of the process is finished by affixing the remaining sheet of paper. The fan has to be folded up and opened three or four times before the folds take the proper shape, and by the time this is put to dry it has received far more handling than any foreign paper could stand; indeed, Japanese paper has been tried and had to be given up as unsuitable for the work, and even the sorts the Osaka fan-makers had been able to make some fans with printed pictures, which had been sent over to Europe as samples, though they were invariably obliged to use the face of Japanese paper.

The qualities of native paper now used are not nearly so good as those of which the fans were made, and in consequence the style of manufacture has had to be changed. Instead of first pasting the two faces of the fan together, and then running in pointed ribs, the ribs are square and are pasted in in their place between the two sheets of cardboard sleeve. The outside lacquered pieces and the fancy work are all done in Osaka and Kioto and consist of the designs in lacquer on bone are sadly artistic but the demand for the highly-ornamented descriptions of fans is not sufficient to encourage the production of larger quantities of first-class work. When the insides are dry, the riveting of the pieces together, including the outer covering, is rapidly done and a dash of varnish quickly finishes the fan.

The highest price that was ever given for a fan in the days of seclusion from the outer world rarely exceeded a sovereign, but since the arrival of foreigners in the country, some few have been made to order at prices ranging from £2 to £5 sterling. The general prices of ordinary fans range from 2s. or 3s. to £3 per 100, though an extraordinary expenditure has been at times lavished on it. The sale of fans in olden times seldom exceeded 10,000 a year for the whole country; but recently years no less than 3,000,000 have been exported from the ports of Osaka and Yokohama alone, in concluding these brief notes it may be interesting to mention that the number of fans sent in Japan for the Centennial Exhibition at Philadelphia reached the large figure of 400,000, the estimated cost of which was £10,000, and that those were over and above the ordinary annual exports alluded to before.

The Korigans Diamond—A Romance.

The north wind moaned and sighed through the trees, causing their branches to wave about and beat against the black night as if striving to ward off the blows of an unseen but active enemy. In the castle, from whose turrets could be seen miles and miles of fertile acres, lush wood and smiling meadows, lay an old man dying.

The Baron de Korigans. By his church stood Percy de Herbert, his faithful friend, whose life he had once saved either by a bottle or bottles of the Sacrament. For it had fallen into a crack and Korigans pulled him out.

"Send for the boy, Percy," said the sick man.

A servant went noiselessly from the room and soon returned, bringing with him a child of ten years, whom he took on the bedside of the dying man. Placing his hand under the pillow, Korigans drew forth a little box, in the center of which sparkled a diamond. He handed it to the boy.

"'Twas your mother's wedding ring, child," said the old man. "Keep it sacred. Never under any circumstances part with it. Let it never be sold," he muttered, hoarsely, while the deep-set eyes emitted a baleful light, "that a Korigans allowed his family jewel to pass from his possession. Dost hear me?"

"I do, father," responded the weeping lad, throwing himself passionately upon the bed, and gulping back a sob as his neck struck his sire's attenuated limbs. "I will guard it forever; aye, with my life!"

"'Tis well," and the old man turned his face to the wall. He lay so quietly that for a time they thought he was sleeping. But presently the boy leaned over the bed, and placing his fair young face close to that of the old man, saw that he did not breathe, and in an instant divined that his father was dead. With a wail that would have moved a heart of stone or caused a mute to run away, he fell upon the form of his parent, kissing the cold cheeks again and again, and calling upon the lips that were closed forever to speak to him once more.

Twenty years had passed. Usually some of them order it up or play it alone, but in the case of the heir of Adelbert Korigans had grown into a strong-limbed and handsome man. Fortune had lavished upon him her golden favors, and, in addition, he had won the heart of a lass—and much she had promised to ere long become his bride. As she stood enfolded in his arms the lovelorn ones exacting her lord-and-king privileges only in his shirt-front where she could almost hear the beating of his liver-colored heart, he had placed upon her finger his mother's ring and sealed the plighting of his troth with a pure passion such as is speaking of it afterward, Doll said he never felt healthier in his life than at the moment. He told Cecil (her name was Cecil) the story of this ring, and that it was to be handed down to their issue; and when the different blocks have been cut, it only remains for him to see what colors are to be used for the two sides of each fan. In fact, this official holds it not the least part, to say rate the most important position on the staff in ordinary. Having the various articles which are to form the two sides of the fans have been handed over to the workmen, together with the sets of bamboo slips which mete to form the ribs, his first business is to fold the fan sheets of which the fan is to be composed, so that they will retain the creases, which is done by putting them between two pieces of paper, well saturated with oil, and properly creased. The four are then folded together and placed under a heavy weight.

When sufficient time has elapsed the sheets are taken out and the muddle used again, the released sheets being packed up for at least twenty-four hours in their folds. The next process is to take the ribs, which are temporarily arranged in order on a wire, and "sew" them into their places on one of the sheets, after it has been moved out on a block and pasted. A dish of paste then gives the woodwork a slight wetting, and the last part of the process is finished by affixing the remaining sheet of paper. The fan has to be folded up and opened three or four times before the folds take the proper shape, and by the time this is put to dry it has received far more handling than any foreign paper could stand; indeed, Japanese paper has been tried and had to be given up as unsuitable for the work, and even the sorts the Osaka fan-makers had been able to make some fans with printed pictures, which had been sent over to Europe as samples, though they were invariably obliged to use the face of Japanese paper.

The qualities of native paper now used are not nearly so good as those of which the fans were made, and in consequence the style of manufacture has had to be changed. MISCELLANEOUS.

—Traveling theatrical companies never sell family tickets at Salt Lake City.

—The house, calling Alexander Vanderbilt's new house costs forty thousand dollars.

—A New York store is occupied by two firms; on one window is the word "Dyeing," and on the other "Undertaker."

—Mary Anderson travels in a special palace car, in which she has her nightly prayers read to her by her maid, plays the piano, a small library, a file of papers and a swinging hammock.

—Mrs. Mary B. Post has been reelected Town Clerk and Treasurer of Georgia, Vt. Her husband held these offices nearly thirty years. He died in 1878, and Mrs. Post has acceptably filled them since.

—Six members of the Senate are foreign born. Messrs. Farley, of California, Fair, of Nevada; Jones, of Florida, and Sewell, of New Jersey, are Irishmen. Senator Jones, of Nevada, was born in England, and Senator Beck, of Kentucky, in Scotland.

—A young lady of Galt, Canada, having for some time been afflicted with the receipt of anonymous poetic effusions of a most sanatory complexion, at length resolved to submit them to an intimate married friend, who at once recognized the handwriting as her darling husband's.

—The Herman Wendell died at Hazelwood-on-the-Hudson, New York, recently, aged seventy years. During the last thirty years his chief occupation of what is now one of the most complete orchards in the country, containing 8,000 to 10,000 fruit trees, every one of which he planted himself.

—If a boy has one-half of a dollar, spunk in his composition, a level head and voice, "an" ongroscare fivecents apiece," he can go like lightning on the crust, if he's got the right kind.

—All the scholars laughed, but Miss Snow put on a stern look and rapped on her desk with her big hickory ruler and said, severely, "Come up to the platform, sir!"

Very much surprised, he obeyed direction.

"Did you answer me as well as you could?" she demanded, looking at him through her specs.

"Yes'm," faltered Jonathan.

"Then down there, them." And she pointed with her ruler at a square block, on which was painted in great black letters, "NOTICE."

Jonathan was at once utterly wretched. He glanced down upon the gigantic ominous seat, resolving if ever he did grow up he would thrash Miss Brandon for her cruelty. They certified Lafe Greenshaw said her young daughter by coming out of his hiding-place under the sofa and coolly announcing that he had been there a whole day and intended to get in his composition on the following night to steal and plunder anything they could lay their hands on. The courage and presence of mind of the child on the occasion were admirable beyond all praise

New York Letter.

New York, 1888.

It would seem a funny thing to fine a man for an alleged offense who wasn't in the country during the time it was supposed to have been committed. Yet has been done by the police authorities of Brooklyn. The Commissioner of Jurors especially takes for names for the panel from the city directory. A bluff old party Scales, who has been one of the Police Justices of a division of several years in fact, for more times votes was summoned as a juror, that is to say, a summons was left for him at one of his haunts where some of his relations made as his excuse. Of course he don't respond, and was ordered fined $100. The money won't very well be collected for the possible difficulty thereof isn't very easily reached, still it exhibits a threatened in the way of duty and sense of some of his officials.

Nearly 30,000 immigrants have been poured into our growing population during the last three months, the German leading the list, and an unusually large proportion have declined to stay in Gotham but have pushed West to grow up with the country. All this is encouraging, for it be well for the new railroads and new telegraph wires, and more brilliant for merchants and manufacturers and goods if travelers here. If our [illegible] business could only put stirred up considerable in America would take greater strides than ever yet have known in this world among our people. The city is Chief and country lawyers, who in spite of the horrible weather which delays many passions and has retarded their subpoenaing, are hastily dragging and preparing documents as business trains as soon as the weather goes a little settled. The *Herald* curious out such cases such a fortnight hard and adventurous, generally to gratifying the hearts of newspaper people. The locus, in a word, is abroad in the land. Let it locate!

As a natural consequence of business prosperity, our amusement interests are busy. The theaters are all doing well, and crowded greatly gratuitous after Easter. As a solid reason anticipation we have the exhibition on the Academy of Art, which the critics say is an unusually good one. New pieces are announced almost, but many of the old favorites are coming to [illegible] houses, and the lucky are eager for such as any novelty without knowing it. Good old acts, even for previous to another fund. The luminous, the "Black Crook" is under weights again as Nibblo, and "Hazel Kirke" at the Madison Square Theatre, where there is the famous double stage on a suspension elevator, will soon have caressed us to its second year. They say that the actors are getting exact at having to repeat the same parts every night. They seem to act pretty well, however, as people seem glad to go to see them, and never have been known to ask for their money back during the night, and again to be interested.

Talking of new plays, your Rialto has seen the premiere and heard the debut of a new American drama, which will have [illegible] for originality and home flavor, even at the end, a most charming outburst of forceful genius held in powerful control. I am sure that I cannot be more explicit at the moment, but, shall certainly be in a position to let you know more soon, and I am much mistaken if your readers don't agree with me that the author has "struck ile" this time.

The Weather Clerk is going on as usual and the experts are getting deliciously roasted for their extraordinary testimony. The chief on whom the prosecution have been leaning considerably has been pretty confidently proven to be a consulted old ass, and in consequence of his characterization as he is epitomized and self-assertive. He has been caught tripping several times in a very ridiculous way.

Our lively burglars are still disporting themselves with commendable courage for the prizes. Two of them marched into a crowded basement, the other day, in broad daylight, and catching hold of a beautiful damsel, whose inopportune squealing at being there in the act of pillaging her appartments some days ago had escaped them, proceeded to torture her with a view of compelling her to disclose the hiding place of her relatives money and other valuables. The brave girl held on like a Trojan, but was finally fairly cowed by the scoundrels' brutal help mates. Some other recent undertook to rob a policeman's watch on the street as she was returning from a drug store with some medicine for her sick husband. When they found out they had been trespassing on the sacred rights of a "copper" they were suddenly scared, and returned the plunder with an apology. Their politeness was in vain, for they were luckily captured, and will be placed for a while out of reach of temptation. But if it hadn't been a "copper's" wife!

David M. Stone, editor and chief proprietor of the *Journal of Commerce*, rather a fiery old gentleman sometimes very "set" in his views, very "mulish," everybody else says, seems determined to run a race for distinction as a co-laborer with Ken Chenton. His graceful remarks, for his exalted views seldom a few years, been a prey to unceasing denunciation by the Press. Ten years ago, swept away by a tide [illegible]

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

The galleries of the Senate chamber were crowded on the 28th, in anticipation of a speech by Mr. Sabin in defense of himself and the Republicans of Virginia. He occupied the morning hour in explanation of his course and in reply to the charge of republicanism made against his constituents as a party. At the conclusion of Mr. Sabin's speech Mr. Hill, of Colorado, addressed the Senate. Hill spoke of the other able senator on the 29th proposed to finish the pending business and go on with appropriation bills, moved an adjourn, which motion was carried by.

The resolution for the election of officers was again called up on the 30th, and Mr. Johnston stated that he had intended last day to reply to the speech of his colleague Mahone, but would postpone his reply until he could have an opportunity to read Mahone's speech. Mr. Hoar and Mr. Jones, of Florida, also addressed the Senate briefly. Mr. Hoar, in the course of his remarks, said that Mr. Kellogg spoke concerning the manner of the Republican party in securing the control of the debt of that State. Several distinct propositions had been made by those who had held the debt, but it was refused by Mr. Brown in addition to the debt.

On the 31st ult., on motion of Mr. Jones, of Nevada, a resolution was adopted authorizing the Senate to pay the necessary funeral expenses of the late Senator Hamlin, and appointing Senators Morrill, Frye and Jones members of senate officers was then taken up, and Mr. Sabin was chosen a large majority in secrecy and a promising condition of the business.

Mr. Ingalls, a soldier on the St. Paul, Minneapolis & Manitoba road, near Bellamy, the other day, was killed by a train.

Mr. Jerome Fleet, of Waterford, Vt., has been arrested for attempting to poison an entire family at Lowell, Mass.

Rowell and Weston have signed articles for the Astley belt contest, which will take place in some English city on June 20.

A very fierce gale swept up in Tuna Creek at Bradford, Pa., was set on fire by an engine on the Erie Road, and the railway bridge and McKee's steel factory were burned.

On the 30th ult. a Wabash train was thrown from the track at Clifton, Ohio, by a defective switch, and eight passengers were injured.

The Supreme Court at San Francisco, in one of the suits instituted by the Contra Costa Flood and the other bonanza kings, has rendered a decision which, if it is sustained, will force the latter to disgorge over $800,000 to other holders.

A FUNERAL in Randolph County, Ga., on the 30th ult. killed Jack Lindsey and his wife and two children.

On the 30th ult. a party of ten cowboys engaged on a lark at Cheyenne, Col., and, in company with Sheriff Kearns and several wounded his deputy, because they objected to the breaking up of a dance.

A LOT of valuable logs, belonging to Michael Burgess, of Bellows Falls, Windham, Mass., were so badly affected by trichinæ that others were recently given to kill them. Five of the hogs had been slaughtered for market, but an examination by a chemist disclosed the white specks where other was scaled.

According to the Cincinnati *Price Current*, the winter pork packing of the West reached the total of 6,976,426 head.

The announcement was made from Washington on the 30th ult. that the Treasury was prepared to redeem the outstanding five per cents of 1881 at the rate of 101.26.

The Indians at Howkan, Alaska, recently burned a church valued at $600. Another murder of some crime.

The Secretary of the Navy has ordered the Wachusett to put in to stay from San Francisco in search of the missing mail steamer City of New York.

Up to the recent great storm, and covering a period of fifty days, the officers of the Northwestern Railroad report that they had paid out $800,000 in overcoming obstructions caused by drifted snow.

Heritage-Galleys in Boston have made the discovery that Shakespeare's name is misspelled in into to farmers near St. Albans, Vt., who sells in a single consignment a sawed log for the prize of genuine country butter.

It was stated on the 31st ult. that five hundred negroes had arrived in Kansas from Huntington, Texas, for Kansas.

Miss Annabel, resident near Youngstown, Ohio, recently hanged herself with a skein of yarn, beating five children. The receipt of the news caused the death of Mrs. Elmore, to fall dead.

The Illinois & Mississippi Canal Commission has arranged for a Northwestern Convention at Davenport on May 25, the date to be appointed by the Governors, Boards of Trade and Farmers' Clubs. The object of the gathering is to devise ways and means of Congress in creating a water route from the Lakes of waters to the lakes.

The time arrested at the mint in Philadelphia during March was 1,561,860 pieces, valued at $1,109,400; of the amount $1,371,000 were eagles, $91,200 half-eagles and $600,000 silver dollars.

The public-debt statement issued on the 1st makes the following exhibit: Total debt, including interest of $10,125,259), $1,156,-

$73,295. Cash in Treasury, $280,814,622. Debt, less amount in Treasury, $1,843,764,035. Decrease since June 30, 1881, $95,449,701.

On the 1st a locomotive burst into fragments while standing on the track at Tyrone, Pa. Five persons were injured, and considerable damage was done to property close by.

A COMPANY has been formed in Buffalo to light the streets and public buildings of that city with electricity.

The total coinage of the United States mints during March was $13,000,101, of which $6,985,000 was silver.

The iron workers of Pittsburgh have secured an advance of ten per cent. in wages by forty shops.

Gold to the amount of $1,440,000 arrived in New York on the 1st from Europe.

A New York survey expert has been sued for $60,000 for making false returns as to the value of a Colorado silver mine.

Near Georgetown, Delaware, Iowa, on the 1st ult. a train of cars on the Northern Line broke and ran down the Rock Island side the Diamond Jos warehouse was crushed by the cars, and several were killed outright.

The body of Edmund A. Sherman, of Holden, Mass., was exhumed at Washington, Pa., on the afternoon of the 31st ult.

Eleven persons from the winter wheat in Michigan, and the crop is larger in acreage in average and a promising condition if favorable

In a collision on the St. Paul, Minneapolis & Manitoba road, near Bellamy, the other day, Sheriff Kearns and several wounded his deputy, because they objected to the breaking up of a dance.

Thomas M. Nevins, nominated for Commissioner of Indian Affairs, on the 1st received a telegram from the president declining on account of ill health.

The Legislature of Tennessee has passed a bill prohibiting the office of any sheriff who shall permit a prisoner to be taken from his custody and lynched.

The Secretary of the Navy has rejected the proposition for a preliminary amendment to the Constitution by a vote of 25 to 38

Charlevoix Sentinel.

CHARLEVOIX, APRIL 12, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

The Business Change.

Mr. Lay, of the firm of Lay & Hannah, has sold his interest in the business to Mr. Hannah, who will continue the business at the old stand. Mr. Lay has not yet determined what he will do, but will probably remain in Traverse City.

Resolutions From Hayes.

At a regular meeting of Hayes Grange, held April 2, 1881, the following preamble and resolutions were unanimously adopted:

Whereas, It Appears, that there have been taken in our State legislature, look to a change in the boundaries of the County of Charlevoix, in the formation of Charlevoix, county of Charlevoix and Antrim, and whereas the action, contemplated in the bill of the people of the Township of Hayes, and as it is supposed that would seem hostile to the interests of the people of the Township and municipal organization, therefore

Resolved, That we, the people of the Township of Charlevoix, in the State of Michigan, in general meeting assembled, do most emphatically condemn the said, and all legislation tending to the same end and purpose, and we do hereby instruct our representatives in the legislature to use their influence and vote against the passage of the same.

Life on a New York House Top.

We are weary of the streets and their familiar sights, even up to the third and fourth stories. The show-windows, their fabrics and what-nots, have nothing now, and the friction of the crowd distresses our nerves. But upon the roofs there is inspiration and novelty. The air is free and pure, the prospect is spacious and the heavens, with their splendid sunsets and gentle twilights, are not shut out from us by the ragged and depraved unpicturesqueness of the external things and unwholesome fronts and business houses.

All is not so inactive up here as it seems; moreover, on the roofs or in the "sky-parlors" immediately under the eaves, a variety of occupations are conducted amid surroundings of which few who are not accustomed to them have any notion. The history of attic life in the city opens many a novel one. The vicious moan of midsummer falls in the sultry night on some stranger scenes over yonder, on the roofs of those tenement barracks; and here, on the Epitaphic roof and on the roofs of many other large offices in the neighborhood there is the view all below is silent and deserted.

The janitors of such buildings as the Equitable are frequently situated. They are well paid and are treated with the deference by all the tenants; their life is easy, and their quarters are especially enviable, having all the comforts and conveniences of a modern "flat." The President of the Insurance Company, to doubt, lives somewhere on Fifth Avenue, and his highly expensive domain on other or more exhalting grounds than the fourteenth front the street in the way. But the janitor has a cottage for himself on the roof, nestled under a tower, and his "flat" below is elegant and parched, invigorating breezes pour into it during the morning hours, while all day long the harbor, from the Battery to its outlet at the narrows, is a placid and beautiful sheet of watery beauty. All the commerce of the rivers, under that stimulus of sunlight in the summer mornings when the sunniness distance is a vaporous gold without a tangible object to it, and the sunlight wraps the waters, pricked by the yellow light, of the shipping, quiver in millions of silvery edges. After his supper he may sit at his door and look on the scene with very much better than a facade of marble or a procession of vehicles. He does have a little space reserved for them, scattered with pigeonholes, and there are no walls about them or surrounding them—only an ornamental iron fence between them and the precipitous front of the immense tenanting with the sky and sunshine capturing full benefit upon them. But the natural advantages are not all.

The interior of the cottage is curiously economical of space by very judicious curtains. It is furnished with a great deal of taste and generosity; it has a piano, which sounds with great clearness and sweetness in the still morning air; it is heated by steam and has a row of hot and cold water, electric bells, a telephone, and every other luxury of a well-appointed American establishment. The unappetizing odors of the cuisine are excluded by the excellent ventilation of the roof. The janitor's passage downstairs is by an elevator; the janitor's wife does not even need to go out, as she can market by telephone. She has learned from her husband that this is a cold world; and that Gulliver's Travels and Robinson Crusoe, which adorn the "prominent women" book.—*Detroit Free Press.*

Fashion Notes.

Silk bonnets are in high favor and are made to match the toilet.

The shearing jacket now so popular is becoming only to slender figures.

Plush will be used upon principal pieces of cheviot, cloth and cashmere.

Uncut velvet in changeable colors will be found in the list of a dress trimming.

Henry II. toques of plush or velvet are favorite hats both in Paris and London.

The corsage bows of satin to be worn at the left side of the belt have reached a stocking, rather than walk two miles, a stocking, rather than walk two miles, a stocking, rather than walk two miles,

Charlevoix Sentinel.

CHARLEVOIX, APRIL 29, 1881.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

LETTER FROM NORMAN

From the Home of the Checker's Sister.

Since time flies, while busying over the confusion in the editorial room, we noticed in one of the Michigan papers, that a measure was to be brought before the Senate at Lansing, that proposed to give to women the right to vote at all elections. We see last week by the Chicago Tribune some display head lines, "Female Suffrage before the Senate at Lansing." What ever lies been the motive in bringing up this question, whether to try the spirit of the people of Michigan, or to sound the women of this state to demand the right of suffrage, or to give interest and strength to the temperance question. If by demanding the right to vote there any increase the numbers of womanhood, and claim for her the right to be equal and as important factor in government, a right to be considered as human, and to be treated as such; if they can demand this, the wife and mother shall be defended and protected; that monster rum shall be put to bar, that she shall have the right to resist, than the law governing women in demanding their just rights would be enforced, then by all means women should be allowed to vote.

The panic of 1873 brought ruin and desolation to many homes. Hosts that had never toiled before had to earn their daily bread. Girls who had never before entered a factory or workshop, wrought in their stead. Women sought every avenue of labor entertaining occupations that but former hour filled by men now born, they came or into competition with such ladies. The result has been, women were paid less wages than men, but have had been paid. This has been carried out in every branch of female occupations. The law of supply and demand has governed the market. If one girl left a place because the wages were insufficient, if dozen were ready to step into it, and in their greed to make money the employer has found the new hands at still lower wages.

The hardships of girls in city life cannot be conquered. They must be seen. During the severe cold weather of the winter, while men have stood on the street corners coming became the street cars could no run, women and girls have tramped it through the deep snows down to work, many miles away. Blizzards could be counted upon the main streets of each direction of the city. To them it was a matter of bread and butter, to stay away was to go hungry. In the fierce struggle for existence the women have gone to the wall. This is the results of the savage, mess of our civilization.

We have become so accustomed to the evolutions in vain regarding the business enterprises of large firms,—employers of labor—that we have not considered the means by which their so many is made, nor the amount of suffering their wealth causes. We bow to this God—Mammon—while the wealth is accumulating, and the labors of women and girls are the means that produce this wealth. We boast of our civilization; editors, poets, statesmen, never grow weary of extolling our achievements, our triumphs, our material and social advancement; there never has been such a century before, possibly never will be again. Never such enlightenment enjoyed, such liberty secured, and such elevation attained. Of all generations we are the most blessed, and we are as good as told to thank God eternally for appointing our birth amid such privileges, opportunities and advantages, and yet, without underrating these extravagant representations. Simply there are many suspicions abroad that modern progress is not what it ought to be. There is a decision in our social structure having the proportions of a Leviathan.

Everybody has been done that ever will be done by a benefactor president, through noble instructions, to elevate, to refine and humanize, yet humanity is trampled upon and almost dealed the right to exist. Opposition cure rides justice, and wrong ever reaches right. Compel, then the the life of trade, has reduced labor to beggary, and large classes of work people suffer a silent martyrdom, and are annually sacrificed by the thousands, to sustain useless pomp and extravagance, the wealthy, not satisfied with his own share of this world and a trifle over, clutches at the share of others. Availing himself of the necessities of others, which poverty, climate, and failures have created, he burdens his dependants with excessive toil, grasps patriotically, about political economy, and plenaty of "manure" too, and continues to underpay them. Should they sink into more abject pauperism, until they shiver in the gloat of a gin mill and for shelter lied together packed in one chamber, son, maid, mother and father—sex be where decency, mean less rapidly, is hourly possible. Are not such results produced by the very cause of our civilization? These are some of the unnecessary of "Capital divorce, who has not much of the sufferings of working people impressed on his soul.

Take for another illustration, an article from the Kalamazoo and Chronicle, published in New York on the "question of labor," concerning the sewing girls. The paper says, "as they could in their hours of business in the morning, they are pallid and peaked as a ghl but by noon are offered them in the form and they get fresh of the cosmetics generally expended to success.

SOME SEE LIVE.

Anywhere. Those who are very young live with their parents. And Many have parents. God pity those nearly all cases are most ignorant souls. Honest, attractive girls are neglected to shameful neglected, and sometimes some unkindness because they are homeless. Boys run swing in comfortable homes, are attracted in their faces. Girls very hard for a respectable working girl to get a good home within her means. Right on give pull references she can secure had bad, some. Also to recover and never wavered, in whatever, or pay she would lose to live with. She can board without influence with them to whom her true value is a matter of indifference. In many places their sex's have a separate boarding among the house, if they board down town they are loaded to suspicion, yet these honest occasion compel them to do so. Or there makes anyone invade upon their private sanctuary. The average work girl is found, by flannel, honest personal from the wanders, and brighter than is alive, that work by business or refining her home is economical as for comfort, the action losses in the pursuit of her condition can scarcely be stated to the loss from her accountable manner, why seeks the drive towards the streets in many places this is considered and indeed, thus make the ignor of evil and hour.

WHAT THEY DO.

Anything, something their strength and pursuit. Women are cheaper and more dependent, indeed they are laborious, and ingenious and inexpertive for their and of service. Small girls make cigarettes and learn to handle throw girls wrap, labels, and learn to chew a that hasty to cheap ways, boot work and sure for the time they make living, and learn also cheap ways, they find pleasure in paste and rolling machines, make hand, banks, are leaders in business and other walk there they stand behind counters, clerk, in machines, running have new ingenious work in shady business, how by I mean they run homes, where nicely dress and slippers, they see late and attentive to caps, make flowers, sort over gut and rags.

WHAT THEY GET.

Much less than they earn. In respect boys come in upon music where necessary. For the location, lost cards about concert an operator receives the emolument sum of thirty-five cents, she down the machine with her tired feet. In winter the whole spring contractor, for a few cent, with five models packed, double stitched, the girl operator gets from eight cents. Finishers in these cases get $6, $7 and $8 per week. Possibly nine within pants; she earns from six to ten cents per pair for all the machine work she does upon them; for button wrapping, among the cents to one dollar per dozen. In shirts, stitches inside bosom, fifty cents per dozen. for button holes for ladies' dresses, for ladies' coats, all the same prices. tion wages; for a shirt a still lower, among to five cents, three is about sixteen hours work in one.

In each establishment as Harper's, the Tract Society, and the American Bank Note Company, there are often necessary names on the list to supplement, among a vacancy, yet the places it has desirable than is supposed. The work is often dirty with printers' ink, and in company with men.

THE WAGONS OF WOMEN WHO LABOR are almost beyond conception. The working girls get clothed—comparatively clean—ish. They have to compete for the foreman and the book keepers. A little girl earning one and sweeps, deliver per week, and fifty cents taken to buy a present for the time of her little girls, to gather earning four dollars per week, and supporting a sick mother, and rent and coal half dollars taken out of their wages to help bury a man she had been employed in the factory. They were not asked to give—the money was taken. The men were invited to give—the girls were openly robbed. When a girl earns $5.50 in six days, and pays $3 of it for board, thirty cents for car fares, dust her own washing at night, now long must she be looking for clothing? Where is the going to get it? God pity them! They walk up and down the streets, people say they are in comfortable circumstances. Are they? People say, as they sit in their comfortable homes, better die, but death is hard to the young; life is before them, they can claim the right to exist. But you, ladies, when you are buying the beautifully worked underwear, "just marked down," remember you are buying the soul of your fine form and sister. And those enterprising merchants who are heaping up riches, are counting out the hours of the working girls of the city, thousands and thousands of them are sinking into an appalling bondage, it is a night that grows dark as it grows they see no star in it nor any hope, they may for bread and they receive a stone, womanhood is degraded, human pride is sapped, and sometimes a curse is lost.

In the fourteen months we have passed in city here the Sentinel has [illegible] Charlevoix, but this only does [illegible] population. Yet we, in our limited experience, have seen instances [illegible] the hand of a young woman has been raised from lip to lip, with a suspicion most foul, because she was friendless, and seemed alone in the city, but she lived, thank God.

We have seen the hot flush on the cheeks of a young girl, under the mingling fear of a known man workman that she was working under. We have known one of the members of a firm to offer the grossest insult to a young woman, whose circumstances (through sickness) had put her in their power. She shed bitter tears over this insult, for she was a lady, though obliged to work hard for a living. She is dead now.

We once stood and heard a foreman of [illegible] that kind come from the lips of a half drunken lout, and our blood boiled with indignation. We were glad [illegible] hearing. We took him by the collar and kicked him from the room, and threatened the direst vengeance if he came back again, yet he was by enough to thrash us.

We have known a young girl to plead the [illegible] her employer, or lose the place she worked under to endure. We have known a young girl to call bitterly in a agony because her own drunken mother refused her a shelter. All went to work, and good God, but is a life of misery, and only because all that working girls have to contend with, but if among the ranks of suffering is women all should [illegible] and curse for which we [illegible] to [illegible] a good "Let the Women Vote."

Yours very truly,
NELLIE.

SUNS

The Distance from the Earth to the Sun and the Fixed Stars—The Masses Full of Pursuit.

Prof. Richard A. Proctor is delivering a course of astronomical lectures in New York. The following is a synopsis of one of them. The subject of the discourse was "The Sun and His Brother Suns." The speaker said in part:

When we look at the skies on a calm, clear night, when all the myriads of stars are shining, the least thoughtful mind is impressed with the idea that a solemn calm reigns there. One is inclined to believe that all these suns are in a state of perfect rest. The astronomer, however, sees that they move. They have several different movements. These, however, are only apparent. The turning of the earth upon its axis and its movement around the sun cause these movements to appear. The astronomer recognizes the stars as in one sense still or fixed. But the star depths are full of noise and motion. Go into some manufactory where a mass of machinery is in motion, where there is a scene of energy and noise. It is absolutely nothing compared with what is going on in the depths of space. We are able to understand this when we know that the stars are so far away. The nearest of all the stars lies at such a distance that our own sun, set beside it, would seem to be an ordinary star of the second magnitude. The star which is considered the nearest to us is Alpha Centauri. I think I am justified in saying that it is the only one whose distance from the earth is absolutely known. For instance, No. 61 of the constellation of the Swan is said to be the second in distance from us. Its distance is said by some to be three times as great as that of the nearest star, which lies twenty millions of millions of miles from us. As Ameri can astronomer, Peters, makes it only twice as far. Hence between the two calculations there is an error of at least ten millions of millions of miles.

The trouble is that astronomers cannot get space enough to work upon. No basis [illegible] can be obtained of sufficient length for the calculation by triangulation of such enormous distances. But we know that those stars lie so far away that the sun would be a small star beside one of them. The sun is not a star of the first magnitude, but we shall take him as a specimen star. As, in the last instance, the earth till as the history of a planet, so the sun can tell us what will be the history of the star. Sirius is far larger than the sun. He lies at least four times as far away from the earth as the nearest star, Alpha Centauri. That star revolved to the same distance from us would shine with only one-sixteenth of his light. But as he is four times as large he shines with sixty four times the light of this star. He also gives 200 times as much light as the sun. If from a square mile of Sirius we get the same amount of light as we do from a square mile of the sun, then he must be 200 times as large as the sun. If, then, we are to take our cue as a principle of the great suns that are scattered abundant through space, let us carefully consider him.

In the first place, the sun lies at a distance of between 92,000,000 and 93,000,000 miles from the earth. A train of cars going at the rate of twenty miles an hour would be 500 years in traversing that enormous distance. A cannon ball shot from a Krupp gun would be thirteen years, if it could maintain the same rate of speed throughout the entire distance. Even light, which travels with a velocity wholly beyond conception, takes eight and one-quarter minutes in reaching us. Hence, the sun is not in the place where he seems to be. He is just as far away from where he seems to be as he can travel in eight and one-quarter minutes, which is 9,000 miles. And this leads us to the important thought that, if gravity ceased at all only the same rate, the whole solar system would be thrown out of gear. The planets would have their paths so widened that they would not get the right amount of heat and light from the sun. Hence, gravity traverses distance at a rate infinitely greater than the velocity of light.

The sun is a tremendous body. If set upon on the sun gravity would crush us flat. Its light and heat are wonderful. The electric light has only one-third the average lustre of the sun's surface. A square inch of the sun's surface would give 300 times as much, and the entire sun one quadrillion times as much light as an electric light. We inquire whence the sun gets his power of making heat. It was once supposed that the sun was fire. But even if at once of the best burning substance it would be used up in 5,000 years. The latest theory is that the sun's heat is derived from its own gravitating power exerted on its own mass. The sun's age is another question. The age of the earth proves that the sun must be very old; but he should have shrivelled more. I think the sun is not what he seems. I think the surface we look upon is chaotic, and that the sun in reality is much smaller than the surface we see.

The lecturer then exhibited upon the screen pictures showing the surface of the sun under different conditions as illustrative of the theories advanced. Pictures were shown of the great solar spots as illustrating the theory that the visible surface of the sun is only an inclosure of clouds of molten metals. Pictures were also shown of the jets of flame, which are visible through the telescope, and the spectra of the sun and of other stars were compared. Illustrations of theories of suns in the "starry-sky" were also exhibited.

Gov. Foster has returned to Columbus from a visit to Washington, and has expressed his views as to the situation to a Columbus interviewer. He says, to begin with, that the misunderstanding between the President and the New York senator has been greatly exaggerated by the press reports, and adds that he knows, personally, that as early as six weeks after the election Mr. Garfield contemplated the recognition of the anti-Conkling element of New York Republicans by giving Mr. Robertson an important federal position. This, Gov. Foster says, the President told him, though he never intimated the position to which he intended to appoint Mr. Robertson; but he is disposed to feel, he said, that it would have been better for the President to have frankly stated his intentions to the Vice-President, Senator Conkling, and Postmaster General James. The governor believes that the New York senators had plans of their own by which they intended to harmonize the party in New York, and which they would have been glad to submit to the President, and fully intended to, if he had afforded them the opportunity. Their feelings are there now, he believes, more of disappointment at the failure of cherished plans than of open hostility to the President. Gov. Foster's confidential intimacy with the President gives his opinions concerning the intentions of the President something of authority.

It appears that the Democrats undertook to lure Mahone over to their side, and offered him anything he wanted if he would vote with them, but he rejected their proposal unduly silly of, and went with the Republicans, who would promise him nothing.

A Memphis paper cries out against the Democrats of the legislature who voted in favor of [illegible] the state debt of Tennessee in bell, as bugeon of infamy who must answer for their act before the people they have betrayed.

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

THE response for the election of officers was again taken up on the 4th and a motion to fix an executive session was lost—39 to 30. Mr. McPherson asked leave to present a petition of citizens of New York and New Jersey praying that Michael Bogton, a citizen of the United states, having implored the British Government on vague charges of inciting to crime and conspiracy, there had been framed up against him a trial for his life, and praying Congress to demand that the United States Government should interfere for his protection. Mr. Hoar objected, and the Vice-President ruled that, there being objection, the petition could not be received. Mr. Hoar then moved that the petition be brought forward on the pending resolutions, and several different motions were made and voted down. An adjournment for the day was finally agreed to.

On the 5th Mr. McPherson again offered, as his right under the rule, the petition relating to the imprisonment in an English prison of Michael Bogton, and asked that it be referred to the Committee on Foreign Relations. There being no objection it was so referred. A motion to go into executive session was then taken up. It was lost—yeas 29, nays 39—being the resolution for the election of officers. Mr. Hoar moved to amend by adding that there was existing for the present Democratic Senators to maintain the right and authority to remove from office the persons whom they had held during the previous ten days. He was opposed to the "spoils system," the service that when the directors of a minority party became a majority, as means to public welfare and as demoralizing generally.

Mr. Bayard, Senator from Delaware, spoke for a reorganization of the railway mail service, as to salaries and appointments, on May 1.

A GOVERNESS BRIDE, printed in 1450 with morality on the cover, is ready to sell at public auction in New York for $8,000.

THE flood of Pacific R. of Indianapolis is said to have discovered that, under the guise of Michigan butter, large quantities of oleomargarine are being received from Chicago.

VAN HUE, Linn and Corwin, who were arrested at Chesterfield on connection with the Missouri land frauds, were released on bail of $5,000 for examination.

A COAL firm in Cleveland has sued two railroads running into that city, claiming $27,000 for freight discriminations in favor of other dealers.

THE United States Sixth Cavalry Judges are quite generally enforcing the State law against carrying concealed weapons.

TWO Indiana House on the 7th adopted a resolution in support of a Woman-Suffrage amendment to the Constitution to the people, by a vote of 69 to 24.

THE strikers of the conductors and drivers of the Chicago West Division street Railway Company lasted two days and ended on the evening of the 8th, the company acceding to the demands of its employes for an advance of twenty per cent. in their wages and the reinstatement of the men who had been discharged for taking a prominent part in the agitation. The strike was participated in by about 800 men, and was conducted in an orderly and quiet manner.

THE total values of exports from this country of petroleum and petroleum products during February, 1881, were $6,934,055, and during February, 1880, $9,930,944; during eight months ended February 28, 1881, $58,-862,393, and eight months ended February 29, 1880, $68,504,408.

THE receipts of foreign gold at New York on the 8th amounted to $3,250,000.

ACCORDING to *Bradstreet* the number of failures in the United States and Canada during the first quarter of the current year was 1,993, against 1,354 during the same time in 1880, and 2,261 in 1879.

THE Governor of West Virginia has pardoned Elias Gorup, who was sentenced to the penitentiary for two years during the court-house riots in 1880, and who absolutely refused to accept a commutation of his sentence to imprisonment for life.

THE high water in Omaha on the 8th threw 1,500 men out of employment. The smelting works and the Union Pacific shops were under water, and the river at that point was four miles wide.

THE levees have agreed to pay the striking New York carpenters three dollars per day. In Cincinnati the carpenters, by arbitration, have secured $2.50 per day.

THERE was a bonfire in Western Iowa on the 8th, the fuel ranging from eight to $1-inch inches deep.

JOHN HUNNER, residing near Allentown, Pa., recently awoke from a sleep which had lasted during fifty-seven consecutive days.

THE New Jersey Senate on the 10th, on motion of Manley, Benson strike, shifts manufacturers of New York City from the 9th, the ineligible to work one being placed at $100,000.

A COLLISION between the schooner N. H. Skinner and the schooner Fred Brown, in Vineyard Haven, Mass., on the 9th, resulted in the sinking of the latter and the drowning of the Captain and Mate, the Mate's wife and their child.

THE resilience of Edwin Reeves, near Staunton, Va., was destroyed by fire on the 9th. Two of Mr. Reeves' children perished in the flames, and he himself was probably fatally burned.

ONE morning during the progress of the recent strike in Chicago of the employes of the West Side Street Railway Company, as a number of striking conductors and drivers were on their way eastward down Madison street with their families, never stopping till they got to Austin, a distance of nine miles. Those citizens along the route who witnessed this little by-play of village and they would be willing to walk for a month rather than see the men beaten in their demands.

Personal and Political.

THE Pennsylvania Senate has passed a bill to refund the property of returning telegraph lines violating the Constitution by consolidating.

GOVERNOR-ELECT VAN MAX MEAGHAT retired in San Luis Obispo, on the 5th, and met with an enthusiastic reception.

GEORGE W. MONTPENNY, Chairman of the Democratic Committee, died on the 5th.

THE Tennessee State Senate on the 9th refused to concur in the House bill to fund the State debt at par and three per cent. interest was rejected, and then passed.

MAJOR EVARTS, THURMAN AND HOWE, United States Commissioners to the International Monetary Conference, sailed from New York on the 9th for Europe.

GOVERNOR HOYT was re-elected over Victoria's band of Indians, has been captured in Chihuahua, Mexico, with four followers.

THE Liverpool (England) cotton firms—J. G. Phillips & Co., and R. M. Carter & Co.—suspended on the 9th.

LATER NEWS.

THE election on the 8th for Member of the British House of Commons from Northampton, in the room vacated by the unseating of Bradlaugh, resulted in Mr. Bradlaugh's re-election by a vote of 3,238 to 3,208 for Mr. Phipps.

THE remains of the late Senator Stats II. Carpenter were buried in Forest Home Cemetery, at Milwaukee, on the 10th, with imposing ceremonies. The Senate adjourned the body as it lay in state at the Capitol House.

THE Missouri River at Council Bluffs was three and one-half feet above the highest water mark on the 9th, and many evacuations across the Union Pacific bridge was stopped. A large number of persons had abandoned their houses, which were surrounded by water. The water was rubbishing at the rate of six miles.

MISS HATTIE DUDLEY, the Iowa City tragedy, has been acquitted by the jury the seventh day of her examination-room food. Her pulse was very feeble, and the hope of her physician was found seemed to her like fire. She was so low that she paid no attention to matters going on about her. Dr. Peck, Dean of Medical Faculty of the Iowa University, paid a visit to the young woman on the 9th, and after a thorough investigation, declared that an attempt to force her to take food would probably make her a raving maniac.

AVA LAND meeting at New Westport, Ireland, on the 9th was successfully avoided, preventing regret that no better means to give long effect to the Land bill had been devised than the worthless, broken-down machinery of the Land act, and declaring that with early amendment no act could be necessarily enforced for the benefit of the people.

ADVICES received in London on the 9th from Peto state that the population of the Island was about 20,000, of whom 4,000 or 5,000 were killed by the earthquake, and twenty-five per cent. of the remainder by famine.

A SPECIAL TELEGRAM on the 9th says the Land Bill was passed by the House of Lords without an effort to lay down their arms in return for a Constitution and amnesty. It was alleged that several persons had been arrested under the outrages to the Winter Palace.

A LONDON telegram of the 8th says leading Indian banks and London bankers were memorializing the British Government in behalf of representation at the Monetary Conference.

THE Land Investment of Ireland has requested Magistrates to co-operate with him in stopping the holding of league courts.

LORD CARLINGFORD has accepted the office of Lord of the Privy Seal in place of the Duke of Argyll, resigned, and will take charge of the Land bill.

THE Treppists expelled from Angiers, France, who will soon reach Montreal, have been assigned seven hundred acres of land at Oka, where they will open an Agricultural College.

A LONDON Dispatch of the 8th says the Bank of England reported a greater stock of gold than for many years, being over £23,-300,000 in its vaults.

ON the 8th, as twelve policemen in Ireland were escorting a process-server at Ballivor, more, twenty women attacked them with sticks and stones. One of the women and another wounded while several officers were severely injured.

MORE, the *Pender* editor, was committed for trial in the London Police Court on the 9th, in default of £1,000 bail.

THE English Court of Appeals has decided against the celebrated circus rider Sanger, Mackenzie, under sentence of deprivation, for circus bills practice.

A SENSATIONAL shock was felt in the vicinity of St. Paul Bay, Quebec, about midnight on the 9th. The people generally awoke from their sleep.

COMMANDER MARKE reports to the Navy Department that lawlessness is unrestrained at Havana, and that the British Consul was recently murdered by ruffians a few nights ago.

THE Italian Chamber of Deputies on the 9th rejected a resolution of confidence in the Ministry, by a vote of 192 to 177.

THE Duke of Argyll has resigned his position as Lord of the English Cabinet, on account of the too radical character of the Irish Land bill.

UP to the 7th about $50,000 had been subscribed in London for the relief of the sufferers by the earthquake at Ischia.

A ST. PETERSBURG dispatch of the 8th says the Czar has given up the idea of granting another an offer to lay down their arms in return for a Constitution and amnesty. It was alleged that several persons had been arrested under the outrages to the Winter Palace.

A LONDON telegram of the 8th says leading Indian banks and London bankers were memorializing the British Government in behalf of representation at the Monetary Conference.

THE Lord Lieutenant

Charlevoix Sentinel.

CHARLEVOIX APRIL 19, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

In Walton on the 9th a man named Coffman attempted to commit a rape upon the 14 year old daughter of Mr. Lee. The man was arrested and bound over to the circuit court in the sum of $500. He was unable to procure bail and was committed to the county jail. The girl's father, mother and brother were in the house at the time of the assault.

The Charlevoix Steamer Argyle, Capt. Thompson, will leave Charlevoix for the Straits on Monday, April 18, at 7 o'clock a. m., and every Monday morning thereafter, until further notice

Keep Your Good Looks.

A woman should never let her prime between forty and fifty, but alas! many have wicked cheek, callow complexions and tired, fretful faces long before that age.

There are many causes which lie at the root of this evil, for evil it is, when the flesh-glow's sweetness and freshness leave a young woman's face and hard lines make it appear older than the grandmother of the house.

One cause of this early failing is useless fretting or over-anxiety. Women, as a rule, dwell too much on imaginary things; they will bear a great misfortune or face a real danger with far more courage than one man when it really comes, and yet they magnify trouble, anticipate its coming, and weary themselves over trifles. Only a short time since, we saw a most estimable lady remained miserable for days because a carpet-sitter had neglected to finish his work neatly. Another was so anxious about some cake she was making for a church tea, that its failure to be perfectly baked put her nerves quite out of tune and seriously ruffled her temper.

One good woman, the mother of a family of grown-up sons and daughters, said, in the hearing of the writer, that she "kept awake all night, worried and nervous, because she had sealed a bottle of some fancy pickles and neglected to put on a certain kind of stamp." Think of it. In a world full of important work, in a life crowded full with possibilities, a woman omitting herself for real usefulness, and simply making herself miserable over a jar of pickles!

Many mothers fret about their children's absence, often in the most foolish and unnecessary manner. Tommy is sent on an errand for his mother, with instructions to return at once. Tommy does not return; an hour passes, and still Tommy does not appear. Mamma grows impatient; then anxious, then desperate, and at last is in a state of mind which is positively quite injurious to her health. After the cotton finally has been disturbed, the neighbors visited and questioned, and pans and the like most sent off to the police station, Tommy, as no purpose except to put them out of sorts thereby, Tommy appears, smiling, whistling, happy. A wise mother would calmly hear his story, and impress him, in the most unobtrusive manner, with the importance of returning at once when he was expected so to do; but Tommy's mother is unduly excited, and she is either so glad to see her child safe and sound once more that she does not reprove him at all, or else goes to the other extreme and chides and finds fault with him unreasonably. The story is terse and simple. Tommy was obliged to wait, then the gentleman asked him if he would do an errand for him, and the obliging boy consented; the delay was greater than he anticipated, and Tommy was "awful hungry." That was all. He had neither "been in a fight," carried off by some horrid tramp, or had "stayed away with wicked boys," as his mamma feared, and yet she is ill with a headache and Tommy was in utter disgrace. Such folks didn't make such a fuss if you was out or signs a little while."

Boys ought to be trained to a greater extent than girls in matters of absence from home. Your genuine, manly boy desires restraint and what he calls "business." Many a mother has unwittingly worried and fretted her child, and by fancied evils, and those are the dangers she worries over, has "driven him" to steal away the restfulness and peace from her own otherwise sweet and beautiful home. Mothers, we must hold are sometimes too fastidious, or even too so-called conscientious for their own good. A true conscientiousness consists in doing as much right as possible to all, herself included, if the manner of the doing does not more serious in their interference in the spheres of the housekeeper's duties. Such men are really the most responsible for the facial looks of their wives and daughters, but fortunately they are few in number and every they ought to know that a woman who is cheerful and bright must depend largely on nature for sustenance.—*Christian at Work.*

A Terrible Ordeal.

The American mails must go ahead, whatever the state of the roads. Bridge or no bridge over the river they must go, even though there is no passage to a ferry-boat. Thus it was recently during a Montana flood. There were people on both sides of the river. A stone was tied to the end of a ball of twine and flung from one bank to the other; to one end of the twine was tied a cord, to the cord a line, to the line a stout cable. The cable was made fast with stakes driven into the ground, a basket was slung to the cable, a line passed through a pulley made fast to the basket. All being ready a stage driver took his seat in the basket, got into the basket. Both banks were lined with teamsters, travelers and emigrants, watching the experiment. The basket was over the middle of the stream; the waters were swelling and boiling; the basket tipped, it turned, the driver and the mail bag went into the water. The shouts arose, they were never seen more—sucked into the maelstrom. The pulley never ceased to move, the basket hung, and some people missed their letters. I witnessed another thrilling scene on the river. A few days after the stage-driver was drowned the water subsided slightly. The proprietor of the bridge was losing money, the crowds on the banks were growing and all travel was stopped. A short distance below a rope ferry was rigged. The delayed stage passengers were all there to cross. It was risky for everybody, but the ferryman had made a trial trip in safety. I was not a stage passenger but I managed to snuggle in with the first boat load. They

INDIAN SALE.

Gen. or Gen. Custer's Indian Opinion Regarding the Whole Matter.

As we have before said, Capt. Wilkinson has had in charge a number of Indian prisoners at Fort Brelland for some months, a sketch of his character and

[illegible]

At Indian was a chief among the Pi[illegible] commons. About fifteen years ago I was on Yellowstone near Shaver Creek, [illegible] Rosebud Reservation. I fell [illegible] them to the agency, near the mouth [illegible] and one of her two squaws. While I was preparing to return, a number of Indian scouts was the Crook army came [illegible] was to take out ten pieces of tobacco [illegible] present to the head men of my camp. This was to be considered as an invitation [illegible] to the camp to come into the Agency and trade. I sent one of my young men ahead to notify the chief men of my coming with good news from the trader and that I had [illegible] pieces of tobacco to give them. My young man returned and informed me that one of the chief men refused to accept [illegible] in camp. The name of the chief was Ta-Wha-Cow-Kimo, now dead. I left the [illegible] with White Sitting Buffalo, one of my young men, and started for the trader's camp. When I arrived I informed the [illegible] that I had good news for them [illegible] trading with the white men, [illegible] the cause of trouble no more. I [illegible] to tell them, and after I had told them [illegible] the kind treatment I had received [illegible] hundred of the whites. I returned [illegible] to go to Grand River, but I did not [illegible] them, preferring to return to [illegible] Bull's camp on Beaver Creek.

A few days Sitting Bull started to the [illegible] and I as I recently learned, to see [illegible] Fort Buelford Agency. While [illegible] was I was notified by one of my [illegible] that the camp had Grand River [illegible] and I at the time of said date by the [illegible] to Fort Buelford Agency. [illegible] my appearance at the Agency (Fort [illegible]). Then I [illegible] made up [illegible] to go to Fort Buelford and from there [illegible] the Grand River Agency. I arrived at Buelford about ten days and [illegible] days before the Agency at that [illegible] would start, and was ever offending [illegible] for lodges at supper and preparing to [illegible]. All at once we were surrounded by the United States troops and I was [illegible] and by an interpreter named [illegible] Agency I understood I was from the [illegible] Whirly I came out of my lodge [illegible] to camp and we could see many men [illegible] our camp. I went out to where there was a [illegible] and was the soldiers in [illegible] to surround me. I stepped to the ground and when I came up it was just [illegible] to throw on. I could hear [illegible] Yankton camps. Their camp was where [illegible] Missouri now stands, Yankton [illegible] called Bonhill W. Cl, and Red [illegible] that the camp that I was with came [illegible] where I was, stating that the troops [illegible] our mother there.

From the Yankton camp I sent an [illegible] to the Grand River Agency. The Yanktons moved to visit the Yellowstone visiting me with them. I could never learn the cause of the harsh treatment that was [illegible] but to me it was not long aware of having done anything to merit it.

I remained here with them on the Yellowstone, and when spring came on the trader (Dutch) came out to us and asked the Indians to go to Grand River and trade with him, and also informed me that my camp at Grand River had threatened to kill me, and that it was all a false report, that the story was a lie out of the mouth of the young man who told me.

We consented to go with him (Dutch) to Grand River to trade, but did not take part [illegible] with us, all that went with us were [illegible] men, we had none of our families with us. While we were there there came a man from the Sioux we named him "The Gray Beard." He was a [illegible] became from the Grand Yankee. He gave [illegible] one keg of powder, and a blanket [illegible] and told me to tell Sitting Bull [illegible] that the Great Father would give him an Agency for himself and people. I returned to Sitting Bull and delivered the message. Sitting Bull was afraid to come in. He moved his camp to the Missouri river and from where he left camp, I started for Grand River Agency where I arrived two winters. On the third spring I started for Sitting Bull's camp. I had [illegible] where I had left it, on Beaver [illegible] From there we went to Powder [illegible] While we were there a person came from Grand River, from Red Water Creek, [illegible] Brave's [illegible] Sioux. Told [illegible] if he would move [illegible] and [illegible] the Great Father would give him and his people all they wanted to eat and wear. Having determined at once [illegible] to the agency. The people of the [illegible] he told them that I was [illegible]

[illegible] Fork, [illegible] Co., Mich., [illegible] day of [illegible] 1881.

[illegible] therefore, I had no other business. Now I [illegible] to my camp to the agency. I [illegible] resolved to surrender them at Buford, [illegible] told that my people would be [illegible] if we went to Buford. So I stayed [illegible] the agency if, upon our surrender, I would [illegible] my blankets with which to draw rations. He told me he would break up a piece of land and set me to work farming for the [illegible]. I had brought them Indians there to surrender them to the agency, but I did not intend to surrender myself, as I was still to return to Sitting Bull's camp and [illegible] in view of the Rockies, and perhaps [illegible] Bull himself.

I then set return to Gall's camp I re[illegible] twenty lodges to return with to [illegible] on our way we were met by a young Indian, who told us that the Indians at the agency were dying at the rate of four or five a day with the measles. I did not venture any more the agency, but stayed with them until fall, and then went [illegible] the agency. Sitting Bull himself came up for an White Paint.

As I was making preparations to bring to Buford about sixty lodges, the Yankton chief hearing of it, began again to create [illegible] Indians. Many so reported our farm [illegible] our cause, and thereby frustrated my plans. Had I been left alone by those evil men, Sub Plenty and the Sweepers, I should have succeeded.

About this time we had fifteen cords of wood chopped, ready to be sold to the trader, Henderson, at Poplar River, but the Yankton soldiers finding out that we were cutting wood, came over to our camp, and told us that as the wood did not belong to us, we should not sell it to the trader; that if we did they would burn our lodges, take our ponies, and also kill some of us. As they were the strongest party, we could do nothing but yield to their wishes.

A short time after this Mr. Henderson and two Interpreters came over and offered us one dollar and fifty cents a cord for the wood. As soon as I heard that I went as to where Joseph Culbertson was standing and asked him to go home and tell the Yankton soldiers to come and get the wood, telling him we were no more to them. I also told him that Mr. Henderson would pay us for the wood, but the Yankton soldiers could come and get it themselves, then the Yankton people would not know but what they took it from us by force. But instead of heeding my suggestion, he got angry at me for telling him to go home that evening, on another more convenient day. Coming up to where I stood, I told that when I elected for home to never told me to go home, and furthermore he was a man and not afraid of anything that walked on two legs. Upon his return to the agency he told Major the Bear that as soon as he saw that man Gall, he was going to shoot him.

The next day I went to the agency without my arms, thinking that my time had come to depart for the Happy Hunting Grounds. As I was standing in front of the trader's store, Gen. Miles came, but never said one word. About four days after this I saw him again, and he told me that he was the only interpreter that the Great Father had any confidence in; that he had accompanied to Gen. Miles to come and [illegible] the Indians of their arms and ponies; that Gen. Miles had sent word back that he was coming down as soon as possible, to set fire on all the country, and make it so warm for the Indians that they could not possibly endure it.

In four or five days from this I surrendered myself to Gen. Miles, telling him that was the truth; that the bad councils of the Yanktonais and Cuthetaus had prevailed with my people, and that as a consequence they refused to surrender with me.

I know Gen. Custer was serious, and had known it for years, and have been trying for years to induce my people to surrender. I now say that my brothers [illegible] have unjustly misrepresented for some reason. I defy any person to prove that I have ever been guilty of any violation of faith. I know now, and my people begin to understand, that the whites do not kill prisoners captured in battle. A short time after I had surrendered Col. Ilges attacked our camp, and my people then learned that what I had told them was true. They lost all their property, lodges among the rest.

I hastened, unarmed as I was, through the fire of the troops to my own camp, and kept all of my people not to resist. There [illegible] some return firing already, and my people were a good deal excited, but I persuaded them to stop firing, leave their lodges, and seek shelter in the timber. They did so, and the troops took possession of our camp, destroying it because they had been fired upon. I do not blame any one for this, as it was a measure of self-defense. I blame the Yankton who have by false and threatening reports led my people here from following my advice, which, if followed, would have led them to surrender peaceably long ago.

[illegible] Gen. Miles was wishing to [illegible] Gall from the Yanktonais and [illegible] parties at Poplar River, my people were encamped all the way from [illegible] to the mouth of Poplar River. But in [illegible] Gall [illegible] to have not [illegible] Gen. Miles [illegible]

NEWS SUMMARY.

Important Intelligence From All Parts.

The U. S. Senate.

On the 15th, on motion of Senator Burnside, a resolution was adopted requesting the President to communicate to the Senate any information in his possession relative to the killing of Samuel Boyton, who, claims to be a citizen of the United States, by the Government of Great Britain. The pending business after the morning hour was Senator Logan's bill to prevent polygamy, which was withdrawn at his request. Mr. Logan, in explaining it, recently had a conversation with Senator Edmunds, who would have others introduce the measure. Senator Beck, Pugh and saunders then spoke on the bill, the latter two of which attacked the Mormon Church and its practices. The bill was then laid on the table. On the 16th, Senator Burnside introduced a bill for the relief of Indian Territory, which was referred. Senator Ingalls introduced a bill to authorize the Secretary of War to make a free distribution of rations and blankets to the sufferers by flood in Idaho Territory.

ERNE WRIGHT, a prominent merchant of Bostin, who lately died, bequeathed nearly all his fortune to the wife of a banker to whom he was not related. He gave his confidential clerk $50,000, his valet $5,000, and an English friend $10,000.

THE cattle handled by the employ of the West Division Street Railway Company of Chicago have registered and been provided an increase of twenty per cent. in their wages.

A FOUR-IN HAND special to the St. Paul Pioneer Press of this date says that Lieut. Colonel McDonald, of the Canadian Mounted Police, has just arrived in that city and reported that Sitting Bull would come to Buford with the shattered remnants of his band and surrender as soon as he could get through the snow in the Moutain.

A CINCINNATI dispatch of the 15th says the town of Hickory Hog, W. Va., on a visit of panic over the starving spread of small-pox. The disease was brought there by a young man from Pittsburg. Nine physicians were all sick, and the body of a young woman who died was left unburied. The Governor had been telegraphed for aid to bury the dead, but he replied that the county authorities should attend to it. Trains passed through the town without stopping.

JAY GOULD'S sables have purchased the interest of Thomas A. Scott in the Texas Pacific Railroad for $1,000,000. Mr. Scott has resigned the Presidence of the road, and Mr. Gould has been elected his successor.

CAPTAIN EADS, the engineer of Pittsburgh, who was arrested for complicity in the Missouri land frauds, was discharged on the 15th, because the District Attorney was not ready to submit any testimony against him.

AT PEARL, five miles north of Atchison, Kan., early on the morning of the 13th, an engine, baggage-car and coach on the Nebraska Road left the track and plunged into the Missouri River. Those on board escaped by swimming.

A DISASTROUS tornado swept through the region near Hernando, in Northern Mississippi, on the afternoon of the 15th, destroying much property, killing a number of persons and injuring others.

FIVE persons suffering from small-pox were recently removed from a house on Carmine street, New York, where a woman who knew she had the disease had been selling clothes for a fortnight.

IT is stated that half the peach crop in Middle and Southwestern Georgia has been killed by frost, the fig-trees are said to be dead, and plums badly injured.

THE Chinese bank, of Atlanta, Ga., failed on the 13th, with liabilities of $300,000.

TWO students of Phillips Academy, Lawrence, Mass., twin brothers and members of a respectable family—inexplicably entered the house of a citizen early on the morning of the 12th, when one of them was shot dead. The other surrendered and confessed.

TERENCE A. DEEN, an intelligent but unscrupulous resident of Charlotte, N. C., has defaulted on paper which he had been receiving to his counter as clerk and title to himself, his wife getting her signature before a Notary Public.

TWELVE were slain—five cases of small-pox in the slaughter-house Reading, Pa., on the 15th.

JOHN SIMMONS had the police of Greenville, Ohio, locking all day for the $1,000 which he had lost. Arrests were made and houses ransacked. At length Mike's own clothes were searched, and the roll of bills found in the bottom of his trousers, where it had fallen through a hole in his pocket.

HEAVY frosts have recently prevailed throughout Texas, and considerable damage has been done to the corn, cotton, fruit and vegetable crops.

WILLIAM DUNSMUIR, wife and several children, of Nanaimo, British Columbia, were the last to be suffering from hydrophobia. Some work, at which they had eaten, and a chest of fish from Nanaimo's seas were found to be alive with whigers.

THE passage of immigrants arriving in this country during March was 41,528, of whom 20,000 came from Germany and 4,000 from Ireland. The number arrived during the month of March was 20,000, of which 12,000 were from Germany, 80,000 from Russia, 30,772 from England, and 4,000 from Ireland. The total arrivals from January 1st to March 31st were 41,528, of which 14,000 were from Germany, 80,000 from Russia, 30,772 from England, and 4,500 from China, and 75,500 from all other countries.

JAMES ROSS of Erie, Pa., has for eighteen years been a paralytic cripple, his right arm and leg being useless. On the night of the 14th he appeared on the streets free from the disease, and declared that he had been cured by the prayers of Father Malleney.

ON the 14th the Red-ax Rock Island attempted a southbound passenger train. The rear of the water-works were quenched, the jail relieved of its guard, and the streetcars ceased to run.

THE annual report of capital invested in the coal and steel industry of the United States for 1880 was $260,977,889, against $121,772,974 in 1870.

ACCORDING to the census reports the school population of the United States is 14,000,000, of the number 8,024,195 were enrolled in 1880. There were in that year 271,144 teachers.

JAMES O'HARON better known as Bob Lidgett, the gambler, was shot dead in a New York Court on the 15th by the famous Morey trial, and was sentenced to State Prison for eight years.

A CENTRAL strike of the employees of the Consolidated Cincinnati Street Railway Company occurred on the 14th. The demand was for an increase of 50 per day for conductors and drivers, and $1 for stablemen.

PROFESSOR GRIFFITH, James Bay Accident, that any publication which is published in accordance with the Copyright law of the United States is admissible.

A RECENT Washington Gazette says the reports received at the Agricultural Department indicate that the live stock of the country is not diminishing, the scarcity of feed and provender caused by the long and severe winter, had come out in fair health, though reported very low. In this, as in other cases, new pursuing disease was reported over any large area, while reports of the ravages of murrain and silly sale were often mentioned. Great losses from cold and starvation were reported from the valley of the Far West.

THE Chicago Times of the 16th repeats the statement that a thorough canvass of the legislature of Illinois, and says that the damage to railroad property will be greater in that State than in the other States, and has called attentious altogether too dismal. There were good reasons for the low state of feeling of the country at large would be many as great as it was six years, as the scarcity had very greatly increased.

THE Pennsylvania Republican Convention is to be held at Harrisburg, September 5.

DR. TYNG, late rector of the Church of the Holy Trinity in New York, has denied a report that he was about to embrace Roman Catholicism.

REAR ADMIRAL JAMES S. LANNEDY, U. S. N., died at Philadelphia a few days ago.

THE Illinois House of Representatives on the 14th passed a bill to prevent the adulteration of food and drugs, and debated the Railroad Anti-scalping bill.

THE eighteenth anniversary of the assassination of President Lincoln was commemorated at Springfield, Ill., on the 14th by speeches and by decorating the monument with flowers.

BISH. DONNIGAN, an ex-Congressman and leading lawyer, died at Auburn, N. Y., on the 15th. He was eighty-five years of age.

IT is stated that Gerhard, the Zulu King, is in charge of an English farmer, several miles from Cape Town.

ON the 13th the Porte expressed to the French Ambassador at Constantinople the desire to withdraw the Turkish troops from Tunis to the defence of her own frontier, and advised the Bey to remove any pretext for murderment.

A MYSTERIOUS disease has appeared among the Chinese population of the Manila Pacific Road in British Columbia. It takes the form of a swelling under the left arm. The first victim was drunk, and then three days later, a second was taken in the same way. He also died. Many have followed, they were literally "struck down" by the mysterious agency. Dr. Richards was of the opinion that many residents would leave the Territory and seek a more agreeable climate. The snow in many places was still from four .. are feet deep, and was rapidly melting.

AT Matagorda, Texas, on the 15th Hans Ruggely, a deputy Sheriff, was killed by a lady who forcibly entered and fired a pistol with a knife, the thought was unloaded.

A CHASE with bull and sworn clubs raged along the Lexington Road left the track and plunged into the Missouri River. Those on board escaped by swimming.

A DISASTROUS tornado swept through the region near Hernando, in Northern Mississippi, on the afternoon of the 15th, destroying much property, killing a number of persons and injuring others.

FIVE persons suffering from small-pox were recently removed from a house on Carmine street, New York, where a woman who knew she had the disease had been selling clothes for a fortnight.

IT is stated that half the peach crop in Middle and Southwestern Georgia has been killed by frost, the figtrees are said to be dead, and plums badly injured.

THE Chinese bank, of Atlanta, Ga., failed on the 13th, with liabilities of $300,000.

A Terrible Story of Hardship and Starvation.

NEW YORK, April 21.

The steamship Nebo, from the Jamaica, arrived to-day. Her Captain reports that he fell in with the bark Tigris, from Liverpool for Baltimore, with seventeen days out, short of provisions, and supplied her. The crew said in the most deplorable condition, having for sustained life for several days on skins of leather and lumps of tallow. They had no coal, and when on the Captain's dog, after which there was nothing but sensibleness and death staring them in the face. To add to their sufferings, two vessels passed several days before within short distance, but paid no attention to their signals of distress.

As the steamer Nebo came up with the Tigris, they saw the latter lowering a boat. After some moments of hard struggling she came alongside, her occupants dressed in ofskins, and evidently very weak.

"What do you want?" came out Captain Gordon.

"We are starving to death! We are starving to death!" exclaimed a man in the stern sheets, excitedly.

"Have you got your wives and children?" demanded that agitate again, in surprise.

"Yes, we have got them, but this is all we have had to eat for nine days."

He held aloft what was left of a dog, and one of the men held up a piece of bear leather.

Provisions and water were then sent down, and the boat was hauled up. Captain Gordon, on learning that the Tigris was now out of coal, and that the crew were in a helpless condition, decided to tow her into Port Royal. The Tigris was then cut loose from the Nebo, and the latter proceeded on her course.

Captain Gordon reports that the Tigris left Liverpool on the 11th inst. and encountered heavy weather from the start. Provisions were short when she left port, and when the gale struck her she was compelled to put into Queenstown for more provisions. She left there on the 14

At a recent meeting of the Charlevoix township board of review the following were elected supervisors of the township:

Board of Review—Supervisors, Byron Sale, Byron W. Mayo and Joseph P. Loomis.

At a meeting of the Charlevoix township board of review the following were elected supervisors of the township:

Hastings From Hayes.

BY WIRE.

—Attorney of the state supreme court.

—Mr. and Mrs. [illegible] Hastings, Mich., March 31, 1881. To the Editor of the Charlevoix Sentinel: In your last issue I notice a list of resolutions [illegible] to the resort association. I would make a statement of a few facts, and then ask the reasonable men of your village if we have gone beyond our instructions from your leading men, and more, if we have employed any but fair men.

When the village charter was read it is [illegible], without the knowledge and consent of the association grounds. The association being chartered under a state law before the Charlevoix village charter was made, it would seem should have been consulted on a matter that was to be of so great interest to it, not financially, but on account of the liability to be annoyed by laws and regulations in which it could have no voice whatever in making or repealing. We remonstrated as soon as it came to our knowledge, and the people of the village, and in fact all with whom the matter talked upon the subject, said it was a mistake, that the village [illegible] to cover any part of the resort grounds, but by some error a small part was included. The same parties said to us that all we would have to do would be to apply to the next legislature (which is the present time), and have our grounds set outside the village limits. That is just what we have done. Having replied to the notice until about the closing of the charter bills in the legislature, the matter [illegible] nothing, and it was supposed that all was right. Now, [illegible] that the people of Charlevoix would carry out in good faith the only contract [illegible] during the winter in which we have [illegible] and I have no doubt but that the great majority of the property owners of the village [illegible] to have the wrong that was done us [illegible] our knowledge and consent corrected.

In regard to the statement [illegible] leaves that the resort association were willing and desirous to get an [illegible] a wrong impression. The writer has repeatedly talked with the village board and other residents in regard to it, and they suggested the very course followed, "apply to the legislature and get your grounds placed outside." We submitted the question to [illegible] what we have always considered and understood the village of Charlevoix wanted us to have.

It is owing to the action of the village [illegible] that the people of Charlevoix [illegible] expect to ever vote for [illegible] village organization. If it was a [illegible] why object to the corporation? It is very unreasonable and beggars description to make an attempt to [illegible] upon us, but I do not think it can be carried out, and do I think the responsible people of Charlevoix object to the village [illegible] where they intended it to be.

Very Respectfully,
S. A. GIBSON.

In the matter [illegible] the undersigned [illegible] would say that [illegible] many county officers of the county [illegible] a majority of the [illegible] county committee, including the chairman [illegible] of the whole ticket of [illegible] ourself.

Mrs. [illegible] would say to the [illegible] that [illegible] purchased Carpenter's [illegible] will [illegible] in a few days [illegible] and [illegible] a complete [illegible] Carpenter [illegible] the exact appearance of the carpet in the form of a large [illegible].

MONEY TO LOAN on good farm security at lowest rates in Northern Michigan. Title is perfect or [illegible]. W. A. Smith, Loan Agent, Charlevoix, Antrim Co., Mich. [illegible]

MARRIED

At Boyne [illegible] by the Rev. [illegible] Mr. [illegible] and Miss [illegible] both of Boyne [illegible].

Local News.

BREVITIES.

—Frank Thompson has purchased the Lewis property on Bridge street.

—Ed. Bowles has the lead pencil for a 10 foot pasture.

—E. J. Lewis has returned to Torch Lake from Antrim.

—Robert Miller has commenced work on his new building.

—The Fifth Ward now pulls off a new race to the fair grounds.

—L. A. Kinney was an occupant of the steamer Clara Belle this morning.

—Sam Ann, the expressman, is around again with his pleasant countenance.

—Mr. Bowles has purchased the Sharp property and will occupy it soon. The price paid was $1,200 cash payment.

—Inspector Lewis will be in his new post of duty at Petoskey on Wednesday.

—Tony Sargent, Esq., left Charlevoix on the Clara Belle this morning.

—Jesse Blanchard is convalescing the best he can from his severe injuries in Mont Clair.

—The mill at Clayton has a capacity of some 6,000 feet hardwood lumber per day.

—Fred Smith, of the Sentinel, goes to Manistique by Sea Gem Thursday for a trip.

—A. J. Mullen, of this place, has sold his Grand Marais to Davis Brothers, of Lee Roads.

—Gentlemen of the Council, put the Court House fence in order out of funds on hand.

—Dr. Hall, the Inspector Marksman has established his office at the Revenue of J. M. Clark.

—The extra express train on the G. R. & I. road will be put on this season about May 15th.

—The proprietor Levi Washington moved out the Snow Storm's comes Board Wednesday.

—Lyons has no less than 60 sawmills. With Less than 1,000 inhabitants it has seven lawyers.

—Capt. McLeod went to Milwaukee as a passenger on the schooner Sea Gem Thursday.

—A bill has passed the Senate and House by a large majority, extending the present liquor law to the townships of the Fox. The bill now only applies to municipalities.

—The Bay View Association, of Petoskey, has purchased the Hotel Rudolph property, and will open it for the season.

—Mr. Lovell's second lecture on the Mound Builders, which was to have been given next week, has been deferred on account of bad weather, will be given next Monday evening.

—The Record says that during the coming season Detroit & Howell will run a stage and baggage wagon from Clarion to any point on Burt Lake to which tourists and sportsmen may desire to go.

—The petition circulated for signatures for the pardon of Mike Murphy from the Detroit House of Correction, resulted in Governor Bagley's writing to Murphy that he could do nothing for him.

—Alex Cadieux will put two passenger wagons and a baggage wagon upon the Boyne Falls and Boyne City route to connect with boats upon Bear Lake as soon as navigation opens that lake opens.

—At the special meeting of the Village Council Monday evening, the bonds of Bigler Brothers were fixed at $2,000, and the names of Nelson Austin and O. S. Woodcock, as sureties for Casper Schuler, were approved.

—A runaway team, unconnected with any vehicle, and with broken traces and whiffletrees, were caught at the bell ranch of the village on Friday. Investigation proved them to belong to Mr. Tucker, of Hayes who was driving to town in a lumber wagon, when the team became frightened near Mr. Verburg's, and strewed things along the road, including Mr. Verburg, who was considerably injured. It is suggested that the horses were paying off old scores.

—The Lebanon Tribune, published at Sucker's Bay, is to be removed to Traverse City. It will be owned by the two Democrats—W. S. and A. H., and H. C. Davis, and will be run as a straight-out Democratic paper.

—A fine large deer made its appearance at Mackinaw City recently, and after running up and down the street several times struck off on the road, and when last seen was going toward Lake Huron at the rate of a mile a minute.

—J. Milo Eaton intends to remove the old Balch residence on State street to the lot now occupied by the house adjoining the Edson residence, both owned by Mr. Eaton, and sell the Balch lot to the grounds of his residence.

—Petoskey is to have a sanitarium, under charge of Dr. W. W. Danks, of Ohio, where medical treatment, including all kinds of baths, as steam, electric, Russian, Turkish, etc., will be used to cure all the ills to which flesh is heir.

—Capt. Henry Aldrich, who is to be master on the propeller Traverse this season, left Sunday for Chicago to assist in preparing that steamer for her route. Willie Aldrich, his brother, was still off-shore as pointer, accompanied him.

—Shields, the man arrested for pounding William Long, was tried at Grand Rapids last week, and the jury brought in a verdict of assault and battery, and recommended the justice to have him punished to the full extent of the law.

—The second annual Meeting of the Inter Denominational Missionary Association of Northern Michigan will be held at Traverse City Tuesday, Wednesday and Thursday, May 31, June 1, and 2, 1881. An interesting programme is announced.

—A Menistee Indian, who was recently convicted of murder, expressed his opinion of the lawyer who defended him with delicious frankness: "Lawyer too much talk! Heap talk! No Chippewa lawyer, he have no lot of words to explain his opinion about Creator's ways."

—We suggest that the village council follow up the enactment of ordinances by their enforcement. One ordinance over a year old prohibits the passing of cow-paths through the roads of Ireland in advance of roads, yet more than a dozen violations of the ordinance can be noticed along the village.

—Will the *Enterprise* please credit the SENTINEL with items of news hereafter which it may copy from its columns. The last item is the statement of Pine Lake contributed by Mr. Lovell, which was compiled with considerable labor and time. Our exchanges are copying and crediting to the *Enterprise*.

—When a pitcher of cider is left on the table at the office of the *Record*, a long local acknowledges the gift, but when McCarty takes the pitcher up to his bar to put himself outside of three fingers of Monongahela, the editor is silent. This is one of the glaring inconsistencies of Petoskey journalism.

—The district Lodge of Orangemen, No. 37, have elected the following officers: W. M., Dr. Cochrane, Torch Lake; D. M., Geo. McDonald, Kewaunee; Treas., A. R. Upright, Charlevoix; Sec., Dan Hickey, Eastport; Chaplain, P. A. H. Cole, South Arm; Tyler G. W. Hall, Charlevoix.

—We are indebted to A. B. Ide, Gen. Passenger Agent of the G. R. & I. R. R. for a copy of their Tourist's Guide. It excels all of its predecessors in typographical beauty and completeness of detail. Every locality of this favorable Northern Country is thus ample justice. The fine engraving in the book is a full-page birdseye view of Charlevoix. The book will attract thousands to the favored North Country.

—The meeting of the Historical Society at the residence of O. D. Wood on Tuesday evening last was one of the most enjoyable of the series. Charades were presented by the ladies, and refreshments by the hostess, and the evening was devoted entirely to enjoyment, the usual historical reading being dispensed with. Prof. Russell read an extract from Mark Twain which took well. The society voted to close their regular weekly meetings until the first Tuesday in October. This has no reference, however, to the lectures of Dr. Leach before the society next Monday evening, May 9.

—Col. Harwood and his assistant, accompanied by Mr. Markese, the new inspector, arrived here Tuesday. They proceeded at once to set the stakes for the revetment, which Col. Harwood expects to commence with the new appropriation—not yet available—but as soon as even. The contract at the head of Lake Michigan to Round Lake, and the north side as far as it will be necessary to prevent present filling. Col. Harwood intends to make a channel eighty feet wide and twelve feet deep this season. The dredge is expected soon. Inspector Markese entered upon his duties Wednesday.

—Petoskey *Record*. On Monday, two men crossed on the ice from Point St. Ignace to Cross Village, arriving here Tuesday, and taking the train south yesterday morning. They represent the ice as in a very impassable condition, and were able in many places to run a boat paddle completely through with but little effort. They were badly frightened before reaching Cross Village, and ingrained many times having ventured on their perilous journey, but were fortunate enough to reach their destination without any accident having befallen them.

—The Charlevoix Summer Resort Association have recently issued several thousand copies of a beautiful folding map of their grounds, and of Charlevoix, which they are distributing. The inside is a correct plat of the grounds and of Charlevoix village, and the reverse side is occupied by several neatly arranged pages giving graphic descriptions of not simply their grounds, but of Charlevoix and Pine Lakes. The association certainly manifest a good Christian disposition, in view of the efforts they have encountered from Charlevoix, for their circular map will do a vast amount of good in attracting hither people from whom the association will receive no profit whatever. We append an extract: "The Village itself is charmingly located, and its citizens show a commendable pride in the development of its industries, the care of their homes, the religious and educational culture of their families, and the general attractions of the place."

Commencement of Vol. XIII

Last week's issue closed the twelfth year of the career of the SENTINEL, and with this number it starts out into its thirteenth.

When we look back over the years and contemplate the struggles, discouragements and vexations which attended the first few years of the SENTINEL'S life, and later, its steady and gratifying growth in strength and popularity, we recognize the fact that in all these phases of its existence it has only kept pace with the development and growth of Charlevoix county, and the rapid tributary to Charlevoix.

While we with thankfulness acknowledge that, in these two realms the SENTINEL'S prosperity has been the effect, and the country's growth the cause, we can honestly and without egotism claim for our journal a steady and strong influence in adding to the warp of our beautiful region the woof of strong arms, willing hands and potent capital. The SENTINEL has a consciousness, strengthened by evidences, of having attracted hither hundreds of those who now adorn our society and contribute to our wealth as a region.

From an obscure and diminutive sheet, the SENTINEL has grown to be a large well filled quarto, with wide circulation and an advertising patronage that testifies to the regard in which it is held by the people of the region and the business men of Charlevoix and outlying villages.

The SENTINEL has always been backward in its Republicanism, without compromise, and free from any manner of corrupt motives. It has many Democrats as its warm patrons and friends, and we thankfully acknowledge their kindness in all these years of our journalistic career. Thankful to all our friends and patrons for their continued encouragement, we step out into the new volume with a firm purpose of still greater progress in all that goes to make a good family and local journal.

Norwood Notes.

—Farmers have commenced sowing wheat.

—Miss Mary Moore has gone to Elk Rapids.

—Very little sugar was made in this township this year.

—Arbor day was quite generally observed in this village by planting trees.

—A vessel was seen from this place on Thursday, supposed to be the Sea Gem of Charlevoix.

—The ice is just going out of the bay and the beautiful snow banks have nearly all disappeared.

—Mrs. Hannah Stafford has gone to the bedside of her daughter, who is dangerously ill.

—The light house on the point was lighted Tuesday night, and navigation is supposed to open.

C. C. A.

Sioux Superstitions.

The Sioux entertain many fanciful ideas concerning the future world and the condition of those who inhabit it. They believe that for some time after death the soul lingers about the body, in consequence of which idea they are unwilling to visit or approach a newly-erected scaffold on which has been deposited one of their dead. This feeling of dread is enhanced by a belief in the vicious propensities of the lately freed spirit, which is inclined to harm the wood-gathering mortal who ventures too near. A short blow is liable to produce death, and it, I believe, always followed by direful misfortunes, such as illness, paralysis, or some permanent injury. The Sioux, following the practice of many other tribes, place the bodies of the dead on a scaffold raised on poles or between the trees for rest in height. The corpse is wrapped in folds of cloth or blankets and buffalo robes, the more opulent of old scaffolds, which are often to be seen in the woods, presenting fairly mummies. Personal distinction, as noted warriors and chiefs, including sometimes the relatives of the latter, receive more honor in sepulchural rites, the last ceremony being frequently attended by a brave—in dry goods or shoe box, obtained at the trader's store, answering the purpose. Sometimes in the grave yards of our frontier posts may be seen a grave of an Indian that pretty nearly the white man's burial place, the scaffold on which reposes the body of the Indian chief.

The soul of the departed Sioux finally ascends to the spirit land, which, in their system, is a highway leading through space to the happy hunting-grounds which the pioneers in search of distant regions beyond. To sustain the spirit during the journey food and drink are required. The noted warrior and chief should be interred with his horse, that in mounting state, to precede stretch one or more horses must be sacrificed, as the spirit refuses to redismount in the savage idea attending the disposition of the animal after its use to mount it. It is not believed that the material food is eaten, nor the actual water drunk, but the spiritual horse, ribbon, but in all material residue a soul and that consumed spirit of the food and drink is consumed by the spirit of the deceased and its spirit of the horse accompanies the spirit of its master to the Indian paradise, where they are both received into the spirit land. These provisions appear to be needed only during the journey from earth, the spirit land, and the chief of the Sioux Indians to which they are departed will be supplied with everything that can conciliate to the happiness of its inhabitants.

The Sioux, or at least some of the Pabean bands, seem to possess quite extensive knowledge of prominent events in the history of the tribe. These records are inscribed on parchment the property of the reservation keeping vested by an individual who has received the appointment, and who is the custodian of which he writes the history of his people during his life. On his death another is appointed, and the more interesting events are perpetuated. Before the introduction of letters among these barbarian annals in the account of the coming of the first white man was apparently among them. He is represented in a very favorable light. At first he is represented as a powerful medicine man, who gave him a cordial welcome and ministered to his necessities. He did not prove ungrateful, but, after leaving them, returned to the tribe bringing articles useful to the Indians, with which he engaged in trade, the trade being continued to the introduction of the red and white men. This event is supposed to have occurred about 150 years ago. The records inscribed on this parchment, now guarded by savage skill, extend back to a remote period, perhaps running over one hundred years. The early parchment appears to be of a legendary character, relating to the creation of man on this continent, or at least, the first appearance of the Indian race. The Black Hills was the theater of the earliest of those historic or mythological events. Perhaps the fastness of the Sioux, for this special territory, and their reluctance to part with it, was owing to the associations connected therewith, as in Dakota, amidst the Black Hills appear to be constituted a new world garden of Eden.

The superstitious element of Indian character is manifested in the peculiar regard paid the medicine man of the tribe, and the implicit confidence with which his mutations are received and his advice followed. Perhaps among all religious known to mankind the priests exert no greater influence over the minds of their devotees than does the medicine man of the North American savage. His incantations are watched with the most profound respect and the results thereof awaited in fear and trembling. Their treatment of the sick and injured in wars are fanciful, and perhaps eloquent, and their invocations and mysterious charms of a medicine man. His rude lodge is invested with a mysterious awe equal to that which hallows the stately temple whose grand dome towers above the institutions of half a million worshipers in other lands. Many of their dances and other ceremonies partake of the same religious character. The great Dakota festival, the sun dance appears to partake both of a religious and patriotic character. During its performance, which is generally for three days, various ceremonies take place, perhaps the most prominent of which is the self-torture inflicted by the young men to prove endurance of pain and to test their endurance. The white visitor to the scene is attracted by the ghastly exhibition of men in various postures undergoing all the pain that their nature is capable of sustaining. Vigorous methods are devised to exhibit the power of the sufferer, and particularly with the design of attracting the admiration of the spectator. One favored method is to cut buckskin through the skin of the back, and through these rawhide thongs, the ends of which are secured to some support aware, after which the victim throws his weight on the rope and remains in this position until unconscious or the swelling sun gives relief. There appears to be a like element pervading all barbarous or semi-barbarous religions. The priests of Isis cut themselves and lifted their bleeding hands in supplication to heaven. The followers of Brahma inflict physical torture as a powerful aid to their invocations. The worshipers of Odin and Thor delighted in pain and bloodshed. The Druidical priests offered human sacrifices. The natives of the North American plains, in their great annual festive, indulge in ceremonies similar in nature to those practiced centuries ago in the mountains of Syria, the forests of Scandinavia and Germany, and until a recent day in Hindostan.—*Cor. Chicago Times.*

Inscription Rock at Zuni, New Mexico

A few miles from Zuni, as we move eastward, there gradually comes to view a bold, high, sandstone rock, a quadrangular wall, white, veined with yellow, named Inscription Rock. It is nearly a mile in length and more than two hundred feet in height. Approaching it, tower and turret, architrave and pillar rise slowly into view. We see a mighty structure Nature has wrought in rude architecture, and that no extravagant coloring gave it the old Spanish name *El Morro*—The Castle. The surface of the sandstone, on the north and south faces is written over with names carved there to history, records that light the dark way like shining stars. Some are deeply and beautifully cut into the pliant surface and remain back more than three hundred years. Other inscriptions are Spanish, carefully graven upon the vertical face, about the height of a man's head from the ground. Usually a date, a brief memorandum of the purpose of the band of men of the Castilian soldiery, the names of travelers explorers, the country, or Franciscan friars going into the wilderness in search of the lost tribes of Israel.

The most ancient of the engraving step is a gobbling spring of sparkling water, and fresh grass, such as is not often seen except in narrow valleys among the arid piñons of the territories. After leaving this fountain, the wonder looking up to the lumpous tables of stone before mentioned, the traveler is able to count the constantly-increasing list on the written monuments, which has now become a printed volume of horse-glyphs—Indian signs, the favorite language which the pioneers use in search of distant regions beyond. To sustain the spirit during the journey food and drink are required. The noted warrior and chief should be interred with his horse, that in mounting state, to precede stretch one or more horses must be sacrificed, as the spirit refuses to redismount in the savage idea attending the disposition of the animal after its use to mount it. It is not believed that the material food is eaten, nor the actual water drunk, but the spiritual horse, ribbon, but in all material residue a soul and that consumed spirit of the food and drink is consumed by the spirit of the deceased and its spirit of the horse accompanies the spirit of its master to the Indian paradise, where they are both received into the spirit land. These provisions appear to be needed only during the journey from earth, the spirit land, and the chief of the Sioux Indians to which they are departed will be supplied with everything that can conciliate to the happiness of its inhabitants.

The Sioux, or at least some of the Pabean bands, seem to possess quite extensive knowledge of prominent events in the history of the tribe. These records are inscribed on parchment the property of the reservation keeping vested by an individual who has received the appointment, and who is the custodian of which he writes the history of his people during his life. On his death another is appointed, and the more interesting events are perpetuated. PUNGENT PARAGRAPHS.

—There is a great social parade about a circus street show.—*Detroit Free Press.*

—The first black Friday occurred in Robinson Crusoe's time.—*Louisville Courier.*

—The debt of nature is paid by the most impecunious, but yet it is not a protested debt.—*Boston Transcript.*

—Very often a young man imagines himself to be a perfect brick, when he really isn't more than half-baked.—*Burlington Hawk-Eye.*

—In most trades young men are advised to begin at the bottom and work up. But this is not practical in well digging.—*Boston Post.*

—Tax assessors—the fellows who never raise you on your wealth, and yet whom you rail for the rating they give you.—*N. Y. Enterprise.*

—What's the difference between a man going to Plymouth Church and a lover stooping to propose?" asks the Rochester *Democrat*. The is going to see Beecher and the other to beseech her.

—The play of "The Fatal Thimble" was advertised in Philadelphia. But it didn't draw. The people wouldn't buy tickets to it. They could get and see their city officers for nothing.—*Boston Post.*

—Mr. P. T. Barnum once exhibited an alleged gorilla, which a visitor declared had to be a gorilla for the reason that it had a tail. "Just," rejoined the eminent showman, "as nothing to do with it. The tail is sewed on."

—The fashionable spring bonnet for 1881 is to be profusely decorated with flowers, and provided in the rear with a fire escape, so that the wearer's friends can climb up to the top and see the trimmings.—*Philadelphia Chronicle.*

—He took her little hand in his:
She tried away to pull;
He gently said: "My darling, don't
Be so fearful of your fool."
The darkling shadows in the glen,
The cool sea breeze that blew,
"I freeze," she murmured, soft and low,
"Do let go my dear you."

Several gentlemen were standing on the corner of Gaiety and Bourbon, one of the most fashionable ladies of Galveston passed on the sidewalk. "Ah!" exclaimed one of the gentlemen, "what a complexion! there is nothing like the natural tinting and the cross between that woman, I am!" "Are you her husband?" asked a stranger. "No, sir." "Her father then?" "No, sir; I am no relative of her, but I am proud of her complexion." And the stranger that said it to her. I made it myself.—*Galveston News.*

"Chiffoniers' Town" in Paris.

No one—save the London *Saturday Review*—who has made the experiment can know how many difficulties beset the unfortunate wicket after trial, when he attempts to explore the unfrequented quarters of a great city, nor can he form any adequate idea of the misanthropy which these difficulties mutely engender. In most trades young men are advised to begin at the bottom and work up. But this is not practical in well digging.—*Boston Post.*

For Young Readers.

"HOW VERY NICE 'TWOULD BE."

"Dear mamma, it you just could be
A little girl like me,
And I your mamma, you would see
How nice 'twould be to run;
I'd always let you have your way;
I'd never scold or frown,
You can be happy all to-day,
Now, mamma, can't you?

"If I always ate my jelly-cake
Before bread, and I never make
My head look so—mamma must and take
Me down to comb my hair.
'My dear,' I'd say, 'I trust
You will not see me act or say
Anything improper,' or 'for-sure
You'll find it very sore.'

"If I'd my own candy to buy;
If go downstairs with you, and say:
'What would one skirting like?' You may
Have anything you see.
If never, never, never I'd know
What 'naughty' meant, or 'cross,'
Or 'fretful,' or 'I will not go,'
Mamma, couldn't you?

"And every day I'd let you wear
Your prettiest dress, and never care
If you did get it big tear,
Or dirty it, and say
'My precious,' caress, never mind,
Let's have a romp instead.' Oh,
Now, Mamma, would'nt that be kind?
Then I'd be nice to play.

"I'd never say: 'Well, just a few'
Of 'em,' when you have bought
A car. 'They are too hard for you.
I'll put them by.' I'd eat
Up all the hard nuts myself, and
Let you have the soft ones, dear;
And every time you wanted candy
I'd buy it for you, dear.

"Ahem, mamma, you sound sore
Abed, I'm sure you do;
And I can't be a little girl
To you, mamma, so
Be very, very nice 'twould be
For me, and you, you know,
Now, Mamma, couldn't you?

—*Wide Awake.*

CARELESS JOHNNY.

"I want you to do an errand for me, Johnny," said his mother.

"Will it be long on the road, mamma?"

"Perhaps not. I think it will be in a little while."

"I like to leaves. If you squeeze them they don't mash, and if you drop 'em they don't break, and if you step on 'em they don't go all to pieces. But paper don't feel nice."

Johnny did not like paper sacks. A week before he had been sent to order a sack of coarse salt, and had met the grocer.

"That's too heavy for you," said Nezer, the grocer's boy.

"Not a bit," said Johnny. 'Nezer put the sack on his shoulder and off he went, feeling every inch a man. But on his way he fell in with a knot of boys who were busy trading marbles. He set his sack in a fence corner without noticing that a big nail was sticking from rain the night before. Half an hour after he picked up the sack and his whole stock of seven cunnys, three potteries and four crystals world of glory disappeared in a cloud of dust.

Then he went for his meal-sack. If it could have come quietly, it might have reached home safely, but the jerk with which he loosed it to his shoulder broke a hole in the damp paper. And as he trotted briskly along a little stream of meal went down his back, and made a zigzag streak on the sidewalk.

Johnny hated paper sacks.

Today he was so busy thinking whether he would offer his top or his knuckle-bone for the jackknife in the market; it is bounded to the south by the Rue des Clovs and to the north by the Rue Marcadet, and is completely surrounded by a high stone wall. It covers a considerable tract of ground and was used during the Commune as an artillery park. The entrance to it is through a large wooden door in the Marcadet, opposite the cemetery of Montmartre. It will be well to warn any intending visitor that the authorities, although a very tolerant folk, cannot endure the sight of decent clothes, and that among many healthy symptoms to be noted in them, the most prominent is a deadly abhorrence of the tall hat of civilization. To attempt to take them in, or the other hand by the assumption of "blouse" or of silken "casquette" is absurd, however "spanish and curious" your knowledge of Parisian slang may be; but they will be pleased by the attention, and when you come among them will comment pleasantly upon your good breeding and taste in adopting the outward habits of the country in which you happen to find yourself.

The *camp d'asil* when you find yourself within the entrance is a striking one. Immediately before you lies an open space with grass growing here and there among the ruins of the old forts and walls, and details of battles, at least of Indian fighting, are not interesting. Enough that, after the summer camp at or near Old Zuni, Vargas with his army and the old Spanish flag, and the Cross of the Capital. The slayers were a few hundreds of white men with a sprinkling of blacks were of a number that has never been reckoned.

Fray Francisco Corvera administered absolution to the entire command before battle, and, as the foreign army was preparing for a general onslaught, the Pueblos stole out on the night, leaving the city in possession of the Spanish race which left nothing but desolation in its track.

The brutal instincts of this Vargas (whom I hate and the judicious reader must hate, too), hardened and intensified with increasing power and advancing years. One of the worst of his half race, he labored incessantly for the conversion of the aborigines. His pathos about the unfathomable sweep for cruelty, which we may be sure he endured with increased timidity and the cross cause the object of bitter hatred to the brother he relieved for an inheritance. He it was who wrote to the Viceroy of Mexico, applying for more troops to own to prove valiance at their bravery and test their endurance. The white visitor to the scene is attracted by, the ghastly exhibition of men in various postures undergoing all the pain that their nature is capable of sustaining. Vigorous methods are devised to exhibit the power of the sufferer, and particularly with the design of attracting the admiration of the spectator. One favored method is to cut buckskin through the skin of the back, and through these rawhide thongs, the ends of which are secured to some support aware, after which the victim throws his weight on the rope and remains in this position until unconscious or the swelling sun gives relief. There appears to be a like element pervading all barbarous or semi-barbarous religions. The priests of Isis cut themselves and lifted their bleeding hands in supplica-

"You are a very little boy," she said, drawing him to her lap, "but you are old enough to know right from wrong, and you do know it is wrong to use what belongs to any one else without permission."

"I didn't stop to think, mamma."

"No, you were carried away by your eagerness to get what you wanted. Now listen; a boy who begins by being careless in little things is very apt to grow into a man careless in great things. Such carelessness often leads to crime. Never trifle with a single cent like a careless boy, but ask God to lend her.

Johnny looked soberly into her earnest eyes.

"I never will, mamma. But may't I buy a little of this beautiful pink gum?" He showed six eight sticks rather shamefacedly.

"I'll tell you what it is made of," she said, "and then you can do as you please. Down among the great old wells they use to get a kind of soapy smelling coal oil, into large tanks which hold hundreds of gallons. A thick, gummy stuff settles on the sides of these tanks. They scrape this off and boil it, and put what they call chemicals into it to make it look clean and clear and to take away the smell. Then they dye it this pretty pink color, and put it up for little boys and girls to chew.

"Where's the mustard?" asked his mother.

"That's it—mustard. I forgot the name, but I'll go for it now." He looked rather foolish as she gave him some more money, but this time he did not forget the name.—*Youth's Companion.*

The Wise Dog and the Cunning Sheep.

Many years ago, I spent a few weeks with some friends who had charge of a large milk farm in the State of New York. They made a great many pounds of butter, which was packed in firkins for market. So much churning was done that the cows which were not working by steam was not common then, they were obliged to employ dogs, and sometimes sheep.

Access was always opposed upon the scene, Bruce returned to his rug as if nothing had happened.

Old Sheepy was marched into the barrel the next morning, you ought to have seen Bruce strutting about the basement! If Old Sheepy slackened her pace at all, Bruce would growl; if she didn't mind that, he would bark, and would not stop until he had succeeded in calling the dairymaid to threaten the Sheepy with the whip.

Presents and bones thought these tributes of the dog were what he liked, and a sheep that could tell the days of the week, as the dairymaid did, no doubt knew enough to run away the night before her turn came, was just as wise as the dog.

The family were loud in their praise of Bruce, however, and, as a reward for his shrewdness, talked of relieving him of his duties. But this question was a success in training another sheep.

I left the farm-house before this took place, so I cannot say how Bruce bore his laurels. Pah, if I had had my way, I would have rewarded Old Sheepy.—*Nursery.*

—Although Yazoo is one of the largest and most populous counties in Mississippi, there is not a railroad touching it.

St. Jacobs Oil

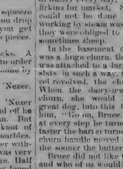
THE GREAT GERMAN REMEDY FOR RHEUMATISM, NEURALGIA, SCIATICA, LUMBAGO, BACKACHE, GOUT, SORENESS AND CHEST, SORE THROAT, QUINSY, SWELLINGS AND SPRAINS, FROSTED FEET AND EARS, BURNS AND SCALDS, General Bodily Pains, TOOTHACHE, HEADACHE, ALL OTHER PAINS AND ACHES.

No Preparation on earth equals ST. JACOBS OIL as a safe, simple, certain, and cheap External Remedy. A trial entails but the comparatively trifling outlay of 50 Cents, and every one suffering with pain can have it. Directions in Eleven Languages. SOLD BY ALL DRUGGISTS AND DEALERS IN MEDICINE.

A. VOGELER & CO.
Baltimore, Md., U.S.A.

WOMAN'S TRIUMPH!

MRS. LYDIA E. PINKHAM, OF LYNN, MASS.,



DISCOVERER OF

LYDIA E. PINKHAM'S VEGETABLE COMPOUND.

The Positive Cure

for all those Painful Complaints and Weaknesses so common to our best female population.

It will cure entirely the worst forms of Female Complaints, all Ovarian Troubles, Inflammation and Ulceration, Falling and Displacements, and the consequent Spinal Weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel tumors from the uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use. It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach, indigestion, bloating, nervous prostration, sleeplessness, depression and indigestion.

That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the female system.

For the cure of Kidney Complaints of either sex this Compound is unsurpassed.

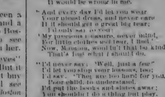
LYDIA E. PINKHAM'S VEGETABLE COMPOUND is prepared at 233 and 235 Western Avenue, Lynn, Mass. Price $1. Sent by mail in the form of pills, also in the form of lozenges, on receipt of price, $1 per box for either. Mrs. Pinkham freely answers all letters of inquiry. Send for pamphlet.

No family should be without LYDIA E. PINKHAM'S LIVER PILLS. They cure Constipation, Biliousness and Torpidity of the liver. 25 cents per box.

Sold by DRUGGISTS, Everywhere in U.S., Canada, &c.

FOR SALE BY DRUGGISTS.

Dederick's Hay Presses



Dr. BULL'S COUGH SYRUP

Formula of Dr. Theophilus Redwood, Professor of Chemistry, Pharmacy and Botany, Royal Veterinary College, and Pharmaceutical Society, Great Britain.

WILMOT'S FEVER AND AGUE ATOMIC

For Chills and Fever AND ALL DISEASES Caused by Malarial Poisoning of the Blood. A WARRANTED CURE.

Price, $1.00. For sale by all Druggists.

FRAZER AXLE GREASE.

Next to the Worth the money. For sale by all dealers. Manufactured only by Frazer, Bolles & Co., Boston. SOLD EVERYWHERE.

$100 A MONTH! Salary or allowance paid. Agents wanted everywhere. Address P. W. ZIEGLER & CO., 191 S. Fifth St., Chicago, Ill.

The Goat.

The goat is a native of the vacant lot about the city, and there are lots of them.

The goat is omnivorous. He will goat anything that he sees and will seize any thing that he can get.

His principal food, however, is playbill. He is very fond of tobacco.

Let us honor him for his love of bill letters.

The goat is generous to a fault. He presents a couple of horns to everybody he sees.

In the matter of mere cash the Cashmere goat is the most famous.

Goats do not like the outskirts of large cities; also heavy skirts.

The goat is noted for his hunting, but he never flags.

The goat is one of the signs of the zodiac, signifying that he has a propensity to knock things sky-high.

He never gets his goat himself. That is to say, never gets over the ca-as.

Shakspeare understood the peculiarity of the goat when he said, "Stand not upon the order of your going, but go at once."

The goat is a wide-awake animal. He is never caught napping, notwithstanding the many cases of kid-napping you may have read about.

For many years the goat was the only butter known.

Goats love to get on a high rock and run themselves. Give them a chance and they will always seen a sunny climb.

The god Pan was a sort of half-goat. All goats do not pan out as well as he did.

Ba-a-a!—*Boston Transcript.*

MISCELLANEOUS.

—There left Ireland last year 96,557 emigrants to other lands.

—In the museum of antiquities uncarthed at Pompeii is a bowle-knife of the American pattern.

—A brought sleeper for the City of Mexico and Acapulco from New York is among the certainties of the next few years.

—In the Isle of Man the right to vote has been accorded to all women who possess an estate yielding a pound sterling per annum.

—Mr. Wash. McLean, of the Cincinnati *Enquirer*, has purchased a lot in Washington on which he will erect a handsome residence, to be presented to his daughter, the widowed General Hazen, of the Signal Service.

—An exasperated Pennsylvania farmer, who had a great number of sheep, placed some poisoned meal where he thought it would do the most good. In turn one thousand crows came to mourning on finding the dead bodies of egotistical suspicious dogs.

—A Cincinnati florist of the Queen dwelled against a dressmaker in a suit in which she claimed seventy-eight dollars for making up a dress the materials of which cost only seven dollars. He didn't believe in the old saying that seems are always safe.

—The rural newspapers of Canada complain of a general exodus of young men to the United States. Towns, in many cases, lose all their unmarried males, while the girls left behind are tragedie females and for the future general prosperity of the community.

—In a farm belonging to the Southern Pacific Railway, California, the Apache Chief Eskiminzin and his band of Indians employs fourteen Mexicans and Indians. He has 150 head of cattle, a number of fine horses, some good wagons and agricultural implements, and will go into stock-raising and the cultivation of the soil.

—Two peasants of San Remo, in the vicinity of the Italian frontier, stumbling lately at Monte Carlo, sold their entire earthly possessions, and, having invested the proceeds on the green cloth. The dealer having raked in their last cent, they went out and hanged themselves under the wheels of an express train and were killed.

—An enterprising manufacturer of optical instruments in Berlin shows his appreciation of his widespread circulation about infected pork in Germany by advertising spectacles for hogs. He has a pamphlet, with specimens of trichinæ prepared for examination, and full directions for detecting the presence of parasites in meat of any kind.

—The oldest fruit-orchard in California, according to a recent estimate but that we could supply the demand ourselves and not have to import a million dollars' worth a year. The poor trees have to have grown to great size, as they were planted about 1775, and still bear an abundant crop of fruit, though quality, in the same country are some almond trees that were planted by the padres, and continue to yield plenty of nuts.

—The largest excess of males over females in the United States is in Montana, where it is 158 per cent., and the smallest excess is in Mississippi, where the sexes being four-tenths. Kentucky's male population is only two per cent larger than her female population, as is Arkansas'. It is 126 per cent. larger. In Nevada 128 per cent. larger. Girls are needed badly in all the Western Territories.

—An army officer, writing to the *Army and Navy Register*, says that the Indian Governor Ilyland, who is very similar among the subordinates in the Pabean department. He established a system of rewards for excellence in industry, for reading, billiards and refreshment, was social and pleasant in his habits and did not neglect his wife. On all these points he was different from the Indian Governor Ilyland, who, in addition to his other vices, was a miser, and a bad husband.

—The stenographic machine which we mentioned in our last issue was presented March 11 to the Société d'Encouragement, the meeting being under the presidency of M. Dumas. It is a small instrument, about 8 cm. long, placed on a stand two and a half feet high, on which it is easy to play with both hands. The number of elementary signs is only six, which by mutual combination give twenty-seven phonetic letters. It has been worked with an astounding velocity, reproducing a speech pronounced by a man reading a passage from a book. The limit of velocity is stated to be 300 words in a minute, which is more than sufficient, no speaker having ever attained more than a third of that speed. The machine is also said to be very neatly printed on a paper band which comes out of the apparatus. They can be read by any person conversant with the peculiarities of the system, without the smallest knowledge of stenography. The machine is made from linden blossoms, and the inventor is a young lawyer of Bordeaux

THE CRAIG MURDER.

Additional Testimony Related by the Counsel Statement of Facts Published.

The list of witnesses drawn up by the Professor Mapes and is entered against Charles Daniel Rosenthal, 19, workman, 2. John Andrew Jennett Hardwood, 20, painter; Stephen Lynch, Cue Gibson, 27, gentleman; Samuel Venable, Maitland, 27, accountant; and Thomas Mowatt Hall, aged 21, gentleman. After Lynch entered the names of the crime, of which the prisoner was accused, namely, the murdering, one of the Governor Alexander II., the Lord gave us to relate the circumstances upon which I would refer, as recited by official report. At the time the first news arrived at the office which excited much deep and universal feeling. It will be as well to commence it at the time of expending what had been said already.

Saturday, October 1, which on March 1, 1879 the engineer left the Maitland railway in the evening, accompanied by the two men and passing three hundred yards, turned to the right, where the house of the Gatherers stood. Behind is a stable, empty, but the gentle, police station and hotel are seen. Dept. from any Major Knollys-street. The carriage had gone only fifty minutes from the corner of Bagshot-street, when at the corner I recently a Constable stopped and took down the light of the carriage. Assistant from the south, and seeing him by one hand, he knew a man whom he had met a week previously at the Gatherers' Arms, and who had informed him that the carriage was coming. Now this was informed Constable, and stopped and asked him the reason was coming. In spite of the opinion the prisoner answered, I am going to the Gatherers' Arms, where the prisoner was met another gentleman, and where the prisoner was met another gentleman, and where the prisoner was met another gentleman, and

NEWS SUMMARY.

Important Intelligence from All Parts

The U. S. Senate.

THE resolution in the matter of officers was presented on the 18th, and a motion for an executive session was made. The report of action by the committee was referred to. Mr. Hoar offered a resolution declaring that, in the judgment of the Senate, political assessments for campaign purposes is the evil out of which the system of appointments to office by the United States Supreme court mount the ruin of the money and corruption in the district of New England ought to admit to have been the ugliest that the history of that point is adjured, no one regret to forward to the Senate, and after a brief discussion it was agreed to reference to the Judiciary committee. Mr. Lodge from the floor in the mechanism of the Senate, and Mr. Hoar replied that he had misapprehended the purpose of the resolution. Mr. Brown asked that the resolution be printed in the record, which was done. The Senate then went into executive session, and soon adjourned. The nominations were referred to the Committee on Judiciary. A motion to go into executive session was lost—30 to 27. A motion by Mr. Cameron (Pa.), that when the Senate adjourn it be for the day it is until the 24th was opposed by Mr. Hoar, who contended that the Senate should not be compelled to remain in session for days after which the motion was carried by one majority. Before the vote was announced Mr. Grimes stated that, as he understood Mr. Hoar, he was in favor of the motion as an affirmative vote on this motion as an affirmative vote on the motion to adjourn. Mr. Hoar said he would be glad to vote for the motion for the same reason, whereupon Mr. Cameron (Pa.) quickly replied "Nothing of the sort," and changed his vote to "no." Messrs. Hale, Sherman and Ferry also changed their votes to the negative, and the vote was announced as 28 to 28. Mr. Hoar then voted "no," and the motion was lost. The Senate then adjourned, after which the session adjourned for the day.

MR. MORRILL introduced a bill on the 19th, after which there was a running debate, in which Messrs. Morrill, Hoar, Bayard, Jones, Hawes, Brown and Hawley took part. Adjourned to the 24th.

Domestic.

W. F. G. SHANKS brought suit to recover $250,000 damages from the American News company of New York for circulating reports of Shanks alleged to contain a libel against him. The jury awarded him $5,500.

ONE man was killed and two others badly burned by a steam gas explosion in a mine at 609 Creek Street, near Wilkesbarre, Pa.

THOMAS J. DELAWATTER, who killed his sister in a hunter at Danville, Va., to protect the honor of his family, has been acquitted on the ground of temporary insanity.

THE revenue officers have captured 1. E. Richmond, a North Carolina moonshiner, after a desperate fight, in which he was wounded.

THE telephone brokers of Pittsburg, Pa., to the number of 500, struck on the 12th for an increase of wages.

WILLIAM RYAN and John O'Neill were killed at Buffalo in the fight by the collapse of a smokestack which had been previously partially destroyed by fire.

ONE wing of the Southern Illinois Insane Asylum at Anna was destroyed by fire on the night of the 13th. Loss about $120,000. One of the insane patients was burned to death, perished in the flames.

THERE were 1,407 smallpox and 156 typhoid fever patients in the New York hospitals on the 19th. Three cases of cattery were also said to have been reported in that city by Dr. F. N. Otis.

L. A. GILBERT, a Pittsburgh lawyer, recently lost in a Chicago hotel a mortgage for $10,000 which he had given to secure a $6 Grier, of Pennsylvania, to be Third Assistant Postmaster-General—the latter one A. B. Hawes, appointed Assistant Attorney-General of the Post Office Department.

THE session of the Forty-sixth Texas Legislature has closed. The Otho Legislature adjourned sine die on the 20th, after a session of 166 days.

THE Legislature of Michigan has passed a bill to establish a State Reform School for Girls, the institution to be located at Adrian.

WASHINGTON events of the week indicate that the resignation of Second Assistant Postmaster-General Hatch, relating to the discovery by Postmaster-General James that Mr. Brady was derelict and unfaithful in the discharge of his duty, is very far from the truth. It now appears that Mr. Brady, on the 1st of January, 1881, the day he entered upon the duties of his office, found over $1,000 so-called "Star Routes" was increased from $700,000 to $2,500,000 annually to cover the expenses of abandoned star and additional trips. It was said to be plain, however, that the increase was in the interest of the contractors and at the expense of the Government. Other irregularities had also been discovered.

MAJ. DELOS A. LOCKWOOD, the Washington lady lawyer, has been fined an aggregate for contempt of court.

A DAY or two ago, while stealing a ride on a freight train, Joseph Cook, living near Louisville Road, a man named Looney had the upper hand of his head taken off by striking a bridge.

LEVINE PINKARD was hung at Lonoke, Ark., on the 22d, for the murder of her husband. She was a negress, and enjoyed considerable notoriety on account of being the last woman hanged in the Southern States in twenty years.

IT was announced on the 23d that the Southern railway connection at Atlanta will change from Georgia railroad to the Atlanta &

—The steamer Lucerne will run between Chicago and Manistee, touching at Ludington, Pentwater and Big Sable

Outraged Democratic Virtue.

The Democratic ale d'spensed to assassinate a woman though they have it not. They are terribly wrought up just now over what they call an "outrageous political bargain" between the Republican Senators and Malone, of Virginia. They justify their present obstructive tactics in the Senate on the ground that it is a high moral duty they owe the country to resist the consummation of this "bargain." Their virtuous indignation, however, does not appear—first, because the Senator from Virginia should refuse obedience to the Bourbon caucus and act with the Republicans; and, secondly, because the Republicans should consent to the co-operation of one whom the Democrats please to call a "rogue and a knave." The democratic managers are no contradiction in this state of things. The Democratic caucus might as well resell of the vote of a "republican," and the transaction would be all right; but if the Republicans entertain such a purpose the sentence is disreputable!

How the honorable politicians can get up over the appearance of resentment at the suggestion of a "bargain," is difficult to understand. It is a new kind of political trade which the Democrats have not made in the past few years in their unceasing effort to grab the spoils of office. Look at the bargains they have agreed to make in Illinois Senator and their special rush as near like a chapter in "A Fool's Errand" as one pea looks like another. Mr. Heath's plantation of nearly 1,000 acres was to "absorb" Parish, ten miles below Columbia. He and his brother, who is a New Orleans merchant, bought the place thirteen or fourteen years ago, and had established upon it a gin factory, grist mills, and repair shop, fitted up with improved machinery. For several years they ran the place under a white overseer, and were not seriously interfered with by their neighbors, but in 1877 or 1878, when a negro was put in as overseer, the trouble began.

Says Mr. Heath: "The Sheriff of the parish came to me and my brother and said something like this: 'We understand you are to divide up your land among ten niggers for them to work it without a white overseer. The niggers are stealing everything they can lay their hands on in the way of stock, even when they have a white man to oversee them, and what will they do if left to themselves? The white people are not going to stand it. We cannot afford to do it, and you cannot afford to do it, and we don't mean that you shall start in that way.'

The reply of course was that the brothers, having paid for the place, had a right to run it as they pleased. A negro named Harris was appointed overseer, and was threatened. Governor Warmoth said he did not have militia force enough to protect all such cases, and the result was that a party of masked men rode up to his cabin at night, called him out, and shot him, making such wounds that he is now a cripple Then the usual Ku-Klux placards were posted around ordering Mr. Heath to leave the place, and threatening death and destruction of the property. But the real trouble began about Christmas last. At that time a young Baltimorean went up to Heath's place with a view of buying him out. He represented himself to the people there as being a native of Louisiana. They welcomed him very kindly and said: "We are glad you are coming here to take Mr. Heath's place. Mr. Heath is a good man. We don't have anything against him. He is a good fellow, but he is a cursed Yankee. We don't want that kind here, but want our native citizens." Says Mr. Heath: "I had been for some time trying to effect a sale and get out of the country as easy as possible. While the neighbors showed no enmity to me, [as] always treating me with the greatest apparent respect and friendship, they were at the same time exhibiting the greatest enmity behind my back. I had had interviews with one or two parties about selling out, and I would have sold out if a very great sacrifice if I could have seen a chance to get away safely, but I would have sold out [as enough by letting them take my property, taking [such a bargain] as I was letting them off for the proceeds as fast as they could turn it into money, everything clear, to get out about $30[0] or $40[0] worth of goods in about twenty minutes we had to work for, and we could not sell as we of being hunted up alive. The only thing that saved me was that I let the word leave the planes away from the building in which we were sleeping.

Mr. Heath claims that he had been a public benefactor rather than an enemy to the parish where his property was, and can only explain his persecution by his desire to elevate the negro. He declares that many acts of cruelty and cowardice by various "The trouble is that the more Southern race has turned toward anchor that comes to their neighborhood, whether native or foreign, who are opposed to the Solid South. They know what my politics were, although I never talked politics to them or advised the negroes, beyond telling them what I thought was for their interest. I never advised them who to vote for, and tried to keep aloof from political altogether. A few days before I came away the District-Attorney of Caldwell Parish was in New Orleans, and I took the trouble to hunt him up, and had a long talk with him. I said to him: 'Mr. Ware, you cannot afford to have me hunted out and driven out of your parish without taking some notice of it. Well,' he said, 'I think likely some folks will notice it.' This was a month after the fire and more, and nothing has been done. I said to him: 'I have got a letter that I received last summer from the post-office just above me, Hogan's Landing, telling me if I returned to the parish they would pay me a visit. I am going to mail that letter, and you may make such use of it as you think proper.' I told him I would advise the parish to offer a reward of $100, $200, or $500, that I would offer as much more to thoroughly investigate the matter. I have made no secret of those matters in New Orleans, and the fact that those same allusion has been made to the fire in my Southern newspaper that I was seeking. Whenever a negro is murdered there in my parish they take no more notice of it than though it was a dog shot. They don't even hold an inquest. They don't give publicity to anything of this kind. When a public man like Judge Crawford is shot everybody thinks that out."—*Special to Chicago Tribune.*

POLITICAL BREVITIES.

—What a noble pair of blunderers Hill and Brown are! Georgia is in luck.

—General Butler and David Davis should consolidate. They are the two great American statesmen in search of a job.

—The mad that is to split the Solid South will strike its first blow in Virginia this fall, and the echo will be heard throughout the whole country. The Old Dominion, for the first time in many years, will be the scene of a fierce political battle.

—There is a pretty unanimous protest against Hill for—Vice-President. Even a popular vote would have no very great significance. The able Democratic editors declare that the old name is good enough for the party, and they are right. Any other name would be no good for it.

—It was once remarked by Horace Greeley that, whilst every Democrat was not a thief and a murderer, it was an unconfronted fact that every thief and murderer was a Democrat. Senator Brown seems to have unconsciously plagiarized this great truth.

—As an unknown the Georgia Senator (Brown) was great; as a known he is unreliable and insignificant. He has shrunk all proportions, shriveled up in the heat of his own volubility. No one by one the "ones left" under the wind of his tornado gone.—*Detroit Post and Tribune.*

—The old Democratic party has never done aught else but deceive the South. To it the South owes its present wrongs. To it the South looks to undo all its evils! It will that day stand forth with new purposes, and other aims as the career and a grander destiny.—*Chicago Inter-Ocean.*

—The sentimental gush and political claptrap" is what a Mississippi Congressman calls the famous letter of observation of General Hancock concerning a "full vote, a free ballot and a fair count." Yet the Congressman is not a Republican, but an undiluted Democrat. This seems to destroy the last of the lames presented to the Democracy by General Hancock. One by one they have all been discarded. The party will have to start in fresh next time with a new candidate and a new set of principles. Benjamin Franklin Butler is the man for them. He can supply all the principles they can handle and have a big supply left.—*N. Y. Tribune.*

MISCELLANEOUS.

—A granite monument is to be erected on the spot in Madison where Maximilian was shot.

—Charles Patch was tarred and feathered by some women at Newfield, Me. It made him insane.

—At a recent Boston concert the programme was printed on thin Japanese paper, so as to avoid the usual rattling.

—The census of the German Empire shows that Alsace-Lorraine has increased in population in less proportion than any other division.

—W. R. Fish, the ex-editor of the New Orleans *Republican*, who died recently, is credited with having first used the term "bulldozed."

—It seems that the sun is greatly agitated just now, and is sending out tongues of flames in all directions. Jupiter is said to be responsible for the disturbance.

—When the late Czar was a handsome child and walked the streets of St. Petersburg with a guard or two, the people followed him in crowds, trying to kiss the hem of his garments.

—Richard Wagner, the composer, has a pet cat which comes on his bed and eats with him at table. He has always had a predilection for cats, and has owned more than a hundred during the last forty years.

—Mrs. Betsy Perkins, of Taunton, Mass., who remembers incidents of one of Washington's inaugurations, recently celebrated her hundred and second birthday by giving to all her daughters a one-thousand-dollar bond.

—A Fall River, Mass., woman, who was badly burned some time ago, is having skin grafted on her body, and some five hundred having already been placed there, and the prospect is good of restoring her arm to usefulness.

—A correspondent of the London *Daily News* writes that nine years ago the Rev. Thomas Snow, then Vicar of Richmond, Surry, was traveling in France with his eldest son, when the wife dressed that she saw both put in a hearse. On her husband's return, a few weeks later, she mentioned the circumstance, and found out that he had that very day entered a hearse for shelter from a storm and had been driven in it to Paris. Again, Mr. Monkhouse, incumbent of Newstead, near Kewick-on-Trent, was driving one night from a land he had failed, and next day withdrew $25,000 from the Newstead Bank that he had stood well, put the money back. In a few days the bank failed and he lost all.

—One striking illustration of slovenly haste in law-making is furnished by a law that passed the Rhode Island Senate at its present session. It enacted that "no clergyman in Rhode Island can join persons in marriage unless he has filed in the Town Clerk's office a certificate of his ordination from the authorities by whom he was ordained, or a copy of the records of the religious denomination showing him to have been ordained." This law if put into effect, would include in its prohibition the best known and most distinguished clergymen and Bishops of the State. Some of them, who have officiated for a generation or more, would have found it difficult or impossible, after so long a time, to obtain the required certificate, and might have been wholly deprived of the power of wedding the members of their own congregations.

For Young Readers.

WHAT THE ROBIN TELLS.

A robin sits in the cherry-tree,
Chirping, merry, throat bare;
I hear a warble, clouting clear,
And I know what the robin says.
Twenty, merry, cherries, for me!
From the gentle spring will come.

Twenty is best, the robin says,
Twenty, merry, cherries for me;
There is no money within the lower,
No bread in the cupboard,
But when the Robin's song you hear,
You know the berry spring is near.

The best arrival from countries far,
Twenty, red, cherries,
And next Sunday in her golden car—
Robin's song is always there,
First came cool March, then breezy May,
Then baby April, next June and July,
And maiden May. The cherry crowned all,
Hide it in the nest of fledgling robins.

The Robin sits in the cherry-tree,
Warbling, merry, throat bare;
He whistles loud, he whistles clear,
He tell the children spring is near,
Twenty, merry, cherries for me;
Now you know the spring will come
Unless the Robin tells a false tale.

A STORY OF REVOLUTIONARY TIMES.

If our heroine, Cynthia Smith, walked the earth to-day she would be a great-grandmother. But at the time of this story, 1780, she was only a small girl who lived in a log house near the Santee River, in South Carolina. She was twelve years old, four feet and two inches high, and, for so young and quiet a person, she was of much help and relief as you could have found in all America, for the War of Independence had been going on for three years now, ever since Cynthia could remember.

Every one in the family but the baby could tell her little heart had beaten loud at the story of the famous "Boston Tea Party," when the people, disguised as Indians, had been emptied into the harbor because they had refused to pay a penny more than a penny for a pound of tea.

"And New York and Philadelphia were so angry at the way the King's ships turning tail, and going where they pleased, that they burned all the tea and stored up the rest in the parlor—waked she.

"Hurray!" shouted John, and Jack, and William and Ebenezer, Cynthia's brothers. "Hurray!" echoed Cynthia, as she understood all about it.

The following year, when England shut up Boston harbor, and would not "obey the law," never a bit of rice did Cynthia get to eat, for her father was always Carver South, so did many another Southerner.

"Hurray!" again, John went to Massachusetts to visit Uncle Hezekiah, and the next June Jack went, and he had been shot dead at the battle of Bunker Hill.

Cynthia wept lost tears on her coarse, homespun apron, but she cried when she saw Jack's blood-stained hat when Jack, at 15, C, has a mind of fifty men, insisted on joining the Virginia Riflemen, and following a certain George Washington as leader.

"It's 'Liberty or Death' we have marked on our shirts, and it's 'Liberty or Death' we have burned into our hearts," Jack wrote home; at which the mother's heart broke, for she knew the father smiled grimly.

"Just one, just two other boys," said the latter; "we'll have it hot and heavy at our own doors before we're through."

That was because Will and Ebenezer helped to defend Jack's interests, and Cynthia longed to be a boy, that she might indulge in a private skirmish with the "Britishers" on her own account.

But she had little time for even patriotic dreamings and yearnings. There was a deal of work to be done in those days.

Cynthia helped to weave cloth for the family gowns and trousers, and to spin and knit yarn for the paternal and fraternal stockings. This kept her very busy until 1776, when two great events took place.

One was the signing of the Declaration of Independence; the other was the birth of a red and white calf in Mr. Smith's barn. Which was of the most importance to Cynthia it is hard to say.

To be sure she tugged from head to foot at her father's ringing tones, as he read from a roll of paper some one had given him. "All men are born free and equal;" but she also went wild with joy when her dear father said he may keep that bossy for your own, if you'll agree to name her, Cynthia."

Cynthia took the calf into her inmost heart, and she named her "Free'n'equal." That was the way the words sounded to her.

If ever any animal deserved such a name, this was the beauteous. She scorned all sweetly, looked up her head, and went unswerving round the plantation on her own sweet will, only coming about eight times in the month of July to be milked.

"Free-'n'-equal was Cynthia's only pleasure, for no children lived within six miles. As the calf grew into a cow, Richmond, Surry, was traveling in France with his eldest son, when his wife dressed that she saw both put in a hearse. On her husband's return, a few weeks later, she mentioned the circumstance, and found out that he had that very day entered a hearse for shelter from a storm and had been driven in it to Paris. Again, Mr. Monkhouse, incumbent of Newstead, near Kewick-on-Trent, was driving one night from a land he had failed, and next day withdrew $25,000 from the Newstead Bank that he had stood well, put the money back. In a few days the bank failed and he lost all.

—One striking illustration of slovenly haste in law-making is furnished by a law that passed the Rhode Island Senate at its present session. It enacted that "no clergyman in Rhode Island can join persons in marriage unless he has filed in the Town Clerk's office a certificate of his ordination from the authorities by whom he was ordained, or a copy of the records of the religious denomination showing him to have been ordained." This law if put into effect, would include in its prohibition the best known and most distinguished clergymen and Bishops of the State. Some of them, who have officiated for a generation or more, would have found it difficult or impossible, after so long a time, to obtain the required certificate, and might have been wholly deprived of the power of wedding the members of their own congregations.

"Will Hale care of ourselves, that's what we'll do. Mother and Uncle Hale rice. And, Free-'n-equal, you've got to be the mark, and give more milk than ever to keep us strong and well."

"I trust me for that," said Free-'n-equal's eyes.

And she kept her promise. Rich yellow milk did she give, gallon after gallon, Cynthia and her mother worked like wrens, and toiled the cream.

There were dangerous days all along the Santee River, for Lord Cornwallis' troops were now in the midst of the land-waste the country. But Cynthia was not afraid—no, not even when Lord Cornwallis came within three miles of the plantation. She said her prayers every day, and believed implicitly in the guardian angels, and a certain cave to fetch her help if danger came.

"Just let the soldiers touch anything of ours, and see what they'll get!" said she, with unconscious grim.

Free-'n-equal was perfectly sure Cynthia could protect her, and would, in all safety, if need were, and munched her cud in blissful security.

Oh no, she was not afraid, no fear, even when a red-coat did sometimes ride above her head on a big, blustering cloud. She regarded him no more than she would a scattered bird. She was not afraid among whom her head whom she went into the forest hard by to gather chips.

So no wonder that she was taken roughly aback when, one afternoon as she came home with her bundle of sticks, her mother met her with wide-open eyes and a pale face.

"Cynthy, they've been here and carried off Free-'n-equal!"

"Thee?" gasped Cynthia. "Who?"

"The British soldiers. They had a rope, and they said they were in a hurry, so they jerked her along. Cynthy, Cynthy, what shall we do?"

Cynthia uttered a sound between a groan and a war-whoop, and darted out, and her mother followed. Many soldiers ran, on and on. Her yellow sun-bonnet fell off, her long, thick, dark-brown curls were covered with dust. One mile, two miles, three miles—and then Cynthia saw sight that made her heart stand still

CHARLEVOIX, MICH.

WILLARD A. SMITH.

Mrs. Partington, the famous old lady whose sayings and doings have been recorded by Benjamin P. Shillaber, is dead. She was a character that will be missed by many.

It is rumored in private circles in the Capital that Senator Conger is one of the most romantic and sentimental of wife and love. Foster declares that if he can only cause Mr. Conger to commit adultery he is certain to be nicely rewarded with his own wife. When Mrs. Conger scatters on the gallery of the house it was immediately known that Mr. Conger would not arrive all even by his graceful manner and said "Ta, Ta, Ta." Some were in favor of this, would not care. "Now, look here, sir," he said, and down his head came on each side of Mr. Conger's head, and he was quite astonished that a man should be in favor of the honest Democrats. But for the honor of the Senator I believe the report of his pure and exalted character.

Mr. P. T. Barnum has gained for the circus business a national and world-wide reputation and advertising. He has used a Pinkham's vegetable compound, and has long ago by its wonderful cures, won the confidence of the people. Barnum has got off to a fortune on the Pinkham, and is now making a different style for his show. Compound of Sarsaparilla or Indiana is the name which confidence and Kidney-Wort is the name which confidence and Kidney-Wort is the name which confidence and Kidney-Wort

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

On the 25th Mr. Blaisdell asked leave for the Committee on Judiciary to sit during the recess of the Senate, if that should ever occur. Mr. Sherman, after explaining some of the subjects which had been referred to the committee, such as the Pacific railroads, the Indian question, the Mormon question, the Louisiana question, and the Texas question, moved that the leave asked for should be granted. The motion was agreed to. Mr. Ingalls, in a speech, after which several salutatory remarks were noted down, in answer to Mr. Morgan said he was finally carried.

A vote about nothing was held on the 27th. Mr. Morgan offered a resolution, which was referred to the Committee on Foreign Relations, declaring that the interests of the people of the United States of America and the welfare and security of the inter-oceanic canal to be constructed across the Isthmus of Darien require that the control of such canal should remain exclusively in the hands of the Government of the United States, with a view to the neutrality of such canal between the nations of the world. Mr. Hoar, in order to escape a vote, he deliberately cut off his right hand with a revolving saw.

The Atchison, Topeka & Santa Fe Road has reached Las Cruces and Mesilla, in New Mexico.

In the Woman's Presbyterian Foreign Missionary Board, in session in Chicago on the 26th, the receipts for the year were stated to be $75,000. All Page, the newly appointed President, and Minneapolis was chosen as the next place of meeting.

Four schoolhouses were struck by lightning and instantly wrecked in Louisville, Ky., on the 26th. Two of the teachers were severely stunned by the shock. Their clothing was literally torn from their bodies.

ELLEN M. FREEMAN, who threw pepper in the eyes of Howard S. Ingersoll, of New York, because he refused to give her employment, has been fined $100 and sentenced to the Penitentiary for one year.

A gentleman, supposed to be in the employ of Postmaster-General James, told a New York reporter on the 26th that the order to the "star-route" frauds, that it was not the intention of Mr. James to investigate the doings of Brady so much as it was to investigate the whole postal-contract system with a view to ascertaining how much of a success it was. At the same time those who were shown to have been implicated in the "star-route swindles" would be prosecuted to the full extent of the law.

The Grand Jury at St. Louis have returned seventeen indictments against Robert Lindsay and three against Charles Bell, in connection with the Missouri loan frauds.

Maj. Jules Burnow sued John Hinchcliffe, of Paterson, N. J., for breach of promise, and his second a verdict of over $5,000.

The right of Jill Warfens to open letters addressed to United States consuls has been affirmed by the Assistant Attorney-General of the Post-Office Department.

Five fishermen assassinated Girard Point clear, six at Philadelphia on the 26th, with 70,000 bushels of grain. Several adjoining buildings were also burned. Loss about $200,000.

The strike of the St. Louis street railway conductors and car-drivers continued on the 26th still, and several riotous disturbances occurred, in order to secure the suppression of the latter the Governor called out the First Regiment of Infantry, etc., and the Police Commissioners gathered four companies of their reserve, and placed on duty along the tracks a large force of special men. With these precautions cars were run on Olive street and Washington avenue. The strike was virtually ended on the 26th, and all the street railroads of Baltimore reported the Brunswick street railroad operations. The wages generally accepted are 18 cents per hour for conductors and 12½ for drivers. The proposed Conductors and Drivers' Union was abandoned.

Bradstreet's reports 195 failures throughout the United States and Canada during the week ended April 23, which was an increase of nineteen over the previous week. The average per week for the year has been 191. There were also granted a number of expressions to relieve temporary embarrassment.

Attorney-General MacVeagh has given an opinion affirming the right of the Postmaster-General to prohibit the delivery of registered letters and the payment of money orders to M. A. Daniels, Secretary of the Louisiana Lottery Company.

Max Senn, of Grand Island, Neb., recently killed her canine children with a razor and then shot herself.

The State's Attorney at Louisville, Ky., has commenced criminal proceedings against Ellis & Nashville Railroad for running trains and employing men on Sunday, in violation of the Sunday law.

Personal and Political.

The status of Admiral Farragut, in Farragut Square, Washington, was unveiled, with appropriate ceremonies, on the 26th, in the presence of thousands of spectators. It was executed by Quartermaster Rogers, who sold the position of Quartermaster on Farragut's flagship at the time of the battle of Mobile Bay, which he occupied to the end of the war, which he subsequently threw up.

Gen. Sherman was all of the time on the 26th in an effort to establish the truth or his former statement that the Spaniards had no hand in the recent Virginius affair with Mr. Mathews. After he had finished the remarks he was questioned by reporters, but all charged that the latter was still in the dark. Mr. Mathews is the newspaper correspondent who sent Attorney-General for a copy of the report of Special Agent C. O. Langhorne to the United States Marshal for the Western District of Virginia. Adjourned to June 5.

Domestic.

A secret freight service was secretly burned on the new route from Chicago to Omaha, and the last delivery of E. C. Smith in New York on the evening of the 26th. One man was burned to death, and several badly injured by the fire was $75,000.

The Tribune of the 27th says the strikers in Chicago had practically ended, as the demands of the strikers were just and moderate, and had been acceded to by them.

The sixty-second anniversary of the introduction of Odd-Fellowship in America was celebrated throughout New England on the 26th, with imposing ceremonies.

A meeting of Socialists on the 26th was the Communists and Nihilists in that city were constantly receiving accessions to their ranks. The recent manifesto to the Czar had been distributed on red handbills.

The Republican United States Senators held a caucus on the 27th, at which the question of declaring in favor of Republican nations, executive sessions and other matters were discussed. No action was taken, and the whole matter being referred to a committee, to report at a future meeting. It was said Senator Miller had succeeded in Dawes that, unless the Republicans moved for executive sessions, they would not be charged with the Democrats for one; that for felt bound to break the deadlock.

The Treasury Department reports that the exports from this country for the year ended March 31 were $823,946,444, an increase of $245,435,930. In the matter of gold and silver the United States gained $75,943,707 during the same period.

A massacre of the 27th says the police and the street railroad employees had come to blows, the latter having attempted to run cars under the police guard. The police charged the strikers, and were driven back by a shower of stones. Several officers were badly injured. Gen. Sherman ordered out the First Regiment of Infantry, and the Police Commissioners gathered four companies of their reserve, and placed

A London telegram of the 26th says contracts had been made in England to carry 50,000 Swedes and Norwegians to the United States.

The Mexicans engaged in running shirts across the Rio Grande at Laredo declare that they will not submit to the destruction of their business by the erection of an International railway bridge.

A new date on the new czar of Russia sent a letter of congratulation to the subscribers of his diplomatic accession, and presented him with portraits of his murdered father and himself set in diamonds.

By the burning of a shed on board the Norman transport-ship Mars, at Wilhelmshaven, on the night of the 25th, two marines and four sailors were killed and eighteen other persons injured.

On the 27th the cable reported the death of General Ludwig von Benedek, who commanded the Austrian army in the campaign of Soulte de Gravatte, the French critic and Dantist.

A St. Petersburg telegram of the 28th says that to effect the necessary alterations at the castle of Gatschina for its occupancy by the Czar several hundred artisans labored for fortnight day and night long, and that silence in the church is unlikely. The wooden floors of the Imperial bedrooms are protected by massive iron shutters; a guard of eight Cossacks are posted in the apartments, electrical apparatus has been arranged to ring a bell in every guard-house, and on telegraph wires have been placed in the grounds of the dune. Dynamite had been captured in the courtyard, concealed in a load of hay.

Extensive arrangements for the reason of interring the Greeks were made at Constantinople on the 26th, and approved by the foreign ambassadors. Thousands would be first accredited, and an International Mixed Commission would supervised the examination.

The Nihilists distributed Easter Eggs on the 26th which contained proclamations requesting the assassination of the Czar and promising a gold coin every person who dispatched the Czar.

On the 25th the timber mill at E. W. Bone & Sons, at Fish Lake, in Grand Traverse County, was burned, together with large quantity of lumber. Loss, $10,000; insured for $4,000; R. H. McNaughton, of Traverse City, had the logs cut on the land by the Recorder's Court. Bull was fired at $5,000.

At Grandville recently Charles Perkins, a brakeman on a Chicago & West Michigan freight train, undertook to uncouple cars while they were in motion. He missed his footing, and fell under the wheels, which passed over his body, severing both legs and crushing one hip to the most frightful extent. He lived six hours after the accident, and was still rising. At St. Paul the wizard fell over him.

On the night of the 1st the City of Dublin was proclaimed as in a state of disturbance, under the provisions of the Coercion Act. The city was greatly excited. A young man named Farrell was discovered on the telegraph wires on the 25th an overdue steamer was reported off the Lizard, and a pilot boat left Falmouth to meet her.

An Associated Press dispatch of the 26th says that the Archbishop of Dublin, Most Rev. Dr. Cullen, died at Rome on the 24th. Dr. Cullen had called upon and had an interview with President Garfield relative to the situation of affairs in the Senate. After the complimentary allusion had been addressed to Cardinal Cullen the committee asked the President whether it would be embarrassing to him to withdraw the nomination of Judge Robertson and have all the rest of the nominations promptly confirmed. President Garfield, in reply, said, with emphasis, that no such proposition could be entertained, and thus the conference ended.

Cardinal Cullen.

An Associated Press dispatch of the 26th says that the Archbishop of Dublin, Most Rev. Dr. Cullen, died at Rome on the 24th. Dr. Cullen had called upon and had an interview with President Garfield relative to the situation of affairs in the Senate. After the complimentary allusion had been addressed to Cardinal Cullen the committee asked the President whether it would be embarrassing to him to withdraw the nomination of Judge Robertson and have all the rest of the nominations promptly confirmed. President Garfield, in reply, said, with emphasis, that no such proposition could be entertained, and thus the conference ended.

MICHIGAN STATE NEWS.

In last been discover d that Jose h Bitz, aged eighteen years, a grocery boman at Saginaw City, has for years been steadily embezzling money, and the defalcation reaches into the thousands.

The Shelby House at Grand Haven, owned and occupied by Charles S. Kelly, was burned on the morning of the 19th. Loss $10,000.

A few days ago at Detroit a colored lass named Joseph Tower, fourteen years old, got into an altercation with a lad seventeen years of age, named August Zinn, and during the quarrel the former drew a knife and stabbed her adversary in the left breast. Zinn then ran home and died before he left it. Tower was arrested and Zinn lies in a dangerous condition.

The rest of the Iron mid steel industries for 1881 show that Michigan has increased its production in the ten years from 1870 to 1880 from 66,259 tons to 154,446 tons, or 133 per cent., taking the old iron plants built in 1881. The State in 1880 had 42 blast furnaces in operation, 10 rolling mills, and 10 Bessemer steel works, with an invested capital of $4,173,000, employing 3,000 men, and paying $2,097 in wages. Those establishments used material valued at $5,579,450, and their product for the year was valued at $8,651,650.

The burial of business interests is generally effected at Manistee during the past winter by the failure of the Manistee Iron Company. Liabilities are in excess of $100,000, and assets, consisting of the plant and real estate, are estimated at $200,000. The company was organized in 1872, and has been reorganized several times. The principal creditors are Eastern capitalists. The company has been unable to get capital to run it for two years.

Sons during burglar got on E. Hendry's premises at Saginaw, and was just getting out of the door by breaking two large panes of glass out of the front, and taking all the valuables he could carry.

It is just transpired, because a wound received in a duel fifty years ago, that Judge Sprague, who resided in Detroit, was formerly a jeweler in Providence, R. I. He was a partner with his brother Peleg Sprague, and had a large jewelry store on Westminster street. He was also a dealer in diamonds and manufactured jewelry. The police knew of it, but the Judge's friends did not, and he was a mystery to them. It is not known how much property he left, but it is supposed to be considerable.

Fire at Coffeeville, Ottawa County, early on the morning of the 21st burned out the store of Wm. Kenyon, and the dwelling of Mr. Tuttle. Loss on the former about $2,000; insured for $1,000. The latter was owned by Mr. Tuttle, and was valued at $1,200. Vanderbeek & Verplanck, hardware, loss $6,000; insured for $2,500; H. J. Hilbert, dry goods, loss $2,000; insured for $1,000; F. F. Gooding, grocery store, etc., loss $2,000; insured for $1,000. The latter three aggregate another thousand or two.

At Detroit on the 24th Officer Preston, a colored policeman, arrested Jerry Cross on a charge of petit larceny because he was caught stealing a ride on the front platform of a car. Cross, who is a powerful man, resisted arrest, and Preston struck him on the head with his club, fracturing his skull. Cross died in the police station in a few minutes. Preston was arrested on the charge of murder, but was released on bail.

The 20th ult. an attempt at eviction at New Paths, Ionia, was made. The sheriff was backed by six hundred soldiers and policemen, and on the same day Rev. Richmond Seymour, who hosted and stoned the officers; so frightening the bailiff that he refused to execute the writ, and went home sick.

On the 20th ult. the anti-Jewish agitation promoted a mob at Kalamazoo, led by several clergymen, to assess the houses of some Hebrews and maltreat the inmates.

The Board of Education at Ionia declined to permit the purchase of a jeweled crown costing a half million dollars, to be worn at their male from Turkish guns captured at Plevna.

A few days ago the consecration of the Roman peasantry at Strasburg that grand Catholic Diocese of Detroit, has issued a pastoral letter forbidding the holding of any choir exercises by the children of the parishes on certain days, and enforcing other such instructions.

A fire on Lake Michigan, off Muskegon, has destroyed the tug Crusader, the steamer Mary Belle, and the schooner Ellen Swain. The Crusader was owned by Capt. Dewey, and valued at $6,000; insured for $3,000. The Mary Belle was owned by Capt. Dewey, and valued at $3,000; insured for $1,500. The Ellen Swain was owned by Capt. Dewey, and valued at $3,000; insured for $1,500. The Crusader was engaged in towing the Mary Belle and Ellen Swain when the fire occurred.

The whole number of pupils enrolled in the public schools of Detroit during the year ending March 31 was 20,000, and the average number belonging 13,000. The number of pupils in the high school was 1,000, and the average number belonging 800. The number of teachers employed was 400, and the average number belonging 350. The average number during the year was 332.5. The nationalities of those received during the year are as follows: American 1,5, Enol ish 15 German 27, Irish 54, Scotch 11, French 5, Canadian 7, mulatto 2, negro 0, all other countries 2. [2 10 [01 novelties received during the year were: Those who could read, write and cipher, 43 could read and write, 38 could read only, 63 were what are termed "half and half," 11 were illiterate; and 1 was unknown. Of the number, 233 were temperate, 536 moderate drinkers, and 238 intemperate. There were 428 single, 336 married, 68 widowers, 64 married but separated, and 1 unknown. 111 the number of new regular attendants at church, 123 irregular attendants, and 666 were never at church.

The Commissioner of the Internal Land Office was asked: "Whether, after a soldier has in person or by agent made an entry of land, he must reside upon or cultivate the same, in accordance therein or another before he has commuted his entry?" The answer was: "Neither. If the soldier should so reside he could not be compelled to reside with another, could he at some future time enter upon other land."

The following is a copy of the response made by the Immigrant agent:

"In reply I have to inform you that a sufficient number of men can be procured early by attorney or agent," the time for a definite reply I am unable to give. I would say that Steamers for Holland sail from New York every Saturday, and from Boston every Wednesday, and from Baltimore every Thursday. The rate from either of these ports is $30 per head. Those who go to Holland will be required to pay their own passage to that country. It is necessary that the men should be under the land ordered by the soldier at entry the land ordered by the soldier at entry the land ordered by the soldier at entry

BREVITIES.

—"The Wild Irishgirl."

—"The Yankee in Cuba."

—Wildman & Peck to-night.

—Howard City will soon have a daily paper.

—Jack Ingalls, of Petoskey, sailed on an Sunday.

—The tug Minnie Warren is out looking like a new craft.

—Harmard postoffice, in this county, has been discontinued.

—We call attention to the new advertisement of J. Milo Eaton.

—Go and see Wildman & Peck in "The Yankee in Cuba" to-night.

—The legislature makes great changes in our school and highway laws.

—Hon. Randolph Strickland died sadly at Chicago, on the 5th. He spent a portion of last summer at Charlevoix.

—Mrs. Pope, the interesting teacher of the Charlevoix school, is preparing to give an entertainment with her classes.

—Peter McNally, of Hayes, who recently had the misfortune to cut his foot while chopping, is said to be lying in a critical condition.

—The person who left a well filled lunch pail on the pistol-fire steps one morning last week can have the same by calling at this office.

—Byron See has recently transferred to B. Saltonstall, of Chicago, lot 1 of section 21, containing twenty acres. Considera-tion, $200.

—The Indian Devil of the *Independent* has come to grief. He got in a fight with another Indian boy, who used a knife on him.

—The propeller City of New York has brought three cargoes of hardcore to the furnace during the past week, and they are in blast again.

—The Charlevoix SENTINEL has entered upon its thirteenth year. The SENTINEL has always labored earnestly for the interests of Charlevoix, and Bro. Smith's exertions have been largely instrumental in securing every enterprise which has been of advantage to the place.—*Pleasant County Independent.*

—Wildman & Peck will conclude with the closing farce, "The Wild Irish girl" to-night.

—Senator Bartlett arrived home Saturday evening from Lansing, and has been confined to his room by sickness. We hope to soon see him about again.

—There will be a meeting of the Historic Society at the school house on May 24, at 7:30 p. m., to fix such further dates as may properly come before it.

—The annual meeting of the Presbyterian Monumental association of northern Michigan will convene at Traverse City, May 31, and continue in session three days.

—The Grand Traverse county jail was broken open one night last week, by parties outside, and a prisoner named Atwood, who was held for passing counterfeit money, helped out.

—The editor was among the many passengers from this place for Chicago on the steamer Freeman City Sunday night. He was accompanied by his granddaughters Florence and Katie.

—Geo. Wilson, employed in the mill yard of John Nicholls, of this place, fell down a lumber pile Saturday, dislocating and fracturing his spine. Mr. Wilson was but just recovering from a similar accident.

—Stockman's hardware store received last week an immense increase to its stock in all the lines, and the additions of goods not before handled by Mr. Stockman. The store is now one of the most complete of its kind in Northern Michigan.

—Wildman & Peck's opera company opened at Lewis' hall last night, to a fair-sized and intelligent audience. The talent of the troupe far surpasses any that has ever before visited our village. If you want to "laugh and grow fat," go and see them to-night.

—All orders for piano tuning left at the postoffice before May 20 will be promptly attended to by Prof. Elmo Bitter, musical director at Wildman & Peck's opera company. Prof. Bitter comes well recommended by the people of Traverse City and Elk Rapids.

—The *Kalkaskian* and the *Progress* are talking confidently of a railroad from Kalkaska to Elk Rapids. The *Progress* says the route between Kalkaska and Elk Rapids is level, the road bed would require little work to it, and it would run through some of the very best farming land north. The *Progress* thinks it is only a question of time.

—The village council of Traverse City has recently enacted some common sense ordinances relative to the duties of the health officer, the enforcement of nuisances and the preservation of health, that might well be studied by those interested in the welfare of the other new and growing villages of this region. "An ounce of prevention is worth a pound of cure."

—The meanest man on record in Charlevoix county is Wm. Orton, who accidentally shot a young son of John Morrow, of South Arm, some time ago. He was in the employ of Mr. Monroe and when the final settlement was made with Orton, he found Mr. Monroe charged with one day's labor for making the return of his victim. Mr. Monroe paid it, and exhibited a decree of saintly forbearance he could proceeded by not putting him in the mill pond.

—The following persons took passage on the Fountain City Sunday night for Chicago: Mrs. E. F. Carpenter, Miss Jessie Carpenter, W. A. Smith and two daughters, A. J. McLeod, Miss Bertie McLeod, Joanna Inwood, Miss Sarah Inwood, Mrs. Fisher, Mrs. L. D. Bartholomew and daughter, Mrs. John Nicholls and son, Miss H. Nicholls, H. D. Cook, Mr. and Mrs. A. Fox and son, Mrs. H. Jewett and G. W. Miller.

For Sale.

I offer for sale the farm known as the "McDaniels farm," 160 acres, well watered and timbered, 45 acres cleared, 20 acres partly cleared. House and barn on the premises. Situated on the main road to South Arm, 21 miles from the Straits, 7 miles from Charlevoix. Terms reasonable. Call on or address

J. MILO EATON.

LINDA GILBERT, who commenced her work of supplying patients with libraries in Chicago, where she was violently assaulted by some of the papers, was not discouraged by their abuse, but continued in her good work until some of the largest jails in the west, and all the principal pesthouses in and around New York, have been supplied with libraries for the prisoners' use.

Go to Lewis & Ackert's for shoulders and hersey skin flesh lotion.

SOUTH ARM AND VICINITY.

Observations of Ye Editor on a Recent Trip Up the Arm.

Ye editor was around Wednesday and a part of Thursday, and made the head of South Arm the objective point of his official perambulations.

The inner villages of South Arm and East Jordan, sitting like gems on the shores of the clear, limpid waters of South Arm are worth a visit any time, and per chance was a pleasant one in many respects.

The mineral farmers of this locality are prescribed, but there are features still concise and some which bid fair to dwarf the romance of scenery and the fiction front are bona. Let it be recorded that East Jordan and her sister hamlet across the water are human beehives of industry and thrift.

The saw mill of Glean & Porter has a contract of cutting about 4,000,000 of logs, and the boys of the new is consigned night and day. The same firm have a store which received the day of our visit a heavy enlargement of general merchandise, and they report a thriving trade.

The site for another saw mill is being negotiated for, which is expected to be in operation the present summer.

W. W. Dingee, at his old stand, is up to his ears in mercantile affairs in connection with the always attendant traffic in the various products of the forest. Mr. Dingee is building up a fine business.

Mr. Somo, who established himself at East Jordan last fall in the mercantile business, is busy in supplying the wants of his customers, and has promise of a successful and permanent business.

The Jordan River House, under the management of Jeff Winkel, has assumed proportions and sorts which have become well known among the people who frequent the river during the summer months, and he is preparing for a rush when the trouting season commences.

Rube Chaddock has his hotel still under the nurturing but expensive care of the carpenters, and this locality, from the beautiful site which it occupies, will when completed afford very desirable accommodations for the sporting public.

East Jordan has its physician, druggist, shoe maker, blacksmith, and clergyman, and his promise of a lawyer, it is said. The town must develop into one of the most important trading centers of the county.

At South Arm, on the opposite side of the canal, business and prosperity is evinced. The only genuine Sol. Inman, with increasing obesity and versatility, is actively engaged in business, and is preparing to erect a large store building.

E. A. H. Cole and H. B. Stockman are dispensing general merchandise to the surrounding country, and are getting fat, but not "fleshy."

This place is the residence of James A. Keat, judge of probate, and the judge also has a law office here. He is also local commissioner of the South Arm and Hayes Falls state road, and is busy just now in preparation for letting the contracts for its construction.

The distance across the arm here is but about eighty rods, and the time has come when better communication should be provided between the two towns. The entire region about the arm, as well as adjoining townships, are interested in the matter, and we hope to see the board of supervisors make a liberal appropriation toward the construction of a bridge. South Arm has already appropriated $500 for that object. It is a necessity that should be provided for at once.

On Thursday afternoon, in company with Judge Keat and Mr. Empey, we walked up to Monroe mills on Jordan river, two miles up from the arm.

Mr. Monroe here has set up ready for action the best saw mill in Charlevoix county. The recent breaking away of a portion of his dam has delayed the work somewhat, but work is rapidly progressing, and Mr. Monroe extects to let the water into his custom-house a month or six weeks. The dam is provided with a long sluice, which amply provides for the passage of logs and lumber, and seems also as a fish ladder, which the board of supervisors compelled the owner to provide. Provision has been made in the dam for another gate, and the coming fall and winter Mr. Monroe will erect a grist mill upon the same angle and substantial plan that he has constructed his saw mill. Mr. Monroe is full of energy, and will in the coming years do much toward the development of the naturally rich country which surrounds him.

The entire region around the arm and the Jordan is abounding in the natural elements of prosperity and wealth, and no wonder for it a future of rapid transformation sets one of the best agricultural sec-

Theatrical.

Charlevoix has not been overburdened with entertainments, notwithstanding the fact that our people appreciate good ones, and patronize them well when they have an opportunity.

Our Traverse City and other exchanges have recently been speaking highly of Wildman & Peck's opera and comedy company, which has been playing engagements at several northern Michigan towns. While playing a week's engagement at Traverse City several of our citizens attended their presentation of "Aunt Lynne," and were so highly pleased with the company that they commended their troupe to an engagement here, which they have done.

The company arrived in on Saturday, and opened their week's entertainment at Lewis' hall with the popular drama, "Phantom the Cricket." They will remain in town six nights, putting on the boards dramas and comedies which have been on the stages of the principal theatres of the interior cities. The troupe embraces a large number of talent, and their entertainment is worthy the patronage of all.

In Traverse City and Elk Rapids, where they played protracted engagements, they had crowded houses until the close.

We opportunity has this week we offer, and we hope the troupe will be well patronized.

Marine Jottings.

—The tug Minnie Warren was launched last week.

—The steamer Grand Rapids will be out in about a week.

—The schooner Bertie Calkins landed a fish pulp mill on the Iron Ore.

—The tug Bob Stevenson went to Elk Rapids Thursday to repair leaks.

—The scow Charles J. Smith arrived Friday with a cargo of lath and shingles.

—The schooner Minnie Mueller had her main-house put in at Washburn's shipyard, in this port.

—The schooner Jennie Mullen arrived from Chicago Monday, and lies in the Pine Lake Iron Co.

—The steamer Fountain City wooded up at this port bound up Sunday evening, her first trip this season.

—The little steam yacht Kittie O'Neill, of Beaver Harbor, came into this port Saturday to be repaired.

—The schooner Minnie Mueller came into port Thursday minus her jib-boom, having lost it in a collision with the schooner Mary L. Higgie. The Higgie's crew was somewhat demoralized. The collision occurred off Sleeping Bear point in the fog.

—The propeller Champion, which left here Tuesday for Chicago, got ashore in the log about four miles this side of Ninepoint, in the bay, and subsequently here for assistance. The propeller City of New York, which was about ready to leave for Ludington, went to her assistance and released her.

—The schooner Bertie Calkins, bound for this port, went ashore in the log Saturday, just below two mile point, south of this harbor. The tug Payne, promptly went to her assistance, and with the aid of the tug Minnie Warren and propeller City of New York she was released and brought in this port. The damage was very light.

—The propeller T. S. Faxton made her appearance through the ice for so early in the season, and entered the harbor. She brought in coal of our customers from Chicago, and landed a full load of freight for them and others. The Faxton is what the Judge would call "just the lovely for anything." She is of a fine model, is fitted up in about the same general style as the City of Grand Rapids, and is speedy. She will be a popular steamer among Charlevoix people, for her captain and owner, Capt. A. G. Aldrich, and Henry Aldrich, are Charlevoix men, and well known here as careful and capable. Capt. Aldrich, her commander, is a seasoned man of long experience, who knows the bay as he knows his own doorway. Good luck to the Faxton. Her time is not yet published.

—The following are the clearances from the port of Charlevoix for the week ending to-day:

May 10—Scow Pigeon, 72 cords of wood, owner to Milwaukee.
May 11—Scow Little Minnie, 88 cords wood, P. E. Sawyer to Milwaukee.
Propeller City of New York, light to Ludington.
May 12—Schooner S. F. Wade, 1,000 bbls. salt, pork, Lockett, Dewey & Co. to Chicago.
Propeller T. S. Faxton, light to Chicago.
May 13—Propeller City of New York, light to Ludington.
May 14—Schooner Jennie Mullen, 1,000 bbls. salt, pork, Lockett, Dewey & Co. to Chicago.
Schooner Minnie Mueller, 1,000 bbls. salt, pork, Lockett, Dewey & Co. to Chicago.
Schooner Bertie Calkins, 1,000 bbls. salt, pork, Lockett, Dewey & Co. to Chicago.
May 15—Propeller City of New York, light to Ludington.
May 16—Propeller City of New York, light to Ludington.
Schooner Minnie Mueller, 1,000 bbls. salt, pork, to Milwaukee.
Scow Pigeon, 100 bbls. flour to Milwaukee.
Schooner Jennie Mullen, 1,000 bbls. salt, pork, to Chicago.
Schooner Bertie Calkins, 1,000 bbls. salt, pork, to Chicago.
Schooner Minnie Mueller, 1,000 bbls. salt, pork, to Chicago.
Schooner Bertie Calkins, 1,000 bbls. salt, pork, to Chicago.

Future of Electric Invention.

Professor Perry, at the Society of Arts last night, says the London *Standard*, painted a most alluring picture of the future of electricity. Telegraphs, telephones, photophones, phonographs, microphones and electric pens are the mere beginnings of the science, and will, by the time we are too old to use them, be regarded with much the same respectful interest that Stephenson's "Rocket" is viewed by a modern engineer, or Custer's "Spiegel cuner Bedbundestz" by a member of the Typographical Union. By-and-by we shall not only correspond, talk, send our portraits and "manifold" by electricity, but have our houses lighted and heated, our machinery driven by the same omnipotent agent. If needs be every weaver's shuttle, every village blacksmith's bellows, every milliner's sewing machine and every advanced baby's cradle will be driven. Money or rocket-fuel by that "Vrill" power, of whose future development by the coming race Mr. Perry has almost as sanguine a hope as had Lord Lytton after a less scientific fashion. Coal gas, at which Sir Walter Scott jeered and for a belief in which the Chalmers was considered by his shrewd countrymen to be not altogether "sound," is, we are told, doomed as a lighting agent. In a few years it will subserve the humble office of a generator of electricity by setting steam-engines in motion, or by being consumed in a voltaic cell. But as power can be transmitted by electricity there is, as Sir William Thompson once suggested, nothing to prevent us from importing our force from America, just as at present we import beef, wheat, "canned" genius and steam engines. In the falls of Niagara there is energy enough to supply a million-horse electricity to light and heat all London, drive all the machinery in Birmingham or Manchester, and send a score of Flying Scotsmen with easy swiftness from one end of the kingdom to the other. "Transmitted energy" will be consigned to us from the Andes and the Amazon, from the smoke-enveloped "foss" of the Rhone and Saône, from the banks of the Mississippi and the bass. In the future we are to bake, broil, build our houses, plow our fields and manure them, sail our yachts, propel our steamers and trains, print our books, and perhaps write them, by the aid of electricity. Men will then have subdued the forces of nature, and the lord of creation will relapse into languid idleness, or dream away life on one long afternoon. In the days of an overdose of electricity, and is buried in an electric dog grate, or crumbles into a touch of his bereaved family's private "Perry-Arrow" machine.

That this and a great deal more will come to pass is evident to all who can read between the lines of Prof. Perry's discourse. Sydney Smith, who, like Southey, had a limited appreciation of science, once said that he feared the electricity and M. P.'s we expected too much. In the Siemens dinner party, the stud way the prevailing force is alone seen with the cars, but not the useless for generating that force. A generator of electricity is driven by a large steam-engine somewhere up the vicinity of the railway. A motor on a carriage receives electric energy by an conducting rails, and therefore owns this into mechanical work to drive the carriage. The introduction of electric railways is merely a question of capital and the sacrifice of much existing plant. But as soon as this is resolved on there will be economy effected, for, as no heavy locomotives will be required, there will be saving in the cost of rails and in the cost of bridges, and in the wear and tear of permanent way. And as each carriage will have its own driving and braking machinery the energy at present wasted in stopping a train "will be simply given back to the generator." The problem of lighting and heating houses by electricity is practically solved. When people generally avail themselves of that solution, smoke and soot and dirt will descend nearly nowhere, and while the same engine that warms the merchant's office will light his warehouse, enable him to correspond with his agent the world or better, order dinner, superintend his clerks, receive the portrait of a suspicious visitor to his country house, call the police and blow the footmen which is to warn of the weeks the crew of his homeward-bound ship. Nor need its use stop there. In the time the advantages of electricity will penetrate even the darkness of the vestries. The clergy, too (unless hint his electrically warmed bed with the snow a foot deep on the ground), will wake up in the morning to toast his toes at the electric stove and see dry streets and the bonnets of the passing house the parish Gramme. Already Mr. Edward Briggs, in an ingenious device, utilizes for a vacuum his hirsute bobbins of yarn, instead of, as formerly, allowing nature to do so in half a year-during which his genital must lie fallow in the factory. Mr. Shefford Bidwell produces pictures of distant stationary objects in shaded tints on paper by electric energy of his composition; and Mr. Perry, by taking a hint from Mr. Punch, is by no means certain that very soon an aged cousin at home may not be able to see on their drawing-room wall an image of their grandchildren playing Badminton in India and of learning from the telephone how they are enjoying the game.

All this, of course, must seem to be in the far distance. Still, we must remember that science is moving rapidly, that every year soon fresh students and busy brains attest on improving the handiwork of their predecessors. It seems like yesterday since Oersted was calmly endeavoring to explain to the Danish queen dowager, who died last week, the first glimmering of the electric telegraph. To the telephone already threatens to supersede the telegraph. Men still living can remember Sir John Barrow warning his friend George Stephenson not to hurt a good cause by talking foolishly about being able to cross a locomotive more than five miles an hour, or to carrying over "a few hundred" passengers in the course of a year. But already coal-driven engines are likely in another few years to be entirely eclipsed by electrical ones. The chances are that telegraphs will by that time be as obsolete as are semaphores, beacon fires and smoke signals, and that the lothergraph will be only examined in museums as an interesting step in the development of the photophone. The Bacons, Newtons, Boyle, Watt, Faraday, Dawson, Doulz and Thomson pointed the way to Stephenson, Peake, Wheatstone, Brunnow, Edison, Graham, Bell and Hughes. The wonders of today may be only the curiosities of the future. Photography is, for instance, so familiar to us, that when the actual discoverer of that wonderful art passed away four years ago, his death was barely noticed, simply because few could imagine that a discovery, seemingly so old, had been the work of men of our generation. Doubtless, which has done nothing for us, is to receive a mighty legacy, which it will be expected to transmit without decrease to the generations yet unborn. Theirs will be a happy lot, and one might well wish to live long enough to witness the wonderful century of which some of us may see the dawn, but the rest of which none of us can survive. Yet the men of these days may, after all be a thought-racked, care-worn race, before they can regulate all their mechanical appliances, they will be a people of short lives and weary brains. But perhaps by that time in electricity will be found the Alchemist's elixir of life, or those fountains of perpetual youth for which Ponce de Leon sought in vain.

Facts About Horses.

An "Equestrian Manager" in England gives the following interesting facts about horses.

It scarcely needs stating that a good memory is indispensable in learning anything. And if a horse has to learn a trick or routine performance he can only do so by remembering it from time to time all through it. Both horses and dogs have wonderful memories, but I will narrate one or two instances relating to the horse.

"The Roman chariot driver," Long Milford in Suffolk at a spot where there was a bridge, leading over a river. As we approached the bridge the horse pulled up and would not move on again without a lump of sugar. For some time I was at a loss to account for this freak, but it afterward occurred to me that the last time I had crossed that bridge and with the same horse, I had pulled up at that spot to speak to a man.

Unless there is a reason to the contrary we always prefer occupying the same stall each time we visit a place. Sometimes it happens that the stud-groom, who is generally well the first lord of creation will relapse into unusual idleness, or dream away life on one long afternoon, in the days of an overdose of electricity, and is buried in an electric dog grate, or crumbles into a touch of his bereaved family's private "Perry-Arrow" machine.

That this and a great deal more will come to pass is evident to all who can read between the lines of Prof. Perry's discourse. Sydney Smith, who, like Southey, had a limited appreciation of science, once said that he feared the electricity and M. P.'s we expected too much. In the Siemens dinner party, the stud way the prevailing force is alone seen with the cars, but not the useless for generating that force. A generator of electricity is driven by a large steam-engine somewhere up the vicinity of the railway. A motor on a carriage receives electric energy by an conducting rails, and therefore owns this into mechanical work to drive the carriage. The introduction of electric railways is merely a question of capital and the sacrifice of much existing plant. But as soon as this is resolved on there will be economy effected, for, as no heavy locomotives will be required, there will be saving in the cost of rails and in the cost of bridges, and in the wear and tear of permanent way. And as each carriage will have its own driving and braking machinery the energy at present wasted in stopping a train "will be simply given back to the generator." The problem of lighting and heating houses by electricity is practically solved. When people generally avail themselves of that solution, smoke and soot and dirt will descend nearly nowhere, and while the same engine that warms the merchant's office will light his warehouse, enable him to correspond with his agent the world or better, order dinner, superintend his clerks, receive the portrait of a suspicious visitor to his country house, call the police and blow the footmen which is to warn of the weeks the crew of his homeward-bound ship. Nor need its use stop there. In the time the advantages of electricity will penetrate even the darkness of the vestries. The clergy, too (unless hint his electrically warmed bed with the snow a foot deep on the ground), will wake up in the morning to toast his toes at the electric stove and see dry streets and the bonnets of the passing house the parish Gramme. Already Mr. Edward Briggs, in an ingenious device, utilizes for a vacuum his hirsute bobbins of yarn, instead of, as formerly, allowing nature to do so in half a year-during which his genital must lie fallow in the factory. Mr. Shefford Bidwell produces pictures of distant stationary objects in shaded tints on paper by electric energy of his composition; and Mr. Perry, by taking a hint from Mr. Punch, is by no means certain that very soon an aged cousin at home may not be able to see on their drawing-room wall an image of their grandchildren playing Badminton in India and of learning from the telephone how they are enjoying the game.

All this, of course, must seem to be in the far distance. Still, we must remember that science is moving rapidly, that every year soon fresh students and busy brains attest on improving the handiwork of their predecessors. It seems like yesterday since Oersted was calmly endeavoring to explain to the Danish queen dowager, who died last week, the first glimmering of the electric telegraph. To the telephone already threatens to supersede the telegraph. Men still living can remember Sir John Barrow warning his friend George Stephenson not to hurt a good cause by talking foolishly about being able to cross a locomotive more than five miles an hour, or to carrying over "a few hundred" passengers in the course of a year. The chances are that telegraphs will by that time be as obsolete as are semaphores, beacon fires and smoke signals, and that the lothergraph will be only examined in museums as an interesting step in the

Why Some People Fail to Succeed.

They are lazy.
They neglect details.
They overlook the small things.
They have no eye to business.
They hope for fortune to drop in their laps.
They let their help waste and dilapidate.
They let their five burn at will.
They are slovenly in their shops.
They let their shops get dusty and dirty.
They try how cheap they can do everything.
They fail to advertise.
They have too much outside business.
They fail to favor or have new ideas.
They are penny wise and pound foolish.
They imitate their neighbors.
They are not polite or accommodating.
They think most things take too much time.
They fail to push business.
They know not the best in the cheapest.
They know not the power of method.
They are illiberal to home enterprises.
They attend to everything but their own business.
They become rusty and lose ambition.

—Take away women and what would follow? The men.

SUNDAY AND CHURCH.

—Yale College funds are now $4,830,000.

—A new church, with no creed, has been formed at Williamsett, Conn., of which the Rev. J. L. Barlow is pastor.

—The Congregational Church at Holbrook, Mass., has been seeking a pastor for nine years, listening during that time to sermons by 240 candidates.

—The peculiary position of curates in the Church of England has improved very much of late years, and in many parishes the curate, if unmarried, will often be a richer man than his rector.

—At a recent meeting of the New York Methodist Conference a candidate for the ministry admitted that he used tobacco, and when asked the disciplinary question, "Will you give it up?" answered, "I can't." He was, nevertheless, admitted.

—"Protestants and Catholics of Hopkinston," says the Boston *Journal*, "united in giving a silver tea service to a Methodist preacher who was about to leave for Boston. The presentation speech was made in the Town Hall by the Catholic priest."

—The University of Cambridge, England, has decided, by a vote of 398 to 32, to admit women to its honor examinations on equal terms with men. The ladies are to be published in the regular class lists and receive similar certificates of the rank and honors attained.

—Says the *Advance*: "A pastor leads as many prayer-meetings in a year as he preaches sermons. He is expected to influence as many sabbath-schools as he preaches congregations. Whole departments in any theological seminary is a living and also take the place of a sill pocket handkerchief. A great deal of stratum, certainly; but what the spring poet and other imaginative sons of Adam most need is a garment that will serve the treble purpose of shirt, coat and pantaloons, and cost only the price of shirt alone.—*Norristown Herald.*

A $10,000 Package Lost and Found.

This morning a stranger, who afterwards proved to be a gentleman from Washington, got off street-car No. 14 at Eighth and Broad Streets. Some time after the car had proceeded he discovered that he had left a bundle on the seat, and hastily getting into the next car, followed the first one and asked the driver for the bundle. He was told that a man in the car had claimed it and gotten off with it. The driver described the party and told the gentleman the direction he had gone, whereupon the gentleman followed and caught the man with the bundle. When accosted the party first said the bundle was his own, but upon being threatened with arrest he gave it up. The gentleman after getting back the package remarked, "That package is worth $10,000."—*Richmond (Va.) State.*

MISCELLANEOUS.

—A woman of North Troy, Vt., is asking a divorce after fifty years of married life.

—A cutting from an apple bough that a lady of Chester County, Pa., stuck into a pot last fall to support a lily, began to bud and now has three green apples.

—A medical journal of Munich says that diphtheria caught by kissing is likely to assume a much severer form than if the disease were contracted in any other way.

—The farm house near Lille occupied by Louis XIV. during his siege of that city, in 1667, is about to be razed to the ground. The speculation by which Lille became French territory was signed there.

—The Oswego (N. Y.) *Times* says that the students of Madison University "united in giving a silver tea service to a Methodist preacher who was about to leave for Boston. The presentation speech was made in the Town Hall by the Catholic priest."

—The University of Cambridge, England, has decided, by a vote of 398 to 32, to admit women to its honor examinations on equal terms with men. The ladies are to be published in the regular class lists and receive similar certificates of the rank and honors attained.

—Says the *Advance*: "A pastor leads as many prayer-meetings in a year as he preaches sermons. He is expected to influence as many sabbath-schools as he preaches congregations. Whole departments in any theological seminary is a living and also take the place of a sill pocket handkerchief. A great deal of stratum, certainly; but what the spring poet and other imaginative sons of Adam most need is a garment that will serve the treble purpose of shirt, coat and pantaloons, and cost only the price of shirt alone.—*Norristown Herald.*

—A celebrated and somewhat eccentric preacher in London played a little trick on his people by refusing to give them each a text. They had been in the habit of coming wherever it suited their convenience, and there was a growing nuisance. The minister one Sunday told the people that he would on the next Sunday have something of unusual importance to communicate to them, but that in order to avoid disappointment to the benefits of it they must all be in their seats at the very moment appointed for beginning the service. It turned out that all he had to communicate was the expression of his pleasure at finding them all in their seats in season. Only two persons were late, and the others grinned at them as they came in on tiptoe and took their seats. It was the impressics of most of those who were thus lured into a spasmodic punctuality that the minister had sold them very cheap.

For Young Readers.

LOVING AND CHIDING.

"How much I love you, mother dear,"
A little prattler said;
"I love you in the morning bright,
And when I go to bed;
"I love you when I'm neat to you,
And when I'm far away,
I love you when I am at work,
And when I am at play."

And then she softly crowded her lovely eyes of blue,
And whispered in her mother's ear
The secret over new:
"When I am fifteen years old
I'll marry me a beau,
And then I'll love my darling child,
And sometimes scold me too."

"I could not let my darling child
Grow up a scolding wife,
And this is why I sometimes chide—
Because I love you so."
—Christian Observer.

"A JOLLY GOOD TIME"

Dick and Johnny were sitting on the fence one day, talking about Dick's aunt, and the other, when Lawrence Heath rode by, smoking a cigar. Lawrence was home from college, spending his vacation, and as he put on a good many airs and told wonderful stories about his college exploits, he was looked upon by the smaller boys as a model of a young gentleman.

Most of them were secretly longing for the time to come when they could do just as he did. If they ever succeeded in coming up to his standard, they felt that the highest ambition would be gratified.

"It looks nice to smoke, doesn't it?" said Dick.

"Yes; I think so," answered Johnny.

"I'd like to try it, wouldn't you?"

"Yes; but I don't dare to—found home, my mother would whip me if she could know what father'd say if he caught me. I don't know how he thinks it's such a foolish habit."

"So does my father," said Johnny. "Says it's a foolish, dirty habit, and expensive, and so on—you know how it is, and you can't do anything you've heard them once, when they saw Billy Mason with a pipe."

"Lawrence Heath says all the boys in his school smoke," said Dick. "They laugh at him because he don't, and he says it's all nonsense about its being unhealthy. He says he couldn't get along without his cigars, and they help him when he has to study hard, and I suppose he knows what he's about. I don't believe all they say against smoking, for I've seen gentlemen smoking what I'd call a awful stuff? They never used it."

"That's just it!" responded Johnny. "They've read about it, and heard some old fogey's long-winded lecture, and they take it for granted that it's all so. Now I'm more liberal than that. I don't believe in believing anything just because some one says it, and it happens to be the fashion to say it's bad. Now John's think it hurts a man to use tobacco—that is, of course, to use it moderately. I know lots of men who've used it for years, and I can't see that they're any worse off than those who don't. Now, if you take a man that's never used it, and you tell him it's bad, you've made a mighty big point in your favor, and he'll be apt to think so, too."

"So do I," said Johnny. "Young men almost all smoke nowadays. It's the fashion."

"And I think it looks nice to carry a cane," said Dick. "Now, Johnny, I says that's foolish, too. What does a young man need of a cane? he says. It's a fellow that wants to show off his hands unless he has a stick to play with he'd better keep 'em in his pocket! he says."

"I'll tell you what let's do," proposed Johnny. "Saturday we'll buy us a couple of pipes and five cents' worth of tobacco, and we'll go somewhere and have a good time smoking. What d'ye say?"

"I'll do it," said Dick. "You buy the pipes and I'll furnish the tobacco."

"All right!" said Johnny. "Let's see—to-day's Thursday. I'll meet you in the old barn over in the Creek Meadow, Saturday, after dinner. No one'll see us there, and we'll have just a jolly time!"

So it was decided that on Saturday afternoon they would take their first step toward the career of confirmed habit of smoking.

Saturday came. In the morning Dick made some sort of an excuse to go to the village. His real errand was to purchase tobacco. On his way home he met Lawrence Heath, and, as usual, he had a cigar in his mouth.

"I know what I'll do," said Dick to himself. "I'll buy two cigars and surprise Johnny. Cigars are nicer than pipes, anyway."

So he went into a store where there was a cigar and tobacco-stand and hung about until there was nobody but him and the clerk in.

The truth was he felt a little ashamed about what he was doing, and he didn't have courage to ask for his cigars when any one who knew him was likely to hear him. "I'll take a couple of cigars, if you please," he said walking up to the clerk.

"What kind'll you have?" asked the clerk.

"I—I don't know," answered Dick.

"I—I—not much used to 'em."

The clerk's eyes twinkled at this.

"Well, here are strong ones and mild ones," he said. "Do you want a five center or a better grade?"

"I'll take the best," said Dick, imitating Lawrence Heath's style.

So the clerk, with a quizzical smile, handed him out two.

"They're Havanas," he said; "fifteen cents apiece, or two for a quarter. You're a judge of cigars you'll say they can't be beat."

"They look like good ones," said Dick, with an air of being used to the best.

"Have a light?" asked the smiling clerk, politely.

"No; I guess I won't smoke until after dinner," answered Dick, and put them in his pocket.

The Creek Meadow was a piece of land about half a mile from home, and as no one had or is in which it was stored over winter. It was about half-past one.

Johnny was there waiting for Dick.

"Here's the pipes," he said, displaying two long-stemmed, white-clay ones. "An' I've got some matches."

"And I've got—one!" said Dick displayed his cigars.

"Oh, hooky!" exclaimed Johnny, with sparkling eyes. "I wish I'd got some, too. These won't last half long enough."

"Real Havanas, too!" said Dick, like an old smoker. "Fifteen cents apiece! Let's light 'em."

He struck a match and applied it to one end of his Havana, seeking at the other end as hard as ever he could.

"Don't draw worth a cent!" he said. "Give me another match."

"Oh, I know what's the matter," said Johnny. "We've got the tips off the end! Of course they won't draw till we do that."

"I guess you're right," said Dick. "There, mine goes all right now!"

And he sat down on an old log, elevated his feet on a beam, tipped back his head, and looked contemplatively at the roof, puffing away like a locomotive.

For four or five minutes they smoked in silence.

Then—

"Ain't this jolly?" said Johnny, blowing out a cloud of smoke, as Lawrence Heath.

But soon of it got into his throat and nose, and set him enough till he cried.

"Pretty strong cigars, I guess," said Dick, making a wry face over his first taste in his mouth, and spitting two or three times.

"Yes; I guess so; but they smell good, don't they?" said Johnny.

"Fragrance," answered Dick. "Ought to, at fifteen cents apiece. Mine's half gone already. Ain't yours?"

"Just about," answered Johnny. "I say, Dick, we'll come down here real often and smoke. I'm sure we've got it in, won't we?"

"I reckon we will," answered Dick. "It's fun, ain't it? I think we're having just a jolly time."

But Johnny I'm going to be sick," said Johnny, faintly. "I'm just as well's in such a stupid thing way that she did not urge the matter.

As it happened, the hay in the old barn was so worthless as to harm itself, so no great damage was done by the fire. But it helped to make a good recollection of their "jolly good time" more lasting.

"We made men of ourselves—didn't we?" said Johnny, the next time they met.

"It's my opinion we made fools of ourselves," answered Dick, with a flavor of camomile still in his mouth. "I don't want another such a 'jolly good time' in a hurry."

"Nor I, either," said Johnny. "I thought I was going to die—I did, for a fact!"—*Ellen E. Pesford, in Golden Days.*

—General Robert E. Lee has just been made out a descendant of Robert Brace. Colonel William Winston Fontaine, principal of Holyoke Academy, in Louisville, Ky., is the discoverer of the royal blood in the Lees. Colonel William Winston Fontaine says: "Recently, while collecting material for writing a biography of Major General Alexander Spotswood, Governor of Virginia from 1710 to 1722, I discovered that through him Robert Lee, of Virginia, was seventeenth in direct descent from Robert Bruce, of Scotland."

FARM AND FIRESIDE.

—Success on the farm depends far more upon the management than the labor performed.

—A small, early-maturing hog is much more valuable than a large one, as no more food will be required to raise two good, quick-growing ones than for a large but slow, all-last hog.

—The best medicine for a horse that is suffering from indigestion is linseed-oil in doses of one pint, and afterward a little consisting of feed-meal of ground gentian root and one dram of sulphate of iron given with the food.—*N. Y. Times.*

—A correspondent of the *Rural New-Yorker* says that an excellent way to make the bark grow on trees from which it has been peeled or gnawed off is to bind the denuded place with clay, or with mud if clay is not at hand. Thus treated he has found that the bark will grow again without a scar.

—Where to Plant Shade-Trees.—Shade-trees are often planted too near to our dwellings and too thickly, so as to make the house dark and damp and disagreeable. Large evergreens are very much out of place on the sunny side of the house, while they form an appropriate screen and wind-break along the cold and exposed north and west sides. Set out trees—it is a duty; but set them judiciously.

—One of the best ways, if not the very best, to cook eggs is to pour boiling water on them. Have a pan on the hearth of the stove, or on the tank, and put the eggs into it; let them remain in it for from ten minutes to half an hour. The economy lies in the fact that the eggs are best preserved, when cooked in this way, by their own shells. Those who have tried it say that the eggs are better than when cooked in the ordinary way.

—Rich Milk Biscuit.—Two pounds of flour, half pound of butter, two eggs, three gills of milk, one gill of yeast, one gill of salt. Rub the butter into the flour, warm the milk; pour it on the flour; beat the eggs light, and also the yeast; mix all together with a knife. When well mixed put on a moulding-board and knead it well; cut in small pieces and form into cakes; put in a pan and set in before a brisk fire to rise; when they bake in a moderate oven. For a small family half this quantity will do.

True and False Economy.

There is an element of success running through all the operations of the farmer; which rewards, pin-with assurance crops. Every year's experience of the farm and makes home cheerful and happy. Every thing that adds to the comfort of the family and to the beauty of the home we find pictures on the walls, carpet on the floors, newspapers and good books. His necessary element of success is economy. Between two kinds of economy, and one is often mistaken for the other.

True economy makes a man liberal but not wasteful. False economy is a hideous creature, which, if it ever comes to the utter disregard of social culture and the comforts of life. The farmer's success does not depend on the amount of labor he performs, or the number of acres of land he owns. He may roam over a large farm, consisting of hundreds of acres, and toil from sunrise till dark and yet gain no success, leaving behind him a family totally unfit for anything but to follow in the footsteps of their father. Another man may cultivate a small farm, give back to the field, so that it will produce more than the former did, and educate his children in such a manner as to fit them for usefulness in the world, and for the enjoyment of life.

The first man is a slave to his farm, and is suffering from indigestion in linseed-oil in doses of one pint, and afterward a little consisting of feed-meal of ground gentian root and one dram of sulphate of iron given with the food.—*N. Y. Times.*

—A correspondent of the *Rural New-Yorker* says that an excellent way to make the bark grow on trees from which it has been peeled or gnawed off is to bind the denuded place with clay, or with mud if clay is not at hand. Thus treated he has found that the bark will grow again without a scar.

—Where to Plant Shade-Trees.—Shade-trees are often planted too near to our dwellings and too thickly, so as to make the house dark and damp and disagreeable. Large evergreens are very much out of place on the sunny side of the house, while they form an appropriate screen and wind-break along the cold and exposed north and west sides. Set out trees—it is a duty; but set them judiciously.

—One of the best ways, if not the very best, to cook eggs is to pour boiling water on them. Have a pan on the hearth of the stove, or on the tank, and put the eggs into it; let them remain in it for from ten minutes to half an hour. The economy lies in the fact that the eggs are best preserved, when cooked in this way, by their own shells. Those who have tried it say that the eggs are better than when cooked in the ordinary way.

—Rich Milk Biscuit.—Two pounds of flour, half pound of butter, two eggs, three gills of milk, one gill of yeast, one gill of salt. Rub the butter into the flour, warm the milk; pour it on the flour; beat the eggs light, and also the yeast; mix all together with a knife. When well mixed put on a moulding-board and knead it well; cut in small pieces and form into cakes; put in a pan and set in before a brisk fire to rise; when they bake in a moderate oven. For a small family half this quantity will do.

How to Make Soup.

Let your materials be what they may, they should be put over the fire in cold water, and kept at a low temperature for the first hour, at least. Bones should be cracked in several places, meat should be cut, vegetables sliced or grated. But the chief secret in the, to many, mysterious art of soup-boiling is simply slow cooking for a long time. To be lasting in the progress is to soar. Impatience has counterfeited. The first heat will harden the outer network of fibrous skin and the albumen next to this into a case almost impervious to watery seas the generous juices may desire to put forth. Even those that would else draw them to the surface.

It is Grimm, I think, or may be Hans Anderson, who tells the story of the peasant-girl whom the king made into a great lady, because when left to watch the soup-pot she never once suffered it to boil. Our energetic Yankee housewife, who, if she has a fault, errs on the side of activity, is apt to be the reverse of this. Fussing fire and soup-pot alternately, she is the slave of both, and the slimmest meal in this line

Senator Gorman's bran-dered bill, I am reconsidered, was lost Monday.

Gov. Jerome has been confined to his bed for several days by severe illness.

The late N. N. Winslow, of Portland, left money to the society, city etc., to animals.

Mail matters a status will be traveled at Washington July 22, the anniversary of his death.

Mrs. Parnell's income from the English pension, has declined $47,000 for the Barnie's Bill picture.

The republicans of Indianapolis elected a complete municipal ticket at their recent election. Good for them.

Jacob P. Hayes died in Portland the other day from the effects of an execution on a walking match a year ago.

The Princess Hohenlohe, one of the most wealthy women of the day, is going to a French seaport for her health.

The late relief John S. Preston was the friend and patron of Hiram Powers, and furnished the money to bring him out.

John K. Boies, of Hudson, has been appointed an Indian commissioner by the president. Tally one more for Michigan.

Rev. Mr. Cleaves, of Campbell county, Va., has gone to prison ten years for criminal assault on his 11-year-old housekeeper.

Utah is being crowded with troops by the Mormon authorities. They probably have not read the democratic papers.

The Mormons are sending numerous missionaries to Europe to obtain emigrants and converts. Europe ought to appreciate such blessings.

Some new postal arrangements have been made between the government and Canada, which it is supposed will result in benefit to both.

Thomas Allen feared that Lumley Wurzer Baker had lost his sight, will be pleased to hear that he has been ordered by the navy department to sea.

The Yorktown centennial still hangs up. A long list of celebrities, some from England even, who will be in attendance are telegraphed over the country.

Professor Wentworth, of Robert college, Constantinople, says Bismarck was a sincere member of the church of England, and a firm believer in the truths of religion.

The legislature has passed and the governor signed a bill creating the 24th judicial circuit. This relieves the 24 persons people of Judge Tuttle as a presiding judge, and they are happy.

The celebration of the 100th anniversary of the formation of the Grand Lodge of Free and Accepted Masons in the State of New York will take place in the Academy of Music, New York, June 7th.

The death of a New York lady from the use of cosmetics has turned Dr. Hunnewell of that city to once more come out with his warning against all cosmetics as poisonous and liable to bring fatal results.

Everybody is happy. At least they ought to be, for Prof. Swift, of Rochester, N. Y., has found another comet. It's a whopper. He hasn't found one. It was simply an advertising dodge. Shoot him.

And now the women have another cause to rejoice. The universities of Spain have opened their doors to the gentler sex. An unexpected concession from an unexpected quarter, but acceptable, just the same.

Wm. H. Smith, who paid fifteen for Milnar portrait of Beaconsfield, was the one who published up the handle of the big front door on beautifulties, that he was made ruler of the Queen's navy, as was described in "Pinafore."

And now the democrats are talking of running Frank Hurd, of Toledo, as governor, against Foster. Frank is about the best subject for a knock down that can be found in Ohio, and deserves a dangler, and will get it—if he can.

That stomach as well as the oldest bride is occasionally surprised by rumor to James Gordon Bennett, a son Jim, is 35 years old, and wears the shrewdest wares of the Princess Amelia, Caroline Governor Princess Matilda, Princess Mary Princess Sophia, Princess Louisa, Princess Augusta, Princess Elizabeth

THE SENTINEL.

WILLARD A. SMITH, Editor and Proprietor.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

On the 31 the unfinished business, being the resolution for the removal of officers, came up, and Mr. Davis (W. Va.) took the floor and made a speech on the Virginia debt, question. A very short debate participated in by eight Senators, no action resulted, and the day adjourned.

After the Senate had assembled on the 6th Mr. Dawes moved to go into executive session, he doing so he repudiated the idea that he and his associates were giving up the fight over the Senate offices, which he considered, in the large and clear-cut way of presenting a question of great importance to the future welfare of the Government, involving, as it did, the right of the majority to rule. Mr. Dawes then asked that the motion be withdrawn for a few moments to give him the opportunity to speak to the resolution. The motion was then adopted unanimously. The resolution was then taken up, Senate confirmed, without discussion, Thornburn, Indian Inspector; Wm. Price, Iowa, to be Secretary of Senate; Hiram Price, Iowa, to be Commissioner of Customs; Wm. H. Smith, Indiana, to be Commissioner of Internal Revenue; Gen. Wm. H. Ludlow, N.Y., for Associate Judge of the Supreme Court of Dakota; Jeremiah M. Rusk, Postmaster at Terre Haute, Ind.; H. N. Coffin, Postmaster at Des Moines, Iowa. The other nominations on the table were referred to the Committee on Privileges and Elections. The new seats which were recessed and the Senate adjourned.

An executive session was held immediately after the readjournment of the Senate on the 7th and a large amount of business was transacted. The following were then both ratified, and also the extradition treaty with the United States of Switzerland, and the naturalization convention with Norway, providing for the annulling of Norwegian and Swedish Government, and the treaty with Japan, relative to shipwrecked sailors, which was taken on eighty-four nominations. Among the confirmations were the following: Wm. H. Smith, Indiana, Internal Revenue Commissioner; Edward S. Meyer, Attorney for the Northern District of Illinois; Thos. Farrell, United States Marshal for the Eastern Wisconsin District; Thos. Thornburn, Indian Inspector; Hiram Price, Iowa, Commissioner of Customs; Benjamin William Walter Wilson, Attorney for the District of Columbia. The following were withdrawn: Gen. Sweeney for following nominations to Federal offices in New York State, Stewart L. Woodford for United States Attorney for the Eastern District of New York; Thos. C. Platt for United States Attorney for the Southern District; Lucius Robinson for Commissioner of Internal Revenue; Silas Marshall for the Northern District, and John Tyler, United States Marshal for the Southern District of Illinois.

On the 8th Mr. Dawes made an attempt to secure action on the resolution for the close of the Senate doors, but the Democratic Senators regained their tactics of attempting resolutions to go into executive session and adjourn, until Mr. Dawes gave up the fight for the day, upon the promise that the executive session was held. When the doors were re-opened an adjournment for Sunday was effected.

Domestic.

On the 31, while the Lessees Ben Lorenzo and Hoyt, Cal., a train on the Central Pacific Railroad ran into a buggy containing the five children of Fritz Kuhn, and killed them all. They were aged eighteen, fourteen, thirteen, nine and seven, respectively.

The Attorney-General of Ohio has rendered an opinion adverse to the issuance of certificates of incorporation to companies organizing their members a specified sum of money as the first savings.

While Mr. David Reese and his son were engaged in endeavoring to preserve some of the contents of the burning house near New Providence, Pa., on the 2d, the building collapsed, and the former was killed and the latter burned to death. Mrs. Reese was also severely burned.

A few days ago a locomotive and tender went through a trestle-work at Ringwood, N. J., which was being repaired, and the engineer and fireman were killed.

William Bonnet, who killed two deputy sheriffs and then escaped from jail at Lincoln, New Mexico, has threatened to kill Governor Wallace for signing the death-warrant.

The total amount of six-per-cent. bonds received at the Treasury Department in Washington up to the 31 for conversion into three-and-a-half per-cent's was $60,050,150.

Mary Fanny E. Blackmer, of New York, a young lady twenty-four years of age, recently died from the effects of a bad poisoning, caused by the use of cosmetics.

It is announced that Mrs. Ella Ludwig, of Canada, N. Y., who had suffered for years from an apparently incurable hip disease, was recently made able to walk by the combined prayers of her friends at her bedside, on a day fixed by a note in Providence.

It was stated on the 31 that in every part of Northern Dakota seeding had been in active progress for the previous ten days, and the acreage was the largest ever sown in the new Northwest.

On the 31 the Oklahoma invaders, to the number of eighty-two, left Arkansas City, Kan., and Captain Payne announced that the recent judicial decision was fatal to their attempt to find homes in the Indian Territory.

On the 1d Professor Chandler reported to the New York Board of Health that contagious gastritis is superior in all respects to the poorer grades of dairy butter; that there is nothing objectionable in the material or manufacture, and that there is no need of legislation to protect public health.

Patrolman was been discharged in the vicinity of Hoopeston, Pa.

Thos. R. T. Dyer, of Chicago, testified before the Whittaker court-martial on the 4th, that the use of sanguitol internally he had explained to show that the note of warning could not have been written on a piece of paper torn from the sheet on which Whittaker had written a letter to his mother, and he testified that the two pieces could never have been joined together, because they were of different chemical composition. He further stated that if the note of warning had been rubbed over so as to erase previous pencil marks, the blue lines would have been injured, and he gave a practical demonstration of this fact.

Eighty-four thousand immigrants arrived in Chicago during April, and were distributed in different directions.

Mackinaw boys by Kingston, N. Y., have lately driven a Canadian boundryman to insanity by continuous tricks.

The recent appointment of a negro on the police force of Augusta, N. Y., has caused the immediate resignation of the Chief and one subordinate.

Two were were recently killed and seven injured at Dubuque, N. H., by the fall of a building which had been raised up by jackscrews.

In consequence of the death, of her two sons Mrs. Delaney, of Shenandoah, Pa., was rendered insane, and, on the 4th, deluged herself with coal-oil and set herself on fire. Though her flesh was charred to the bone, it is stated that she stood up cry of suffering.

The indications of an outbreak among the Utes have been dectared by the sitting of hostilities sufficiently serious to cause the dispatch of six cavalry companies from the contiguous force to White River.

The New York dispatch of the 5th says the World's Fair project in that city was virtually a failure, and would soon be entirely abandoned.

Nearly five thousand immigrants landed at Castle Garden, N. Y., on the 5th.

Five directors of the defunct First National Bank of Newark, N. J., have been indicted for conspiracy and aiding in the falsification of the books and reports of the bank.

Denver, the famous homestead once owned by Jas. Cooke, was sold at auction on the 5th for $15,500.

Mr. McCormick, of Quincy, Mass., whose child was stolen by a boy belonging to Deborah Wescott, and peddler in the society of hydropathists, brought suit for $20,000, and was awarded $1,200

As the result of a conference between Secretary Endicott, the Secretary of War and Generals Sheridan and Sheridan, an order was drawn up on the 6th restoring the military functions to the same status as before the order of November 1, 1880, which created the office of Lieut.-Gen. Sheridan. By the new order General Schofield is placed on visiting orders, and will report for duty at Chicago. This is placed in the Division of the Gulf is restored to the Division of the Missouri, which will remain under command of Lieutenant-General Sheridan. The Division of the Atlantic and Pacific remain undisturbed, under the usual respectively of General Hancock and General Schofield.

The American Medical Association, at its recent session in New York, annulled the charter of the Homeopathic leading of students who intend to practice the irregular method of prescribing.

Jacob Bierce & Co., one of the leadiest grain-dealing firms in Chicago, failed on the 6th, on account of the fall in the market of corn.

When passing through Baltimore on the 6th Mr. Henry Ward Beecher was served with a summons to answer the suit of the Maryland Agricultural Society for damages by his failure to keep his engagement to deliver the annual address at its fair in 1875 and 1877.

Mrs. Rose Stuart and party sailed from New York on the 4th for France.

Dr. John Bunn, the famous rifle shot, died at Hamilton, Ont., on the 5th.

Passenger Gazetteer on the 6th nominated Hon. Thomas O. Howe, of Minnesota, to be Superintendent of the new Assay Office at St. Louis.

Upon receipt of a statement of the case in Washington on the 5th by the withdrawal by the President of the nomination of Stanley Matthews, Judge A. W. Tourgee, Lewis F. Payne, Clinton D. McDougall and John Tyler to Federal judgeships in the State of New York, it is being understood that these withdrawals were made on a distinct understanding that Senator Conkling for his well-known opposition to the nomination of Judge Robertson.

It was stated on the 5th that United States Senator Dawes had telegraphed to a New Englander in Washington that he, or any one else, would be glad to see a member, had advised the President to withdraw the nomination of Judge Robertson, and recommended to him or to the caucus that action on the nomination be postponed until another session.

The Connecticut Democratic convention held its annual meeting at New York on the 5th, and Gov. Curtis presiding. The report showed that $1,239 had been spent in the canvass, and over two thousand dollars remained in the treasury. The following officers were elected for the ensuing year: President, George William Curtis; Vice-Presidents, Benjamin H. Bristow, Howard Potter, Orville Dewey, Chancellor, General George B. McClellan, John Jay, Robert B. Minturn, George B. Butler.

Passenger Gazetteer on the 5th nominated George P. Pomeroy, of New Jersey, for Secretary of the American Legation at Paris.

Angell, Russia, the first Governor of Iowa, died on the 5th, at Omaha, Neb., after having lived to the age of ninety-one. He was seventy-five years of age. Randolph Strickland, who represented the Sixth Michigan District in Congress in the session of 1869-70, also died on the same day, at Detroit, aged fifty-three.

An Associated Press telegram from Washington on the 6th states that President Garfield, while, to-day before, talking with a few trusted friends about the fight against Robertson, expressed a determination to defeat Robertson, even if the Republican Senators banded together in support of Conkling, and made the remark that every Senator who should thus enter into combination against him would regret a letter of instruction to be traced in the Division of the Gulf is restored to the Division of the Missouri which will remain under command of Lieutenant-General Sheridan. The Divisions of the Atlantic and Pacific remain undisturbed, under the usual respectively of General Hancock and General Schofield.

The American Medical Association, at its recent session in New York, annulled the charter of the Homeopathic leading of students who intend to practice the irregular method of prescribing.

Jacob Bierce & Co., one of the leadiest grain-dealing firms in Chicago, failed on the 6th, on account of the fall in the market of corn.

When passing through Baltimore on the 6th Mr. Henry Ward Beecher was served with a summons to answer the suit of the Maryland Agricultural Society for damages by his failure to keep his engagement to deliver the annual address at its fair in 1875 and 1877.

Mrs. Rose Stuart and party sailed from New York on the 4th for France.

Dr. John Bunn, the famous rifle shot, died at Hamilton, Ont., on the 5th.

Passenger Gazetteer on the 6th nominated Hon. Thomas O. Howe, of Minnesota, to be Superintendent of the new Assay Office at St. Louis.

Upon receipt of a statement of the case in Washington on the 5th by the withdrawal by the President of the nomination of Stanley Matthews, Judge A. W. Tourgee, Lewis F. Payne, Clinton D. McDougall and John Tyler to Federal judgeships in the State of New York, it is being understood that these withdrawals were made on a distinct understanding that Senator Conkling for his well-known opposition to the nomination of Judge Robertson.

It was stated on the 5th that United States Senator Dawes had telegraphed to a New England paper announcing that he, or any one else, would be glad to see a member, had advised the President to withdraw the nomination of Judge Robertson, and recommended to him or to the caucus that action on the nomination be postponed until another session.

The Civil-Service Reform Association held its annual meeting at New York on the 5th, and Gen. Curtis presiding. The report showed that $1,239 had been spent in the canvass, and over two thousand dollars remained in the treasury. The following officers were elected for the ensuing year: President, George William Curtis; Vice-Presidents, Benjamin H. Bristow, Howard Potter, Orville Dewey, Chancellor, General George B. McClellan, John Jay, Robert B. Minturn, George B. Butler.

Passenger Gazetteer on the 6th nominated George P. Pomeroy, of New Jersey, for Secretary of the American Legation at Paris.

Angell, Russia, the first Governor of Iowa, died on the 5th, at Omaha, Neb., after having lived to the age of ninety-one. He was seventy-five years of age. Randolph Strickland, who represented the Sixth Michigan District in Congress in the session of 1869-70, also died on the same day, at Detroit, aged fifty-three.

A Berlin dispatch of the 31 says a number of Jewish families had fled from Argenau, West Prussia, on account of fresh outrages, but the authorities were determined to preserve order. Two hundred persons were in the gaol in the city at Bischofwerd, Russia, and the streets were being patroled by troops.

Lord Lovelace has purchased in London a steamer of one thousand tons, and will attempt to reach the North Pole.

The death of the Marquis de la Vallette was announced from Paris on the 31.

On the 31 Vigel, a Vienna bookmaker, killed his wife and four children and cut short his career.

A threepenny battle recently took place at Fitzroad, where 3,000 Africans attacked the Turks. The latter were successful. The combined loss of the was 1,000.

The British aboard-of-war Bidoral was recently thoroughly in the Straits of Magellan, and out of 130 persons on board, but eleven perished.

A London dispatch of the 31 says that Maspero, the Egyptian explorer, had recently opened many of the Sakkara pyramids, and found that the discovered rests which meet the Masonic theory of the religious belief in the days of the Kings of the 6th Dynasty.

A St Petersburg dispatch of the 31 says that 15,000 Russian prisoners were on the point of starving for Siberia.

At a banquet in Montreal, Canada, on the 30 a member of Parliament named Courcell expressed the hope that Canada would send a detachment to the Yorkville Centennial celebration.

The commercial treaty governing the relations of France and England will expire by limitation in November.

On the 31 a committee of the International Monetary Conference at Paris adopted lists of questions to be submitted as a basis for discussion.

The Grand Jury at London on the 4th refused Herr Most, editor of the *Freiheit*, for inciting assassination.

According to a Paris dispatch of the 4th a delegate of the Revolutionary Committee had stated to the Czar the demands of the Nihilists and had been rewarded by arrest.

It is stated that the president of the Nihilistic province of Russia demand absolute ownership of the lands now held on lease.

The British House of Commons passed a resolution on the 4th in favor of absolving distress for rent of agricultural lands.

At a Land-League meeting in London on the night of the 5th, after a long discussion, a resolution to abstain from voting on the second reading of the Land bill and to force the House when a division was called was adopted by a vote of 17 to 12. Parnell threatened to resign the leadership unless it was passed. It was stated that sullivan had written a letter declining longer to acknowledge Parnell's authority.

On the 4th a Land-League manifesto appeared in London, signed by Justin McCarthy, urging Irishmen to either their landlords as they themselves had been treated, and to wreak vengeance at the polls on apostates from liberalism.

In the International Monetary Conference on the 5th the delegates from nine countries stated the views of their respective governments.

Mr. Forster, Chief Secretary for Ireland, stated in the British House of Commons on that night that he could not receive the report of the reported resetting of a tenant, and did not believe the charge.

On the 4th T. Aymer of the long-established carpet firm of Abbott & Netcham, at Leicester, England, Jewers, of Missouri, to be Superintendent of the new Assay Office at St. Louis.

Upon receipt of a statement of the case in Washington on the 5th by the withdrawal by the President of the nomination of Stanley Matthews, Judge A. W. Tourgee, Lewis F. Payne, Clinton D. McDougall and John Tyler to Federal judgeships in the State of New York, it is being understood that these withdrawals were made on a distinct understanding that Senator Conkling for his well-known opposition to the nomination of Judge Robertson.

It was stated on the 5th that United States Senator Dawes had telegraphed to a New England paper announcing that he, or any one else, would be glad to see a member, had advised the President to withdraw the nomination of Judge Robertson, and recommended to him or to the caucus that action on the nomination be postponed until another session.

The Civil-Service Reform Association held its annual meeting at New York on the 5th, and Gen. Curtis presiding. The report showed that $1,239 had been spent in the canvass, and over two thousand dollars remained in the treasury. The following officers were elected for the ensuing year: President, George William Curtis; Vice-Presidents, Benjamin H. Bristow, Howard Potter, Orville Dewey, Chancellor, General George B. McClellan, John Jay, Robert B. Minturn, George B. Butler.

Passenger Gazetteer on the 6th nominated George P. Pomeroy, of New Jersey, for Secretary of the American Legation at Paris.

Angell, Russia, the first Governor of Iowa, died on the 5th, at Omaha, Neb., after having lived to the age of ninety-one. He was seventy-five years of age. Randolph Strickland, who represented the Sixth Michigan District in Congress in the session of 1869-70, also died on the same day, at Detroit, aged fifty-three

Items From Home.

—Vegetation is growing finely.

—The Sun Crest was loading wood at Grass Bay Monday.

—Cricket will commence at Maple Grove on Monday next, by Miss Cora M. Gurbin.

—The whips' bells in Hayes all promise a good crop of nothing further into the season.

—Josh Billings says never do today what you can put off until to-morrow, and he has a great many followers.

—Mrs. S. succeeds Hiram Lothbury was blessed last Saturday by her children, who presented her with a full costume, and entertained her an enjoyable time.

—Mrs. E. W. Mandeville, formerly postmistress at Hayes, accompanied by her two daughters, started for Warren, Penn., last Monday, where she will spend the summer visiting friends.

—Mr. A. Ross sowed his spring wheat the 6th inst., and on the 13th the wheat was up and visible over the field, which is a remarkably quick germination.

—Highway Commissioner Bacot has passed among throughout the town ordering all obstacles removed out of the highways. If he will enforce the order we will say, here like a half brother.

—The corner folks of Hayes are too slow in matrimonially ally themselves so as to have a wedding at Hayes. Mr. John Dudik and his wife were remarried a few days ago by Rev. James Hard.

—The new school law which passed our senate a few days ago provides for a county board of three school examiners to be elected by the school superiors of the townships, which is a great improvement over our present system.

—Several of the neighbors gathered at Mr. J. Meade's the residence last Saturday evening. They brought their meat and bread and an impromptu supper was made, the evening was enjoyably spent, all at which arrangement was a surprise to Mr. and Mrs. Meadeville.

South Arm Items.

—Our society has commenced.

—Hiram A. Wilson has gone outside to work.

—Geo. D. Keller, of Chicago, passed through town.

—Thomas Gilson has received letter from Colorado.

—James Bennett has March's pint logs in the mouth of the river.

—Charles Barker and aunt have put in 20 acres of grain this spring.

—Hall Brewery has been employed to teach the Todd school in Wilson.

—Daniel H. Sager, father of Wm. Frisbie of this place, is in town visiting his son.

—The new Hercules, is in port; also the schooner Minnie Moeller is in other line.

—Gibson & Porter are building a large dwelling house for the accomodation of their work hands.

—The family of John Hackett are all sick with the diphtheria. The Spanish Burton is treating them.

—John W. Grant, of Ironton, who has for the past week been at Bellaire, has again resumed his homeward journey, where he commences his general routine of business, painting.

—Mrs. Tom Gilbran and daughter have arrived in town. Oracle.

From Kalamazoo.

To the Home of Charlevoix:

Not one-half of our fishing maps have been issued, but the letters of enquiry already received are convincing to the effect that we shall find our Belvedere House a source of embarrassment to us, and shall be compelled to look to the citizens of Charlevoix to open their hospitable doors that the many who will be drawn hither this summer looking for a summer home may not be poorly impressed from lack of proper accommodations. Those who can accommodate families and parties of two or more will confer a favor on the writer by stating what accommodations they can afford, terms and full information, and I shall perhaps do them and some of our correspondents a favor in return. The last experiences of a place is often the leading one, and we all, tourists and citizens alike want to give this summer's visitors a pleasant, homelike greeting.

Geo. E. Hazzard.

For Sale.

Several second-hand light harnesses, cheap for cash. J. Milo Eaton.

Edward Hanlan, the Canadian oarsman, who has been all the world at rowing, lost a heather named Jack who was born on Saturday. Jack was 10 and had a bronze about a piece of property worth $10, the dispute led to a fight, and he was completely wasted. Jack was somewhat browner, and, though he could have crossed the Nile over 100 times without fear, dying so because, as he said, he did not want to disgrace his family.

A good tea horse cheaper than any other will be sold at once, and cheaply. J. Milo Eaton.

Money to Loan on good farm security, Inquire of Willard A. Smith, Charlevoix. Apply by letter or at Home Mich. Home Agent, Hamilton, Antrim Co., Mich. 11-6m

The Pearl Fisheries of Lower California.

On the coast of Lower California an important industry has been developed by the pearl fisheries of that remote region. Five merchants and a thousand daring divers are wresting with their lives in supplying the markets of Paris, London and New York with the rare and costly object, which, when found, is in a state of great perfection in the deep waters of La Plata. The latitude is a little south of New West, in Florida, and not far north of Havana. Since the recent Mexican fever began, an increasing public interest has been taken in the resources of the southern Empire and of the Mexicanas, and the gold and silver and other precious products of that land are exciting much curiosity among American capitalists. As the pearl interests of Lower California belong to Mexico, they will, of course, rank among the other natural riches of that country. Chief Engineer Magee, of the United States Navy, who has lately returned from the Gulf of California, was found at the Fifth Avenue Hotel recently, in company with other the principal merchants of Mexico, who had just arrived from Paris, whither he had been to dispose of his annual harvest of precious stones. This merchant, chiefly hoping to use his country developed and American capital, industry, and machinery encouraged for this purpose, did not think that the present condition of the pearl fisheries of the Gulf of California would warrant the investment of more capital or labor.

The following facts were given during the interview: Pearl oysters are found from one to six miles from shore in water equal to twenty-one fathoms in from eight to twenty-one fathoms of water. The best divers or oysters are engaged in searching for them are generally employed under the contract system, as the best results follow in the discovery of pearls than they do when hired by the day. Boats, diving apparatus and money for provisions and outfits are supplied by the merchant on condition that all the pearls discovered shall be sold to him at such prices as may be agreed upon—in other words, that the many have the refusal of all the pearls found. Salt-boats of five ton burden and canoeing the rest, each are fitted up with sleeping and cooking accommodations, and all manned are employed in driving up and down the coast from May until October and November. The total product of the year's work is estimated at about $500,000, that is, reducing the pearls at the five-cent prices. The United States is a very poor place to sell pearls of any kind, and black pearls, which are most valuable are bought exclusively by wealthy and titled people in Europe. St. Petersburg ranks next to Paris as a good market for them, while in the United States there is a great demand for diamonds of extraordinary value. Of the entire yield of Mexican pearls ten per cent are white, forty per cent. blue, and fifteen per cent. black. The blue pearls are of little value. The oyster in which the pearl is found has the shape of a large clam or saddle rock oyster, but it is smooth and brilliant, with all the colors of the rainbow. The shells, which are known as mother-of-pearl, are carried once a year in cargo lots to Hamburg, where they are sold to Germans, who manufacture for German merchants and manufacturers for sawing into buttons, knife handles, paper-cutters and a thousand other conditions for beautiful and useful Americans are beginning to use this material. It is thought that there will be a large demand for pearl shells in a few years. They are worth from $150 to $200 per ton. Boston buys more of them than any other city in the United States.

The value of pearls depends entirely upon their size, shape and color, and perfect conditions. Here can never be an arbitrary schedule of prices agreed upon, for what one man may be willing to pay $1,000 another man would not be willing to pay a tenth part of that sum. The Russian nobles are especially fond of rich black pearls, which rarely find sale in the United States except as a matter of speculation to send abroad. Sometimes it is worth and even assumes before a hundred dollars' worth of stones are discovered. The choicest pearls are found during a season are worth from $1,000 to $5,000 apiece. The cheapest pearls are sold by weight. Generally pearls are about the size of bullets and found in the soft outer zone the piece where it joins the shell. Then again, just at the close of a long and unprofitable season an oyster is opened over may find a few pearls worth a fortune. Strange things keepen down in the wild autumn of those tumultuous fisheries. Four men sometimes find pearls that a king might envy, and if the divers were frugal they could often rise above the absurdity of poor pearl fishermen; but such successes are generally followed by dissipation, which and leaves the men as penniless as before.

The Mexican divers of the Gulf of California are said to be the most expert in the world. They go down into deep water and remain for a long time. In former times many men were lost in this perilous pursuit after submarine treasures. English diving suits are said to be the safest and most satisfactory, and superior to the celebrated French armor, but American hose-pipes are unsurpassed. Several years ago a large number of divers lost their lives in one season because of the defective English hose tubing. Since then there have not been many serious accidents. The loss of life caused by the exposure and hardships of pearl fishing is considerable, and the men generally retire after a few years of active service to spend the rest of their wretched days in trying to find relief from a rheumatic paralysis which generally closes a pearl-fisher's life. The lower currents of the sea, at a depth of eighteen or twenty fathoms, are very cold even in the tropics, while the pressure is oppressive. The blood grows cold and thick, so that the joints stiffen, the muscles contract, and only the strongest constitution can long survive the hardships of the pearl-fishing.

The divers are a great many sharks, but, as a rule, they do not fear them, although they sometimes cut or break the pipes which supply the men with air from the atmosphere above. The danger most dreaded by the brave fishermen is the celebrated devil-fish. "They are all we fear," said the merchant. "They lie near the bottom of the sea. At first sight they seem to be nothing but a shapeless, huge mass, but if a diver or the air pipes come within their reach, their long, shadowy tentacles or fingers suddenly clutch the object with a powerful, tightening grasp, until the man is drawn to death or the hose-pipes burst in twain. Many a man has lost his life through his accidental or theirs devil-fish."—*New York Herald.*

How Kentucky Horses are Trained.

One after another beautiful saddle horses were ridden out over the track, moving along at a gentle, easy gait, playing at a rapid canter, racking or breaking into a trot, as the rider wished. All these horses, I believe, were thoroughbred and their prices ranged from $250 to $1'000. So well were they gaited and trained that the rider had but to touch his mount in a given place or make a certain signal to have them take a rack, canter, trot, run or lope. Any one can learn to manage these gaits in a very short time, as I found by my own experience. But the method by which these horses are so perfectly trained I could not learn. Either the trainers do not know exactly how to impart this information, or they are deliberately reticent in regard to it. Some answered my questions by saying, "It is easy enough. You can make a horse do anything you want to. Only let him know what you want him to do. Use a better word spare in ridup, give him the hand freely, and it he takes over and when you spur him on the right side, just spur him again there when you want the same gait." Here a horse passed on a track, and as the rider touched him with the tip of his finger on the head, he struck out on a square trot. "Now," said I, "how was that horse trained so as to strike a trot by touching him with the finger?" "Why," answered the Kentuckian, "our saddle horses all learn that from the time they are colts." I asked Mr. Lindenberger. "What is the secret of the superiority of Kentucky horses. "There is no combination of causes," he answered. "The great majority of the horses here have some thoroughbred blood in them, and you will find it crossed somewhere back in their pedigrees. The best strains of running and trotting blood have been taken from here to other States, and they there fail to breed anything like desired results. There is something in the blue grass, the water, the atmosphere and the general climate influence, and then, as Mr. Treacy told you this morning, there is everything in judicious breeding and training. We force our horses to a gait when they are one year old, and at three we have what we are pretty well developed. The Northern men, however, always improve them." "How long have Kentucky horses held their high place?" I queried. "As far as anyone can tell us," answered men who have lived here eighty-five years and they state that from their earliest childhood they have heard of the superiority of our horses. Their fathers there them had the same story to tell. The fact is, that somewhere in the past there was brought into this State a strain of thoroughbred blood, derived from the best stock of the old world, and it has transmitted its qualities from sire to son to the present time. It is a lamentable fact that we have not the exact data upon which to base a history of the Kentucky horse." "The fastest horses in the world have been bred and trained in this neighborhood," continued Mr. Lindenberger, "as Maud S., record, 2:10; Wedgewood, 2:19; Woodford Mambrino, 2:24; Trinket, 2:10; Jack Moore, 2:22; John Morgan, 2:24; Indianapolis, 2:21; Voltaire, 2:26; and a host of the same horses that have been sent out of Kentucky, while the number of her carriage, saddle and trotting horses that have been sold here, and are now scattered throughout our large cities, could be more be calculated than one could count the trees of the forest.—*Lexington Cor. Cincinnati Leader.*

The Veil About Shakespeare.

Considering that Shakespeare died only two hundred and sixty-five years ago to-day—just four years before the landing of the Pilgrims at Plymouth—we know wonderfully little about him. Of Julius Cæsar, in many respects, we know far more. We are acquainted with Cæsar's habits, his judgments of men, his very words on many and some of these important occasions, so that his personality is almost familiar. But Shakespeare is to us the wise almost a shadow, and his works, amazing as they are, help us little in giving form and substance to himself. If nothing else, the fact that over two and a half centuries hence save his poetry, it would not be hard for some people to doubt and realize the man. We should know that he was at once a gentleman and Scholar; a lover of women and hater of men; a person at once prodigate and superstitious; an aristocrat and a zealot for liberty; a syharite, desperately prone to self-indulgence, yet capable of astonishing efforts of both mental and physical industry. All this and more it is easy to glean from Byron's writings, because he was morbid, intensely self-conscious and intellectually limited, however great, within assignable bounds, was his genius. But with Shakespeare it is almost exactly the reverse. So broad, so catholic, so healthy and so unsyoided is he that no such process of divination will apply to him. Byron is Conrad, Manfred, Lucifer, but never is Cæsar, or contrasting character. But Shakespeare is equally Hamlet and Falstaff, Iago and Touchstone, Justice Shallow and Macbeth. You cannot find in Shakespeare the assertions that imply introspection or self-love. Perhaps in this our fellcity in his possession is the greatest. A striking literary figure, like a noble mountain, is perhaps the grandest for being partly veiled by mysterious clouds. If the atmosphere were clearer the pronounciation might gain in distinctness, but it would lose in majesty and impressiveness.

Of the world's statesmen, warriors and rulers we can in general seldom know too much. But of certain wonderful writers—and if this is true of any of the immortal band it is true of Shakespeare—the zest and worth of the treasures they have left mankind are probably heightened, and at all events attention is more entirely concentrated upon them, by the fact that mankind know so little about themselves.—*N. Y. Evening Post.*

MISCELLANEOUS.

—Princess Louise will visit Saratoga Springs this summer.

—A Boston man has carried one leather pocket-book fifty-two years, and still uses it.

—The streets of Cairo, Egypt, are to have their names inscribed in Arabic and French and the houses numbered. It will be the first Mussulman town with such indications.

—Mr. James Beswick, British ethnologist, contends that the Welsh are a decidedly mixed people, the child-like and vivacious belonging to the early Iberian and the later Celtic type.

—A German girl of Sheboygan, Wisconsin, has been married to a Chippewa Indian, and has followed him to the lodges of his tents, where she dwells with him in the usual attire of a squaw.

—Queen Isabella is reported to be a property owner in Washington. She possesses there are thirty acres on Capitol hill and a row of brick houses. The latter are rented through a Philadelphia firm.

—Among the latest fashions for spending money by lady millionaires is the purchase and fitting up of special rail-way carriages. Mrs. Mackay is one of the fashion, and many others are following her example.

—A gentleman who have been rejoicing in seaside sausages and other delicacies, was horrified to discover that he was regaled with the wriggling tails of the worms which skirt the beach. The disappearance caused great alarm, and the people became suspicious when they learned that it was no less than Mingaud and a bad of eighteen years of age who had ridden the Count, traversed the mountains and obtained a ransom of $1,400 from his wife at Nice, and then returned again to the neighborhood of Forli. In June of 1880 he attempted an attack upon some merchants who were journeying to Modigliana, but was disturbed in his work by the police and threw himself in the river at Rimo. He tried to enter a mill but found the doors closed and contented himself with strangling the miller. In October he kidnapped the son of an officer of Brisighella, within a few feet of the village and held it for ransom for 2,000 francs. At the end of the month he organized another plot, but a telegram to the police of Faenza interrupted his design. Only a few days later the body of a man was found, and tied to his arm was a piece of paper on which was written: "It is thus that traitors are punished." His latest exploit was an attempt to sequester the son of the deputy Bonvicini.

—King Kalakaua has been elaborately entertained by the Emperor of Japan. The two potentates are nearly the same color, although his Sandwich Island majesty is much the larger and finer-looking man. The legs of the latter are very long for the usual diminutive Japanese pony, but this lack of harmony did not prevent the King being much admired for his equestrian grace.

—The man who stole a glance has not yet been arrested, although his attention was arrested when he stole the glance.

Teaching Him the Business.

"Herman," said a Bayless Street boy, addressing his brother, "what you sold all of those overgrown vatas left over from last winter?"

"No, sir, dere was three of dem left yet."

"Vell, we must sell 'em right away. De winter will not last, you know. Herman, Friday you go out de giant and I will show you somethings about de pianoes. I vill tell you how to vill sell de pianoes. Herman, dis winter vas gones, you know, and we has had dose giants in de store more as sexa years."

An eight-dollar overcoat was handed him by his clerk; and something it cost, in took a locksknin money purse from the show case, and, stuffing it full of paper, dropped it into one of the pockets.

"Now, Herman, my poy," he continued, "catch me sell dat goat. I had sold over dirty-life ol dem shirt in some day, and I vant to deceit you de pianoes. Yes de nexd customer comes in de shop I will show de way Reba Hoffenheim, mine broder in Detroit, sells his cloding and rubber dings."

A few minutes later a negro, in quest of a suitable pair of cheap shoes, entered the store. The proprietor advanced smiling and inquired:

"Vat is it you vish?"

"Yer got any cheap shoes liyar?" asked the negro.

"Plenty all dem, my frent, blenty; at any brice you vant."

The negro stated that he wanted a pair of brogans, and soon his pedal extremities were encased in them and a bargain struck. As he was about to leave the proprietor called him back.

"I ain't peine to buy nuffin else. I've got all I want," said the negro sullenly.

"But may be so, my dear sir," replied the proprietor, "but I shust vants you to look at dis goat. I vill tell you somethings, and dis time last year you dean got dot same goat for seventy-five dollars. Mine gracious! dot goat has gone down so nothing and dere vas no money in de pianoes any longer. You vant someding det vill keep you from de colder, und make you feel warm as a stove? Dis goat vill keep you warm in de coldest nights. De pianoes vas going round, and de doctors dell me it is almost exzed the exercise. So dere vas nine hundred pianoes sold in dis town and did round vere I lif last week. Dink of dot. Mine frent, dat goat vas listen vas vool, dick und long, and only vas dree Jooses, who owns de pank on Canal street, took dat goat from me dere yesterday, and vere it all day; but it vas a leedle slight agross de shoulders und I vas brought it back alnes a vile ago. Dry it on, my dear sir. Ah! dot you all right, Mister Jones vas a fine man und he liked dot goat. How deep de pockets vas, but it was a leedle slight agross de shoulders."

The negro tattered up the coat, threw the lapels back into the pockets and felt the purse. A peaceful smile played over his face when his touch disclosed to his mind the contents of the pockets, but he choked down his joy and inquired:

"Who did you say wore this byar coat?"

"Vy, Mister Jones rot owns de pank on Canal Street."

"How you gwine to ax fir it?"

"Dwenty dollars."

"Dat's powerful high price for dis coat, but I'll take it."

"Herman, here, wrap up his goat for de schentleman und drow in a scrack; it will make him look nice mit de ladies."

"Nother detail, I'll keep de coat," replied the negro, and, pulling out a roll of money he paid for it and left the store.

While he was around the next corner Herman was the stuffed pockets Hoffenstein said to his clerk:

"Herman, fix up anoder von of dose goats de same vay, und doan forget to dell dem dot Mister Jones vot rues de pank on Canal Street vore it yesterday."—*New Orleans Times.*

An Old-Time Brigand.

Mingazzi Ciambone, surnamed Bonin, says an Italian journal, a brigand of the old-fashioned type, has just been arrested in Italy. The following is a brief account of his career: Bonin, before he was released from jail in 1879 after ten years of penal servitude. He first asked a passage into Switzerland, obtained it and deceived the authorities who thought themselves well rid of him remaining the while in the neighborhood of Forli and Faenza in Italy. In November of that year he tried to stop one Guiarelli, a nobleman, on the highway, but his gendarmerie spurred his horse and escaped. At the same time Count Porzi and his wife were crossing Mingazzi fell upon him, looted and beat him and kept him prisoner in the mountains which skirt the Scalo. The disappearance caused great alarm, and the people became suspicious when they learned that it was no less than Mingazzi and a band of eighteen years of age who had ridden the Count, traversed the mountains and obtained a ransom of $1,400 from his wife at Nice and then returned again to the neighborhood of Forli. In June of 1880 he attempted an attack upon some merchants who were journeying to Modigliana, but was disturbed in his work by the police and threw himself in the river at Rimo. He tried to enter a mill but found the doors closed and contented himself with strangling the miller. In October he kidnapped the son of an officer of Brisighella, within a few feet of the village and held it for ransom for 2,000 francs. At the end of the month he organized another plot, but a telegram to the police of Faenza interrupted his design. Only a few days later the body of a man was found, and tied to his arm was a piece of paper on which was written: "It is thus that traitors are punished." His latest exploit was an attempt to sequester the son of the deputy Bonvicini.

Restrictions on the Suffrage.

Several Southern Senators have been able to meet the charge that the right of suffrage is unlawfully violated in their section of the country with no stronger defense than a counter-charge that the right of suffrage is restricted by law in certain Northern States. An inability to see any difference in the moral quality of the two offenses, although not to be offensive, would enable them to tolerate a remarkable obtuseness in regard to moral distinctions. Whether it is apparent to mankind that assertions that exist in one or two Northern States is the violation of the constitution of maintaining them may be subject to misuse by reasonable argument. There is at least ground for controversy. But to prevent those who are actually denied the right of suffrage by law from enjoying its exercise, and by violence, intimidation or fraud to subvert the will of the majority of legal voters, is a practice about which public opinion can be no doubt.

Violation of law and the subversion of legal rights allow of no argument in their defense. They stand on very different ground from that on which the right to prescribe a property qualification for voters is defended.

In the States which are the favorite objects of attack with those defenders of Southern practices it is difficult to support their cause with argument. Massachusetts and Rhode Island, for example, are most enlightened and orderly of the New-England Commonwealths. There is not a more populous State. Brown to less than forty years ago she contributed to five times as much to the national revenue as she received back in the shape of appropriations, and she afforded all the machinery of local government that was needed. Yet she has a system which concentrates its population in towns and attracts a large foreign element. Rhode Island has deemed that its interests and security required a restriction of the right of suffrage to persons of property. The suffrage must be free, the rights of citizens must be protected, and the evils which are charged that are so apt to spring up where restrictions upon suffrage exist avoided. The South has a task to deal with in which the North has little or no direct assistance. But first of all, the South must be orderly. Violence must not shriek. If a considerable portion of the whites will himself a party and refuse to recognize the political rights of the blacks, there will speedily come a political division of both races that will vastly simplify this task. It is the apprehension of this fact that gives per the Northern mind so much significance to the attitude of Senator Mahone. He is regarded as in the van of a movement that would prove a blessing to the colored race, to the Southern States, and to the cause of universal suffrage.—*N. Y. Times.*

The Anti-Bourbon Party.

The essential fact in American politics is that a build South is a standing menace to the peace and prosperity of the country. The experience of fifteen years has convinced the people of the North that decent in the solid has not changed the purposes of the Southern Bourbons. The Northern people would gladly welcome the party which should put an end of fertility—fields that could not support a blade of timothy or redtop.

Mirrors should never be hung where the sun shines directly upon them. They soon become misty and grow rough and granulated and do not give back a correct picture. The amalgam or union of tin-foil with mercury, which is spread on glass to form a looking-glass, is easily ruined by direct contact and exposure to the sun's rays.

To talk of any object being "literally roasted" is nonsense; says the Mark Lane *Express* (London.) Rust, like the potato-fly, can still attack any variety of its host plant, though some varieties are less susceptible than others. For instance, wheat with extra hard chaff-scale and straw offers greater resistance to rust than a soft-strawed wheat.

—Parsley and Lemon Sauce (Dutch.)—Wash a bunch of parsley and mince it up finely with the pulp and rind of a lemon; melt a cup of butter in a saucepan, mix with it a tablespoonful of flour, add the minced parsley and lemon, pepper and salt to taste, and pour over the sauce, a little pounded sugar and a few capers; stir well for a minute or two, let it stickily boil, and serve.

—A Quaker correspondent of the *Scientific American* gives the following simple remedy for destroying lice on fowls: Dissolve a tablespoonful of sulphur and glycerine, which I mixed into a quart of soft water. Sprinkle or sponge it gently upon the fowls, taking care not to get it in the eyes. I obtained it a short time since from a druggist, and it soon destroyed the entire brood of lice that had troubled me for months. I apply this paste at night and in the morning before going out I apply it to the roosts.

—The Country Gentleman says the only effectual way of preventing a horse from chewing his manger, stall or other fixtures, is to keep him in a box stall, or close by while tied or standing is to use a strong, light chain in place of the rope strap, and also for any part of the time the horse is in the habit of chewing. Such iron fixtures are quite cheap, and will last for several years, if they are not allowed to get rusty. Rusty iron soon becomes dryer, so that a third less water often has to be carried to the upland. Iron compounds poisonous to vegetation, which may sometimes, though rarely, be present, are rendered harmless, and the nitrogen may, to a slight extent, become more assimilable. If the muck bed is not to far from the barn, there is usually no more profitable way to use it than in composts with the manure of the yard.—*N. Y. Tribune.*

Early Spring Farm Work.

At no time in the year does farm labor bring greater returns, it it is rightly done, than in early spring. This is a peculiar time, in which great caution should be exercised, lest work done too soon or in an improper manner will leave scars or marks that will be visible when the land is ploughed and planted, and which, also, will injure the crops. Out of all these a few facts are developed, more lobarglas ones and a vast residuum of tuberculin bakers and bread makers, male and female, are born, not to be educated into a human soul. That indistinct, inqualable, intangible and unbelievable something which decides can person to get his loaves or cast his net. Sweden and Norway crust light and spongy while others are only the consistency of plaster Paris or gutta percha belongs to the same order of materials cannot which away the guest's pan, the painter's brush and the sculptor's chisel. The salad that is to be dressed or it comes forth from the oven a dead, lumpy mass. It is devoid of sweetness, without the tonic. Had bread is to staff of life at all. It is an ally of the stomach which is baked at every loaf. I was never a good bread maker. A blind skeletons in my window. Some were heavy, some heavier, some within were greenish yellow in hue, here excess of moisture. These killed not so quickly, but quite as surely as the others. Finally, the potato disease of my loaves were of an exhaustive hardness. With the idea that I was a failure in bread making, I had not had due success, from overmuch rapidity in kneading, from soda, sour and glutinous mass, often taken from the oven as some geologists, who explore the earth at first, as the entire core. Doubtless my bread has cost short cause of this shock of fear. It was the crime of ignorance, however. In the consolidated relations of flour, yeast, fire, flavorings and cooking with each other, we are thus ever involuntarily brought into contact. Any one should wonder is that I should, after having so long partaken of my own poison, still live.—*Practical Builder.*

A Very Old World Indeed.

Prof. William Denton, of San Francisco, gives a recent lecture, made some speculations upon the earth's age, and from fresh illustrations. He explained how, during 2,500 annual rings of growth, were found in the trees of California, showing that the fallen monarch of the California forest was at least 4,000 years old. The lecturer claimed that in the tertiary strata of California had been found the earliest human remains ever discovered, and these human logs were created when New Jersey, Pennsylvania of Virginia, all of Florida, part of Texas and Great Britain were under water. Also that the Mediterranean Sea was double its present size, and the Gulf of Mexico extended to Ohio. Where a large part of California was under the bed of the Pacific Ocean, and the Sierra Nevada Mountains. Man was on the earth in that period, and was long prior to the glacial period, which no geologist places at a less remote period than 100,000 years ago. Further back, and running still further back, are the distant periods of chalk, tertiary, the red sandstone, carboniferous formations, old red sandstone, silurian, lacustrian, and older than all, the laid-rock granite that forms the backbone of continents, and rises curves up to the surface from the earth's deeps. But Prof. Denton didn't know, and couldn't think, how old the world is.

The Largest Telescope in the World.

Sir Henery Bessemer, who invented a process for making steel which bears his name, has just erected near his home in England the largest, the most powerful, and probably the most useful telescope ever constructed. He himself has devised a plan by which telescopes of a size hitherto deemed impracticable can be set up. The chief point in which this instrument is erected is so constructed that any part of the heavens above the horizon can be inspected. It is made of glass with windows facing in every direction. Within are placed mirrors of silver glass, which last is used in place of metal. The frame and tube come move together automatically. Very great discoveries are expected from this, because when once it for use, Mr. Clark, of Cambridge, makes the best American telescopes, and some rich American should now set to work to beat the instrument of Sir Henery Bessemer.—*Bonner's Monthly.*

Confessions of an Amateur Cook.

From '49 till '52, or until men commenced to inspect their wives, the mule population of California was one seen posed largely of amateur cooks. Every man's hand was horizontally more or less in the dough, and his finger in the pie. Out of all there a few fine cooks were developed, more lobarglas ones and a vast residuum of tuberculin bakers and bread makers, male and female, are born, not to be educated into a human soul. That indistinct, inqualable, intangible and unbelievable something which decides can person to get his loaves or cast his net. Sweden and Norway crust light and spongy while others are only the consistency of plaster Paris or gutta percha belongs to the same order of materials cannot which away the guest's pan, the painter's brush and the sculptor's chisel. The salad that is to be dressed or it comes forth from the oven a dead, lumpy mass. It is devoid of sweetness, without the tonic. Had bread is to staff of life at all. It is an ally of the stomach which is baked at every loaf. I was never a good bread maker. A blind skeletons in my window. Some were heavy, some heavier, some within were greenish yellow in hue, here excess of moisture. These killed not so quickly, but quite as surely as the others. Finally, the potato disease of my loaves were of an exhaustive hardness. With the idea that I was a failure in bread making, I had not had due success, from overmuch rapidity in kneading, from soda, sour and glutinous mass, often taken from the oven as some geologists, who explore the earth at first, as the entire core. Doubtless my bread has cost short cause of this shock of fear. It was the crime of ignorance, however. In the consolidated relations of flour, yeast, fire, flavorings and cooking with each other, we are thus ever involuntarily brought into contact. Any one should wonder is that I should, after having so long partaken of my own poison, still live.—*Practical Builder.*

Swing Small Seeds.

The many failures we hear of in sowing small seeds—whether of farm crops, garden vegetables, or of flowers, seem to render necessary the repetition of the following essential requisites for success, namely, a finely pulverized covering, a depth according to the size of the seed, a moist surface until the plants are well rooted. 1. To bury seeds of any kind deeper than would be the throwing earth into a stone heap, expecting it to germinate and grow. The soil must be free, so as to press against the seeds to be buried, and give them moisture; and to supply this quality it is generally necessary to add fine manures. A top dressing of such manure is a good method to be accorded to grass, with a light and thorough harrowing. 2. A general rule for the reception of the seed; and a similar treatment is required in sowing any small vegetable seeds, as celery or lettuce, whether in a hot-bed or in open ground. Some flower seeds are still smaller, and may need the addition of loam mould to make the soil cover them. Sand seeds are sometimes buried so deep that they can never reach the surface. The depth should never exceed four or five times their diameter. Hence the reason that grass and clover seeds, which are rarely buried in, and portulaca seeds covered by sifting fine earth upon them. A cheap large scale moisture is had by early sowing, and for smaller garden seeds by the spring by shading the surface with a thin grass or straw mulch, and covered pot, a covering for a few days with coarse sacking or with other similar protection.—*Country Gentleman.*

—Plum Pudding.—One pound of meat, chopped fine; one pound of English currants, one pound of raisins, one and a half pounds of flour, three cloves, cinnamon and nutmeg, one-half teaspoonful each, one large tablespoonful salt. Mix all well together, then add corn cake sugar, one cup molasses, seven eggs and a half pint of sweet milk. To be made over night, then put in a cloth and boiled four hours. To be eaten with sweet sauce.

[Chicago Western Unionist.]

The latest man who has been made happy through the use of this valuable liniment is Mr. James A. Conlan, Librarian of the Union Catholic Library of this city. The following is Mr. Conlan's endorsement:

UNION CATHOLIC LIBRARY ASSOCIATION,
181 Randolph Street,
CHICAGO, ILL., Sept. 16, 1880.

I wish to add my testimony to the merits of St. Jacobs Oil as a cure for rheumatism. One bottle has cured me of this troublesome disease, which gave me a great deal of bother for a long time; but thanks to the remedy I am cured. This statement is unsolicited by any one in its interest.

JAMES A. CONLAN, Librarian.

The fellow who was much struck by a young lady wanted to retrieve a kiss for the liberty.—*Lowell Citizen.*

Member of this Legislature relieved of Rheumatism by the use of St. Jacobs Oil, says Hon. W. Watts, Esq., Representative from Fellow New York, in one of our exchanges.

A man who rises by his profession—a builder of castles.

Worthless Stuff.

Not so fast my friend; if your could see the strong, healthy, rosy faces, women and children that have been raised from beds of sickness suffering and almost death, by the use of Hop Bitters, you would say: "Glorious remedy, worth its weight in gold." See other column.—*Philadelphia Press.*

What are people who sit still and do nothing? Why, they are always breaking their word.

Nature's Remedy.

It is evident that a large portion of "nearly every body" is troubled with Kidney Complaint or kidneys. Kidney-Wort is nature's remedy for this, and when that natural power in the dry rose now presents it in liquid form of all may strong.—*Globe Democrat.*

A Very Old World Indeed.

WOMAN'S TRIUMPH!

MRS. LYDIA E. PINKHAM, OF LYNN, MASS.

DISCOVERER OF

LYDIA E. PINKHAM'S VEGETABLE COMPOUND.

The Positive Cure

For all those Painful Complaints and Weaknesses so common to our best female population.

It will cure entirely the worst form of Female Complaints, all Ovarian troubles, Inflammation and Ulceration, Falling and Displacements, and the consequent Spinal Weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel tumors from the uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use.

It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach, indigestion, bloating, nervous prostration, headaches, nervous fears, sleeplessness and indigestion.

That feeling of bearing down, causing pain, weight, and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the female system.

For the cure of Kidney Complaints of either sex this Compound is unsurpassed.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND is prepared at 23 and 25 Western Avenue, Lynn, Mass. Price $1. Six bottles for $5. Sent by mail in the form of pills, also in the form of lozenges, on receipt of price, $1 per box for either. Mrs. Pinkham freely answers all letters of inquiry. Send for pamphlet. Sold by druggists.

To family physicians Lydia E. Pinkham's Liver Pills. They cure constipation, biliousness and torpidity of the liver. 25c. per box.

Sold by DODSON, PLUMMER & CO., Chicago, Ill.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

The day, [illegible] made a big Arm over a million [illegible] last.

Texas went [illegible] Now I'm from [illegible] of the [illegible] terms.

Mrs. Mary Clay President, of [illegible] the notes published in the Interbellum [illegible] recently.

The Bank of England was founded in 1694. Its capital is £14,553,000, on which [illegible] in our money.

Notorious Injustice is spread to be afflicted with swarms of [illegible] bugs, which are consuming all [illegible] of fabric.

The number of types of temperate [illegible] the world is placed at 10,000, and the [illegible] of edible species in the United States is estimated at 2000.

The smallpox prevalence [illegible] continues in southern [illegible] Reports [illegible] and [illegible] are made, [illegible] ered by the epidemic, [illegible] and [illegible] miles constantly in [illegible] and property.

The goal of the new [illegible] the [illegible] runs out to the [illegible] [illegible] known as the Corner Stone and [illegible] telegraph [illegible] to leave [illegible] New York [illegible] but Bishop [illegible] a favorable [illegible] of lawyers upon [illegible] case.

R. B. Mason, of Detroit, the [illegible] of the Michigan Capitol and the Western Asylum for the Insane, is the [illegible] convention for the election for the new Texas capitol, at Austin. The building is expected to cost at least $1,000,000.

Opinion is about to replace the wooden pavements with stone, and, according to the Baton Transcript, the Batons will soon [illegible] a contract for [illegible] granite from near Richford, Maine, to Boston, whence it will be taken to Chicago.

Some of the very profitable [illegible] lasts of Baltimore are [illegible] at the Rev. Dr. Vanmeter for preaching at a Presbyterian church recently. He will be "persecuted." The Reverend Doctor is pastor of the wealthiest and oldest Episcopal church in Baltimore.

The people of Adrian, that town [illegible] deadly mosquitoes, and [illegible] how to subdue it. They recently [illegible] a [illegible] burrow factory proposition, located at Hudson, Lenawee county, [illegible] to send [illegible] his socks to their city. He accepted, and the financial [illegible] to smile.

A [illegible] and fatal [illegible] is [illegible] among cattle in the valley of the Missouri river, in Iowa and Nebraska. Thousands were drowned by the recent floods in that region, and now thousands of those which escaped that disaster are dying from the new disease, which appears to be the result of blood-poisoning.

The saying, "Money makes the mare go," is said to have originated as follows: "At a horse-race, a long time ago, a man had a mare that was noted for its fleetness. An other was made to induce him to re-sell a trait of speed, but [illegible] persuaded to his figure, he refused, saying 'Money makes the mare go!'"

The following test is given to ascertain whether well water is pure or not. "Take a clean bottle and put in it a teaspoonful of pure granulated sugar, fill with water from the well and cork tight. If after standing 24 hours, the water in the bottle is clear, it is good and pure; but if it presents a cloudy appearance it is bad."

Hon. Geo. Work, [illegible] member of the Ohio legislature, residing at Cincinnati, has recently [illegible] heir to $40,000, by which he will be able to retire from business and [illegible] himself to the luxury he is seeking, covering a period from 1620 to 1880, and [illegible] Indian, Negroes as Slaves, as Soldiers, as as Citizens.

During the year 1879 there were manufactured in the United States 1,000,000 tons of steel rails. This was the largest amount manufactured in any one year in the history of the country, and is 31 per cent greater than the product of 1878. The prospects for this year are excellent, and it is expected that there will be a much greater number of miles over the railroads of that year.

The man [illegible] of agricultural implements in one of the most [illegible] and staple of all American industries. In 1850 there were only 9,661 hands employed in the manufactures, now there are 110,000, the number having nearly doubled every [illegible]. Fifty employes more persons in this town than any other store, having 10,000 hands, whose [illegible] 1879 [illegible] [illegible] their [illegible] to agriculture implements are already large, and is reaching steadily to all parts of the world, except to the British colonies and possessions. The total [illegible] of Philadelphia [illegible] the [illegible] of [illegible] year.

LEE AND LINCOLN

How the Confederate Chief Heard of the President's Assassination.

[Special Dispatch to New York Tribune.]

Living at Point Lookout, Maryland, during the week, examining the new rations from Washington City to that point, my projector, S. Taylor Suit, once the Adam of the press in New York, later a Maryland planter, told this reminiscence: "There lived near me in Prince George county, at Upper Marlborough, a cousin and favorite of Gen. Robert E. Lee, named John E. Lee. He was judge advocate of the United States army, and when the war broke out was absent enough to watch this comfortable place and his rank of major to go over to the Confederacy. My intimate relations with him led me to know Col. R. E. Lee slightly. At the close of the war, about April 12, 1865, I made a visit to Richmond, Va., with the United States Marshall at Washington, Ward H. Lamon. On Saturday night I went to his room at the Spotswood hotel, and found him lying on his bed weeping. I inquired the cause, but he sobbed that he could not tell me then. Being unsatisfied and excited, I pressed to know his grievance, and finally said: 'I am going off in the morning to Washington; before I go I will tell you.' He informed me at Rockets, as the steamer was about to depart, that President Lincoln had been murdered. I came ashore again, and filled with the weight of such information, which was known in but few in Richmond I thought it would justify me in calling on Gen. Lee, who had arrived a day or two before and was at his dwelling. There I was told that Gen. Lee was about to attend religious service, but would be at home about 12:30 o'clock. I called again, and he received me cordially and inquired particularly for various friends, places, and incidents about Washington, Baltimore and Maryland. I finally said to him:

"Gen. Lee, I have a piece of private information which I came here to give you sir. The President of the United States, Abraham Lincoln, was assassinated night before last in Washington city."

"He ceased suddenly, his face being but half turned toward me before, and looked into my eyes with an expression I shall never forget. He looked me through and through.

"'General,' said I, 'there can be no doubt of it. The President's marshall, Col. Lamon, told me of it, and it has been fully confirmed in cipher messages to the military authorities. What do you think about it, Gen. Lee?'

"He raised his head and—him, assumed a positive expression, and exclaimed:

"'The South has lost her best friend.'"

Military History of Grant.

Gen. Badeau has completed his Military History of Gen. Grant. The first of the two volumes just published, 13mo with Grant's appointment to be general of all the armies in the spring of 1864. He proves that the Rebels had half a million soldiers in the field in May, 1864, notwithstanding their assumption of such great inferiority of numbers. There really was a difference of only 56,000 men in favor of the north at the opening of the Wilderness campaign. The battle of the Wilderness is described as splendid fighting, but the battle was a wrestle as blind as midnight in a wilderness that made maneuvers impracticable as in a jungle. Regiments stumbled upon each other and into the enemy by turns, firing sometimes into their own ranks. Grant's losses in the Wilderness were 13,000 killed and wounded, of which less than twenty three hundred were killed. This puts at rest immense misrepresentations about Grant butchering one hundred thousand men. Lee was very skillful on the tactical defensive, but he let every aggressive opportunity go unused. Lee's action of the war was to save out the political seniors of the north, or get English or French intervention. Grant's losses in the entire campaign from Culpepper to and about Petersburg, were sixty-five thousand killed and twenty-six hundred wounded, or not more than other great campaigns of modern times. Twenty-seven thousand five hundred men were captured at Appomattox, in addition to nearly forty-seven thousand captured in the previous pursuit, on a total of seventy-four thousand prisoners—and yet the Rebels say that Lee lost only fifty thousand men to fight Grant's 120,000.

The appointment of Gen. Grant as engineer to make preliminary surveys for the proposed Mexican Southern railroad looks like taking hold of the matter in earnest. The permission of the Mexican government to commence the work has been obtained. The time is not far distant when the whole of Mexico will be open to American commerce, and, we can say right to American progress and civilization. Mexico today is sunk in a worse barbarism than when Cortez, with his avaricious and bloodthirsty followers first set foot upon her soil. We are apt to think of the Mexican population as being of Spanish descent; nothing could be further from the reality. A very large majority of the natives are Indians, descendants of the ancient people who were conquered by Spanish arms without a trace of Spanish blood in their veins, and the marriage of several soldiers to some fair girl of the native Mexican, added no admixture

NEWS SUMMARY.

Important Intelligence from All Parts

The U. S. Senate.

THE unfinished business came up on the 9th, and a motion, by Mr. Hamlin, to go into executive session was adopted. After a long executive session there was a debate on the nomination of Stanley Matthews to be Associate Justice of the Supreme Court of the United States, which was finally confirmed by a vote of 24 to 23. Mr. Matthews was then sworn in by Chief Justice Waite, and took his seat on the bench. The Senate then adjourned.

Domestic.

FOURTEEN Cabinet Organ steamships have been indicted by the United States Grand Jury at New York for carrying passengers in excess of the number allowed by law.

THE City of New York and the Seventh Avenue Railroad for a license fee of $50 each for the privilege of running cars Sundays for $46,000.

LIEUTENANT BUELL, of the Twenty fourth Infantry, commanding a body of Seminole scouts, recently came upon the band of Indians who murdered the McLaverin family in Frio Canon some time ago. He attacked their camp near the Pecos River, in Texas, killed four bucks and one squaw, and captured one boy. The others, twenty-one in number, escaped on foot, leaving their ponies and camp equipage behind.

THE Catholic Young Men's National Union convened in Chicago on the 11th. Fourteen hundred delegates were present. A grand military review took place in St. Peter's Park, and for a century the city was received with great enthusiasm, and the Empress drove down the ranks in an open carriage.

SEVERAL arrests were made in Ireland on the 11th under the Coercion act. Among the victims were three men who had previously been arrested for complicity in the shooting of the boy Farrell, in Dublin, but were discharged.

THE Bank of France has declined to issue a fifty franc note, and will, if required by the Government, issue twenty and fifteen franc notes.

GENERAL GRANT has signed a new contract with the Mexican Government embracing extensions of the Mexican Southern Railroad.

THE Marquis of Lorne is said to have declared his intention to retire from the Governor-Generalship of Canada after his journey to Manitoba.

A RIGHT (Russia) telegram, received on the 12th, announces the burning of the Bolshoi Theater in Moscow, and the loss of property to the amount of 20,000,000 rubles. Crowds of refugees were crossing the Austrian frontier.

ON the evening of the 13th an Irish ballad singer was shot dead in Dundalk, while performing in the Market House, was shot through the lungs by parties concealed behind a curtain. On the following day John Heffernan, a prominent Cork Land Leaguer, was arrested under the provisions of the Coercion act.

THE Grenada electricians have constructed an electrical car to convey the Russian Papal Nuncio to Lichterfeld, a distance of six miles. The trial was made on the 12th, resulting in unqualified success. A simple transcar with an electric battery running underneath the floor, and propelled over rails resembling the ordinary ones on railroads, the motive power being applied to the wheels of each or electric battery at the sending station. The transcar, seating about thirty soldiers English miles an hour, but it was stated that a greater rate of speed could be attained, if necessary.

IN the British House of Lords on the 13th the Marquis of Ripon, replying to a question by Viscount Middleton, that the increase of outrages in Ireland was partially accounted for by the increase of agitation.

W. J. ROGERS, iron and coal merchant of Cleveland, Ohio, failed on the 13th. Liabilities, $600,000.

ROUMANIA numbers 5,000,000 souls, and is governed by a Prince, who had been ordinarily ill for several days, was reported to be slowly improving on the 13th, and was at least rather, but I know, too, that while her dream for years has been to perfect herself in her studies, she has also prized patiently at home nursing her invalid mother and running and managing for all that crowd of children." And George, who knew Nellie Read well, rejoiced in his friend's choice, and wished him every success for Nellie's sake as well as his own.

All had gone smoothly through the winter and early spring. Ben unmistakably preferred Nellie's society, and though there was no exact understanding between them, Nellie found her daily round of household labors, which, in spite of her determination to forget it, would obtrude themselves even very irksome, were lightened and changed by

CHARLEVOIX, : : MICHIGAN.

TRUE STORY OF MOTHER HUBBARD IN 1881.

DAME Hubbard lived in a lonesome house in the wilderness of Central Michigan,
And she kept a dog, and a woodsaw'd cat, But never a bit of bone.

The dame was thrifty, wheezy and old;
The cat was a thief to the core;
And neither the cat or the wheezy old dog Would touch a bit of barley.

One day Mother Hubbard went out for a drive With her neighbor, a transcendental friar;
The two old ladies were airy as evils,
And both were fond of gossip.

Their hair was puffed their bonnets in style,
Their dresses short and frisky;
They had much to say of the scandals
And the sins of the neighborhood.

Now old Mother Hubbard said to her friend,
"Let us lunch—I am hungry and cold"—
So they drove to a place where the best of cooks
Served fishes with dainties untold.

These three sat and satisfied, as ladies will,
Their appetites during prime;
Mother Hubbard said, "Friary was quite an ass
Mother Hugg expressed "mystic."

"Now little dear!" said the transcendental friar;
"My pantry is pearly, look!
But what ought to be in it is not,
To sympathize here with you!"

Mother Hubbard she blabbed, and wiped her eyes
With a napkin of linen fine;
For my darling dog has the jubilee now,
And my cat has the pip of swine.

"And I am so anxious, whenever I'm out
I mislay my pocket-book;
And I'm sure I've left it at home on the shelf
Of which the key I've lost."

"My cat, she ate her milk through a straw;
And my dog has a wound a leg;
Oh! what shall I do with my pocket-book,
A dish he eats by the dazzling way.

"Oh! what shall I do with my pocket-book,
I am sure and restless at night;
And I'm sure I've left it at home on the shelf,
And we always learn a bright light!"

"When he three of you be gone to the nest,
And all by other ways be met,
Let us then search for my pocket-book
To tell where he wants to go.

"Ah, they so were their talkers round,
"My cat will sure have a wound,
My dog will have the jubilee in thread."

"And my dear little Polly," said grandma Grey
"It would grieve you much to hear
Her cry when the chickens run about,
Their pretty feet are so sore."

"I told my daughter the child must keep
Out of sight—in and out her way,
Children should, you know, every where,
What's pretty, peculiar and gay."

"That is true, my good friend," Mother Hubbard said
"But some act as an ass and
If that should be the case with Wonderful
Pet's blanket are a pottering for me.

"He has only six more pretty pairs their
Some scarcely worn, and a variety of cloth,
For their pretty dog or other."

Now those antiquated ladies went out once more
To drive in the fresh air,
And on the front seat sat a messy dog
With a blanket on his back.

And close by his side, in a basket gay,
Was a cat in a dainty bed;
A gentler boy could not the pug or boy look
Than this cat and dog had.

Now this is the story and quite as queer,
If you see it at some bricks do,
And when you see a messy dog,
Which must was had a blanket.

—Kate Emmett Wood, in Chicago Inter-Ocean.

BEN'S LESSON.

"Are you going to the Tennants' to-night?"

"I don't know—who is to be there?"

"O, the usual set, and those Graham girls—they're a crowd in themselves."

"I should say so," said Ben, laughing; "they are young. There is plenty of time to settle down. I don't mean to hurry that I think Nellie Read is perfection, but by-and-by I mean to do my best to win her, but—that's no difference. But the Grahams seem to have lost their attractions for you—at first you were as much taken in as the rest."

"Shall I tell you the truth, old fellow? I was carried away by their easy, city ways; though Laura Graham is really no better-looking than Miss Read, and her mind is none better and no, at a casual glance, is more attractive. But I said to myself, 'Now, if you want Lottie's heart, you must not be carried away by a little city style, a woman you and use—I wouldn't bet on either Laura or Winnie Graham; a fellow would be running a risk to be married to either of them, in my opinion, though, after all, they may be gay and contented for a few years and settle down to be good as—"

"No, no! I can't have you pretend to think those girls can be compared; I know every one pass away your time with them in all hours, and was only too glad to have you back again, but in a manner that was quite complimentary to our mother's table."

Meanwhile, almost the first time of this conversation, Nellie Read and her intimate friend Lottie Lord were seated together in Nellie's room taking over the same question—to go or not to go. Lottie's escort, George as call for her, and they might go, but, if Nellie was not to be there, she really cared nothing for the party.

Nellie hesitated. She knew if she went she would, all evening, remain alone, and worst of all she was pretty sure that Ben would not ask to see her home but leave her to go with George and Lottie. Her heart was very sore, and she hesitated then came to her eyes and before she could check them were falling on her hands.

"O Nellie, Nellie, don't fret! I am quite sure Ben cares more for you than for that Kate girl. He must know you would only laugh at him if he made real love to her."

"And he thinks I will gladly take him when that occurs!" said Nellie, her head falling through her tears. No, Lottie, I will not. I begin to see that Ben's lessons have not been entirely plain hint of the state of affairs. Lottie cared she. It was the sweetest flattery to her and I will appreciate that—that was and country fellow," as she called Mr. Drummond to her friends. She thought she really carried him captive, but she was mistaken. All these last days Ben had been thinking, though he made three calls on her to one on Nellie, he had been very careful to show the best girl, as he told George.

But his friend saw he was running a great risk. Nellie wasn't quite so himself, so glad to be taken up at any moment. Mr. Drummond to the Read house, and a certain warm yet delightful picture of future duties and future cares for which all this daily routine was a good preparation. Her plain face had grown almost pretty, for the gray eyes were soft and shone with happy thoughts. Perhaps her words were not those ready than of old, for Nellie was a quiet girl, but she guarded her thoughts more than ever.

"I must be worthy," she whispered to herself, and blushed till her neither sorting the defects in her character that she might be worthy of her husband, and drawing down the happy tears, so sweet in her, she blessed her lonely daughter—her comfort and strength.

"Mother knew," but, until the story was really told, mother would not mar its awesome joy by one word of comment of her own. But Nellie loved to hear of girls and then turn to the spinner kind to choose a wife from at last; but I think it that is Ben's notion he will find out his mistake."

No more was said on the subject, for both girls had other matters to think of. They compared notes as to their progress in history and literature. Nellie was a favorite pupil, for a French sentence which puzzled her, and Lottie had tried Nellie's receipt for cream puffs twice and failed.

Both true to her resolution, studied faithfully all the evening, and, though she suffered somewhat, she found her mother a dear friend to stop and talk to her work—very well worth following. Ben spent the evening at the Tennants', and Winnie was particularly entertaining, getting him off by herself and confiding to him in a very very flattering to the young man. He did not think her improved in appearance, as he whispered to others. Not that Winnie was entirely hideous and untrue, but she had been allowed to go in society before her manners were formed or her mind sufficiently broadened to make a good impression.

The rest of the day went by all too, for the girls, under Nellie's guidance, found a great many finishing touches to put to the "preparations," dining-room and parlor. Sylvia, her cousin Sara and Nellie, as they made out a list, began to talk of the coming guest.

"It must belong to Nellie," said Sara. "It's only fair, since he's from the North."

Though she has one or two Southern admirers already," added Sylvia.

"Very likely," Drummond, may have his special attraction already in New York," said Nellie.

"All the more fun to win his heart."

"Would you think so if you were the girl?" asked Nellie, earnestly. "No girls; do let us be fair to each other. If we are to be happy let us not make us husbands, but be won by them."

"O, we weren't talking of marrying; only a little fun—an innocent flirtation."

No flirtation is innocent," said Nellie, decidedly, and managed to turn the conversation to other things.

Mr. Drummond proved a general favorite; he was musical with Sylvia, delighted to go boating with Sara or ready for an animated conversation with Nellie. His two weeks' visit, length ened by earnest request, lasted till Nellie and her mother treated their faces northward. Mrs. Read felt satisfied with the two months' stay. Nellie was eager to get home, but it was cheerful; six had no bitter feelings towards him, still thought him a fine, upright young fellow, but it was plain he had not won her, and Mrs. Read felt satisfied.

Ben was the first to call, and evidently intended to take his old place in the pleasant family circle, but with quiet dignity Nellie kept him at a distance. He had tired of Winnie Graham and grew really eager as Nellie grew cool. Perhaps the letters Nellie received from New York once in a while helped her to "teach Ben a lesson," though Mr. Drummond merely wrote of books and lectures, sending her magazines, and asking her opinion on different subjects.

Miss Nellie, I wish you would go back to last winter," said Ben one night.

"Why so?" asked Nellie, thinking, as over, "He may as well understand me now as ever."

"Because we were such good friends then—something more than friends, I sometimes hoped; but now you are so cool, so indifferent. You are so changed in short."

"And so are you, Ben, to be truthful; you are also changed from last summer."

Ben flushed uneasily.

"O, you mean I flirted a little. That was only fun. I knew all along who was the best girl and really waited for her—I wanted her for my wife. Will you forgive my foolishness, Nell, and accept me?"

"I really have nothing to forgive. To be honest with you, Ben, I am very fond of you; you could have won me long ago by less saying. But I felt obliged to look upon you as a mere friend, and it has become a habit. I could never change now."

It was very plain speaking yet Ben would not believe it at first. He tried again and again to win the prize that now that it was lost he longed for so earnestly. But Nellie, though his warm friend, would be nothing more, and for two years, people would say of "who Ben was not good enough for her."

Lottie Lord was a frequent visitor at the Read house, and Nellie's visits from New York. Mr. Drummond spent his vacation at Milton, and showed unmistakably whom he had come to see. Nellie was sought faithfully; courted even by Winnie Graham, who tried their charms with him, and at last Samuel Drummond won a true, good wife, and in the world Nellie Read would marry if Ben was not good enough for her.

State Rights Knocked on the Head.

At the breaking out of the war a citizen of Rockingham County, Va., owned a Pennsylvania bank of considerable debt, for which the creditors sued as soon as hostilities ceased. The debtor set up, as a defense to the suit, that the Confederate Government had run an armed debtor due to alien enemies, thus relieving him of the debt. The decision was against the debtor—was not obliged to pay it a second time. This plea was sustained by the Rockingham court, whereupon the Pennsylvania parties applied to the Virginia Court of Appeals for a writ forbidding the case before it for review. The Court of Appeals denied the application, affirming in the usual terms the decision in Rockingham was "plainly right." The plaintiffs then carried the case to the Supreme Court of the United States, which issued a mandate telling Virginia Court of Appeals to reverse its opinion and review the case on its merits. This order the Virginia Court of Appeals refused to obey, declaring that it was dead a-sin" to go behind the Federal as well as the State judiciary is coequal.

The Rockingham case was then carried negatively into the United States Supreme Court, which promptly declared that the Virginia tribunal was not justified in "plainly and palpably" refusing to consecrate Southern debts due to Northern creditors, and again ordered a final judgment in favor of the persons to whom the debt was due.

Mr. Alexander Fields, also a Democrat, in pronouncing upon the case, remarked, substantially, as follows:

"So long as this decision, made by the Virginia Court of Appeals, remains unreversed, it will be authority to all the inferior courts of Virginia that the confederation of sovereign States is dissolved under an act of the Confederate State government entitled a war of the States' Rights."

The point in this matter is, not that the Supreme Court of the United States decided in favor of the loyal creditor, which action of the court was right, but the court confession says, but that the Virginia Court of Appeals should be found defending the "confederation of sovereign" which assumed to be a Government, and that fifteen years after the revolt was suppressed.

It was to be expected that the Supreme Court would assert, as it has done, in no unmistakable terms, the supreme power of the United States. The only regrettable feature of the decision is that it should be necessary, and this necessity and the decision which is its result, will attract the attention of the country to the loose and pernicious methods of thought quite as much as will the opinion itself. That which National authority is resisted in other parts of that section.

The decision of the Virginia Court of Appeals will be accepted as Virginia sentiment, and the fact that such a reactionary will come to the conclusion that these yet exists in the Old Dominion a settled purpose to accept all the results of the war, with the Constitution framed and established upon it, and to affirm an extreme doctrine of State Rights such as it professed when it seceded, is a most significant fact.

The Virginia decision would make the bonds of the Union a rope of sand, and, confirmed as it is by the action of the Democratic power over the lives of the millions rescued from slavery, where events have proved it would be not only to turn the humanity of emancipation into a consuming curse. What happiness it would confer upon the lately enslaved to reverse the verdict of Appomattox at Richmond Court-House, they would leave the Union, with its debt and sacrificial suffering, where it was when the Monsignore Secession mutt decreed the most unjustifiable war of history.

Being animated by these purposes, and giving them expression through their press, and through the Senate and through the mouths of "grave and reverend" judges, the people of the South cannot complain if the men who defended and saved the Union hesitate to entrust them with its control.—*Detroit Post and Tribune.*

Bourbonism vs. Mahone.

A correspondent of the New York *Tribune* who has lately interviewed an intimate personal and political friend of Senator Mahone, lets out some of the secrets which may readily down upon the devoted heard of that Senator such an avalanche of Bourbon spite and malice. The learning of the Bourbon managers to date back as far as 1876, when Mr. Mahone took it upon himself to oppose the Virginia Constitutional amendments. Bulfinch liberty as a question and citizens who have got within the year been assessed, and who has not paid a poll-tax. Mr. Mahone favored the amendment to be in contravention of section 1 of the fourteenth article, because it would result in the practical disfranchisement of a large class of honest voters, and be made use of by unscrupulous politicians to manufacture Presidential majorities. In spite of his opposition, the amendment was adopted and has been used precisely in the way he predicted it would be. It has put in the hands of the Democratic assessors the power to defeat a fair election in the manipulation of which the colored vote could be suppressed, whereupon the power of the party required that to be done. It is the duty of the Assessors to make out assessment lists to individuals, and have each fill out and return his own list. An omission to send out those lists to the colored voters was a very easy thing, and one which would not be likely to become known to the public. When each Assessor made up and transmitted his returns to the proper officers, they would show only those who had actually paid their assessment into the Assessors. When the colored man who had paid into the capitation tax came to apply to the Treasurer to pay the tax and take a receipt in order that they might vote, they were quietly informed that their names were not on the assessment rolls and that no tax had been assessed against them. Their only remedy, then, was to appear personally before the State Auditor, at Richmond, pay the tax to him and get a receipt. To most of them this would be utterly impracticable, and those, though they were abundantly able to pay their taxes, they were disfranchised. Thus without recourse to violence or intimidation, the Virginia Bourbons have been enabled to suppress thousands of Republican votes, ever since the adoption of this amendment; and their justification of such a procedure is the avowal of their belief that a negro ought not to vote; it is a convenient way of nullifying the Constitutional amendments.

Opposition to measures so liable to be carried was the beginning of the schism which Mr. Mahone has been the cause of the instruments to open, and he made so extensive a breach in the party as to attract the attention of Mr. Sprigg, of Chairman Barnum, who at that time was trying to effect the annihilation at Cincinnati of Samuel J. Tilden. Barnum, in great nervousness had been to Cincinnati, watched improvements in Virginia, and finally procured an interview with General Mahone. He asked him if he would not carry Virginia, if nominated. Mahone replied that he would, though he was very unpopular in the State. Then Barnum proposed that Mahone should go to Chicago, secure the Funder Convention and send a set of Tilden delegates to the Cincinnati Convention, and offered to furnish funds for that purpose. Mahone refused to make the attempt or to have anything whatever to do with the Bourbon Funders. Barnum appealed to the Readjusters would carry solid delegates to the Convention. Mahone asked if they would be admitted. Barnum replied in the negative and said that the Democratic party would have to be reorganized. Mahone then told him that the Readjusters would not attempt to delegates to the Cincinnati Convention for the purpose of breaking up the party. Barnum and Barnum that the National Committee would do better to keep his hands off. Mahone returned to Virginia thoroughly disgusted with Bourbonism, and stigmatized as being only a commercial man and no true Democrat. When the Readjuster Convention met, there were 11 delegates assembled, less than a quorum. Could be summoned, and these had been chosen by primaries in which not more than 3,000 voters altogether had participated in the Readjuster supremacy with a vengeance. The Convention elected delegates to Cincinnati and instructed them for Field, a man whose very name was unknown to all those who had come to Richmond in the State of Virginia.

The Readjuster State Convention assembled with over six hundred delegates, but in no way affiliated with the Democracy, except to instruct its Presidential Electors to vote for Hancock and English. The Readjusters rejected all the overtures, and declared they would have nothing to do with the Bourbon Democracy.

Chairman Barnum's attempt to buy up Mahone has resulted in a Special Railroad tried his hand at it, and opened a correspondence with Mahone, but struck a stone-wall. Mahone is Pennsylvania to ally himself against the Bourbons and Readjusters upon the electoral vote. Mahone was intractable, and replied that he would do no such thing; that the National Committee had no business to meddle with the affairs of Virginia, and that it would be better to keep its hands off. Randall then said that he would telegraph for Mr. Hewitt to come to Philadelphia. Mahone replied that if he did so he must do it on his own responsibility.

Mr. Hewitt, on the part, undertook the mission of raising $200,000, with which to carry New York, Indiana and Connecticut, declaring that unless Democratic States could be carried he would make no difference as to which faction in Virginia was recognized. But he informed Mahone that if this result could not be effected the Committee would recognize the Bourbons, because they had always been their friends and stood by them. Mahone then warned Hewitt against this course, telling him in substance that it would forever prevent any future recognition of the National Democratic party by the Readjusters except as an enemy to be fought by them, wherever and however they might meet it, whether in Virginia, in Congress or elsewhere. Mahone immediately hastened back to Richmond and issued his address.

These are some of the ante-solstem which have brought on the bitter fight upon Mahone which Hill and Hewitt and Morgan and Butler and Lamar and the whole tribe of Bourbons are waging upon him, and they exhibit the native corruptions of the old party of which they are now the aggressive and unscrupulous. But the little Virginian withstands their assaults undaunted, and the breach he has opened, in like and being healed up, is widening and spreading to other States, dealing a most threatening measure to the Bourbon domination which has so long kept the Solid South under its iron rule.—*Wisconsin State Journal.*

So-Lo, a resurrection! Hendricks, who has not been visible to the public eye for six months or more, barely suddenly upon us at Kansas City loaded to the muzzle with unreasonably interesting views of men and things. His opinions have the familiar Hendricks flavor. They straddle all the possibilities scientifically. Of the late lamented Chesterfield he says:

"Mr. English is living in Indianapolis as usual. The stories of his wealth are greatly magnified. I suppose he is now worth about $1,000,000—certainly no more. General Harrison is a very different sort of a man from Mr. English. He is a great General and a millionaire. Well, English never claimed to be a great General.

Jefferson Davis comes to the surface again with the observation that "it is a narrow and weak policy that endeavors to perpetuate the Union of States by begging the question of their sovereignty." It will be observed that Jeffy, the same old sixpence, like the State Sovereignty trouble very hard, and it will probably die with him.

The Democrats say the situation makes them enormously happy, and one exuberant prophet among them says they will nominate General Hancock in 1881, and elect him without a particle of trouble. No discreet Republican will interfere with that delusion.—*N. Y. Tribune.*

SCHOOL AND CHURCH.

—One prize in three is carried off by Jewish students in the New York colleges, according to reports.

—Rev. Joseph Cook is lecturing with considerable success in Ireland. He recently dined with the Archbishop of Dublin.

—The University of Zurich has conferred its first Hungarian Countess William Hugnay the title of Doctor of Medicine.

—A Missionary Conference, embracing a large number of missions in the East, will convene at the Bible House in Constantinople in June.

—The new compulsory education law in France provides, among other things for instruction on duties of citizenship and the constitution of the country, elementary notions of political economy, and law, and gymnastics.

—A class of fourteen has been organized at Yale College, the lectures and instruction to be delivered by Professors Sumner, Williams, Brewer and others. It will resemble what is popularly known as the Harvard Annex.

—Bishop Elliott, of Texas, is the youngest Bishop in the United States. He is a son of a Georgia planter, before entering the military was a dashing young Confederate officer, and carries a bullet in his handsome head which still troubles him occasionally.

—The Americus Presbyterians and the American Baptists are the only denominations carrying on missions among the Negroes. The Presbyterians work among the Siamese and the Laos and have a flourishing orphanage in Bankok, the Presbyterians have a flourishing orphanage in Bankok, the capital.

—Bishop Warren has introduced a poly technic department of a novel but very practical character into the Puget Sania University. He has organized a College of Carpentry, and the students down a large part of the work in large numbers that he wants a little money to engage in a business where they can work and to supply tools.

—At the recent meeting of the New England Methodist Conference a report was presented by the Committee on the Church of Christ, encouraging special effort for higher piety and more faithful Christian lives, and the maintaining of a higher general standard. It discourages single services on Sunday, and the holding of the afternoon and evening and preaching service in the evening crowds out an important prayer meeting, and the tendency to become a temptation to Sabbath-breaking.

Mr. Vest, of Missouri, says he can see no Democrats in sunset. But then, since Washington.—*Boston Republican.*

—Garfield says he wrote a "stirring" letter to Mr. Dawes. Mr. Dawes says he didn't. Mr. Dawes possibly lied.—*Pittsburgh Times.*

—That any Malone is small has plenty. He is big enough to lose the Republican party, and he plucky as that of a cock plantation overseer.—*Boston Post.*

—I earnestly want everything to go against Garfield. *Time* would have come as without the hope of reward or fear of punishment before them.—*Rochester Union.*

—A clerk in the penitentiary department knows enough about the Brady business to make the whole business about Cincinnati look like. Tell us that Garfield.—*Cincinnati Times-Star.*

The Garfield-Conkling Controversy.

A Boston correspondent of the *Albany Journal* discusses this sensibly on the controversy between President Garfield and Senator Conkling:

"Good Republicans regret very much that an issue has been joined between President Garfield and Senator Conkling. No one pretends, for one moment, to controvert that the President has not the right to appoint whoever he pleases for an office that is vacant, or about to become vacant. It requires a question of expediency that is a question of right in most cases. The nomination of Robertson as evidence of capacity for the post of New York collector of the first that took prominent and very distasteful to the leading, influential, active Republicans of that State, with Conkling, Arthur, Platt, Cornell, Depew, Woolford and others at their head, was a mistake. It may be that Robertson will help to break the solidity of the New York delegation in the National convention that did much to render the nominations of Garfield possible, but if it so has come to pass that his the powerful and efficient aid of Conkling, Arthur, Cornell, Platt and their friends, New York would have been counted for the Democrats and Garfield defeated. Garfield owes far less to Robertson in his consideration, than to Conkling in the election. How any personal slight to the moment appears that Judge Robertson and ex-mayor William Cornell with all of that class of Republicans ex-gether, could count within 10,000 votes of carrying the State of New York for the Republican party, is deep any one can pose that the Republicans can carry the State of New York without the help of Conkling and his friends? If anybody faithfully proposes to crush Conkling, it should be borne in mind time when that is done, what there is left of the Republican party in the State of New York would hardly be worth looking after. Perhaps the Republican party can get along without the vote of New York in 1884, if it can, let the party go on and crush Conkling. Now is the experiment a new one in some of its phases. Have tried his hand at the business. First, he refused to make Platt of N. Y. Postmaster then, Platt was not such a man to be thus insulted; and then Platt was a friend of Conkling's, as he must be included, and rejected and so as Conkling preferred to him for the position, so the country had a Democratic Postmaster General. Now, and the case seems to be, the President has refused to make one of Conkling's friends in the New York custom house, Messrs. Chester A. Arthur, Alonzo B. Cornell's and General Gen. H. Sharpe, all of whom have been promoted since by the people to places of official position, while Dorsey has proved to the discredited chicanery of private life. Garfield had the power to do it, but can he do it? Some of the N. Y. Republicans, doubtless Democrats themselves, will accept the position, but would be regarded by their friends as traitors. Republicans had a right to oppose the appointment of Dorsey, and as a Republican he has a right to the position, the President has a right to appoint him, and the Republicans have

THE SENTINEL.
WILLARD A. SMITH, Editor and Proprietor.
CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

The U. S. Senate.

On the 15th Mr. Saunders introduced a series of resolutions, by reference to an alleged evasion by the Central Pacific Road of the 20th section of the act of 1862, which provides that 'one-half of the net proceeds of the sale of the land so granted to aid in the construction of the road shall be reserved and applied as a sinking fund to pay the bonds as they become due.' The resolutions call upon the Secretary of the Interior for information in regard to the matter, and request the next session of Congress to take such action in the premises as may be necessary to secure the United States from loss. Mr. Davis (Ill.) introduced a bill to amend the act of 1862, to provide for the appointment of a commissioner of railroads, to be appointed by the President, by and with the advice and consent of the Senate, at a salary of $5,000 per annum. Mr. Sherman introduced a bill to amend the act of March 3, 1875, so as to provide that the Secretary of the Treasury may, in his discretion, issue duplicate certificates of deposit in lieu of those lost, stolen or destroyed. Mr. Sherman also introduced a bill to provide for the payment of the bonds issued to the Pacific railroads, after a strike of two weeks, returned to work on the terms offered by the companies.

A few days ago Mr. Sherman introduced a stage near San Marcial, N. M., and shot at the driver. Two passengers sitting on the box drew Winchesters and killed the robber. The bullets were left in the road for a day.

The steamer Arizona has made the quickest recorded passage across the Atlantic, he time being seven days, five hours and thirty-five minutes.

The Internal Revenue authorities have compromised the claim of the United States against the International Bank of Chicago for back taxes on circulating notes, by the payment of $46,000.

The army-worm is reported to be destroying all kinds of vegetation in Northern New York.

From the 15th to the 18th 9,200 immigrants arrived in New York. The total since the year opened was 105,902.

Fifteen houses, including Headmastons and Bethell, Mayfair, and Grosvenor streets, were recently burned to death in Douglass' house at Franklin, Ohio.

A Tennessee gave half the police force of the town employment a few days ago for three hours. After he had been shown how the fire alins no less than twenty bullet-holes were visible in his canvas.

Governor Churchill, of Arkansas, recently changed the face of a negro murderer to life imprisonment on the very eve of being hanged for a crime which he fully confessed.

Five hundred children were recently taken from the public schools at Atlanta, Ga., on account of the prevalence of a mysterious disease.

Since July 1, 1880, the railway mail service has been extended to 6,130 miles of road, this being the extent of new roads built during that period.

A few days ago seven Texas rangers and a band of thirty outlaws had a desperate battle near Fort Ewell. One soldier was killed, and two of the cattle-thieves were captured.

On the 16th three rail-agents stopped a train near Lake City, Col., shot a fireman, railway engineer, and carried off the treasure pouch and mail sacks.

Harmon, the defaulting cashier of the First National Bank of Newark, N. J., has been sentenced to seven years in State Prison.

A small colony of Mormon converts from Australia reached San Francisco on the 19th.

The steamer Alaska left San Francisco on the 20th was the sale of copies of the Revised New Testament, which began at an early hour in the morning. Dealers in the city took about 70,000 copies, one house alone taking 30,000. The orders from New England were also very large. Ten thousand copies were shipped to San Francisco, and double that number to booksellers in Chicago. The entire number of copies of all kinds disposed of by Nelson & Sons, up to three p.m., was 250,000. Of these the largest number were Brevier books. The next day over a million exhausted was that known as the Minion edition, which is the real price of which from $1 to $1.50. Bank & Co. dispatched 30,000 copies by express and freight to many points in the United States, and a great number of single books were sent by mail to those who had ordered them by letter in advance. It is said that no book ever introduced in this country was brought up with such a degree of avidity, and it is not likely that a larger number of copies of any other book were ever sold in this country.

The Turkish leader has gathered a force of twenty thousand men for another incursion into Greece.

Count von Arnim, the German diplomatist who was sentenced to five years' penal servitude for betraying his country, died a few months ago at Nice, France.

Secretary Sherman has issued a circular to the national bank examiners, directing them to make a special examination of the silver certificates, of the denomination of $20, his been reported that a number of counterfeits have been circulated. It was examined with a pen, and is the first which has appeared.

Personal and Political.

James Buchanan died at Lancaster on the 10th, at the mature age of eighty years. He was famous as a leader in the Whig party, and was the first Democrat to sit on the bench the unconstitutionality of the Fugitive Slave law.

The Treasury Congress, lately in session in the city of Washington, has voted to the Secretary of the Treasury, to be used in the discretion of the Secretary, a sum not exceeding $10,000, to be used in the detection of counterfeiters.

Mr. Blackburn's resolution relative to international canals was called up on the 18th and, after debate, was adopted, and the Senate on Monday, 21st, adjourned. Mr. Saunders's resolution directing the Committee on Finance to inquire into the relations of the Central Pacific to the United States, and to report to the next session of Congress the most equitable method of adjusting the debt of that company, was taken up on motion of Mr. Davis (Ill.), and adopted.

A committee was appointed to wait upon the President to inquire whether he would have any additional nominations to make, and after a short absence reported that he would send nothing more to the Senate except the return for Collector of New York and formally thereof, for Commissioner of Agriculture, and the nominations without opposition. The nominations of Hubbell and Folger followed in the order in which they were withdrawn at his own request, and were confirmed, among the rest, Postmaster-General James, who was also confirmed as Collector of the Port of New York. Mr. Jay Gould, Chief Engineer of the Union Pacific railroad, and Mr. Dillon, President of the Sioux City and Pacific railroad, were also confirmed as Directors of the Union Pacific railroad.

The Brewers' Congress, lately in session in the city of Washington, has voted to ask the Supreme Court to decide whether the Internal Revenue authorities have compromised the claim of the United States against the International Bank of Chicago for back taxes on circulating notes, by the payment of $46,000.

The army-worm is reported to be destroying all kinds of vegetation in Northern New York.

From the 15th to the 18th 9,200 immigrants arrived in New York. The total since the year opened was 105,902.

Fifteen houses, including Headmastons and Bethell, Mayfair, and Grosvenor streets, were recently burned to death in Douglass' house at Franklin, Ohio.

A Tennessee gave half the police force of the town employment a few days ago for three hours. After he had been shown how the fire alins no less than twenty bullet-holes were visible in his canvas.

Governor Churchill, of Arkansas, recently changed the face of a negro murderer to life imprisonment on the very eve of being hanged for a crime which he fully confessed.

Five hundred children were recently taken from the public schools at Atlanta, Ga., on account of the prevalence of a mysterious disease.

Since July 1, 1880, the railway mail service has been extended to 6,130 miles of road, this being the extent of new roads built during that period.

A few days ago seven Texas rangers and a band of thirty outlaws had a desperate battle near Fort Ewell. One soldier was killed, and two of the cattle-thieves were captured.

On the 15th three rail-agents stopped a train near Lake City, Col., shot a the fireman railway engineer, and carried off the treasure pouch and mail sacks.

Harmon, the defaulting cashier of the First National Bank of Newark, N. J., has been sentenced to seven years in State Prison.

A small colony of Mormon converts from Australia reached San Francisco on the 19th.

The steamer Alaska left San Francisco on the 20th was the sale of copies of the Revised New Testament, which began at an early hour in the morning. Dealers in the city took about 70,000 copies, one house alone taking 30,000. The orders from New England were also very large. Ten thousand copies were shipped to San Francisco, and double that number to booksellers in Chicago. The entire number of copies of all kinds disposed of by Nelson & Sons, up to three p.m., was 250,000. Of these the largest number were Brevier books. The next day over a million exhausted was that known as the Minion edition, which is the real price of which was from $1 to $1.50. Bank & Co. dispatched 30,000 copies by express and freight to many points in the United States, and a great number of single books were sent by mail to those who had ordered them by letter in advance. It is said that no book ever introduced in this country was brought up with such a degree of avidity, and it is not likely that a larger number of copies of any other book were ever sold in this country.

The Turkish leader has gathered a force of twenty thousand men for another incursion into Greece.

Count von Arnim, the German diplomatist who was sentenced to five years' penal servitude for betraying his country, died a few months ago at Nice, France.

Secretary Sherman has issued a circular to the national bank examiners, directing them to make a special examination of the silver certificates, of the denomination of $20, his been reported that a number of counterfeits have been circulated. It was examined with a pen, and is the first which has appeared.

Personal and Political.

The Brewers' Congress, lately in session in the city of Washington, has voted to ask the Supreme Court to decide whether the Internal Revenue authorities have compromised the claim of the United States against the International Bank of Chicago for back taxes on circulating notes, by the payment of $46,000.

The Ohio State Democratic Convention for the nomination of State officers has been called to meet at Columbus on the 16th of July.

The German Republican Central Committee of New York has been authorized by the Legislature not to re-elect Messrs. Cooking and Platt.

Foreign.

The International Monetary Conference at Paris on the 17th was addressed by Hon. Timothy O. Howe in favor of bimetallism. The representatives from India said he would support any measure tending to increase the value of silver.

In the Newmarket (England) races on the 17th Lorillard's "Iroquois" won the Sursell Stakes, and Lorillard's "North Star" was second in the Welter handicap.

A raid on the Jews was recently made by the people of Wodowka, on the Pojodian border. Many houses were destroyed, and three hundred and thirty families fled into Austria.

Sorgetto Morak, one of the most active members of the Limerick Land League, was arrested on the 15th and lodged in Kilmainham jail.

A Saw Dalton Ministry has been organized by Signor Sella, which from the Right. This fact led to angry demonstrations by the people of Milan and Florence on the 18th. In the former city the troops charged on the people; in the latter, barricades were erected.

A ravenous disaster recently occurred in the Hoosac Tunnel in Switzerland. While a large force of workmen were engaged at work in the tunnel a mass of rock let came cla ished and buried nearly 400 of the men. Three hundred of these, some maimed for life, others fatally injured, were taken from the debris. Seventy workmen were killed outright.

On the 19th General Ignatieff sent a circular to the Governors of the several Russian provinces in which he attributes the desperate conditions of Russia to the insidious advice of certain, the inactivity of the authorities and the indifference and evasive of officers.

On the stipulation that a fair trial would be given him, Mabat Pasha surrendered himself to the Turkish authorities on the 20th.

Ten tribes Bernachout Indians deserted part of the Ute Reservation, and the commissions of the treaty with France, and accusation of treason.

Parnell and eighteen followers withdrew from the House of Commons on the evening of the 19th without voting on the second reading of the Land bill.

At the same request, John Bilner Inc. been removed from his prisoner in Kilmainham jail to a cell.

The Kentish leader has gathered a force of twenty thousand men for another incursion into Greece.

Count von Arnim, the German diplomatist who was sentenced to five years' penal servitude for betraying his country, died a few months ago at Nice, France.

Secretary Sherman has issued a circular to the national bank examiners, directing them to make a special examination of the silver certificates, of the denomination of $20, his been reported that a number of counterfeits have been circulated. CONKLING AND PLATT.

Their Letter of Resignation as United States Senators in Which They Give Their Reasons for Resigning and Their Version of the Differences Between Them and the Administration at Washington.

As Albany (N. Y.) telegram of the 16th gives the long-looked-for letter of resignation sent to Governor Cornell by United States Senators Conkling and Platt, and which we publish in full as a matter of general public interest, giving, as it does, "their side of the story":

WASHINGTON, D. C., May 16, 1881.

SIR: Transmitting as we do our resignations respectively of the great trust which the whole New York late honored us. It is but due to ourselves and, through you the Legislature and people of the State, of the reasons which, in our judgment, render such a step necessary and necessary. Power works sure and subtle. We shall not be the first to whom the nomination of actual persons for public offices already filled (one of those offices to the Collectorship of the Port of New York, now held by General Merritt. An office to the Senate Foreign Relations Committee. Another to the Stanley to Switzerland held by Mr. Fish, a friend of former distinguished Secretary of State. Mr. Fish has not resigned his position in advance, placed his position at the disposal of the new administration. Mr. Fish has not been removed, he was ready to remain at his post. It permitted to say that the President, as recently as Mr. Cramer are citizens of New York. It was proposed to impose them on us, and to our advantage of the public service, but in order to fit for treating his country, and a friend of New York to Mr. William H. Robertson. As other of the Collectorship of the Port of New York, in order to make way for the nomination of Mr. Robertson.

The chain of removals thus proposed was broken by Senators asking personal favors, or, if the official nominations on his part is not to be confirmed, he will resign. The President was informed that he would not be allowed to put the regular machine law and public opinion of the State. Besides the nominations of Messrs. Robertson and Merritt, the action of the Senate several citizens of New York, in whom the Senate has confidence, as District Attorney, and Marshals. These nominations were rejected, and the offices were promptly filled by the appointment of Messrs. Bliss and Jenkins. They were certified by Judges of County and have other unquestioned claims to the public confidence and merit of their services to the State. Their nominations were promptly rejected.

Learning that the Vice-President was equal to the occasion, we promptly joined, we went to Mr. James, the Postmaster-General of the State, and learned that, though he had been appointed to the office but a few days, the morning of the day the nominations were sent in, and declined to be used as a means to defeat the wishes of the President. We then went to Mr. Robertson and informed him that, in view of the circumstances, we could not consent to his confirmation. After earnest remonstrance and conviction we believed that the President was wrong, which, of course, did not involve any assault upon him, we left the Senate Chamber. We immediately addressed the public, examine to us, or in relation to the integrity of the Republican party. Our action was taken with extreme reluctance, was made by neither of us in the Senate or elsewhere, and we believed that no action on the President would remember an action so unprecedented in the Senate, and that no one has been given to the subject, and sure distrust my own judgment of the correctness of our positions that we think it right and duty to submit the whole matter to the Legislature of the State, which is now in session. It is Republican in both branches, and we have no doubt that it is quite as able as we to take the measure and the public sentiment. We are conscious that we have done all in our power to avoid the embarrassments which might make this action necessary, but we have been unable to do so. We have not sought this controversy, but we have not shrunk from it. We have not been willing to be the instruments of any man's personal ambition, and we have not been willing to be the instruments of any man's personal ambition, and we have not been willing to be the instruments of any man's personal ambition, and we

—The Michigan Legislature will adjourn today.

—Fisher & Inwood are building an addition to their store.

—Ask Geo. Miller if he has seen any leaky butter recently.

—Shipping tags printed in neat style at the Sentinel job office.

—The fountain, well for the new M. E. parsonage is completed.

—A. Schaefer has received the goods for his new store at Ironton.

—E. S. Hawks is building a residence at the west end of Bain street.

—Lewis & Ackert's soda fountain has commenced dispensing liquid gas.

—The corners of Highway is graveling the lower end of Bridge street.

—The Boyne City *Standard* advertises itself at $100 per annum. Cheap!

—The Pine Lake Iron Co. are to rebuild their engine room with brick.

—Work commences on the Chicago Summer Resort Club House today.

—Byron See has the motives at work on the foundation for his new store.

—In the revised new testament it reads "Blessed is he who is in the context."

—Dougherty & Bartholomew have found in their location on Main street.

—Mrs. Pierson, daughter of D. Hoyt Smith, of Monroe, died the first inst.

—Next Sunday will be "Floral," or "Children's day" in the M. E. Church, and preparations are being made to decorate the church and parsonage.

Rev. Mr. McIlwee will preach to the children at the usual morning hour.

—Regular communication of Charlevoix Lodge, F. & A. M., this (Tuesday) evening.

—Twenty two carpenters arrived yesterday from Chicago to work on the Chicago Summer resort.

—When parties resist arrest at Gaylord, the unskilled always them in order to facilitate matters.

—The town few days hence shall not run at large, yes the streets are full of them every day. Why is it?

—Hereafter, until further notice, the Charlevoix postoffice will be opened on Sundays from 11 a. m. to 12 m.

—A Missouri Company want to exhibit here June 27th, and Dr. Lewis hopes to have his new hall ready for them.

—Nelson Austin has moved into the upper story of T. D. Smith's new building until his own residence is completed.

—Chas. W. Miller yesterday sold his farm of fifty one acres in this Township to M. J. Stockman for the sum of $450.

—T. C. Hall recently sold a site near Ironton to Messrs. Box & Barker, who will erect a saw mill thereon this summer.

—A. J. Mosher is completing and painting his new residence on Clinton street.

The rumorers are that Austin county will be in the Representative district, comprised of Lacranse, Benzie and Antrim counties.

—For a flattering portrait of the Independent Bimetal Candidate, we refer our readers to a picture on the wall of Mr. Little's millinery store in this place.

—Walter Mooney has the contract for building eight treatment houses at Ironton for the iron ore piper, and a $2,000 residence for Superintendent Osborn.

—A. B. Platt, of Chicago, has during the past week caught one lake trout in Pine Lake, with a spoon hook. They weigh from four to six pounds each.

—Robert Miller, the veteran blacksmith of Charlevoix, has taken his hand leave of the anvil, and will hereafter devote his attention to the Bridge Street House. He has leased for his benefit the shop in Sims Bakery.

—The new building on Mr. Spaulding's property on Bridge street, of which we spoke last week, is to be occupied by N. Anderson, of Antrim county, as a residence. Mr. Anderson is to pay Mr. Spaulding $400 per annum rent.

—We reckoned last week to notice the arrival upon our editorial table of the *Tribune* of Traverse City. It is Democratic, straight, and has place of publication here it, but it well printed and well edited. We don't wish it any harm.

—The messenger boys of the House presented Speaker Moffatt with a handsome silver plated water set a few days since, consisting of server, large pitcher, a pair of gold lined goblets and a slop bowl. All are handsomely engraved.

—We visited the furnace Friday, and were shown many courtesies by Robert Young, the founder. Mr. Young is one of the most capable and experienced iron founders in the business, and the P. I. I. Co. are fortunate in having his services.

—The auditor general has issued a circular asking the boards of supervisors to equalize their assessment rolls on the 2nd and Monday in June, in order to be ready for the state board of equalization, which meets at the capital the 3d Monday in August.

—In evidence of how stock will do in Northern Michigan is afforded by the fact that four of Capt. Rose's sheep, that strayed from the flock, passed all of last winter on the woods of Fox Island, and all returned a few days ago, not only alive and well, but in good condition.

—The contract for building the Petoskey and Gaylord State road has been awarded to C. F. Sweet of the Antrim line. He has also secured the contract for building the Boyne Falls and South Arm State road. He will commence work on both roads during the present month.

—The Baptist Sunday School concert Saturday evening last was well attended, and the little ones acquitted themselves creditably. The entertainment was all the more appreciably, from the fact that it was compelled to compete with a base ball and lie across the street, during the entire programme.

—Charlevoix is enjoying a steady and permanent prosperity. Charlevoix boasts not as the mushroom growth, but with a well established and well ordered activity. Fine construction on the bonds fall, and every carpenter, painter, plaster, stonemason and laborer has steady employment at good wages. Four business buildings are going up within a few paces of the Sparrows building, and on nearly every street fine cottages are observable. The new buildings are not shanties, but well built and well finished offices, each and

Fine construction on the bonds fall, and every carpenter, painter, plaster, stonemason and laborer has steady employment at good wages. Four business buildings are going up within a few paces of the Sparrows building, and on nearly every street fine cottages are observable. The new buildings are not shanties, but well built and well finished offices, each and

ornament the town. Many improvements are also in progress on the residences and business places of the village, which all tend to give additional beauty to the most beautiful town in Northern Michigan.

—Robert Lay, of Northport, has again met with a severe loss by the breaking away of his mill dam by which several thousand dollars worth of logs and lumber were swept away, and will be retained with much expense and difficulty. A bridge was also carried away and several houses narrowly escaped destruction.

—A mysterious murder occurred at St. Ignace last week. While Wm. Smithers, a setter in the Mackinaw Consumer's mill at that place, was standing by a window in the mill, he were shot and instantly killed by an unknown person outside. The murder caused the greatest excitement, but as the last accounts the assassin had not been discovered.

—Will Brown, formerly of Norwood, was very seriously injured in a saw mill at Simon's bay Friday. He was guiding a saw on a very swiftly running gang-stone, when the stone broke into four pieces, one of them striking him on his left side, breaking his ribs and injuring him internally. His life is in a critical condition.

—The contract for building the Petoskey and Gaylord State road has been awarded to C. F. Sweet of the Antrim line. He has also secured the contract for building the Boyne Falls and South Arm State road. He will commence work on both roads during the present month.

—The Baptist Sunday School concert Saturday evening last was well attended, and the little ones acquitted themselves creditably. The entertainment was all the more appreciably, from the fact that it was compelled to compete with a base ball and lie across the street, during the entire programme.

—Charlevoix is enjoying a steady and permanent prosperity. Charlevoix boasts not as the mushroom growth, but with a well established and well ordered activity. Fine construction on the bonds fall, and every carpenter, painter, plaster, stonemason and laborer has steady employment at good wages. Four business buildings are going up within a few paces of the Sparrows building, and on nearly every street fine cottages are observable. The new buildings are not shanties, but well built and well finished offices, each and

—Robert Lay, of Northport, has again met with a severe loss by the breaking away of his mill dam by which several thousand dollars worth of logs and lumber were swept away, and will be retained with much expense and difficulty. A bridge was also carried away and several houses narrowly escaped destruction.

—A mysterious murder occurred at St. Ignace last week. While Wm. Smithers, a setter in the Mackinaw Consumer's mill at that place, was standing by a window in the mill, he were shot and instantly killed by an unknown person outside. The murder caused the greatest excitement, but as the last accounts the assassin had not been discovered.

—Personal Mention.

—Sol Isaman has gone to Chicago.

—Mrs. Little now occupies her new store building on Bridge street.

—Superintendent Fobson of the iron work goes to Ohio this week on business

—James Dunlevy, Judge of Probate of Manitou county, was over from the Island Tuesday.

—Rev. Leslie Hudson, of Chelsea, a cousin of Mrs. E. H. Green, has been spending a day or two in town.

—R. F. Monahan, lately in the employ of the Pine Lake Iron Company, has been employed at work of the Fountain City House.

—Robert Jackson, who superintended the construction of the Pine Lake Iron Company's works, is on a visit to his old home in Scotland.

—Mrs. Hannagan, a lady who is writing up the resorts of Northern Michigan for the Detroit *Free Press*, was in town last week looking over the ground here.

—Arrived at the Charlevoix Summer Resort: Mr. and Mrs. Gally, Detroit; Mrs. Van Vleck, Ionia; Mr. Woodbury and son, and F. W. Wilcox, Kalamazoo.

—Hon. A. H. Turrell is sojourning at Mount Clemens Mineral Springs for the benefit of his health. He writes a friend here that he is doing well, and that his physicians tell him that there is no probability of anything serious following his recent slight attack of paralysis, although his face was not entirely recover its natural place. He expects to return to our town sometime as soon as it is advisable.

—Those who are wondering about the coming out of the devil out of the New Testament in the new revision may perhaps gather a hint as to matter that perhaps has been by consulting the job of the clause of two leading changes news paper about such affair.

Marine Jottings.

—New in port—Schooners La Pacite, Sea Gem and Fleetwing; propeller City of New York.

—Steve Miller has accepted a position as engineer of the steamer Jennie Sutton at Elk Rapids.

—Four double barreled breech-loading timber vessels loaded at one time in the harbor last week.

—The schooner Sea Gem brought a ware house full of merchandise for T. D. Smith's new store on Sunday.

—The propeller Idaho arrived up on her first trip Saturday evening looking like a new boat, with Capt. Penny on the pilot house as natural as ever.

—Capt. Hanson, of the bark Cavalier fell from the deck into the hold of his vessel, in the harbor, on Friday morning, and dislocated his shoulder. The hold was nearly full of timber, else the captain would have fared worse. Dr. Perrin replaced the shoulder, and the captain is doing well.

—The schooner Evening Star is the handsome little craft that comes into this port, and Capt. Dunk takes great pride in his vessel. She carries a patent log, and it is next to an all wonder. She took a deck load of timber recently at Norwood for lumber yard.

—During last week the bark Cavalier of Quebec, and the tug Admiral Porter with the barges Ayr, Annie Craig and M. C. Cameron, have been loading with the square timber of McArthur Bros., of Toronto, which was rafted from the Jordan here this spring. Each vessel has a steam engine in her hold, for hauling in the timber, instead of the old-fashioned horse power.

—The following are the clearances from the port of Charlevoix for the week ending to-day:

May 31—Schooner Ocean Wave, 200,000 feet lumber, and 50 cords wood, Chicago.
May 31—Schooner Alpena, Fox, Chicago.
May 31—Schooner Merle, Charlton, & Cooper to Milwaukee.
June 1—Schooner Sea Gem, 60 cords wood, Chicago, Harvey & Co.
June 1—C. Boose, 100 cords wood, number to Milwaukee.
June 2—Schooner Ocean Wave, 200,000 feet lumber, 50 cords wood, Chicago, Harvey & Co.
June 2—Schooner Evening Star, 60 cords wood, Chicago, Harvey & Co.
June 3—Schooner Merle, Charlton, & Cooper to Milwaukee.
June 3—Schooner Alpena, 12,000 shingles, 100 cords wood, Chicago, Fox & Co.
June 3—Schooner Idaho, 50 cords wood, Chicago, Harvey & Co.
June 3—Schooner Cavalier, 1,000 cubic feet square timber, Quebec, Canada.

Business From Hayes.

AT ONCE.

—Merrit Hess has leased the Hanson farm, and moved thereon.

—There is a reasonably large growth of new wood on the trees this year.

—Peter Hanson's family took the steamer at Charlevoix last Wednesday for St. Ignace.

—It is a terror to any community to be afflicted with a person whose fingers stick to everything laying around loose.

—The way that young Hawaiie made his feet handles fly, when the girl's father set the dog on him, was a credit to the native.

—Burgess postoffice is now in new quarters, at the Hanson place, being a little nearer to a majority of the patrons of the office.

—If we could have our highway work performed this month it would be a great deal better for our roads, than putting the work on so late in the fall.

—Hosea Stevens is hewing an eighty barrel kiln of lime as an experiment. He has an experienced lime burner employed, and has the raw material for making a good lime, and we see no reason why he should not make a success of it.

South Arm Items.

—Refreshing showers.

—Mosquitoes are plenty, and business is generally lively.

—There is talk of another saw mill being built at East Jordan.

—A little daughter of S. Batton recently died of inflamation of the lungs.

—Peter H. Isabhair was the lowest bidder for the state road job, and as soon as he can get some men to go to his lumber, he will rush the thing through.

—John and James Isaman of this place have purchased some land of the railroad company and have a force of men employed peeling bark.

—Albert Packard and Nathan Weaver, two young saplings of East Jordan, who possess considerable vim, energy and muscle, have erected a store building on Main street. They intend stocking it with groceries, confectionery, and have in connection a soda fountain.

Owen.

Jay Gould is a little forgetful about some matters. He was a witness in a big telegraph suit against the Western Union the other day, and in response to questioning concerning his financial operations it came out that he had [illegible] dollars of the stock of the Atlantic & Pacific road, but he couldn't remember how he got it. He also couldn't remember how much he paid for it, but he thought it was [illegible] dollars. He couldn't remember how much he received for it, but he thought it was [illegible] dollars. He couldn't remember how much he had left, but he thought it was [illegible] dollars. He couldn't remember how much he had made, but he thought it was [illegible] dollars. He couldn't remember how much he had lost, but he thought it was [illegible] dollars. He couldn't remember how much he had spent, but he thought it was [illegible] dollars. He couldn't remember how much he had saved, but he thought it was [illegible] dollars. He couldn't remember how much he had given away, but he thought it was [illegible] dollars. He couldn't remember how much he had received, but he thought it was [illegible] dollars. He couldn't remember how much he had paid, but he thought it was [illegible] dollars. He couldn't remember how much he had owed, but he thought it was [illegible] dollars. He couldn't remember how much he had owned, but he thought it was [illegible] dollars. He couldn't remember how much he had had, but he thought it was [illegible] dollars. He couldn't remember how much he had been, but he thought it was [illegible] dollars. He couldn't remember how much he had gone, but he thought it was [illegible] dollars. He couldn't remember how much he had come, but he thought it was [illegible] dollars. He couldn't remember how much he had seen, but he thought it was [illegible] dollars. He couldn't remember how much he had heard, but he thought it was [illegible] dollars. He couldn't remember how much he had known, but he thought it was [illegible] dollars. He couldn't remember how much he had thought, but he thought it was [illegible] dollars. He couldn't remember how much he had said, but he thought it was [illegible] dollars. He couldn't remember how much he had done

SCHOOL AND CHURCH.

—Bishop Merrill has organized the Methodist missions in Italy into an annual conference.

—The Khedive is about to erect, at his own entire cost, a school in Cairo for the education of girls of higher classes.

—The sum of $19,000,000 has been given by private individuals in this country toward the cause of education within the past fifteen months.

—Bishop Peddock, who so recently left for Washington Territory has met with a terrible affliction to the sudden death of his wife, a most active, earnest and noble Christian woman.

—Nine members of the newly-elected City Council of Toronto, the Mayor of the city and eight Aldermen, are Sunday-school Superintendents, and several others are active Sunday-school workers.

—It is now seventy years since the first Hindoo baptism by Dr. Carey. There are in India, Burmah and Ceylon 50,000 persons of the native population professing and ranking themselves as Christians.

—The National Conference of Second Adventists, recently held in Worcester, Mass., adopted a declaration of faith, the chief features of which are the near second coming of Christ and the annihilation of the wicked.

—There are 1,578 inhabitants among the Quakers, or German Dunkards. Of these 350 are in Pennsylvania, 248 in Indiana, 237 in Ohio, 142 in Illinois and 130 in Iowa. The denominational is represented in twenty States.

—Among the Conferences elected to the Methodist General Assembly, which meets in Buffalo, is the venerable Dr. Cadman, of Brooklyn. He is first spoken of in the General Assembly in 1852, just fifty years ago.

—The average cost of education in Massachusetts during the past year was $18.40 per pupil, while in the year 1870 it was but $7.81. In the same time the average pay of the Boston teacher has increased from $71.00 to $93.57 per month, and throughout the State generally the pay has doubled.

—Information has reached this country through Dr. Newton, that he saw, during a journey in Africa, three well-grown persons and thirteen infants baptized, and also many inquirers. The number of stations reported is 15, and where Christians meet for worship number twenty-five, and in several different villages were either Christians or inquirers. These stations extend 200 miles from south to north and seventy miles from east to west.

—The known students, of whom 44,678,000 school children in the world, so far as the census takers were enabled to ascertain. There have about 1,000,000 teachers. First in proportion to population comes the United States, with 9,873,196 pupils and 271,141 teachers. Both here and in France the school children form one-fifth of the population. Prussia, with 4,067,776 pupils and 67,398 teachers, takes the third place, where comes England and Wales, where, as in Prussia, school children are one-sixth of the population. Austria has but one to nine. In Japan there are 2,162,865 school children, but the total population is not known.

What Shall be Done With the Boys.

With parents who have boys to rear and set started in life, this is one of the most perplexing of the questions and questions which occupy the after-bedtime talks and carry themselves on into the home-time sleep. If the young bird does not readily leave the nest, the old one, instinctively, shoves if off, for the young have only one simple thing to do. But in human life are many paths and planes, and the question is the continually getting into square holes and over every mistakes about one's calling are as common as they are serious, and experimental knowledge is like a lamp held behind us, illuminating after we have ceased to need it. Parents' difficulties in what direction to push their fledglings are the greater because of two facts first, that the choice of boys as to what they "would like to be" is ordinarily too shallow to suggest anything for guidance; second, that while the natural bent of mind, in very rare instances, is shown early and unmistakably in a specific direction, or diversity, rather does not show characteristics positive enough to make their line of work clear. But what shall be done with them then? A newspaper article has not space, even had the writer the ability to answer the question definitely, no more can an attempt than to indicate some considerations which may help the family counsel to deal with it.

First of all, let us secure that the spread of common sense has made obliterated the notion that sons of the boys, for the family reputation, must go through college. Collegiate education, the training abroad, is now uncommon that it confers no distinction. "Liberal education," as it was called, once meant only the college; an "educated" man was one who had passed through the curriculum. But the sole estimate placed upon this as essential for, or even as aid to success and usefulness in life, has lowered greatly, and justly so. This is not as much because many leave the college, and accomplish much, and many others, without it, do memorable work, as because people are discovering that education is as broad and many-sided as God's kingdom. It cannot be forced into those who have no capacity for it and reject it, but those who want it will have it in the genuine manner, athirst for knowledge, will draw it in at every pore of its being, conquering difficulties in the way. Hence not to have collegiate education is not really the deprivation it was once esteemed to be.

In the strict utilitarian view, which must govern such a discussion as this, the sum is true. The value of an acquirement must be tested by the use it produces for its possessor. And while probably a larger share of college graduates than formerly enter business life instead of the three "learned professions," on the other hand it is equally true that collegiate education is an asset, a help-finance to the success of the battle of life as a help. Space does not allow drawing those distinctions very nicely; all said here is not meant as disparagement of the colleges, but only to oppose the proposition that the boy must have, or might best have a college course, in order that he have the fairest start.

Emphatically should the disposition to go into a store" be discouraged. Producing is not attractive enough, distributing and selling are very far too much so. The editor of a commercial journal in this city recently advertised once for a youth to help in statistical work, at eight dollars a week, and received nearly 300 replies before noon; an advertisement for an assistant bookkeeper brought 387 letters in the next morning's mail; an advertiser who wanted a clerk, very recently, was considerate enough, two days later, to insert a request to "please excuse replies to notice of saturday, for 1,500 situations received"; a dealer tins had fifty applies to a call for a clerk, but not a single reply to a subsequent advertisement for a good wood-sawyer. There are but rassions and ordinary illustrations of the almost terrible pressure to get hold of mercantile line at any point.

The reasons for this are probably an altogether mistaken idea of the nobleness and agreeableness of such a life and an equally mistaken one of the social position of farmers and mechanics. The merchant is imagined to be the man of success and standing; the mechanic is imagined to be one who works so hours a day, with dirty hands, for twelve dollars a week. Like most sweeping generalizations, this is widely astray. Really successful trades, although many are the exceptions; professions make always crowded with competition; all the changes of the present quarter century have tended to narrow the profit margins, increase the strains and demands, and lessen the probabilities of success in trading. By principal, also, it must be no error to rate the dealer in any respect above the producer; and experience confirms this. The farmer and mechanic, moreover, is not bred in the groove where he is conventionally supposed to run; he is what he makes himself; and he is making himself. Agriculture by new lands, new products, new processes, new guidance and an enormously more-and and increasing demand for knowledge, whatever its kind and however won, that whoever is worthy of it will get it; that identically the same system of science, that are the promising nebila for the boys are the same that open, through practice and manufactures rather than the choked paths of trade; and that—in the oft phrase, never truer than now—where there is a will there is a way. —*Julian Hawe, in Christian at Work.*

Easter Pilgrims at the Jordan.

The scene in the Jordan at the immersion was in the Jordan. That rushing river, the one river of Palestine, found at last its fit purpose. Although no details are given of the external parts of the ceremony, a fresh interest is imparted to every transaction by the scene which now takes place at the bathing of the pilgrims at Jericho. The pilgrims reach the spot by night. Above is the bright Paschal moon, before them moves a bright flare of torches, on each side huge watchfires break the darkness of the night and set in relief the masses of successive descents of the road. The sun breaks over the Eastern hills as the bands of the pilgrims emerge from the wilderness of the Jordan. The sacred river rushes through its channel of limestone, oleanders, willow and agnus-castus with rapid eddies, and of a turbid, yellow color, like the Tiber at Rome, and about as broad. They dismount, and set to work to perform their bath; mean in the open space, some further up among the thickets; some plunging in naked; most however, with white dresses, which they bring with them and which, having been once used, are kept for their wedding sheets. Most of the bathers keep within the shelter of the bank, where the water is about four feet in depth, though with a bottom of very deep mud. The Coptic pilgrims are curiously distinguished from the rest by the boldness with which they dart into the main current, striking the water after their fashion alternately with their two arms and playing with the eddies, which hurry them down and gather as if they were in the cataracts of their own Nile, crashing through the thick boughs of the jungle which on the eastern bank of the stream intercept their progress, and encouraging the river higher up, where they can wade, assisted by long poles which they have cut from the opposite thickets. It is remarkable, considering the mixed assemblage of men and women, the nakedness and the enormously more-and and increasing excitement of the performance, often a bewildering tied for young men who leave a gaily and lieccharacter to achieve success in manufacturing, others a broadening field

Charlevoix Sentinel.

CHARLEVOIX, JUNE 7, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

QUEEN VICTORIA is now in her 62d year.

BELVA LOCKWOOD is still an applicant for the Russian mission.

THE Detroit *Post and Tribune* announces that it is soon to issue a new daily.

THE late Chief Alexander H. Seley, deceased, left a will by the terms of which he bequeaths $10,000 to the Indians.

LETTA, the charming little actress, is a member of the Episcopal church, and was confirmed at New Orleans at Lent.

THE New York *Evening Mail* estimates that every seventh dollar of the country's increase in wealth is destroyed by fire.

GENERAL GRANT and party sailed from Vera Cruz, March 10th, but Saturday evening on the steamer City of Mexico for New Orleans.

A LEADING paper, the *Truth*, says eleventh that Representative Ford was respectable than at home. If Truth be true, play on its Tenth.

TUESDAY, May 24, was the Queen's 63d of July, that is it was the Queen's birthday. They don't celebrate carrying gaudily over the bay however.

BISMARCK tried to leave an air pistol by the Prussian embassy—or boundaries—when here, but it did not work and they say "Bis" is used enough.

NEW YORK city is to have a grand and final shutter next year, under the supervision of Theodore Thomas. Money to that has already been raised in a generously fund.

IN the Circuit Court at Flint last Saturday, Thomas Whittle and Peter Bush were convicted on a charge of selling liquor to persons in the habit of drinking to excess, and were fined $200 each.

LAST Saturday Col. I. R. Monroe purchased Gen. A. A. Stevens' half interest in the Grand Rapids *Daily Democrat*, paying $6,000 each therefor. The entire Monroe will owner and editor.

TOM SHAW, Edward, carried on $50 a month, and Charley A. Dana on $25 a week. Scott died worth nearly $20,000, and Dana lives in poverty in New York city.

THE granite monument which will mark the last resting place of the late Zachariah Chandler, is ready to shipment from the Maine quarries. It is made 40 feet in height, and weighs upwards of 20 tons.

THE New York Court of Appeals recently decided that lumbermen for pioneers, even though the extreme loss prevailed up the prices, is not raising for a wages or but, but a lawful contest for a price.

JESSE Stanley Matthews has been sworn into office and assigned to the sixth additional judicial circuit. It may be planning to some of his former hirelings to know that the state of Michigan is in that circle.

THE Toronto *Globe* says that to prevent the rapidly spreading treason in Canada, it may be necessary to shut a few more alcohols. Such a course might possibly hasten annexation. It would not stamp it out, that's certain.

CAPT. PAUL BOYTON, the good swimmer, left St. Paul, Minn., last Monday morning for Cairo, in a suit of inflated rubber, hoping to paddle the distance in sixteen days. He then proposes to float down the Mississippi from Port Benton to St. Louis.

A CORRESPONDENT of the New York *Sun* is authority for the statement that Tilden is laying plans to go on the track once more. He proposes to be nominated and elected Governor of New York in 1882, and secure the presidential nomination in 1884.

AT TIMES, a man is sure that he knows everything; at times, he begins to have grave doubts; at forty, he knows that there are some things he don't know; at fifty, he is certain that he will never again know as much as he once knew.

IN one of the recording contests a part of the performance is for one man to open a safe on the head of another man. While opening in Milwaukee a few days since the ball hit the poor fellow's head instead of the panel. If the wounded man lives will it not be a case of murder? Such faithful performances ought to be punished.

AMONG the stories current for the purpose of ridiculing Mr. Conkling, is one which Sir Joseph Bowington tells in the presidency of an Irishman, who, seeing Irish dogs in their work of sweeping away with his scythe hanging over his shoulder, saw a toad. "Bestial," said he, "I've got you, my boy," and took up good aim at the toad with the end of the scythe handle, he jabbed Rdown, and on the end and easily cut off his own head.

Ex-Prisoners of War.

Arrangements are nearly perfected for the grand reunion of exprisoners of war, to be held at Detroit June 21, 22 and 23. The programme includes a parade, speeches by distinguished speakers, boat rides on the river, and a banquet by the ladies of Detroit. The regular sessions will be held in Music Hall, which has a seating capacity of 3,500. The rate of two cents per mile has been secured on all railroads centering in Detroit, and one-half fare on the Cleveland and Detroit steamers. Visitors will pay full fare one way and be returned for one-third, on presentation or a certificate issued by the Secretary, which all should apply for. Hotel rates have been secured at the hotels, ranging from $1 to $2 per day. President Garfield, Secretary of War Lincoln, General Sherman, Sheridan, Hancock, and other distinguished soldiers have been invited, and some of them will surely attend. All Michigan militia companies have been invited to participate in the grand parade, together with the United States regulars now stationed at Detroit. There will be music by some of the best bands in the West. Comrades who intend to participate in the meeting should inform E. O. Hodge, Secretary at Detroit, in order that proper provision may be made. The men who surrendered to the forces at Andersonville, Salisbury, Belle Isle, and Libby, are bound together by ties as none others can ever been bound, and it is well that these bonds should meet on fraternal greeting.

One of the latest shipments to Europe is well going from the West. The orders already announced exceed all previous expectations. The principal points of shipments are Chicago and St. Louis. Last year's business in the former city is estimated at $2,000,000, and in the latter considerably over $1,000,000. The shipments consist chiefly of quails, prairie chickens and wild turkeys. The birds, closely packed in barrels, are put in charge of the stewards of the transatlantic steamers. Generally the loss of the shipments are delivered fresh and sound. Venison is also shipped across the Atlantic, but till now to small quantities. The export trade of wild game is yet in its infancy. Various Chicago and St. Louis dealers confidently predict that before a great while it will reach at least $10,000,000 per annum.

In the investigation of the State House of Corrections at Iowa some forty or fifty witnesses have been examined. It seems to be the opinion of those who have watched the testimony closely, that no criminality is proved against Warden Gunton, but that there has been a lack of harmony between him and the managers on the one hand, and between him and the subordinates of the prison on the other; also that the discipline has been of a rather flabby character. That institution was started with a lot of "green hands" in the management, who have experienced much difficulty in getting into good working order. This investigation ought to disclose just where reforms and improvements can be made. The report of the Legislative Committee will be made soon.

Texas who have indulged in the supposition that the resignation of the New York Senators discommisses the Republican party may as well be undeceived. It has good reasons for existence, which is more than can be said of any other political party. It is the party which stands for principles that are abiding, that never die, and that are of vital importance to humanity, to progress and to good government. It is the only party which has practiced reform from within, by dealing sternly with offenders in office wherever found. Its loss for the one route avoidance is no new demonstration of its enemies for honest and faithful administration of public affairs.

"Is there any bad news in the Gazette?" were the last words of Beaconsfield, to Sir Stafford Northcote, says *Truth*. Here's a name. The idea that Ben Disraeli the Earl of Beaconsfield, should pass off the stage with so tame a sentence! Why didn't he shout "Oh, Gladstone, oh!" "Change, Wales, change!" or something similar, as Munsion did? But perhaps he thought Gladstone was as far on as he ambition would ever permit him to go and felt certain that Wales would have it changed anyway, so considered it useless.

Speakers of the New Testament the New York *Tribune* says: "There are two points to which we direct special attention, because it is important that certain erroneous impressions derived from home reading on the subject as well as the secular press should be corrected. The first is that the present work is not essentially different from the old version as to be a new translation. The fact is, on point to find startling changes or revolutionary amendment will be disappointed. It is a revision, and not a translation. It is a plain, even scholarly and more settled text, but it is the same Scripture. Christianity remains unchanged. Such a single doctrine of faith is decided. There the lower ranks of men to read the printed page of the New Testament, but for all ... the work of the New Testament, but for all essential purposes the basis of every Christian believer will remain precisely as it is. Second point as regards we wish to lay stress on that the New Testament has not been set according to theology. The old version was often tried to make whatever other reasons personally unfaithful, although there may have been good of common use. Where there is a change it is because a careful examination of the original text has convinced the revisers that the old version was not correct, but the change is usually slight, and in no case does it affect the sense of the passage. The statement of Canon Farrar that not a single doctrine is changed, represents the theory and the views of the Revision party. This is a long step in advance, but by that against the policemen and the influence of the formerly living Republicans can not well be ignored."

Wm. H. Vanderbilt, although he might have all his real estate, railroad property, etc., swept away and still have $50,000,000 left on 4 per cent. government bonds on which to live, it and to have dread forebodings of future poverty does not affect his vision. If such is a fact he might save up his extravagance, and save up a little for a rainy day. Why just think of it! He has received a handsome income on millions of dollars each year, and now he has been to Brussels and had carpets woven for the different rooms of his house, after which the carpets were destroyed so that no one else might have the same designs. How extravagant! How ridiculous!

Hans Andersen, the author of a metal in newspaper at Copenhagen, has been arrested for inciting the assassination of the good King Christian IV. This sovereign has been one of the kindest Denmark ever had, and his reign has been marked by a period of the greatest freedom and prosperity the people of that nation ever enjoyed. And yet that occurred in other would please his subjects into murdering not his people into trouble by killing him. Such discontented, blood-thirsty rascals deserve punishment. Banishment seems almost just right. The timber devotion of Lord Bishop's hanging law would be better.

The four orators invited for the completion of the orator's contingent at Decatur, will soon arrive in this country from the profile of Rudolph Rogers in Italy, and be placed in position. It has been announced that the fourth of July would be an appropriate occasion for the unveiling of the group. But we agree with the *Free and Tribune* that the coming meeting of the ex-prisoners of war at Detroit, on the 21st to 23d of June next, would be a more appropriate occasion for the unveiling. Time is the only thing to be done by all means.

FARMING LAND!

500,000 ACRES

—OF—

Michigan Lands

—FOR SALE BY THE—

G. R. & I. R. R. Company.

30,000 Acres in Charlevoix County.

These lands are underlaid with hard wood and other wood, and are accessible by railroads by

WATER AND RAIL.

They are a part of the state reserved for health, and watered, and growing on the great fruit coming section of the east coast of Lake Michigan.

The Grand Rapids & Indiana Railroad runs through the center of the grant.

The part of Michigan on which these lands are found is

NOT A WILDERNESS, BY ANY MEANS.

It is settled on all sides, and has a dense population, and is rapidly filling up with industrious farmers and mechanics.

Over 1,000,000 acres of the lands of this great State already sold.

For sale on terms to suit purchasers.

Address W. A. HOWARD,

Agent Land Department, Grand Rapids, Mich.

MISCELLANEOUS.

DR. MARSHALL'S

CATARRH SNUFF

This Snuff is superior to anything yet known for removing the Catarrh, Cure in the head, and the Headache. It opens and purges out all obstructions, strengthens the glands, and gives a healthy action to the parts affected. It should be kept in a convenient form for everyone without the fear of inconvenience from exposure. Price 50 cents.

Dr. J. Marshall

H. C. GUNSMAR, PROPRIETOR.

Beware of Chas. Brown's Counterfeits. All those wishing to purchase the GENUINE Dr. J. MARSHALL'S ARomatic CATARRH AND HEADACHE SNUFF should purchase that of which H. C. NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

THE Postoffice Department has recently furnished interesting statistics showing that during the year 1880 there were sent through the United States mails 7,720,584,326 pieces, of which 1,961,762,830 were letters, 358,956,440 postal-cards; 819,325,000 newspapers; 451,-185,776 magazines and periodicals, and 21,-185,852 packages of merchandise.

AT noon on the 24th application had been received at the Treasury Department and at Washington for the renewal of $250,000,000 worth of five-per-cent bonds at three-and one-half per cent., and, as this was the full amount to be renewed or continued, all applications received thereafter were refused.

THE body of Miss Frank M. B. Kendal, of Madison, Ind., was cremated at Washington, Pa., on the 24th.

SEVEN students were expelled and three suspended from the Phillips Academy at Exeter, N. H., on the evening of the 23d. About twenty of the students gave a serenade before violinist several of the Professors' houses and gave unduly boisterous cheers, passed by grosses and hisses. Windows in three of the Professors' houses were broken. Hence the above action.

THE army worm, which is devastating the fields in Northern New York, has also made its appearance in some of the eastern counties of that State and in New Jersey.

MISS MURRAY, of Baltimore, who recently recovered a verdict of $5,000 against Postmaster Tyler, of that city, for libel in a lawsuit, has been given a clerkship in the Government Printing office at Washington.

A CONVENTION ladder in Rice & Co's machine shop at Memphis, Tenn., exploded on the 24th and blew three men into the air, killing three others.

THE Internal Revenue Collector at Atlanta, Ga., reported to the Commissioner of Internal Revenue on the 24th the jobs of Faulds and Pickens Counties had been emptied of moonshiners by armed mobs. Warrants were at once issued for the arrest of the resenting parties.

THE American Missionary Association held its annual meeting in Boston on the 25th. A very satisfactory exhibit of evangelistic and educational work among the colored people in the Southern States was made by the Secretaries. During the nineteen years of the Association the Association had sent 3,000 teachers and missionaries into the Southern States at an average expenditure of $300,000 a year. It had established no less than fifty-one schools for negroes and built or bought fifteen large and three theological courses. During the same period seventeen churches had also been established. In all respects the work of the Association is reported to have been highly successful.

AT a mass-meeting of citizens at Rollo City, on the 25th, it was resolved that the Chinamen should be allowed to work on the railroad being built over Rollo to Rollo Lake.

AT the session in Buffalo, N. Y., on the 26th of the General Assembly of the Presbyterian Church the report on foreign missions was read, showing the receipts of the year to have been $693,087; disbursements, $681,555. A marked progress has been made in China, Siam, China, Mexico, India and Syria, and the committee make an earnest appeal for the immediate relief of the debt, the interest of that had previously been made for this object.

THE sixty-seventh annual meeting of the American Board of Missions met in Boston on the afternoon of the 26th. Officers were elected for the ensuing year. Receipts of the year, $596,000; of which $204,000 were received from donations and legacies, $256,678 from churches, and $111,308 from rents, expenditures, $606,000.

IN Brooklyn, N. Y., on the 26th 8,741 officers and teachers and 52,000 scholars took part in the anniversary parade of the Sunday-schools of that city.

DURING the late session of the Baptist Home Missionary Society at Indianapolis Hon. George W. Whipple, of Ohio, raised that $3,000 negroes were preparing to emigrate from Louisiana to New England.

A COMMITTEE of Boston's wealthiest citizens has been raised to consider the project of building a Grand Pier in that city. A meeting held on the evening of the 26th about 200 were present and great enthusiasm was exhibited.

IT is announced authoritatively that Secretary Windom does not intend to allow an increase in the amount of standard dollars coined.

THE Northwestern River Improvement and Canal Convention met at Chicago on the 26th, and elected a permanent organization, R. R. Starr, of East saginaw, Mich., being chosen President. The delegates present numbered about 400, representing seventeen river cities, and about 40 speeches were made during the day and evening on Governor Irwin, of Iowa, Congressman Henderson, of Illinois, James F. Wilson of Iowa, Horace Harrison, of Chicago, and ex-Mayor Murphy, of Davenport, the latter delivering the final address of welcome. Resolutions were unanimously adopted on the 26th in favor of a canal from the Mississippi to Hennepin and Lake Michigan, and for a continuance of the work of the Mississippi River Commission.

MRS. ESLER, of Pittsburgh, Pa., recently attempted to fight the Indian fire with a broom. The net results were: The death of her little daughter—the insanity of her husband; fatal injuries to herself; the destruction of seven frame buildings, and serious injuries to a fireman.

IT is stated that the right of way for the New York, Chicago & St. Louis Railroad has been already secured through New York, Pennsylvania and Ohio, and that the road will be ready for the rails in September.

MR. ROBERT P. PORTER, Chief of the Wealth, Debt and Taxation Department of the United States Census, states that the net debt of all the cities and towns of the United States is in a population of over 7,500 is $370,471,870.

AN immigration agent, representing Texas, Arkansas and Louisiana, has called for Europe to establish immigration bureaus to seven of the larger cities. The firemans who were recently dispatched from Castle Garden to South Carolina report that the prospects for encouragement there were plundered on the 26th, and troops despatched in to the scene.

THOUSANDS people in England have invited the Government to withdraw the prohibition against the sale of intoxicating liquors in railway carriages.

THE United States Minister to Commerce sailed on the 26th that, as the Examining Commission at Havre continued to report the presence of trichinæ in pork, the Government would continue in force the measures taken to keep out the public health.

THREE deaths from yellow fever occurred at Havana during the week ended on the 31st. In the same day during the same time there were twenty-four deaths from small-pox and thirteen from typhoid fever.

MR. G. H. HEAP, United States Consul General at Constantinople, has reported to the Government the continued prevalence and extension of the plague in spite of the most vigorous efforts to combat it.

A MOUNTED bandit chief, Nikos Iea, from his cave near Vallia, Boumelia, captured a rich land steamer and sent $25,000 ransom.

ON the evening of the 26th the steamer Victoria, returning from Spring Bank, about three miles below Long Island, Ont., with 650 excursionists on board, suddenly collapsed and became a total wreck. All her passengers were plunged into the river, and over 240 persons perished.

THE Mexican Congress has given the President full power for eight months to contract with States or individuals for the construction of railways.

AT Ottawa, Ont., a few days ago Johnny Rich, of that city, ran a mile in four minutes and twenty-eight seconds—the fastest time on record in America.

THE Bulgarian Government has arrested ex-Minister Karaveloff and proclaimed martial law in Rustchuk, Widdin and Tirnova.

A NEWSIER bomb and exclusive factor was discovered by the French police at Montrouge, a suburb of Paris, on the 26th.

ROSE BONHEUR of the Museum of Fine Arts has approved of Ha'n contract for a ship railway across the Isthmus of Tehuantepec.

PARNELL has been ordered by his physicians to abstain from work because of ill-health.

DURING April there was a falling off of Irish emigration of about forty-five per cent. from that of the corresponding month last year.

THE City of Pesth in Russia, containing a population of 28,000, has been nearly destroyed by a conflagration. The loss was very heavy, and great distress prevailed among the inhabitants.

A NEW ENGLAND (recently farmer was sentenced on the 26th to ten months' imprisonment with hard labor for cutting off a neighbor's ear.

THE Cuban Committee of the French Chamber of Deputies has reported in favor of the Tunisian expedition—was under 14,000,000 francs.

NEARLY all the chiefs of the Albanian League have been arrested and thrown into Pasha.

AN attempt at nineteen ranged a battle near Carrick, Ireland, on the 26th, in which several persons were wounded.

VAN BRAUER, a Dutch diamond merchant of Paris, suspended payment on the 26th. Backers hold his acceptances for about $1,000,000 to-day. All went well on the down to Wednesday, when the steamer grounded on the shipped safely in small quantities once or twice a week, and had been doing a very particular trade.

IN the Tipperary fray, when more than half was home, a night demonstration on the heat, and by seven to ten local magistrates, one of a number of youths on the lower deck, and by others gambled on the boat striking the bottom.

IRELAND transmits to-day the immigration of Russian Jews, they are said to be coming Scotland in great numbers.

THE truth of the late report of the hanging of Hesse Hollyman, one of the female associates of the late Czar of Russia, is now generally denied on the 27th.

A LONDON dispatch of the 27th says the holders of Confederate bonds in London were about to petition the United States to pay their bonds.

THE final electric railway is working in the vicinity of Berlin—a distance of twenty miles.

Charlevoix Sentinel.

CHARLEVOIX, JUNE 5, 1883.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

The Nature Question.

CHARLEVOIX, June 30, 1883.

Friend Smith:—In passing along Bridge street the other morning I halted for a few moments where a number of workmen were engaged in removing the trees and spreading the new loam. Riley and other beautiful shrubbery, to which has been one of the loveliest thoroughfares in our village.

On reaching the point that I am about to call to mind I became alarmed, I was told that everything there could be the result of progress.

To that suggestion I readily assented, as it is a truth that all must admit. What is rendered as truth and science to-day will in the morrow be exploded as the error of the past. Hence, I pondered and wondered that the march of science has bestowed, the march of progress has not ever.

Everything is doomed to yield before the onward march of the conquering army of progress. The very words of divine inspiration must yield to the requirements of these progressive times. So, Mr. Editor, when told that the beautiful shrubbery was being uprooted I made room for it should be the sole of spirituous liquors, I soon began to doubt and ask myself this question. Does not the army of progress, like all other armies bring with them a host of camp-followers of a vile character that must ready to encircle with the health and morals of all who may chance to yield to their allurements?

I felt and to me these beautiful flowers ruthlessly uprooted and torn from their proper status to wither and decay, but neither will when I chance to reflect that these were not the only flowers that may possibly be blighted on that spot.

Our village is full of bright intelligent lads that will in a few years open into the full bloom of manhood and womanhood.

They are now watched over with all the anxious care and solicitude of fond and doting parental affection. They are right by but away with the mother's fond pride! good right kind, to be awakened in the morning by the same gentle embrace that never wearied in tasting for their comfort.

Who knows how many of these bright boys, as they approach the years of manhood may take their first, and it may be their last step in the downward road to ruin and their very eyes where once beamed the sweet rose.

How many of our sweet little budding rosebuds may in after years have their lives made miserable by taking their first to that of some young man who on that spot may commence the habit that may bring them low to ruin and disgrace. How many mars may yet be shed over the fate of many now innocent boy by parents who now look in perfect security on each corner to see another gate to run, upon a spot in their midst.

People of Charlevoix, for the sake of the fond hopes of our beautiful village—for the sake of the young and unaware, prevent one instance or circumstance that in any manner that may go to the cause of many being ruined.

TRAVELER.

A Proclamation.

To the Arcadia and Hiawatha I. O. of M. E. wheresoever scattered throughout the earth:

GREETING—All who have passed the sublime degree of M. N. E., or will so those who have passed the G. G. and all who have an honest desire to join the order, are hereby notified and requested to meet in public camp, in the town hall in the village of Charlevoix, on Saturday evening, June the 14th, 1883. The camp to be called to order at 8 o'clock sharp. The special business before the camp will be to confirm the passing of candidates cut en mass to celebrate the coming birthday anniversary of our nation.

Let there be a full attendance of the comrades and citizens in general.

By order of the commander-in-chief of the I. O. of M. E. in the State of Michigan.

JOHN ANN G. SOOKSTAS, A. G.

June 4, 1883.

Many furniture just received at Carpenter & Bartholomew's.

NEW YORK *Tribune*: There will be plenty of harmony in the Republican party of New York presently, and there will be something else there which is even more desirable; and that is enthusiasm. And again: When Elaine's Senatorial term is officially ended by the action of the Legislature, he ought to stuff it on as Indian specimen. There has never been anything like it in American politics.

CARPENTER & BARTHOLOMEW have the yellow rain hogs used to knit, which they warrant to be good.

It is related that Benjamin Harrison, U. S. 4 was most humorously appropriate remarks "prohibition." It reads: "Tribulation worketh patience, and patience experience, and experience hope." Is not this a point for the Methodists?

Go to CARPENTER & BARTHOLOMEW'S for wood-working clamps.

Answer to the conundrum sent in the Arcadia.

Senator Conkling has discovered that the people have opinions and ways of expressing them.

In Answer to Many.—We say that in theory the ex-Senator Conkling is a nuisance of solitariness.

Two bill enclosing sixteen volumes of statistics of the war has been passed by the Legislature. Which is all right.

The Democratic party is anxious to all appearances. It has the courage to have it draw and punish the emeute to its own credit.

Senator Conkling is the man who in the convention assured that Roberman's nomination be favorably regarded, and who made his report to the Senate.

And now it is said that President Lowell has consented to remain in America once again and visit her for Lenox Easter right here, come back soon to your own native country.

Gentlemen, please your friends by placing your names on the list. Conkling's nibbles. Don't waste your position by championing the cause of the New York Senatorial jackass.

Two Republican men will succeed C. Angell retired. His successor depends upon great principle and not upon politics or political fortunes of any man, no matter how distinguished.

The army worm has made its appearance in the vicinity of Watertown, N. Y. and is causing great destruction to all kinds of vegetation. Its ravages are said to extend all over northern New York.

Representative the editor of Senator Cameron of Mitchell, the President made his own personal representative of the part of Pitchell-ites. The two Senators don't like it, but they don't seem inclined to resign.

The Grand Rapids *Eagle* and the Big Rapids *Pioneer Report* comment on the appointment of Ex-Senator Bruce as Register of the Treasury. We call and this is a most commendatory to either. Ex-Senator Bruce is Register of Deeds of the District of Columbia.

A. H. Stevenson of Georgia is expert 4 as fleering Cox of Senator Conkling and Hill, in ridiculing their acts, to their other members Senators in Iowa, and saying: "They should be ranged just as the Southern Senators were, and not be allowed to come back till their daughters are removed."

Local News.

BREVITIES.

—Small pox is raging in Cheboygan.

—The Board of Supervisors are in session.

—Another very refreshing shower of rain yesterday.

—"How Ruby" played at Sound House Hall Thursday evening next.

—Five dramatic companies are hovering around though Northern Michigan.

—Robert Miller will leave the Bridge Street House early in spring of 1884.

—I. pright, Emrey & Co. are raising their warehouse and repairing their dock.

—John H. Dewey, well known farmer of the Round of Supervisors visited day.

—Messrs. Cahill and Howard, farmers of Hendrie, are both building fine new houses.

—Charlevoix is waking up to the importance of celebrating the Fourth. Ladies, as usual.

—Mr. Lewis' lawn hill will be the largest in northern Michigan. It will be completed by June 23.

—If you don't think Charlevoix is on the high road to prosperity, come here and see for yourself.

—They want them to jail in Traverse City for getting drunk. Leaves my the Professional bum.

—Dr. Frederick Schmidt, School House Hill, Thursday evening. He will visit you all a month.

—The Traverse Bay Eagle denounces the "Miller Uncle Tom's Cabin Combination" as a humbug.

—A minstrel company from Petoskey, composed of about [illegible] Wednesday evening.

—Popular prices of admission have been adopted by the management of the Home Mercantile [illegible] Hall.

—Mr. Rowsted has the contract now on sale at Lewis & Ackert.

—The dredge arrived today and will proceed at once to the work on the lower [illegible].

—The Chicago Bonton club, home is being packed rapidly forward under the hands of a large force of workmen.

—M. J. Stockman has received an assortment of very fine [illegible] which may be seen at his [illegible].

—Cheboygan Indians with his much "Shoo-shoo-ba" was foiled in Marshall Miller, but was released Sunday morning.

—The Grand Traverse county fair will be held this year on Monday, Tuesday, Wednesday and Thursday, October 8, 9, 10, and 11.

—Everything new in Charlevoix. Examine our window lists and prices, and remember it takes place Thursday evening, June 16.

—A dispatch received yesterday states that the city of Ludington is enveloped in flames, with the probability of its almost entire destruction.

—A freight conductor on the G. R. & I. R. R. was killed near Cadillac Saturday. His train was standing still, and was run into by a passing train.

—Chas. P. Russell, G. W. C. T., of the Order of Good Templars of Michigan, will deliver a temperance lecture at the M. E. Church this evening.

—Lewis' new hall will be the largest in Northern Michigan. It will be completed by June 23.

—If you don't think Charlevoix is on the high road to prosperity, come here and see for yourself.

—They want them to jail in Traverse City for getting drunk. Leaves my the Professional bum.

—Dr. Frederick Schmidt, School House Hall

Three Months of Garfield.

It is now nearly three months since James A. Garfield was inaugurated President of the United States. His election was secured by the combined action of all the factions and elements of the great party that has had control of the Administration since 1861, with the exception of the disaffected element known after Mr. Lincoln's death; and Mr. Garfield's inaugural address was so liberal and statesmanlike in grasp and tone that it promised Sectionals at home and abroad. His first serious work was to name his Cabinet out of men, which was done discreetly and well, and with an eye to securing the discords in the party and to silencing men of acknowledged ability and of National reputation.

His first serious embarrassment arose from the deadlock in the Senate, which the President could neither avoid nor remove, and for eight long weeks some of his important officers were not confirmed. Party spirit ran high in the Senate, and both sides displayed unusual fight it out on that line if it took all summer. Finally, the Republicans recceded from their position, after the principal contestants were made. The Senate adjourned over.

While this angry political debate over Mahone and the right of each party to rule the other was going on in the Senate, the President and his Cabinet went at their business and did much to cement devotion of experienced statesmen who are familiar with the routine of their departments, and to better determined to succeed them. The Secretary of State visited Boston and New York on private business, which assembled gentlemen from all parts of the country, and the Secretary of War visited the cities of Savannah and Charleston, which are among the most important positions of the country, and his acquaintance with the leading men and his personal interviews removed the cause of the misunderstanding, and, with it, the cause of Atlanta. Mr. Blaine visited Boston to promote the rights of certain railroads, and to secure the influence of capitalists in Massachusetts which would otherwise be outlined to vote. A man may pay taxes on a million of dollars in Massachusetts, but if he cannot read the Constitution of the United States he has no influence in the Senate or Executive Councils, and write his own name, he has no right to vote. So one may leave any amount of intelligence and property out of the census of this country has a large number of one hundred and thirty-four dollars, he has no right to vote. Not half of the male adults in Rhode Island can read, but by the proper age and having the proper residence, can vote, while in Massachusetts one-seventh of such adults are excluded from voting.

Now, when Southern Democratic Senators point to these facts by way of defending their right to rule a section they do not, indeed, make their own case any better, or justify any wrongs which die and others do, but which they ought to do their utmost to correct; but they do refer to an injustice and wrong in, at least, these two States, which also ought to be corrected. Massachusetts and Rhode Island are accustomed to all the other States in their legal restrictions upon the exercise of franchise, and if they complain of the white Democrats of the South being disfranchised in some localities, where practically denied to colored people, even when they have a majority of that race, they must say to them: "Physician, heal thyself." There is no call in the court, and there is no adequate answer to it. The plain truth is that the wrongs against the elective franchise at the South ought to be admitted and corrected. There is no use in denying them, since the evidence of their existence is overwhelming, and they cannot be justified. The Constitutional restrictions in Massachusetts and Rhode Island, to which the Democratic Senators have referred, ought also to be corrected. They are unfair and unjust to a large number of persons otherwise qualified to vote. They are behind the age and contrary to the general sentiment of the American people in regard to the elective franchise. We protest against the wrongs on this subject which exist at the South, and equally against the Constitutional provisions in Massachusetts and Rhode Island.—*N. Y. Independent.*

POLITICAL BREVITIES.

☞ With the Senate out of the way, the Administration will have free course and be glorified. Its first appointment will be Postmaster-General James Jingles' sway at that bell, and wakes up a new sleeper or two every day, some of whom will not live to see the end of the session until they repose within the peninsula.

☞ When the able Senators reach home they are one and all likely to have a similar and not quadrilateral pleasant experience. To each one will come a confidential friend who will lead him gently into a secluded place and say: "Now, tell me, what in thunder made you fellows act as you have done? What was the matter with you?" And the chances are that in nearly every case able Senator will say he doesn't know.

☞ It is a curious result of succession that South Carolina is likely to become in a few years a black Republican State in earnest. The negroes are increasing faster than the whites, whom they already outnumber. A lawyer recently removed from Columbia, S. C., to Colorado. He said the negroes would soon learn to count as well as vote, and that many whites were beginning to feel like giving the negroes power and having done with the North. This man said one hundred white families would follow him if he found his new location agreeable. There is no law to prevent this kind of exodus, and no need for Congressional inquiry, but it will seem like poetic justice if South Carolina, the hot-bed of secession should become a thoroughly Africanized State.—*Indianapolis Journal.*

☞ A writer for the Glasgow *News* says that the mania for slender figures is to be laid at the door of fashion magazines, where the human figure is invariably represented entirely out of proportion.

☞ A poor fisherman of Tallahassee, Fla., while digging worms for bait the other day, struck a brass kettle that was found to contain $1,400 in coin.

Reflections on Suffrage.

During the long wrangle in the Senate, in which almost everything had been talked about except the business for which the Senate was called together, several Republican Senators pointed to the practical denial at the South of a free ballot and an honest count as reasons why regard to colored voters. Some of these speeches possessed a strong array of facts show that the contest to which and the methods by which the colored vote has been virtually subordinated is a topic among the Southern States. This is particularly true of time discreetly and well, and with an eye to securing the discords in the party and to silencing men of acknowledged ability and of National reputation.

His first serious embarrassment arose from the deadlock in the Senate, which the President could neither avoid nor remove, and for eight long weeks some of his important officers were not confirmed. Party spirit ran high in the Senate, and both sides displayed unusual fight it out on that line if it took all summer. Finally, the Republicans receded from their position, after the principal contestants were made. The Senate adjourned over.

While this angry political debate over Mahone and the right of each party to rule the other was going on in the Senate, the President and his Cabinet went at their business and did much to cement devotion of experienced statesmen who are familiar with the routine of their departments, and to better determined to succeed them. The Secretary of State visited Boston and New York on private business, which assembled gentlemen from all parts of the country, and the Secretary of War visited the cities of Savannah and Charleston, which are among the most important positions of the country, and his acquaintance with the leading men and his personal interviews removed the cause of the misunderstanding, and, with it, the cause of Atlanta. Mr. Blaine visited Boston to promote the rights of certain railroads, and to secure the influence of capitalists in Massachusetts which would otherwise be outlined to vote. A man may pay taxes on a million of dollars in Massachusetts, but if he cannot read the Constitution of the United States in the English language, and write his own name, he has no right to vote. So one may leave any amount of intelligence and property out of the census of this country has a large number of one hundred and thirty-four dollars, he has no right to vote. Not half of the male adults in Rhode Island can read, but by the proper age and having the proper residence, can vote, while in Massachusetts one-seventh of such adults are excluded from voting.

Now, when Southern Democratic Senators point to these facts by way of defending their right to rule a section they do not, indeed, make their own case any better, or justify any wrongs which die and others do, but which they ought to do their utmost to correct; but they do refer to an injustice and wrong in, at least, these two States, which also ought to be corrected. Massachusetts and Rhode Island are accustomed to all the other States in their legal restrictions upon the exercise of franchise, and if they complain of the white Democrats of the South being disfranchised in some localities, where practically denied to colored people, even when they have a majority of that race, they must say to them: "Physician, heal thyself." There is no call in the court, and there is no adequate answer to it. The plain truth is that the wrongs against the elective franchise at the South ought to be admitted and corrected. There is no use in denying them, since the evidence of their existence is overwhelming, and they cannot be justified. The Constitutional restrictions in Massachusetts and Rhode Island, to which the Democratic Senators have referred, ought also to be corrected. They are unfair and unjust to a large number of persons otherwise qualified to vote. They are behind the age and contrary to the general sentiment of the American people in regard to the elective franchise. We protest against the wrongs on this subject which exist at the South, and equally against the Constitutional provisions in Massachusetts and Rhode Island.—*N. Y. Independent.*

SCHOOL AND CHURCH.

—Forty-four Mormon missionaries have gone to Wales on a proselyting expedition among the mining and iron districts.

—The Protestant Episcopal Church has in Mexico fifty churches, congregations and mission schools counted together, with 3,000 communicants.

—Bishop Keane, of Richmond, has received a legacy of $100,000 for the benefit of his diocese, from the widow of the late Dr. William Brown, of Lexington, Ky.

—Mr. Wordsworth, Bishop of Lincoln, having inducted Mr. Pelham, Duke, a condemned ritualist, into a living, the Archdeacon of the district in which it is situate has resigned.

—It is now an open question whether Lord Beaconsfield died a Christian or a Hebrew. Sir Valinnial Belasolle is said to have evidence of the fact that he returned to the faith of his race before his death.

—The Portuguese Government have made primary education compulsory for children between seven and twelve years of age living within a radius of two miles from any Government school, exempting the very poor.

—The Trustees of Hamilton College have unanimously elected the Rev. Henry Darling, D. D., of Albany, to the Presidency of the institution. Dr. Darling's parishioners have urged him to decline the position, promising an increase of salary if he will remain where he is.

—One of the oldest churches on the American continent is the Tumacacori church, near Tubac, Arizona. It was built by the Franciscan friars in 1691, and has consequently reached the age of 327 years. Fifty-six years ago the Tubac murdered seven priests within its walls, and twenty-five years ago several persons were killed in the church during from a quicksire on the right side of the altar $80,000 in coin and jewels.

—Dr. McAnally, of the St. Louis *Christian Advocate*, is praying himself against the "Jingo Now" and the Sunday-school music, and demands the introduction of select church hymns "to the exclusion of the jingoes, wishy-washy and sometimes senseless poetry of poetry it may be called." He says the supply music that excites nothing of a devotional spirit, and trains the children altogether out of harmony with the music of the church."

—Connecticut has a compulsory school law in active operation, but it is not to work well. The school population of the State last year was 140,293. All with the exception of 13,565 attended school. Hartford and New Haven have excellent truant officers, and manage their work admirably. The Connecticut schools cost last year $1,483,874.74. The funds furnished amounted to $1,487,290.93. The average salary of male teachers was $65.45; of female teachers, $35.42.

PUNGENT PARAGRAPHS.

—Inquirer asks: "How many pounds of coal make a ton?" That depends on the weight of the driver.—*Buffalo Express.*

—"The young lady in the novel who 'tripped lightly down the stairs' to meet her lover, must surely have worn her slippers.—*Boston Times.*

—"Have you been to the dentist lately?" "Yes." "Well, I suppose I might try some. Is it healthy or unhealthy?" "Oh, it is said to be very healthy." "What organs does it seem to act on?" "Well, I couldn't say."

—"That's unfortunate. How do you know it wouldn't aggravate my lung trouble, or help along my liver complaint? Have you no certificates from any one it has helped or injured?" "No, sir."

—"That's unlucky."

—"Will you have some?"

—"Well, what do you think? Will it be perfectly safe?"

—"I think so."

—"Then I might try it. You needn't draw but two cents' worth, considering the circumstances."

—"That is—we sell it for five cents per glass."

—"Very well—I won't take any. Have you any clear, cold water?"

—"Thanks. Sorry to put you to any trouble, but I fell through a hatchway once by not asking inquiries in time. That's a favorite kind of water—very fair. Have you the smallpox?"

—"No, sir."

—"That's too bad. If you get it please let it settle until I drop in. As to that ginger ale—let's see. To-day is Friday. I may pass after about next Thursday, and if I do I suppose you will still have it on draught?"

—"Yes, sir."

—"And the price will be the same."

—"Yes."

—"Very well. I have no doubt it is a refreshing drink, and full up to your guarantee, but there is no particular hurry in this case—not the least. I shall be in your city for about a week soon, a week all summer, and any time before cold weather will do. So long to you."—*Inter-Ocean Free Press.*

—"Let us play we were married," said little Dolly Dimple. I will bring my dolly and say, "See baby, papa." "Yes," replied Johnny, "and I will simply write a letter to King Oscar so from here to him, and demanded an explanation. He treated my letter with contempt and did not answer it. But the Swedish and Norwegian press took another view of the affair, and censured him in the strongest of terms. And this is how I and the King became enemies."—*N. Y. Tribune.*

The Tribute of a Tear.

In 1847, Gulia Grisi and Jenny Lind were singing in London, but at different opera houses. The star struggled to outshine the other, and those who one evening went to entasize over Grisi's "Norma," were the next evening enraptured with Lind's "Casta Diva."

Such was the rivalry that it was not to be expected that they would sing together in a ball-room, but Queen Victoria, thinking it a shame that two singers so eminent should be separated by a public jealousy, commanded both to appear at a Court concert. Of course, they complied with the request. The Queen cordially welcomed them and expressed her pleasure at seeing them together for the first time. She then gave the signal for the concert to begin.

As Jenny Lind was the youngest of the two it had been arranged that she should sing first. With perfect confidence in her powers she stepped forward and began. But, chancing to look at Grisi as she saw the Southern malignant gaze fastened upon her. The fierceness of her look almost paralyzed the singer. A cold shudder ran through her voice trembled, and everything before her eyes darkened. She nearly fainted, but when she nearly fell, by the utmost exertion of her will, however, she succeeded in concluding the song. The painful silence that followed its conclusion was almost as embarrassing as those present are embarrassed—convinced her she had made a failure. The conviction was confirmed by the triumphant expression on Grisi's countenance. Jenny Lind began to despair of her senses she realized that the failure meant her glory, the destruction of her professional career, the overwhelming grief of her parents and friends.

Suddenly a thought came into her mind like a voice from heaven whispered, "Sing one of the old songs in your mother-tongue." Grisi was just on the point of leaving the room in triumph, when she heard the first few notes of the "Last Rose of Summer" sung in the Irish language. She turned, and listened, and listened, and listened. Her self-possession returned, and she remained to the end. Then she went up to Jenny Lind, and, with a burst of tears, said: "Oh, you have conquered me! I never heard anything like that! I never knew what singing was before! Oh, you have conquered me!"

DO YOUR DUTY NOW.

It was the last day of the school year, in the basement of the Methodist church and pupils were all assembled to hear a few parting words from their principal, Mr. Hollingsworth, and to receive from them. What anticipations of pleasure filled the minds of all as they felt that the last day before vacation had come! All were anxious to hear the closing address, and to receive the encomiums of their old friends. She announced the opening hymn, which was sung, and took the vacated seat. For a few moments her thoughts were eagerly wander over the keys in a low prelude then sic began to sing.

The hymn was quite a little prayer, which, in the long ago, she had loved to sing at other anniversaries and children's meetings, but had not thought of it for years. As she sang, she was no longer in the church, but was with her fatherland, surrounded by those who were not to return.

Not one of those before her understood the words of the "prayer," but their hearts were touched by the soft, inspired tones of the pure, sweet voice brought the minister to every one. There was the silence of breathing worder.

When having finished the "prayer," she lifted her mild blue eyes to her friend, whose flaming orbs had so disconcerted her, she found no terror expression on her countenance, but instead a look of encouragement which took away lashes.

A moment after, with the impulsive, one characterizing the children of the tropics, Grisi rushed to Jenny Lind's side, and, folding her three sisters upon neck and kissed her, regardless of the lookers-on.

A Man With Lots of Time to Drink.

He had his hat in one hand and his handkerchief in the other as he sat down sparsely in front of a ginger-ale fount in a Jefferson Avenue drug store yesterday. No one would have said he was about to melt, but he wasn't the sort of man to be bowled up in a hot day to an icehouse and sit down on a block of ice. He fanned with one hand and mopped with the other, and finally inquired:

"Is this root beer?"

"No, sir, this is ginger ale."

"You cotton pickers?"

"No, sir, it is five."

"Cold?"

"O, yes."

"Made of ginger?"

"Certainly."

"Well, I suppose I might try some. Is it healthy or unhealthy?"

"It is said to be very healthy."

"What organs does it seem to act on?"

"Well, I couldn't say."

"That's unfortunate. How do you know it wouldn't aggravate my lung trouble, or help along my liver complaint? Have you no certificates from any one it has helped or injured?"

"No, sir."

"That's unlucky."

"Will you have some?"

"Well, what do you think? Will it be perfectly safe?"

"I think so."

"Then I might try it. You needn't draw but two cents' worth, considering the circumstances."

"That is—we sell it for five cents per glass."

"Very well—I won't take any. Have you any clear, cold water?"

"Thanks. Sorry to put you to any trouble, but I fell through a hatchway once by not asking inquiries in time. That's a favorite kind of water—very fair. Have you the smallpox?"

"No, sir."

"That's too bad. If you get it please let it settle until I drop in. As to that ginger ale—let's see. To-day is Friday. I may pass after about next Thursday, and if I do I suppose you will still have it on draught?"

"Yes, sir."

"And the price will be the same."

"Yes."

"Very well. I have no doubt it is a refreshing drink, and full up to your guarantee, but there is no particular hurry in this case—not the least. I shall be in your city for about a week soon, a week all summer, and any time before cold weather will do. So long to you."—*Inter-Ocean Free Press.*

Emily's Out-of-Door Sleep.

There was once a little girl named Emily, who did not like to go to bed. This was not because she did not feel sleepy. Every night when the Sand man came round with his bag of silver sand, he sprinkled some in Emily's eyes. They were big brown eyes with long lashes. He always remembered to look for them. But Emily wanted to be a "big girl" now. Only little girls were sent to bed at eight o'clock. Mamma grew tired of saying, night after night, "It's bed-time, dear." No wonder.

For she had to say it so many times before Emily minded. So she did not always say it, and papa, in the lounge, or the armchair would presently hold a rampant bear. It looked like white sprun, red stockings, golden curls and buttoned shoes. It was by and by found to be a wee body, which had to be undressed and put somehow or other into bed.

One summer night there was company at Emily's house. Everybody sat in the porch and ate ice-cream. A lady inside played the piano, and sang so that the children in bed could hear every hurt, and ran to grandma. The dear old lady gave her a seat on a low bench by her side.

The breeze stirred the lilac leaves, and said, "Lullaby! lullaby!" and presently Emily was fast asleep.

Her party was soon over, and grandma went to bed. She forgot about kindly. Nurse thought she was with mamma, and mamma that she was with her, and so the hours were locked. Nobody knew that a birdsgirl was lying asleep on the garden-bank.

In the middle of the slight papa waked with a start. Everybody else was in their best estate, and it inspired the sensation of sweetness. Strawberries, though most delicious when fresh, become somewhat insipid when cooked. Red raspberries are excellent when canned, but they should, to preserve their flavor and aroma, be put up as soon as they are gathered. Blackberries are inferior to red raspberries, but if canned shortly after they are picked they will come out in very good condition and be very welcome. Red and white currants contain too many seeds to be very desirable. It is better to make a wine of them and preserve them underneath the bark of the tree just above and below the wound. Tie the ends up with strong bass matting and draw up the earth to cover the place and keep out the air. A correspondent says that an application of clay on the denuded part of the tree will cause the bark to grow again without a scar. According to our own experience, when wounds are treated in this way each one heals perfectly as good as before.

Gardening.

Gardine the rooms of the young ladies in our college at this season, when the air is so pleasantly better, and where something better should be heard. But of what be the first sounds that salute you are, "you are generally lowly to come;" and, "don't the day just brewed for me?" "Look at these roses and bright leaves on the wall. Aren't they pretty?" and so on.

With these young women, anything that is perfectly lovely, from a piece of "perfectly lovely," from a piece of "perfectly lovely," from a station of Venus to coffee jelly or a bonnet-string is the opposite.

"Bread Gooseberries for Tarts.—Fill very clean, dry bottles with gooseberries with gooseberries picked the same day, in dry weather, and just before they are quite ripe. Cork them with a little hay round each bottle, and set them up in a copper of cold soft rain water, which should be brought to boil a little hay must be put in the bottom of the boiler, and the bottles fixed firmly. Let the fruit simmer gently until it appears tender and perfectly scalded, then take out the bottles, and fill up as many as you can quite full with some of the cooked gooseberries—it is generally necessary to sacrifice one of the bottles to obtain enough to fill the rest. Cork them directly the bottles are full of gooseberries, pour melted resin over the corks, tying a piece of bladder over them. Store in a dry place.

Although efforts some persons very persistently and where a simpler remedy does not check it, a half teaspoonful of olive is a half dissolver of sand used in modern localities should be sown before July 12, otherwise early fall frosts may catch the crops. Rape and clover may sometimes be sown successfully with buckwheat.

Buckwheat may be made profitable upon a piece of rough or newly cleared ground. No other crop is effective in destroying weeds, shrubs and bushes

Charlevoix Sentinel.

CHARLEVOIX, JUNE 11, 1881.

WILLARD A. SMALLEY, EDITOR AND PROPRIETOR.

A. B. CORTELL, undertaker at Bay City, has failed.

THE steamer Chas. Noble, the fast-sailing passenger of the Benton service, visits Charlevoix to-day.

It is reported that forty new cottages will be built at Harbor Point next Decoration Day, this summer.

A Reverend Sunday school speaker is to trouble Longwell the next time he gets a chance to do a favor of the missionary sort towards.

THERE are over one hundred surviving members of the Michigan 1st Regiment, Col. Robert Patterson, of Philadelphia, and Gen. Barnes, of St. Louis.

GRAND preparations are being made for the annual reunion of the sons of the Pilgrims, which takes place at Hartford, Conn., June 20th.

THE British government announces that it will entertain no application for the removal to the United States of the remains of Wm. Penn.

THE business tax paid in Wyandotte by John F. Clark, of Malden, whose property is assessed at $300,000. There is not a millionaire in the county.

THE St. Louis Globe-Democrat says: "We predict that James G. Blaine will not be a member of the cabinet when congress meets hereafter."

ON the 1st inst., a fire broke out in the cane shop connected with the reform school at Lansing. Loss about $100. It was a useless escape from a useless life.

THE statement is made by the census bureau that the new debt of $2,000 which now confronts the United States having more than 7,500 inhabitants, is over $70,000,000.

THREE United States marshals from Fort Smith, Ark., arrived at the Detroit Correction in Detroit on the 2d. They were heavily ironed, and are a hard looking set.

NEW and strong forts are to be erected. Irons are being constructed near the Ute reservation, in Colorado, to be used in transferring that tribe to their new reservation.

AN insane woman at Goshen, Ind., demolished nineteen rooms in a very heroic manner. She astonished her physician with her strength and then set them on fire. Her name was Mrs. Darcy.

A NEW railroad, from Butler, Ind., to Detroit, was completed the 24 inst. The readers behind the postscript by means of the great Wabash system, and Detroit people are naturally very jubilant.

ELDER FREDERICK PERRY, pastor of the Christian Church at Washington, which the President attends, is traveling through Ohio and Indiana, soliciting funds for building a new church in the capital city.

PRESIDENT GARFIELD has appointed his brother-in-law, Commodore Rodgers, to the command of the cruiser at the naval academy at Annapolis, Md., on the 10th inst., and also the commencement exercises of Williams college, July 4th to 6th, inclusive.

THE senate has appropriately $100,000 for a new interior edition passed the house on the 7th, by a vote of 71 to 2, and if the governor does not veto it, will become a law. Now for another session, the affairs of our state being bitters.

IT is asserted that Rockford has consented to a new commission on the Canadian fishery awards, being ashamed of the meal she made of them. John S. Newberry, of Detroit, is to be a member of it on the part of the United States.

GIVE us a school yard at every jail in Michigan, and in less than ten years our state would have the best and best conducted reform roads of any state in the union. Why not make the criminals work for their living? Can any live man give an answer?

THE investigation into the affairs of the Ionia house of correction still draws its weary length along without any especial or terrible facts being drawn out to warn the rest of the sons to the state. Investigations are expensive things, and generally useless.

THE court of claims have very justly overruled the attempt of the Union Pacific railroad company to make the government pay additional compensation for carrying the mails. That corporation, the courts partially judged, had already filed the government sufficiently.

THE clerks in the various departments at Washington are all on the anxious seat lest some at a premature reduction at the clerical force. But then, as the telegraph quietly observes, good copyists and accountants are rare, the people if needlessly consulted can be expected to cancel the interference.

A correspondent has been looking at Grand Island, Michigan, and says: "A party of sixteen excursionists from St. Paul to Glasgow, Scotland, by way of Duluth and Chicago, passed here yesterday. If the ship canal was completed, exhaust will follow, and then the great commercial lines between New York and the West be deprived of a portion of their trade. To-day the Duluth elevators was crowded per bushel.

THE tax lists of the state are to be equalized, and Gov. Jerome recently nominated for Tax Commissioners, and sent to the State Senate, the names of B. H. Hinsdill, of Bay City; John Moore, of Sullivan (Ill.); Charles A. Keely, of Detroit; H. O. Ottawa, of Jonesville, and Wm. Chamberlain, of Three Oaks. The first three named are lawyers, and the fourth is a merchant and banker, and the fifth a merchant and farmer.

HE came home to his mother looking very foolish, with a big red swelling under his left eye, and four or five bruises all over after he had gone over the breeches bank. "Why, where have you been?" she asked. "Me and Johnnie were playing." He replied in such a manner, and I played I was Indian. Then I put on some red paint, and—" "Yes, you little rascal, but how did you get hurt?" "Why, mother, but for paint I looked!"

☞"MAKE NO MISTAKE!"

THE night train will be put on the G. R. & I. road the 19th of June, and at the same time the Mackinac boats will commence making regular trips.

THE 6th annual Methodist camp meeting at the Petoskey Bay View grounds, will commence on the 27th of next month and last one week. Many people will reside there, some in cottages and some in tents, a considerable portion of the summer.

THE Empress Augusta, of Germany, offered the doctors of Europe a prize of $2000 for the best work on diphtheria, and of the hundreds of competitors, no one gained the prize, as not one new fact relating to the disease was brought out in the contest.

THE Mackinaw extension of the Jackson, Lansing & Saginaw railroad will be graded through to the Straits by the middle of August next, and ironed, and in operation before next winter sets in. For some reason, the G. R. & I. folks are not extending their road to the Straits this year.

THE gloom still grows thicker and thicker over poor, oppressed Ireland. It doesn't look as though the English parliament would take any measures looking to the relief of her people. The only out come, unless something is done soon, is bloodshed, and the repetition of former scenes on that island.

CANADA has adopted a new land policy for the far northwest. The Pacific railway syndicate has advertised its lands at $2.50 per acre, with a rebate of $1.50 on all improved within three years, and the government will equalize the matter by reducing the price of prospection lands in that section from $5 to $3.50 per acre.

IF the system of virtue which occasionally rules the citizens of our large cities would only hold out until the evil the evil they strike at is crushed, then they would be deserving of praise. But the great trouble is the spasm passes off just as an effective blow might be struck, and the evil goes on as strong and bold as ever.

THE state has commission, which investigated the oil fields near our lakes and creeks, will have some terrible falsehoods to account for. We have been trying to keep track of the big oil stories told by our exchanges for the past few weeks, but it has been utterly and absolutely impossible. They came too big and too thick.

DAVID MCDEARD, an employe of Carter & Flint's mills at Lindington, was discharged recently, and the next night was discovered in the act of cutting the belts in the mill, by James Curtis, a boy. McDonald turned upon the lad, and beat and kicked him in such a terrible manner that he died soon after. The murderer was subsequently arrested at Manistee.

JOSEPH, PIERRE LORILLARD'S 3 year old colt, won the famous English Derby stakes, at Epsom Downs, on the 1st inst. This is the first time an American horse ever won this, the National English race. On the race course were the Prince of Wales and his brothers, the Dukes of Edinburgh and Connaught, with leaders of the royal family, and some German potentates. The winning horse and his jockey, Fred Archer, were the subjects of much enthusiasm.

CLEVELAND, Ohio, is not without her princely benefactors. J. H. Wade has a claim for the enduring gratitude of her citizens. He recently presented to the city, a park of a hundred acres, bearing his name, and worth half a million dollars. It has a front on Euclid avenue, of itself one of the finest avenues in the world, and has great natural beauties. Men who make such use of their wealth have a large place in the admiration and esteem of their fellow men.

THE Northern Pacific Railroad, which has become one of the collossal enterprises of this country, will when complete extend from Duluth and Thompson, on Lake Superior, to Puget Sound, and also to a point at or near Portland, Oregon. There are now completed and in operation 221 miles, and 231 miles more will be completed by July 1st, next. In addition to this mileage, there will remain 55 to be constructed 1110 miles, which will give the completed line a total length of 2662 miles.

TWO years ago the City of Memphis abolished its municipal corporation in order to get rid of its debt. The Supreme Court of the State very justly decided that the property-holders of the city are responsible for the debt, and can be sued.

THE elements of discontent, disorder and resistance to official and lawless tyranny are becoming continually more demonstrative in Ireland, and now assume the proportions of a general insurrection. Acts of violence and bloodshed are increasing.

GEN. GRANT arrived in New Orleans last week, and was instantly "interviewed" by hungry news gatherers, who report him as saying that Conkling has been woefully treated and should be re-elected to the Senate. He thinks that the present abuse of Conkling is instigated by White House influence, but not by Garfield. He reaffirms his letter to Senator James of Nevada, but will take no hand in the fight. He went from New Orleans to St. Louis, thence to his home at Galena, Illinois.

TREASURY officials are of the opinion that the total reduction of the public debt for the now closing fiscal year will be $100,000,000. The reduction for the month of May was over $11,000,000, and there is no reason for supposing that the average receipts for June will not be as large as those of last month. Large disbursements will be necessary during the month of June to meet the demands of the Pension Office, and the semi-annual interest on the National debt will fall due on the first of July. The receipts from internal revenue during the month of May average over $1,000,000 daily.

THE progress of civilization was illustrated by an event of unusual significance on Decoration Day at Harper's Ferry. Frederick Douglass, standing upon a platform near the old Cluckasmith shop to which John Brown retreated after his raid, delivered an eloquent eulogy upon the grand old agitator. The F. F. Vs who were present at the ceremonies must have rubbed their eyes in amazement at the remarkable spectacle. Gen. Hunter, the State's Attorney who prosecuted John Brown, was present, and congratulated Mr. Douglass upon its eloquence, which is said to have surpassed anything ever heard from him before. The occasion was certainly one to inspire him.

A CUNNING youth who hangs around the depot at Monroe, in this state, tied a hornet's nest to a dog's tail expecting to see a fast race for the amusement of himself and the passengers who were waiting for the train. After dragging the thing around awhile the hornets began to come out and light on the dog. The unprotected whelp crowded in between the boy's legs, and wouldn't go any where else. The boy was almost paralyzed with mortification at the failure of his little amusement scheme. But when the hornets began to get in their work there was a change in the programme, and the boy entered the foot race. A boy cannot run very fast with a big yellow dog between his legs, and the burst of speed was not as fast as was hoped for, but the hornets did all they could to help the boy along.

IN Texas, the public lands are at the disposal of the state government. A few weeks ago the Texas Legislature passed a bill declaring that all persons who are now residents of the state, and who were residents at the opening of the war and enlisted in the military service of the state or Confederate states, and were honorably discharged while in the service, shall each receive a certificate for 1,280 acres of land, equal to two square miles. The provision applies to widows whose husbands died or were killed in service, and who show that they have not property to the value of $1,000. This shows that Texas is disposed to treat the disabled soldiers of the Confederacy more generously than the National Government has treated the veterans of the Union army. And yet there are those who complain that the government has done too much for the soldiers that fought its battles. As Texas is now a reconstructed state, the legislature might have included Texas veterans of all classes, as well as Confederates. The reason is plain, however. The legislature is composed of 97 Democrats, 27 Republicans, 6 Independents and 3 Greenbackers.

Commissioner of Land Grants, Ionia

Send for Pamphlet in German language.

MISCELLANEOUS.

DR. MARSHALL'S CATARRH SNUFF

The Snuff is superior to anything yet known for removing the Catarrh, Cold in the Head, and the Headache. It opens and purifies the nasal passages, strengthens the weak, gives a healthy tone to the whole system, and will restore the sense of smell, when ordered. None genuine without the fac-simile signature of the inventor.

Dr. T. Marshall

H. O. GRIDLEY, PROPRIETOR.

Beware of Chas. Bowen's Counterfeit.

All those wishing to purchase the GENUINE Dr. J. Marshall's Catarrh Snuff, and Headache Snuff, should purchase that of which H. O. Gridley is the proprietor, and not of Bowen, or anywhere personally the Snuff sold by him and Gridley. Dr. J. Marshall

I believe that the above article was concocted by my late husband, Dr. J. Marshall, and that he put genuine therein. DORCAS WOOSTER,

Middlebury, Vt., Jan. 1st, 1881. Judge

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

THE General Assembly of the United Presbyterian Church, at its session at Pittsburgh, Pa., on the 8th, decided to erect an educational establishment at Hackettstown, for the benefit of the freedmen. For foreign missions $70,000 was appropriated.

EIGHT lady physicians were recently graduated from the New York Women's Medical College.

JUDGE WOODS, of the Supreme Court of the United States, has decided that an interest note bearing interest at ten per cent. continues to draw that rate after maturity until paid.

A FEW days ago Black Varian, the mistress of a large beer saloon at 34th avenue, New York, deliberately fired the building, in which twenty persons were sleeping, to secure $4,000 fire risk.

THREE masked robbers recently entered a store at Nortonville, Kan., drew revolvers, and forced those present to keep still while $1,500 was carried from the safe.

THE steamer Fearless has paid out over nine hundred miles of the newest Anglo-American cable, beyond the half-way point.

THE Franco-American Claims Commission has reported for approval to Joseph W. Perkins, Archbishop of New Orleans, for $9,000 for property destroyed by General Butler during the war, on the ground that the Archbishop had admitted having been naturalized.

THERE are 3,307 vessels engaged in the lake commerce, with a registered tonnage of 497,328.

THE vicinity of Poughkeepsie, N. Y., was visited on the 1st by a tremendously hailstorm which brought down much damage to fruit trees and vegetables. Some of the hailstones measured over an inch in diameter.

THE largest grain elevator in the world has just been completed in South Brooklyn, N. Y. It contains 1,000 bins, and has a storage capacity of 3,500,000 bushels.

IN a book factory at North Brookfield, Mass., Miss Nelia Murphy was recently beheaded by the descent of an elevator.

JESSE LITTLE, a deserted Civil War captain, residing in Jefferson County, Maryland, died on the 30th ult. One of the last insurance policies on his life for $60,000, recently obtained by various persons, had been progressed for payment.

THE voyage of the various United States ministers to the Centennial of 1876 will cost $16,000 each in silver dollars.

TWENTY-SEVEN cases of gasoline on a railroad platform at Springfield, Mass., caught fire on the night of the 1st from a spark from a passing locomotive. Two explosions occurred, injuring forty persons more or less seriously.

A SUITE in Hatfield & Co.'s dye-works near Philadelphia, exploded on the 1st, instantly killing three persons and seriously injuring about forty others. An insurance record fixture was caught in the ruins.

ON the 1st 4,393 immigrants arrived at the port of New York.

THE Public-debt statement issued on the 1st makes the following exhibit: Total debt (including interest), $2,076,393,094; cash in Treasury, $256,406,008. Debt, less cash in Treasury, $1,819,987,086. Decrease during May, $1,765,921; decrease since June 30, 1881, $82,250,938.

AT Frederick, Md., on the 31 a monument was unveiled at Mt. Olive Cemetery over the graves of the Confederate soldiers who fell at Antietam and other battles fought in that vicinity. The oration was delivered by Jas. A. Buchanan, of Baltimore. Several thousand persons were present.

SIR EDWARD THORNTON on the 3d gave Secretary Blaine a draft on London for £10,000 to pay the Fortune Bay Fishery claims.

THE United States Treasury Department has recently issued a circular in answer to a number of steamboats, containing stringent rules for their guidance in inspecting excursion steamers.

THE Bank of North America, Philadelphia, suspended payment on the 3d.

THE new Constitution of the Episcopal Diocese of Iowa grants to women a voice and a vote in meetings for officers of the church and on all other questions, but does not allow them to hold offices in the church.

THE Post-office Department pronounces unmailable samples of flour or other powdered substances, unless in transparent bags and tightly sealed.

A CONNECTICUT gambler has recovered a judgment against the Chief of Police of that city because he destroyed a faro lay-out after it had been replevined.

IT is stated that the Steelton gang in New Mexico has reorganized under the leadership of Charles Allison, and was recently engaged in robbing mail-coaches and plundering stores near Paso Springs.

A FEW days ago Albert Clark, a recent immigrant at Peru, Neb., became suddenly insane, cut his wife's throat with a penknife, and then went out on the street with a shotgun, shot Dr. W. Sargent, a harness-maker, he shot him dead. The madman's next attempt was to kill some idle, on which he nearly succeeded.

ALAD named Straley, living at Lancaster, Ohio, was recently elected to the bench with a pocket-knife by a ten-year-old son of Michael Hollinger.

GEORGE CLARK, once a wealthy banker of Cincinnati, drank twenty-seven glasses of whisky-and-soda-waters on the 30th ult. at a ball of the 51. As he reached the door he staggered and dropped as if dead. It was thought that he could not live.

ASHLEY PARK, N. J., has been selected as the place for holding the assembly of Sabbath Schools of the Presbyterian Church of the United States, commencing August 2 and closing August 7.

THE real-estate agents of Pennsylvania met in Philadelphia on the 3d, and, to prevent overproduction, agreed to knock off work in the mines six days in June and three days in July.

Personal and Political.

THE two houses of the New York Legislature at noon on the 31st ult. balloted for United States Senators to succeed Messrs. Conkling and Platt, with the following results: For successor to Mr. Platt—Thomas C. Platt, 8; Chauncey M. Depew, 1; Francis Kernan, 7; Warner Miller, 3; Sherman S. Rogers, 1; Roscoe Conkling, 2; Joseph H. Choate, 1; Judge Noah Davis, 2; William A. Wheeler, 1; George B. Sharpe, 1; Hiram Barber, 16; Kernan, 47; Platt, 31; Fergus, 1; Latham, 6; Cornell, 12; Crosby, 3; Sherman S. Rogers, 1; Morton, 3; Miller, 30; Francis, 1; Pomeroy, 1; Wadsworth, 3; Tremaine, 3; Rochester, 1; Choate, 1. For successor to Mr. Conkling: Senate—Roscoe Conkling, 2; Sherman S. Rogers, 2; John D. Bradley, 1; Charles J. Folger, 2; Governor Cornell, 2; William A. Wheeler, 4; Theodore M. Pomeroy, 2. House—Conkling, Jacobs, 47; Wheeler, 21; Crowley, 3; Cornell, 9; Wadsworth, 2; Rogers, 8; Miller, 1; Evarts, 2; Sessions, 11; Folger, 2; Wilbur, 2; Ingham, 1; Tremaine, 2; Pomeroy, Davis, 1; Pumpelly, 1; Dutcher, 1; Alvord, 2. No choice. Necessary for choice, 85.

A WASHINGTON telegram of the 31st ult. says Mrs. Garfield had been entirely free from fever since the 26th, and was rapidly convalescing. The President would soon remove his family to the Soldiers' Home for the summer.

THE Pennsylvania General Assembly, in session at Buffalo, adjourned on the 31st ult. to meet at Springfield, Ill., on the third Thursday of May, 1883.

A BILL has passed the New York Legislature providing for the payment of a tax of $5 for each unmarried woman broadcast in New York by clergymen, to be applied to incorporation for the needy.

A WASHINGTON Associated Press dispatch of the 1st says: "Postmaster-General James struck two more officials Secretary Windom looked sour for Meiklejohn, Sixth Auditor of the Treasury, and Noble, Auditor in the Interior Department, and whose duties are almost identical with that Department. Windom demanded Muir-ek's resignation immediately, and Noble was also admonished, as he believed he had avoided the necessity of resignation by and by. Windom intends to clear the Augean stables of the Treasury Department. Nothing positive has been said as to the removal of Auditor Lyons, but it is stated that he will soon be a prime favorite for the axe and deadwood page.

SOME Land Leaguers at Killay, Ireland, have been imprisoned for mutilating cattle. Their lordships ordered in some evictions at Hoolyke, Ireland, on the 23, and were fired upon from behind fences. They captured a house filled with armed men, and captured 15 prisoners. One farmer was killed by a shot from the house and a police and several others were injured. On the same day, another farmer was killed by a shot from a window. Several persons were injured. Two carts loads will be facilitated by having these men out of office. Many more arrests have occurred since, and Litter, his deputy, was deposed forthwith.

THE Iowa Greenback State Convention met at Marshalltown on the 1st. Almost full delegation present. W. H. Fleming was made permanent Chairman and O. A. Burdick, Secretary. A platform was adopted declaring that the Greenback party of Iowa will support only such candidates for public offices as will favor the repeal of the National debt or the issuance of non-interesting promissory notes; demanding a graduated income tax; declaration of the people from all unjust charges on the transportation of the necessaries of life; such laws, equal political rights for all men and women, and such laws as will protect the person of the non-settlement of contracts; that railroad companies shall be restrained by the Government, and knowledge that the public domain shall be reserved exclusively for actual settlers and bona fide settlers; etc.

THE basis for United States Senators in the Democratic caucus of the 31st ult. was: Election on the 1st to be voted as follows: For the short term, to succeed Mr. Conkling—Conkling, 31; Cornell, 30; Rogers, 30; Cornell, 11; Jacobs (Dem.), 59; remainder scattering. For the long term, to succeed Mr. Platt—Platt, 32; Pierce, 30; Cornell, 12; Evarts (Rep.), 59; others scattering. The Chair announced no choice in either case, and the convention adjourned to the 3d.

THE Democratic State Convention of Nebraska entirely ignore the Star-route matter in providing for the new force of from $500 to $1,000 in each county. The Democrats have been organized to contest the election.

THE Iowa Greenback State Convention on the 2d nominated the following ticket: Governor, B. M. Clark, of Wapello County; Lieutenant-Governor, J. M. Hodges; Judge of Supreme Court, Seneca Judge, A. D. Dabney, of Madison County; Superintendent of Public Instruction, Mrs. Mary E. Mason, of Polk County. Additional resolutions were adopted extending sympathy and co-operation to the Land League of Ireland in their resistance to landed monopoly, and also to the down-trodden people of the whole globe, and favoring the election of President, Vice-President and United States Senators by direct vote of the people.

COLONEL W. A. UNDOW, the special counsel employed by the Government to prosecute those implicated in the "Star-route" frauds, took the oath of office on the 2d, and went into his examination of the evidence so far gathered by the investigation of the Postmaster-General and James.

TWO BALLOTS for United States Senators were taken in the New York Legislature on the 3d, the latter of which resulted as follows: For successor to Mr. Conkling—Conkling, 40; Cornell, 29; Wheeler, 17; Rogers, 15; Jacobs, 59; not scattering. For successor to Mr. Platt—Platt, 28; Depew, 30; Cornell, 11; Kernan, 57; others scattering. In the Assembly a resolution to adjourn sine die on the 6th was lost—28 to 69—only Democrats voting yea; and a counter-resolution to take a recess from the 6th to the 10th was adopted—81 to 65.

THE Republicans of Virginia met in State Convention at Richmond on the 30, over 500 delegates, including 70 colored men, were present. Resolutions approving Garfield and Robbins's course in the United States Senate were adopted. A platform was adopted declaring for a free ballot; denouncing the capitation tax as in conflict with the Fourteenth amendment, and reasserting our purpose to settle and adjust our State obligations on the principles of the "full to re-establish public credit," known as the Republican "readjuster" policy of the last General Assembly, and vetoed by the Governor; declaring that this measure recognizes the just debt of Virginia. The successful ballots for candidate for governor were taken.

A JOINT RESOLUTION proposing an amendment to the Constitution, prohibiting the sale and manufacture of intoxicating liquors, has been defeated in the Pennsylvania Senate.

THE New York Legislature balloted again for United States Senator on the 3d. The vote for successor to Mr. Conkling: Conkling, 34; Cornell, 29; Wheeler, 18; Rogers, 15; Jacobs, 59; not scattering. To succeed Mr. Platt: Platt, 30; Depew, 30; Cornell, 10; Miller, 8; Kernan, 59; scattering, 19. A motion to either case, and a resolution that the convention adjourn until noon on the 4th was adopted.

THE Virginia Readjuster Convention on the 3d nominated Colonel William E. Cameron, Mayor of Petersburg, for Governor; ex-United States Senator John T. Lewis for Lieutenant-Governor, and Captain Frank S. Blair for Attorney-General. Mr. Cameron made a speech of acceptance in the evening.

GENERAL GRANT and Captain Eads arrived at New Orleans on the 30 from Mexico. The ex-President stated to a special correspondent of the New York Times that his mission to Mexico had been highly successful. He got all the concessions he wanted, the only opposition being from subsidized railroads.

THE trial of the late Colonel Thomas A. Scott on the dictated provision for his family and relatives, but forbids the firing of an inventory of his property in any public office.

ADDISON BROWN, of New York, has been appointed by the President United States Judge for the Southern District of New York, vice Judge Choate, resigned.

GENERAL SHERIDAN on the 3d formally announced the resignation of lieutenant-Colonel Fred D. Grant as a member of the staff. It is understood that Colonel Grant will devote his time hereafter to railroad interests in Texas and Mexico.

Foreign.

IT is reported from St. Petersburg that Socialistic plots in all the chief cities of Europe are to be watched by agents sent out from Russia for that special duty.

A BERLIN dispatch of the 31st ult. says Bismarck was confined to his bed by inflammation of the bone-tissues of the knee.

IN the 1st Lord-Lieut. Dufferin, an American horse, won the Eglinton Plate, being nearly $2,500.00 to the pocket of his owner. The crowd was immense, among the events to be the Prince and Princess of Wales, the Princess Louise, the Duke and Duchess of Connaught, and the Duke of Manchester. Iroquois is the first horse from America who ever won a derby race. It is stated that he will soon be a prime favorite for the Ascot and Goodwood page.

SOME Land Leaguers at Killay, Ireland, have been imprisoned for mutilating cattle. Their lordships ordered in some evictions at Hoolyke, Ireland, on the 23, and were fired upon from behind fences. They captured a house filled with armed men, and captured 15 prisoners. One farmer was killed by a shot from the house and a police and several others were injured. On the same day, another farmer was killed by a shot from a window. Several persons were injured. Two carts loads will be facilitated by having these men out of office. Many more arrests have occurred since, and Litter, his deputy, was deposed forthwith.

A GLASGOW (Scotland) dispatch of the 31 states that nearly all the cases of cholera recently arrived from Boston by the steamer Pandosian were found to be affected with the foot and mouth disease.

ON the 31, during artillery practice at Gravesend, Kent, a three inches gun burst, killing three and wounding nine. The accident occurred through the bursting of a shell.

THE cashier and three clerks of a commercial house in Paris were imprisoned on the 31 ult. for the embezzlement of 2,500,000 francs.

PETROLEUM has been struck on a farm near Sarnia, Ont., at a depth of six hundred feet.

ARCHBISHOP CROKE has appealed to Gladstone to put a stop to evictions in Ireland.

HIGH streams of ice were flowing down the northern end of Lake Ontario on the 3d.

THE census recently taken in London shows a population of 3,834,371.

A STEAMER of three and one-half years' steam certificate and the loss of his civil rights has been granted to Jean Louis Le Goarnic, the anti-Jewish rioter at Rieff, Russia, and all the other accomplices have also received extended terms.

COUNT VON BULLENBERG, formerly German Minister of the Netherlands, died at Schleswig on the 31.

IT is stated that a body of 1,500 shooting weavers at Chemnitz is preparing to emigrate to the United States.

A VIENNA dispatch of the 30 says Prince Milan, of Servia, had decided to assume the rank and title of King.

THE Victoria Cross Medal issued a proclamation on the 31 commanding the unlawful assemblages at New York to disperse by force. A flying column which left Fort Erie, Ontario, found a bridge destroyed, but kept on the way and made extensive destruction of the lumber interests of the Pelee Islands in it.

ON the night of the 31 a Roman forty years of age was found lying near the Campo Santo cemetery, at the suburb of Monteverde. A paper lying beside her indicated that she had taken poison. Being still alive, she was brought to the city. Letters in her pocket give the name of Anna M. Wing, and show that she was but lately from Carlisle, Pa.

LATE on the night of the 31st ult. Robert McTaggart, a servant at Bliss, Bisset & Co.'s tea-mill at East Smithfield, was thrown from a top-story to into a large dust-bin, cutting his left leg and causing death in an hour.

WILLIAM TINNER was recently drowned in the river Washington, while bathing. His body was recovered on the 1st.

AT Mankato, on the 31st ult. James W. Pope was drowned while at work at the Pelican sluice in it.

AN explosion of new stock will soon notify Sam Mahlings is afraid by the fact that four of his bulls, purchased at the sale of the Duke of Oxford, had all taken first Victor in the Shorthorn Herd Book, and all returned a few days ago, on account of their low state of condition.

A CANOE of square timber is being prepared at Peabody for a vessel which will soon arrive and take it direct to England.

HERR BAKER, secretary of the Auditor General's office, and Mort Curran, a barber, were up for alleged assault on the other day, when a charge by reporters in Curran's hands and Baker's face. Assaulting Baker in the afternoon, inflicting a dangerous wound.

A few nights ago burglars broke into three of the saloons and a store at Wyandotte, and Custer, Barry County, and secured about $200 in cash. Three local lawyers, Hiram Walch, a farmer, and others. They were the same parties who recently committed burglaries in Kalamazoo.

THE house of U. T. Peck, the United States Express Company agent at Morley, Mecosta County, was entered by burglars on the night of the 31st ult. and robbed of an express package of money. Peck and Postmaster Sanford were found to be silenced with the foot and mouth disease.

ON the 31, during artillery practice at Gravesend, Kent, a three inches gun burst, killing three and wounding nine. The accident occurred through the bursting of a shell.

THE cashier and three clerks of a commercial house in Paris were imprisoned on the 31 ult. for the embezzlement of 2,500,000 francs.

PETROLEUM has been struck on a farm near Sarnia, Ont., at a depth of six hundred feet.

ARCHBISHOP CROKE has appealed to Gladstone to put a stop to evictions in Ireland.

A flying column which left Fort Erie, Ontario, found a bridge destroyed, but kept on the way and made extensive destruction of the lumber interests of the Pelee Islands in it.

MICHIGAN STATE NEWS.

HOUSE APPORTIONMENT.

THE House has passed its substitute for the Senate "bill to apportion anew the Representatives among the several counties and districts of this State." The ratio is fixed at 19,000 inhabitants for each representative, being one one-hundredth part of the entire population of the State, according to the census returns. As required by the Constitution, a Representative is assigned to each county having more than half of the above ratio, as nearly as may be without increasing the total number above 100, and the counties having less than half that ratio are grouped together, there being ten districts thus constituted:

	Pops.	Repr.
Counties.	Allow.	Senators.
Bayne	49,504	2
Saginaw	53,843	2
St. Clair	40,187	2
Lapeer	19,762	1
Sanilac	28,474	1
Huron	29,011	1
Tuscola	29,483	1
Genesee	50,710	2
Lenawee	31,221	2
Monroe	30,439	2
Hillsdale	30,130	2
Branch	28,867	2
Jackson	47,851	2
Calhoun	43,601	2
Ingham	30,118	2
Livingston	20,178	1
Washtenaw	34,629	2
Wayne	116,342	4
Monroe	19,333	1
Oakland	41,937	2
Macomb	24,233	1
Lenawee	30,441

Charlevoix Sentinel.

CHARLEVOIX, JUNE 14, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Norwood Notes.

—L. A. Bailey, who has been clerking in the store with Bennett for the past year, has gone to Ohio.

—Mr. Russell, of Detroit, G. W. C. T., will lecture on temperance at this place on Wednesday evening, June 15.

—Wm. E. Brown, who was killed at Stanton Bay last week, was brought here for burial on Tuesday last. Services were conducted by Rev. S. S. Brumfield, of Elk Rapids. The deceased had many warm friends here, who regret his sudden death. He leaves a wife and one child, adopted.

—Robert Chamberlain, of Detroit, son of Dr. Chamberlain, arrived in town on Friday last with a bran new bride. They will remain here a few days for the benefit of their father, the doctor. By the way, this is a first-class place for newly married people to spend their honey moon; all is quiet, serene and beautiful, and nothing to molest or make them afraid.

PETOSKY ANX.

Blessings From Hayes—By Gin.

—Rye strawberries.

—Frost three mornings last week, but no material damage done.

—Rev. James Boyd started for Winnipeg last Tuesday, where he will follow his avocation.

—Dr. F. McBrearty, of Grand Rapids, visited Hayes last Tuesday, looking after some of his patients. He makes bimonthly visits to this region of country.

—Mr. Wharton's mail has passed through town on Thursday, in search of a "where of nothacker." He was arrested in a new fangled Detroit stinger, and all the objection we had to it, their was too much vacuous in the motive part.

—Those persons who cut on all night last Saturday, the 11th, saw the total eclipse of the moon. The eclipse began 10:37 p. m., total at 12:05 a. m., and ended at 3:45 a. m., just as the dawn of day was visible. You will be the last total eclipse visible to us until 1885.

—The next road in District No. 1 should have the immediate attention of the highway commissioner. The law makes him the special overseer of the state road. There is an accumulation of three years' taxes laying in the treasury, and a portion of that road almost impassable at times. There is a move made somewhere that needs immediate tightening up.

A Few of His Quarrels.

Among the many reasons demanding Mr. Conkling's defeat is his violent and vindictive temper, which keeps him at enmity with more than half of the prominent men of the Republican party. Just look over the list. Mr. Conkling for years did not speak with Charles Sumner; he parted with Seward; he quarreled and broke relations with Pennsylvania; he was on ill terms with Treasbull; he was a mortal enemy of Grimes; he held no intercourse with Schurz; he openly quarreled with Edwin Washburne, and refused to speak to his two brothers. He broke with Bristow, and violently abused Attorney-General Hoar, and acted in Grant's interest out of Grant's cabinet and keeping him off the supreme bench. He quarreled violently with Zach Chandler, and for some reason longed to make it up. There are a few of the notable enemies that are scattered along Mr. Garfield's general pathway in life. At present he holds no intercourse with John Sherman; he openly broke with Gen. Hawley; is a vindictive enemy of George F. Hoar; quarreled with Gen. Burnside twice; will not speak to Furay, of Michigan; refused to speak to Senator Windom because he voted to confirm Merritt, and treated Senator Kirkwood the same way. Both these gentlemen have since improved their offense by going into Garfield's cabinet. We mention the Mississippi enemy with Mr. Hinton only to remark that in the sorrowful thistle of Mr. Conkling's life pleasure the memory of war has a sweet and distinguished company.—*New York Tribune.*

Two duels took in the New York Legislature on the question of the election of Senators by unanimous balloting and his many friends congratulate Depew that he is not one who is the choice of the Republicans to succeed Conkling. The defeat of the latter and his methods is certain.

Money to loan on good farm security at lowest rates in Northern Michigan. Apply in person or address, W. S. Mason, Loan Agent, Mancelona, Antrim Co., Mich. (12-6m)

There are engaged in the commerce of the lakes 2,607 vessels, with a registered tonnage of 557,376.

For Sale

A second hand threshing machine, with ten horse power, in excellent condition; to save cartage. Part cash. Call soon at Charlevoix Livery Stable.

J. MILO EATON.

For distinct lead for painting dwellings in two shades of drab go to Carpenter & Bartholomew's. A neat thing.

Marble Halters.

The tobacconist Evening Star, which left here last Monday Easter holes for Chicago, returned yesterday. Quick trip. —New in Port—Skiles' Home Bank, Evening Star, La Petite, Wolfsohn, City of Wooddock, Von Platten; snow Blanche.

The following are the clearances from the port of Charlevoix for the week ending to-day:

[Illegible]

To My Patrons.

We desire to thank our customers for their past patronage, and will do our best to merit their favors in the future. We have recently had increased facilities, and would call especial attention to our full and complete line of groceries. We will keep constantly in a year, and all fresh stock is warranted to give satisfaction, and sold cheap for cash.

E. W. CROSSETT.

CALIFORNIA'S wheat crop for this year is estimated at 19,000,000 bushels, against 54,000,000 bushels last year.

MISCELLANEOUS.

A FEW GOOD REASONS WHY EVERY LADY SHOULD BUY THE Broadhead Dress Fabrics, Mourning Cloths, Cassets Flue Armures and Alpacas.

For Sale or Rent.

Have sold in town to Carpenter & Bartholomew's.

For Sale.

Several second-hand light harnesses, cheap for cash. J. MILO EATON.

Dr. W. P. Conner, Assistant Dentist, University of Philadelphia, Pa., has 8 years of practical experience. Will be at Fountain City House, Charlevoix, all summer. Those desiring to have their teeth put in sanitary shape by a first class dentist will call at the above place immediately and secure his services. Teeth extracted without pain by latest approved methods. Elegant gold fillings a specialty. Prices reasonable. Examination of mouth and teeth, gold, silver, rubber, cohesive and non-cohesive gum pieces to order. All other work promptly executed. Teeth made while waiting. Terms remarkable, and no charge to responsible parties until guaranteed that all work is satisfactory.

For Sale.

A good, second-hand pony four-wheeled Cart or Buckboard. Call on the undersigned.

J. MILO EATON.

The Charlevoix receives today from Elmira another nine feet of Milliken's goods.

My Two Gray Foxes.

Not long ago, writes a Virginia lady, my husband went for hunting, and met with a den of wee little fox babies, at the most three days old, which he brought home cradled in his silk pocket-handkerchief. This caused an utter consternation, for what could be done with such tiny little things? I happened to put them into the rocking-chair, and called my kitty that had one little baiin of her own. Pussy looked at them in amazement, and the little things crowded against her. She commenced nursing them at once, so that her own little fit divided its nourishment with its little brother and sister-fox, to the astonishment of every one. They grew and thrived in my rocking-chair, so that I had no more occasion to fit as my own for at least three months, for they all took possession—Kitty, kit and the house. They soon began to be very playful and cut up all kinds of little capers, and began readily to answer to their names. They were so much alike that I could not distinguish one from the other, save by the colored ribbons on their necks. Romeo was scarlet. Juliet bluish.

They became my little companions and friends. When I walked out they would be on each side of my dress, and never offered to desert me. One day I went some distance to see a neighbor, and the broom grass being very high crossing the field, I felt very much afraid of losing them, but they stuck close to me. At this time they were some six months old.

One morning Juliet came home with one of her hind legs broken. I took her up in my lap, examined carefully for bones, and found that the leg was broken. It immediately. She was perfectly quiet, and never offered to prevent me from binding up her leg, and was not even timid. At night they slept on the porch with few or no sounds, but were in a very fond of them—a curious sight to see prowl, the hounds and the foxes, all cuddled up together. Then, as soon as the house-door was opened, Romeo and Juliet would rise upstairs to my room and jump on the bed. Romeo would purr in my face and creep down so still as not to wake, but Juliet was much more shy. She would jump on the bed, run around and jump off again. Romeo would remain in bed until breakfast time. Then they would take their station with their forepaws in my lap, waiting for any little bits that I would give to them. They were very fond of anything boiled, and a preference for eggs.

They were exactly like two cats about the house, and quite as much trouble. Strange to say, they were never known to rob the hen-house or take a chicken of any kind. My husband and I became very fond of them, but they did not like strangers. They were perfectly free—never were tied or confined in any way. I had not one objection to them—that was their fox odor. Out of our eight Virginia fox-hunting hounds, Major Thornton, came home to spend the night. The Major admired the foxes amazingly, but the little animals did not take at all to the Major. The Major they snapped and snarled at his shins in such an impressive manner that he became quite afraid of them and said:

"Pray, madam, do take them away."

I think they must have had an instinct that the Major had brought many of their species to grief.

Shortly after this, to our great sorrow, Romeo and Juliet met their fate. They were then fourteen months old, and began to wander too far from home. They were mistaken for wild foxes and hunted down. It was not discovered, that they were pets, and that the hunters saw the ribbons upon their necks. Romeo was killed by a strange pack of hounds. Romeo and Juliet were both affectionate and grateful little animals. I could have retained them until now by keeping them in captivity, but I would rather not have done, however, for I think it most cruel to confine any animal, and very selfish too, for one's own pleasure, to deprive foolish poor little animals. I am sure all such pets fret more than any person is aware of.

Louise Michel, the French Communist.

I had an interesting interview with Louise Michel yesterday. You will recollect her as the leading spirit of the petroleuses, the women who threw petroleum on the public buildings and set fire to the Palace of Justice, the Hotel of the Legion of Honor, the Hotel de Ville, etc. It was Louise Michel who headed off, it is said, the Hotel de Ville's conflagration. She returned on the 15th of September last from New Caledonia, the French penal colony, having been amnestied by the Government. She is now engaged in furthering the cause of "social reform" and agitating "social revolution." I called on her writes each week several editorials and poems (for Louise is also a poetess) for her journal—*La Revolution Sociale*. She also contributes to other Parisian journals. She is a philosopher, and devotes from three to five o'clock each afternoon to receiving the poor, the working classes and hearing what they have to tell about their troubles and distress which she tries to alleviate when possible. She is a woman of very ordinary appearance as regards dress and manner, about forty to forty-two years of age, of medium height, very strongly-built, with hair which hangs in a frizzled sort of way about her ears and forehead. Her face is not handsome, in fact, is the reverse. But her eyes have a remarkable look and when she is talking with you she looks you straight in the eyes, with a very frank and earnest expression.

She has a romance, so they say. A schoolmistress upon the heights of Montmartre, she owned a cat, prior to the war of 1870, a nice little home and school-house. This cat disappeared, took from her as a war measure, the property being required for some purpose in connection with the defense of Paris. They paid her only a small part of its true value. She felt very bitter towards the French Government on this account. This bitterness was greatly increased by the killing of her lover, who was sent by the Government troops during the early days of the Commune, he being a leader on the side of the communists. Then she became immediately the unrelenting foe of the Government and the chief leader of the women who did all they could to destroy and ruin Paris by fire and otherwise.

MISCELLANEOUS.

—Six million lager-beer glasses were sold in this country last year.

—Mayor Grace, of New York, was once employed as a waiter in one of the city restaurants.

—Caste is duly recognized among criminals. Forgers, bank robbers and murderers (when out of the vulgar) spurn him "upper crust."

—Mr. Isaac H. Cary, an old Boston merchant, who died the other day, left the first person to engage in the sale of Yankee notions as a distinct branch of trade.

—The largest clock ever drawn by an American, probably, was that of Jay Gould in favor of Tom Scott, April 11, for $2,400,000 on the Fourth National bank of New York.

—There is at Pendleton, near Penzance, in Cornwall, England, a camellia japonica tree growing outdoors which is fifty-seven feet in circumference and fifteen feet high. It is of the rare anemone flowered variety.

—The *Caribbean Indies*, of Atlanta, Ga., is printed from type made out of bullets, with which the ground about that city is strewn for miles. It says: "They are all aimed at human hearts, but not to injure but to bless, to bring out health but life."

—The medical faculty of Vienna have been studying a young man who wears his heart on his right side, his liver on his left, and in other respects has the usual arrangement of the internal human organism completely reversed. He is strong and healthy.

—While two men were digging a drain near Limerick, county Clare, Ireland, they came upon a hollow tree containing a number of stones, lying on which was a large sword. The box was found to be full of gold coins of ancient date. On the sword was engraved the word "O'Neill."

—Logwood was first introduced into England in the reign of Queen Elizabeth, but as the dyers of that time only produced a fugitive color from it its use was forbidden by law, and it was ordered to be burned wherever found. Chewing logwood was then a breach of the peace. The senior partner of the firm was making up the day's account when the junior partner entered the private office and exclaimed: "Look here, Smith, calls, "it's a new bonnet." "Heaven! do they call like that? Why we've killed a dozen in making it, and before—it was too late?" "It would have made no difference; this is one of the original railroad track which was laid in Meridan some forty years ago. It consist of a thin strip of iron spiked on heavy timbers laid on the much heavier stringers that support the rails, and is a curious relic of early railroad building.

—Mr. Mackey has given his wife the dress which the French Indian Company were manufacturing for the exposure when Bismarck's little game shut up the Fisheries. It is pronounced by the learned in lace the un plus ultra in Point d'Alencon. Seven different stitches are employed, some of which were only discovered by enravelling a lace flounce which once belonged to Mme. de Pompadour.

—The little son of Mrs. Jackson Wilson, at Wrightsville, Ga., fell into a deep well. She soon decided that the only way to save her child from drowning would be for her to go down into the well. With a stout heart she summoned all her courage, and by the aid of the little steps which were dug in the walls of the well she quickly descended and snatched her precious child, almost drowned, from a watery grave. She managed by the same means to ascend with the child in her arms, and thus saved her darling boy from an awful death.

—Mrs Anderson, of Cincinnati, declared to become suddenly rich. She consulted Miss Lee, a negro clairvoyant, who assured her that the fortune could be gained in a few weeks if she was willing to pay $200 down. Mrs. Anderson joyously paid the money and waited a month. Then she was informed that ninety dollars more would bring the prize. Lais sum she also paid without inquiry as to the conditions source of the expected wealth or why she was to receive it. The third demand for money, however, opened her eyes, and she had the swindler arrested.

—During the prorogation of Parliament a friend of Lord Beaconsfield, then Mr. Disraeli, passed the latter's house and saw that the blinds were up and the owner evidently at home. "What! thought you would be abroad" he said as he entered; "all London is out of town. How is it you are here?" "Oh, the countess is ill. I cannot leave her and she cannot go with me." "What are you doing with your time? What have you been reading?" "Ah, for the last week I have been reading a great mysterious book I have never read before, although I have heard so much of it." "And what book is that?" "The East End of London. For the last few days I have had a cab at the door, and I have spent the day in walking about through the darkest slums of the East End of London. That is the great book I have been reading." The sense of the gathering multitudes and overwhelming crowds appeared to have oppressed him; and yet he did nothing by any measure to attempt to relieve—nay, the great actions of his life all tended to plunge him still deeper into wretchedness and misery.

A Cannon to Shoot Ten Miles.

The making of the patterns for the Lyman-Haskell accelerating or multi-charge gun, at the Scott Foundry of the Reading Iron Works, was begun last morning. The gun will be twenty-five feet long and have a bore of nine inches diameter. Along the bore four pockets will be located, in each of which a charge of powder will be placed, with the view of accelerating the speed of the ball after it leaves the chamber of the gun and during its progress through the bore. Experts who have seen the drawings and have given the subject of the manufacture of heavy ordnance a study have expressed the opinion that the gun will throw a ball a distance of ten to twelve miles, whereas five miles is a good range for the best cannon. The charge of powder will be 130 pounds and the weight of shot 150 pounds. It is calculated that a shot from the gun will penetrate through two feet of solid wrought iron.—*Reading (Pa.) Eagle.*

A Spring Bonnet Against the Missionaries.

He was lately married, and had no much idea of what an article of a woman's dress cost than an elephant has of a humming bird; so when his young wife gently hinted one morning that she must have a new spring bonnet he looked pleased, and blandly told her to do something nice and have the bill sent around to the store, and he gave her a good-bye kiss and said he wanted his little wife to look as well as the rest, and went off humming a Sunday-school air. He had been a missionary meeting the night before, and, pleased with the sermon, had promised a liberal donation to the collecting agent when he called, as he had announced he would on that day, as he took twenty-five dollars and inclosed it in an envelope, with "From a friend" on the outside, and then tucked five dollars into his vest pocket to pay for his wife's bonnet. "I don't suppose it will cost more than half of that," Mr. Mills says he said to himself, but was startled to get up one of those stories that our reason could believe.—*Lowell Citizen.*

"Beautiful effects," says a fashion journal, "are produced by the combinations of color in the mantel-cloths, lambrequins, pictures and other articles of plush drapery shown by leading dealers." Beautiful effects in pocket-books are also produced by using any of these things.

A husband who lately went to execute a few little commissions for his wife gives it as his experience that there are two kinds of women. One kind when sewing-silk so exactly alike that no male eye can tell the difference and a wrong shade never comes into a piece of dress, and no pie in the house for a week.

Grandfather's Kitchen.

The following description of the room in which our great-grandfathers lived is read to some old ones, and the echoes of his boyhood:

Grandfather's kitchen was a somber room, ceiled and painted brown, with huge beams, high dressers and yawning fireplace. It had only one window of two lasses, one cupful of sour milk, and water sufficient to make a soft dough. Bake four cakes in the morning pan in Columbus. We commenced in 1858; the grapefruit was the institution of slavery and the cotton crop was 3,000,000 bales. In 1880 we raised 6,000,000 bales, and the 6,000,000 were owned by 6,000,000 people, and not down a man claimed to believe; moreover, that he had never owned a slave, and that he had never known anybody who had ever owned slaves, and we have agreed to let the matter drop right there. Now, I want to say a word to the boys and girls. I am the lowest of all men and don't claim to be the best successful man in the world, but I will say that I have attained public credit, and more especially private confidence, by always telling the truth. Don't tell lies, boys and girls, don't tell lies. Don't tell your mother you have been to school when you have been fishing or playing marbles. Don't tell your father you have been to church when you have been to the circus. Don't tell your teacher you have been sick when you have been playing ball. Don't tell your employer you have been to dinner when you have been to the saloon. Don't tell your wife you have been to the lecture when you have been to the theatre. Don't tell your husband you have been to prayer-meeting when you have been to the dance. Don't tell your children you have been to the Sunday-school when you have been to the picnic. Don't tell your pastor you have been to the concert when you have been to the ball. Don't tell your friends you have been to the party when you have been to the dance. Don't tell your customers you have been to the meeting when you have been to the billiard saloon. Don't tell your creditors you have been to the lecture when you have been to the horse-race. Don't tell your brother you have been to the prayer-meeting when you have been to the gambling-house. Don't tell your sister you have been to the Sunday-school when you have been to the beer-garden. Don't tell your cousin you have been to the church when you have been to the ball-room. Don't tell your aunt you have been to the Bible-class when you have been to the billiard saloon. Don't tell your uncle you have been to the Young Men's Christian Association when you have been to the theatre. Don't tell your grandmother you have been to the Sunday-school when you have been to the circus. Don't tell your grandfather you have been to the prayer-meeting when you have been to the dance. Don't tell your minister you have been to the Bible-class when you have been to the billiard saloon. Don't tell your mother

Charlevoix Sentinel.

CHARLEVOIX, JUNE 21, 1881.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

Jeff Davis' book thoroughly exposes his own littleness.

Activity in the Lumbia circles of the country continues.

The best way to reorganize the Democracy is to put up the platters.

The Republicans of New York owe it to the country to harmonize and unite the party in that state.

Millions of admirers of Gen Grant, the world over, will regret to learn that his wife is in very feeble health.

The currency of the country, coin and paper, now exceeds $1,300,000,000, or about $27 per capita of the population.

Advices from numerous quarters continue to reach the committee that the prospects of war reunion will be a great affair.

The Cincinnati *Commercial* calls the Chinese *Inter Ocean* an old swill-bucket and will probably keep its nose out of it hereafter.

The increase of railroad earnings the May on long-line roads is reported at $2,466,457. A strong proof of the healthy condition of travel.

A Chicago Journal correspondent at Washington sends word that Gen. Logan is distinctly in the field as Presidential candidate for 1884.

Belle Boyd, the rebel spy of the war, is now Mrs. Murphy, a resident of Wauwatosha, Texas, where she is writing a history of her spying.

General Longstreet is expected to get the Republicans and Independents of Georgia into line together, and the Bourbons are afraid he will.

The antislavery society of Brazil will have the sympathy of all lovers of freedom in their efforts to substitute instant for gradual emancipation.

There never was a more egregious abuse of the English language than that by which the Conkling men endeavor to monopolize the term "stalwart."

The Philadelphia *Press* says "Tariff is coming over, then, after all." She will not get it if she does. Even the motherly maiden, Reciprocity, didn't get it all.

The maritime association of New York city asks for the application of civil service reform rules in the appointment of officers for the New York customs office.

Great Britain rather expects to show us that she has even a bigger fool than she has yet sent us, and will forward the head antitaste, Oscar Wilde, to our shores.

The New York *Herald* doesn't believe there is any aristocracy in the army. No aristocracy! And yet, if there is any place where rank is insisted on it is in the army.

James McCann, of Bethel, N. Y., was so frightened for fear he would be killed by his horse's backing off a trestle that he died of fright, and the horse did not back from the bridge, either.

Mr. and Mrs. Elisha Sanford, of Plainsville, Ct., have just celebrated the sixtieth anniversary of their wedding, their family, on which death has made no demand in all those years, being present.

The Oberlin *News* very sensibly observes: "The best thing the friends of temperance and morality can do, in the way of a political move, is to unite in the support of the Republican party."

A cabinet-maker of Harrisburg burns his face with vitriol and on the strength of his misfortune sells for alms, which he generally gets quickly that he may at quickly take his republic face from sight.

A member of the legislative body who accepts money for the alleged purpose of exposing the transaction will always be looked upon with suspicion, and it will require much support to his word to convince any honest man that he is not a liar.

The thirteenth day of voting at Albany was nearly as barren of results as the first. Davies polled 55 votes, which were three votes than enough to control a caucus. His vote is slowly but steadily increasing and there are indications that it will continue to grow.

The Toronto *Globe* charges the Canadian government with having neglected to duly so strenuously as to insist the entrance of infectious diseases among Canadian cattle. It says that cattle brought from England during a time when foot-and-mouth disease was prevailing in almost every county of the kingdom, were conveyed the entire length of the intercolonial railway, from Halifax to Quebec, without undergoing the lawful quarantine. So the disease, it seems, is brought from England: but papers from that side of the Dominion have been charging it all up to the United States.

CONKLING.

Interview with a Confidential Friend of the Administration.

Why the Withdrawn Nominations of the Conkling Men Were Again Sent in.

The New York Senator Misled by Self-Conceit and Flattery.

I Issue Had Nothing to do with the Nomination of Robertson.

From the Chicago Tribune.

Washington, June 16, 1881.

I had a long and interesting talk this morning with a gentleman very high in the confidence of the Administration, that who understands the present situation of affairs better, perhaps, than any other man, besides the President and Secretary Blaine, in the United States. The conversation was of peculiar interest just at the present time, and I reproduce it immediately in full, as throwing peculiar light upon certain things not fully understood by the public in general.

I began by asking the gentleman if he had seen the recent interview with ex-President Hayes, in which he analyzed Conkling's character. He replied:

"I read it with much interest. It is the best and

MOST ACCURATE STATEMENT OF THE CASE that has been made. It comes from a man who has watched Conkling carefully for a long time, and who has had the best opportunity of watching him, from all points of the compass. I was talking with one of Mr. Conkling's fellow-Senators the other day, who put the case very similarly. He said that conkling was like the man he had recently seen at a lunatic asylum, who said: "That man over there is as crazy as he can be. He thinks he is Bismark. But I am King William, and I don't know him at all. I feel very sorry for him. He must feel very badly." Mr. Conkling was not past ed on the situation in New York. He supposed that everybody there considered him just as great a man as he considered himself. He imagined that he held the handle of the crank of the machine there, and when he turned, it would work to perfection. He would not tolerate any one about him who would tell him the exact situation. He encouraged

ONLY FLATTERERS.

He had done so for years. If any one told him that the people of a certain section of the State were getting down on his course, he would wither that man by the scorn of his countenance, and the unfortunate individual would never venture to approach him in that way again. He has conducted himself on the principal that any man who did not flatter him was a traitor to his machine. Of course, men very soon learned how to approach him, and those who did not feel like coming to him in that way kept away entirely. This being the situation, and Conkling's henchmen having told him how badly the President had treated him, he imagined that the moment he resigned, the whole State of New York would be in arms. He expected that great would be fired in all the principal towns in his behalf; that torch light processions would be organized, and banners would be carried through the streets with the inscription

"CONKLING AND CONKLING"

on them; that speeches would be made everywhere in his interest; that, when he should return to his state, he would be met everywhere by brass bands, which would play 'Hail to the Chief.' 'See, the Conquering Hero Comes'; and that ballads would be written in his behalf, and sung in every house in the Empire State. How horribly he was deceived in all that! His favorite expression is 'humiliation.' He constantly tells of people who are trying to 'humiliate' him. If ever a man 'humiliated' himself, Conkling is the man. He has gone to his native State, and indulged in all the work of bulldozing and personal solicitation. He has seen his followers one after another desert him and his last hope leave him. This is all the result of the one flaw in his character,—

THAT OF SELF-CONCEIT,

which has developed and rusted into his very life and whole being. It is like a great glider in an iron bridge that has a small flaw, so insignificant that it escapes the notice of the best mechanic, and is incorporated into the structure. The weather works upon the bridge for years and the water that soaks into the little flaw under the paint rusts it until it eats to the very heart, and finally there is a great crash, and an accident comes just when a great mass is put upon the bridge and no one knows what has caused it. The best architects and mechanics are confounded, and the whole thing is a mystery. The great superstructure, that is bent and twisted beyond all recognition seems to have been made of the best stuff and everybody considers it a chastening stroke of Providence that so many lives are lost. It was, however, wholly owing to the most natural and explainable cause in those causes could have been discovered."

"I notice that the Conkling men are very anxious to attribute this work to Blaine in very large part. Is there any foundation in these allegations?"

"NOT THE LEAST.

Mr Robertson is a good Republican, and a gentleman of high culture. He has been known by all factions in New York State for years, but of course could get no recognition from the Conkling crowd. Gen. Garfield decided early in the winter to give him some good office in the State,—either the Collectorship or something else. Mr. Blaine was not consulted, and knew nothing of the matter whatever, except perhaps in an incidental way. Gen. Merritt was desirous of going abroad. I have seen him since the nomination was made, and know that he is perfectly satisfied, and more than satisfied, with the change. He prefers the Consul-Generalship to London, to which he has been appointed. The office pays very well indeed. Some one figured what the Consul-Generalship pays, and he made it out to be about $18,000 per year, then. Badeau, who has had the place for some years, has become rich out of it, and no harm was done in removing him to a less lucrative place. This nomination of Judge Robertson was taken by Mr. Conkling as intended to humiliate him (Conkling), and then the music began. The country is now of the Judge in regard to who was humiliated, and why."

"There is another point in regard to this matter that I desire to inquire about; and that is why, after it was well known that war was to be made to the bill by Conkling, then Garfield should have sent in the names of

THE CONKLING MEN WHO HAD BEEN WITH-DRAWN.

I understand there has been a good deal of criticism of this action of the President and it would seem as though he had better have let Conkling and his men go after the skirmish had really opened."

"I understand that some people have not been able to understand that matter, and I am very glad you have brought it up. That re-nomination of those men was the wisest thing the Administration could possibly have done, and will be so understood in due time by everybody. It gave notice to everybody that they were not to be punished simply because they had been Conkling's friends. The Administration will appoint no man who talks against it,—says bad, harsh things about it,—and who is evilelently hostile to it; but the simple fact that a man has been friendly to Conkling

SHALL BE NO BAR TO PREFERMENT.

If the opposite course had been marked out, then every man who had been Conkling's friend would have been converted to him, and no hope of ever getting him to see things in the proper light could be entertained. Mr. Gould, who is the new collector at Buffalo, was talked with, and he said that he was tired of the machine. He saw its evils; he despised its tyranny; and, if there was any way out of it, he would be glad to escape. He is now a strong supporter of the Administration, and has directed Conkling entirely. Mr. McDougall, whose name was sent in as one of the United States Marshals, was known to be a strong Conkling adherent, but he felt much as Mr. Gould did. I took the trouble to talk with him myself, and tested him in every way to see whether he was sincere in his professions, and became confident that he was fully so. General Woodford is well known as a pure and upright gentleman. He has been a Conkling man, but is no less a Garfield man, and is now with the Administration in every particular. Payn, the other man whose name was sent in for Marshal, began to talk very loud in regard to the injustice of Robertson's nomination, and made some very bitter attacks on the Administration in general, and President Garfield in particular. No such man as that can expect to get anything, of course. The President does not exclude any person's hostility to Mr. Conkling, and certainly

DOES NOT FEEL UNFRIENDLY

those who have adhered to him. He will simply proceed in the even tenor of his way, as though no such men with a name as Conkling had ever been in existence."

"What is the opinion of the Administration in regard to Conkling's ability to get back to the Senate?"

"I do not know as the Administration has any opinion in regard to the matter. My own opinion is that he will not."

"What will be his course?"

"No one knows that. He is a stricken and a staver, and will fight it out as long as he has sufficient strength to make any showing."

"Do you think the present number of men will stick to him?"

"I do. I think they are so fully committed that nothing can turn them, for the present at least. It will be political death to all of them, however, and they know it. They can never be returned from their counties again. The people of New York are with the Administration. But, even if Conkling can go back since a prostrated fight, his prestige is all gone. He can never be the haughty, sneering senator from the Empire State again. No one will fear him, and no one ever will heed him. Five people in the next one under stand the feeling that is manifested in the Empire State. Administration have labeled all over Conkling's old district, and pass first in honor of the

EMANCIPATION PROCLAMATION

that has been accomplished. It is something truly remarkable. It would in as though the people of Rensselaer, Cleveland and Monroe should hold Conkling mass-meetings and denounce the President in every way. I believe people would think that something rather remarkable, and would feel that the President had been humiliated in rather a marked degree."

"What will Conkling do if he fails to be elected?"

"Oh! that is a question no one can answer, of course. He can return to his law-practice, I suppose, and sneer at his clients as they come and go. But he may not be out of politics yet. He never gives up so long as there is any hope."

"So far as you can observe, do you think the fight will hurt the Republican party to any great extent?"

"I am confident that it will

HELP THE PARTY IN THE LONG RUN.

People are getting remarkably tired of these rows. They see where it leads to. I believe that if the machine were in as perfect running order in Iowa as it has been in New York, it would make the former a Democratic state in five years. Everything about the machinery is warfare. Great men and statesmen give place to officeseekers and blackmen. There is a political revival raging in New York. Those who have become renovated are as happy as new converts at a religious revival. Of course there will be some kickers and scowlers, but the majority of them will disappear in a very short time."

CHARLEVOIX. : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

SEVERE frosts occurred on the night of the 8th in Sullivan County, N. Y., and at some points in Vermont, and ice was formed in the rivers in the vicinity, around St. John, N. B.

A FIRE for $14,849,000 was on the 7th given in the Pennsylvania Railroad Company's consolidated report, and the above includes only the Philadelphia, Wilmington & Baltimore lines, who reside locally in New England). Nearly $5,000,000 more would be distributed among stockholders in Philadelphia. The Wilmington, Md., will pass into the hands of the Pennsylvania July 1.

THERE were 122 cases of small-pox and sixty-three cases of typhoid fever in the New York hospitals on the 4th. Fifty-three new cases of small-pox and thirty-three cases of typhoid fever developed during the week.

MAYOR MEADE, of Cincinnati, has issued orders to fire parties of the city to attend no Sunday picnics at the hill-top resorts and public parks.

FATHER MAHONEY, of Erie, Pa., the alleged worker of miracles, has been arrested for obtaining money under false pretenses.

CAPTAIN ISAIE BOUTON, who had started on a filibustering expedition down the Mississippi River, arrived at Dubuque on the 7th, eight days from St. Paul, Minn.

THE aggregate loss for the Census Bureau being nearly exhausted, Secretary Kirkwood, acting on the suggestion of Superintendent Walker, on the 7th addressed a letter to the clerks employed in the Bureau, informing them that their places will close with the 31st, but that they will have the option of the following day, except when the succeeding day is Sunday, in which case the adjournment shall be until the following Monday.

GENERAL GRANT arrived at St. Louis on the 7th from New Orleans.

MR. MARY B. NASH, of Dubuque, who was nominated by the Iowa Greenback State Convention for the position of State Superintendent of Public Instruction, has declined the nomination.

THE Ohio Republican State Convention was held at Cleveland on the 8th. Senator John Sherman was elected permanent President, and Governor Foster was renominated by acclamation. STATE Treasurer Dorsey and Attorney-General Neal were renominated in the same manner. J. H. Richards, of Jefferson County, was nominated for Judge of the Supreme Court. Nicholas Longworth, of Cincinnati, for Judge of the Supreme Court. The resolutions adopted declare that the Republicans of Ohio "heartily approve and indorse the administration of James A. Garfield;" and pledge to him cordial support in all the duties devolving upon him as the Chief Executive of the nation. The platform also declares that the wise policy of the Republican party in the past will be continued in America labor and in discriminating in favor of home protection.

SECRETARY HUNT has accepted the resignation of Commodore Jeffers as Chief of the Bureau of Yards and Docks of the United States Navy Department, to take effect June 30.

A SWITCHMAN succeeded ballot for United States Senator was taken in the New York Legislature on the 9th. For successor to Mr. Conkling, Jacobs had 40; Conkling, Mr. Conkling, 25; Cornell, 26; Bagley, 14; Lapham, 9; scattering, 8. For successor to Mr. Kernan, Daniel Dugro, 3; Kernan, 29; Cornell, 8; scattering, 15. In the Assembly Mr. Bradley stated that he had received a letter by this time if he would vote for Mr. Depew for United States Senator, instead of Mr. Platt, which would be handed to the speaker. He asked for a Committee of Investigation. The speaker appointed the Committee on Privileges. A resolution for a Committee of Investigation was unanimously adopted, and the committee were instructed to extend the inquiry to all other cases of alleged bribery. The committee were given the meeting in the evening, and Bradley stated before them that he had received the money by Senator Jacobs, and detailed the circumstances of the alleged bribe-giving. Mr. Sessions, of the Cornwall line, denied Bradley's story emphatically in every essential particular, claiming that the money or other consideration had been given by him to Bradley. Mr. R.'s vote, but that the latter had announced his intention of voting for Mr. Depew because his constituents were generally in favor of his so doing.

THE Legislature of Pennsylvania adjourned sine die on the 9th, after a session lasting 102 days. The State Treasurer reported to pay anything above $1,000, mileage and stationery, and the members are reported to have received in addition to mileage proceedings to recover $125,000 more than they are officially entitled.

THE Republican State Executive committee of Virginia met at Richmond on the 9th and adopted a resolution requesting the calling of a convention of representatives of the Republican party in the State to consult as to the proper course to be pursued by the party in the coming campaign, and for such other action as may be conducive to the future welfare of the party in the State. A committee was also adopted requesting that the Republican State Central Committee meet on the 26th to decide on the matter of calling a convention.

THE Michigan Legislature adjourned sine die on the 9th.

AT the special election held in the Second (Charleston) Congressional District of South Carolina on the 8th, to fill the vacancy caused by the death of Congressman M. P. O'Connor, Daniel Dibble, Democrat, was elected over Greenville Norris. The latter also ran and passed fatal influence. A large number of houses and barns were struck by lightning in Solomon City and Minneapolis, a distance of twenty miles or more, were blown down.

THE village of Seven Star Springs, in Berry County, Mo., was nearly annihilated on the evening of the 9th by the bursting of a water-spout. No lives were lost, but there were several narrow escapes.

ON the 9th a barn in Clark County, Mo., a party of cherry pickers took refuge in an abandoned building. Lightning struck the chimney and J. Otis, his daughter and F. Bynall were instantly killed. Four or five others were injured, some of them fatally.

A BUFFALO magician who was ejected from his filthy room was found to have had concealed upon his person $4,000 in gold and silver.

THE Illinois Board of Agriculture states that fifty per cent. of the fall wheat in the Northern Grand Division of the State has been plowed up, forty-five per cent. in the Central Division and sixteen in the southern, and the portion remaining gives bad indications of only about half an average yield.

THE Iowa saloon-keepers of New York have joined hands with the striking brewers by refusing to purchase soda beer.

TWENTY-SEVEN men were more or less injured by the explosion of a boiler in the iron-works at Pottsville, Pa., on the 10th. Four of the number were fatally injured.

THE Elm Commissioners left Los Pinos Agency on the 9th, with a strong escort of cavalry and infantry, for Grand River to select lands for a new Ute reservation.

WILLIAM BRAGG, who was recently arrested at Nashville for robbing the tiverrament Paymaster at Mound Station, on the Tennessee River, has been fully identified as one of the party who took $60,000 in gold from a train at Glendale, Mo., two years ago.

A NEW York dispatch of the 10th says that Baroness Rosa had learned that the plot to change the town hall at Liverpool was only a blind for the skirmish. She also claimed that last December he received information that explosive materials had been placed in the hold of the British war-ship Dukes.

THE St. Paul Railway elevator at Faribault, Minn., was destroyed by fire on the 10th, with 30,000 bushels of wheat.

FOUR members of a Hopi County (Ky.) band of revivalists have been sent to the Penitentiary for whipping a country group because he charged too much for his goods.

Personal and Political.

IN the New York Legislature, in joint session on the 7th, rules offered by Mr. Woodin to govern the proceedings of the Joint Convention were adopted, providing for the appointment each day, except Sunday, at noon, until the election of two Senators, with the necessary number of voting vacancies, or until the first adjournment of the Legislature; and providing that a ballot for the election of Regents of the University of the following day, except when the succeeding day is Sunday, in which case the adjournment shall be until the following Monday.

GENERAL GRANT arrived at St. Louis on the 7th from New Orleans.

MR. MARY B. NASH, of Dubuque, who was nominated by the Iowa Greenback State Convention for the position of State Superintendent of Public Instruction, has declined the nomination.

THE Ohio Republican State Convention was held at Cleveland on the 8th. Senator John Sherman was elected permanent President, and Governor Foster was renominated by acclamation. STATE Treasurer Dorsey and Attorney-General Neal were renominated in the same manner. J. H. Richards, of Jefferson County, was nominated for Judge of the Supreme Court. Nicholas Longworth, of Cincinnati, for Judge of the Supreme Court. The resolutions adopted declare that the Republicans of Ohio "heartily approve and indorse the administration of James A. Garfield;" and pledge to him cordial support in all the duties devolving upon him as the Chief Executive of the nation. The platform also declares that the wise policy of the Republican party in the past will be continued in America labor and in discriminating in favor of home protection.

SECRETARY HUNT has accepted the resignation of Commodore Jeffers as Chief of the Bureau of Yards and Docks of the United States Navy Department, to take effect June 30.

A SWITCHMAN succeeded ballot for United States Senator was taken in the New York Legislature on the 9th. Drowning of a Mother and Five Children in a Flood.

WHEELING, W. VA., June 8

Early this morning this section of the State was visited by a most terrific and destructive storm of rain and hail, accompanied with thunder and lightning. The water came down in torrents. The narrow mountain streams in the vicinity of Wheeling rose rapidly, and were soon transformed from babbling brooks to raging torrents. Along the National Road bridges were swept away, fences immolated and crops destroyed. At Glen's Run, four miles above Wheeling, an appalling loss of life occurred, an entire family of seven being swept away by the flood. The run is a mountain stream which empties into the Ohio River, and although the rain fell here in torrents, it was not considered in comparison of the whole. In order to get to the residence of the unfortunate family it is necessary to cross the run on a bridge. A number of persons had collected on the bridge to witness the force of the flood, when the family coming down the road in their wagon, attempted to cross the bridge. The current was so strong that the bridge was carried away, and the wagon, containing the family, was precipitated into the stream. The father succeeded in reaching the shore, but his wife and five children were drowned. The bodies of the victims have been recovered, with the exception of one child, and are terribly mangled. The father is almost crazed with grief at the loss of his family. The damage done to property in the vicinity of Wheeling will amount to many thousands of dollars. Many bridges were carried away, and the loss to farmers in the valleys will be heavy.

A Chinese Wedding in San Francisco.

People on the verge of matrimony, and anxious to find some striking novelty in the way of a wedding, should by all means be aided by studying the account of a marriage recently celebrated in San Francisco. The bride was a Chinese girl, and the groom one of the Chinese aristocracy of the city, were the high contracting parties. The ceremony took place at the house of the bride's parents, and was performed by the Rev. Otis Gibson, a missionary of the Methodist Episcopal persuasion. For the groom and the clergyman the ceremony was simple enough, but for the bride and her parents it was a most elaborate affair. The bride was dressed in a gorgeous costume of red silk, and was literally covered with jewelry. Her head-dress was a marvel of ingenuity, and was composed of a profusion of pearls, diamonds and other precious stones. The groom was dressed in the usual costume of a Chinese gentleman, and was attended by a number of friends, who were also richly dressed. The ceremony was performed in the parlor of the house, which was handsomely decorated with flowers. The bride's parents stood on the left of the room, and it was immediately behind them that the bride and groom took their stand. The ceremony was performed in the English language, but that had been left entirely to the clergyman, for neither the bride nor groom understood a word of it. The bride's parents, however, understood it perfectly, and were able to follow it with the closest attention. As the ceremony progressed, the bride's mother, who was standing behind her daughter, began to weep, and when the latter received the wedding ring from the hands of the groom, the mother's grief broke forth in loud lamentations, which continued throughout the remainder of the ceremony. The bride herself was perfectly composed, and showed no signs of emotion. The ceremony was performed in the presence of about fifty persons, who were invited to witness it. After the ceremony was concluded the bride's mother continued her lamentations, and refused to be comforted. The bridegroom is a native of China, and is said to be a man of wealth. He is a member of the firm of Quong Tuck & Co., which is one of the largest importing houses in San Francisco.

A Mother's Devotion.

A very peculiar case of a mother's devotion to her son is the result of a recent fire in Ogle. About eighteen years ago a family named Harrington moved to Portsmouth, Illinois, and lived there three years, when they sold their town of the widow Harrington and her two children, and started for Ogle. On the way they stopped at Mount Morris, and it was immediately discovered that the boy became insane, and was sent to the asylum at Elgin. The mother refused to let him be taken from her, but remained with him, where she has since lived. The insane boy was allowed the freedom of the asylum grounds, and was especially delighted to watch the engine and hose which were kept in the engine house. Last night the fire broke out, and

Charlevoix Sentinel.

CHARLEVOIX, JUNE 21, 1881.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

—Walking match, 50 miles, pleasure, Jamm, June 10, in a tent, in a circle, 1-16 c. mile. Contestants, five: Miller, Daniel Gallagher, Wm. Boyle, Marcus Benner. Work began at 7 p. m. Benner walked until 8 a. m. next day; Boyle at 2:30 a. m. next morning; Geo. Millward Gallagher walked at 12 noon and retired; Richard Gibson & Geo. Miller, 50 miles 242 rds, 21 hours; B. Gallagher, 50 miles 53 yds, same hours; Benner, 48 miles, 1100 rds; Boyle, 48 miles 127 rds. First prize, $25; 2nd, $15.

—From the *Liberty Herald* we learn that in the recent fire in Cheboygan the whole South Bay mill burned, together with 3,000,000 feet of lumber; in trying to save the large piles of choice lumber belonging to Mr. Waterman, upwards of 500,000 feet was thrown into the river, thinking if in such an easy at that to logs or timber could pass up or down, where the water is not back. The loss is about $127,000, of which the greater part falls on Senator Ferry, they having lent in addition to their mill and buildings, a large pile of lath and 2,000,000 feet of the lumber. Mr. Waterman loses 400,000 feet of choice lumber. No insurance.

—The *Traverse Magnet* says: A camp meeting will commence at Kalkaska, on the 27th inst., and from that day till July 2, the G. R. & I. Company will sell tickets from all stations to Kalkaska and return for two cents a mile each way, tickets good for return till July 10. The fare from the people to Kalkaska and return will be $3.25, and as some of the finest timber in Northern Michigan are in the Kalkaska region, it affords a good opportunity to get fishing, as well as to camp meeting. Well, this sentiment or opinion we have long entertained, that a majority of those who go to camp meeting on Sunday, might as well go a fishing.

—The recent conflagrations at Looking Glass are of little importance. The saw-gig-saw loses are estimated at not less than $75,000. The office of the Looking Glass *Record* is a total loss. One entire square was consumed, with the exception of the bank building, which stood isolated on one side of the block. Nine-store dwellings and small wooden buildings were destroyed. The Congregational and Episcopal churches, the dwellings, hall and furniture burned. A lady, name unknown, was burned to death in a small wooden building. She and a man were seen on the roof of the porch, and were still at jump off, but both turned and went back into the building. The man then came out, but the woman has not been seen since, and no doubt perished. Loss to date has no fire department and no water works, consequently but little could be done to stay the progress of the flames.

—On the second day of August, the Township Superintendent of Schools meet to elect a county board of school examiners. In addressing the township superintendents relative to the selection of members of the county board, the superintendent of public instruction says: "I trust you will exercise the greatest care and wisdom. The change will be watched with great interest, and upon your action and the discretion with which you make your choice will depend the success and progress of the schools. The law was designed to enable you to call to your aid, and secure the best and most capable men in your county—men of character, experience, and practical sense. Let no other consideration govern your choice. While the law makes no restriction as to eligibility to the office of school examiner, you will perceive from the wants and relation of their duties that a person cannot act as chairman of the board of township inspectors and county examiner at the same time."

To the Public.

The undersigned would announce that on and after the first day of July next the Bridge Street House will be open for the accommodation of the traveling public. This house is very pleasantly located near the shore of Round Lake, affording a lovely view of our inland lakes and both of the resort grounds. The house and all the furnishing is new, a guarantee of undisputed right. Baggage will be conveyed to and from steamboat landing free of charge. Good boats for rowing or fishing furnished at reasonable rates. Stables for the horses trust strangers will be procured for all who may meet their evening. We will guarantee as good fare as can be had for the same price at any other house in northern Michigan.

ROBERT MILLER, Proprietor.

Dr. H. P. Snyder, Surgeon Dentist, Formerly of Philadelphia, Pa., has fifteen years of practical experience. Will be at Fountain City House, Charlevoix, all summer. Those desirous of having their dentistry done in a first-class manner, should call at the above place immediately and secure his services. Teeth extracted without pain by latest approved methods. Charlevoix, Mich.

A FEW GOOD REASONS WHY EVERY LADY SHOULD BUY THE

Broadhead Dress Fabrics, Mousquie Cloths, Camels Hair Armures and Alpaca.

Because They are the cleanest goods in the market, when the quantity is taken into consideration.

Because They do not crock during the wet or damp weather, and have done the very best materials by experienced workmen, and cannot be excelled by any similar goods either Foreign or Domestic.

Because The manufacturing and finishing is done in such a manner that these goods can be washed and ironed as well as a linen, and without the least injury to the fabric, and the purchaser assured of satisfaction to warrant them so each.

LEGAL NOTICES.

NOTICE.

[illegible]

Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before the Clerk of the Circuit Court for Charlevoix county, Michigan, at the court house in Charlevoix, on the 15th day of July, 1881, viz:

Joseph Monroe Gregory, of Boyne City, Mich., for the S. W. ¼, sec. 31, T. 33 N. R. 7 W., and names the following witnesses to prove his continuous residence upon and cultivation of said land, viz: Henry Robbins, John Fish, Jr., of Boyne City, and Alexander Hay and T. B. Murray, Horton's Corners, Mich.

EDWARD RUTH LYMAN, Register.

NOTICE OF ATTACHMENT.

State of Michigan, County of Charlevoix, } ss.
Alexander J. McLeod, vs. George Bethune, Jr. attached.

Notice is hereby given that on the 30th day of May, A. D. 1881, a writ of attachment was issued out of the Circuit Court for the County of Charlevoix, at the suit of Alexander J. McLeod, the above named plaintiff, against the lands, tenements, goods and chattels, moneys and effects of George Bethune, Jr., the defendant above named, for the sum of Two hundred and twenty-five dollars, which said writ was returnable on the 4th day of September, A. D. 1881.

Dated this 11th day of June A. D. 1881.

J. MILO EATON,
Attorney for Plaintiff

PROBATE ORDER.

STATE OF MICHIGAN, } ss.
COUNTY OF CHARLEVOIX }

At a session of the Probate Court for said county, held at the Village Hall in the village of Charlevoix, on Wednesday, the eighth day of June in the year one thousand eight hundred and eighty-one.

Present, HON. JAMES A. KEAT, Judge of Probate.

In the Matter of the Estate of WM. F. MACK, Deceased.

The Administrator of said estate come into court and represent that they are now prepared to render their account as such Administrator.

Thereupon it is ordered that Monday, the eighth day of August next, be assigned for examining and allowing the said account and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate Office, in the village of Charlevoix, in said county, and show cause, if any there be, why the said account should not be allowed: And it is further ordered that said Administrator give notice to the persons interested in said estate, of the pendency of said account, and the hearing thereof, by causing a copy of this order to be published in the Charlevoix Sentinel, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing.

(A true copy.) JAMES A. KEAT,
Judge of Probate.

PROBATE ORDER.

STATE OF MICHIGAN, } ss.
COUNTY OF CHARLEVOIX }

At a session of the Probate Court for said county, held at the Village Hall in the village of Charlevoix, on Wednesday, the eighth day of June in the year one thousand eight hundred and eighty-one.

Present, HON. JAMES A. KEAT, Judge of Probate.

In the Matter of the Estate of JAMES DOHERTY, deceased.

On reading and filing the petition, duly verified, of Thomas Doherty, praying that administration of said estate may be granted to himself or to some other suitable person.

Thereupon it is ordered that Wednesday, the fifth day of July next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate Office, in the village of Charlevoix, in said county, and show cause, if any there be, why the prayer of said petitioner should not be granted: And it is further ordered that said petitioner give notice to the persons interested in said estate, of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the Charlevoix Sentinel, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing.

—Mr. Cooper has purchased a new omnibus for the Fountain City House, and has also commenced further improvements on the house.

—The Cash Store, Lower Hall, is now receiving their spring stock of goods, and will sell at low prices.

—Mr. Cooper has purchased the Fountain City House, and has taken possession. He will be pleased to see his friends at

Mr. Rabbit and the Little Girl.

"What did the rabbit do after that?" the little boy asked, presently.

"Now, den, you don't wanter push old Brer Rabbit too close," replied Uncle Remus significantly. "He mighty tender-hearted creetur, an de nex' time you push 'im, de fuzzle he lef' you."

There was prolonged silence in the old man's cabin, until, seeing that the little boy was growing restless enough to cast several curious glances in the direction of the cobwebbed corner, Uncle Remus lifted one leg over the other, stretched his head reflectively, and began:

"One time, atter Brer Rabbit done bin trompin' 'roun' huntin' up some sallid fer ter make out his dinner wid, 'e fine hisse'f in de neighborhoods er Mr. Man house, an he pass 'long 'twel he come ter de gyarden-gate he see Little Gal playin' 'roun in de sun. Wen Brer Rabbit look 'twix' de gyardin-palin's en see de cabbiges, an de sparrer-grass, an de yather gyardin truck growin' dar, hit make he mouf water. Den he take an walk up ter de Little Gal, Brer Rabbit did, an pull his mouth, 'I tap-knock, I an-bow, an-scrape his foot, an ask mighty nice an slick:

"'Howdy, Little Gal, an Brer Rabbit, an how you come on?'

"Den de Little Gal, she 'spon' howdy she did, an she an Brer Rabbit how he come on, an Brer Rabbit, he how he pert'y, an den he ax de Little Gal ef she see Brer Rabbit, an she 'spon' how Brer Rabbit wuz a singer, mon,' continued Uncle Remus, with unusual emphasis, 'one w'en he climbed up fer 'sir ang he make dem yuther creeturs hol' der jaws.

"Wha' dat he sing, Uncle Remus?" asked the little boy.

"Ef I sh'ld 'member dat song sh'ts mighty," said Uncle Remus, looking over his spectacles at the boy with a curious air of attempting to remember something, "but run sorter dis yer way:

"De jay-bird hum de sparrer nest,
De hummin-bird suit de rose;
De hawker he holler from de top er de tree,
Mr. Meek he stay in de grass.
He holler on de wuz twel he dat'y drap down,
Mr. Meek he stay in de grass.

"W'en de Little Gal year dat, she laugh, she did, an she 'spon' how Brer Rabbit ter 'er sing some mo', but Brer Rabbit, he sorter cough, he did, en 'low dat he got a mighty bad hoa'seness down inter his win' pipe som'ers. De Little Gal she look sorter sorrerful, 'pressin'ly, an bimeby Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. Den de Little Gal, she ax 'im wunt he dance, an Brer Rabbit, he 'spon' how in de name er goodness he wuz dance w'iles he all tie up in dis away, an den de Little Gal, she say she kin untie 'im en Brer Rabbit he say sho' 'nough' she do. Wid dat de Little Gal, she patch down en undoove de tan-line, en Brer Rabbit, he sorter stretch hisse'f en look 'roun.'"

Here Uncle Remus paused and sighed, as though he had relieved his mind of a great burden. The little boy waited a few minutes for the old man to resume, and finally he asked:

"Did the rabbit dance, Uncle Remus?"

"Wha? Him?" exclaimed the old man, with a queer affectation of elation. "Bless yo' soul, honey! Brer Rabbit gedder up his fixes nuff 'im, en he dance under dat gyarden, en he dance home. He did dat! Sho'ly you don't 'spec' dat a old-timer w'at done had 'sperunce like Brer Rabbit gwine ter stay shar on let dat ar Mr. Man seekytine' 'im? Shoo! Brer Rabbit dance, but he dance home. You hear me?"—*Uncle Remus, in Scribner's Monthly.*

How the Weather Bulletins Are Received.

At the Signal Service Bureau in Washington the weather indications are recorded as they come, as often as four p. m. and eleven p. m., daily. A reporter undertakes to tell how the work is done, and this is what he says:

Take a seat in the indication room with me, and we will see how the weather is gotten up. It is now four o'clock, Washington time, and telegrams are pouring in from all parts of the United States, Canada, British America, West Indies, Nova Scotia, and falling into the lap of the sergeant in charge. The territory covered is from Olympia, in Victoria, on the northwest coast of British America, across to Sydney, slopes Newfoundland, throws down to Havana, across to San Diego, California, and thence back again. There's a girth for *Puck*. At certain hours of the day—three o'clock Washington time—observations are taken at all the stations, and these ought to become interesting each other over the wires pell-mell, like a crowd of young reporters possibly be devised. At an age when the rapid development of the human organism requires the utmost freedom of movement, our children are kept in the close confines of garments that check the activity of the body every way; swaddling clothes, underskirts, overskirts, neck-wrappers, trailing gowns, garnitures, flounces, and sashes reduce the helpless humanbeing to a bundle of dry-goods, unable to move to turn, incapable of suffering or enjoying its uneasiness in any way save by the use of its sqneal ng apparatus, and consequently squealing vociferously from morning till night. Out-doors, in the baby-carriage, would draughts of air be guarded against, and a load of extra wrappers completely counteract the healthful influence of fresh air. Think with nausea and suffocating heat the little tiannged figs sometimes sit on back, in the sunshine in its white surplice, a candidate for the honors of a life whose every movement of a natural impulse will be suppressed as a revival of barbarism and superstition against the heathen Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. Den de Little Gal, she ax 'im wunt he dance, an Brer Rabbit, he 'spon' how in de name er goodness he wuz dance w'iles he all tie up in dis away, an den de Little Gal, she say she kin untie 'im en Brer Rabbit he say sho' 'nough' she do. Wid dat de Little Gal, she patch down en undoove de tan-line, en Brer Rabbit, he sorter stretch hisse'f en look 'roun.'"

Here Uncle Remus paused and sighed, as though he had relieved his mind of a great burden. The little boy waited a few minutes for the old man to resume, and finally he asked:

"Did the rabbit dance, Uncle Remus?"

"Wha? Him?" exclaimed the old man, with a queer affectation of elation. "Bless yo' soul, honey! Brer Rabbit gedder up his fixes nuff 'im, en he dance under dat gyarden, en he dance home. He did dat! She'ly you don't 'spec' dat a old-timer w'at done had 'sperunce like Brer Rabbit gwine ter stay shar on let dat ar Mr. Man seekytine' 'im? Shoo! Brer Rabbit dance, but he dance home. You hear me?"—*Uncle Remus, in Scribner's Monthly.*

SCHOOL AND CHURCH.

—The Christians of China have increased forty-two per cent in the past three years.

—The American Bible Society supports two missionary colporteurs in Siberia.

—The British and Foreign Bible Society put in circulation in China last year 200,000 copies of the Scriptures.

—Father Curci has just finished his translation of the Italian New Testament and is commentary upon it.

—It appears that there are twenty-five distinct Methodist denominations in the world, with a total of 4,620,780 members.

—In thirty-seven years the Church of England has erected 2,581 churches and has expended on church buildings $200,000,000.

—Mr. Fred M. Page, Professor Schele de Vere's assistant in the University of Virginia, has been selected to fill the chair of Modern Languages in the University of the South, at Sewanee, Tenn.

—The University of Vienna has 4,672 students. Of these, 287 are foreigners. Theology commands the attention of 217, law and political sciences 2,150, medicine 1,337, philosophy 762, pharmacy 156.

—Through Mr. Leo S. Hobden, the Regents of the State University of Texas have offered the Chancellorship of that institution with a salary of $5,000 a year to Professor Wm. T. Harris of St. Louis.

—The Rev. Robert Stewart, D. D., late professor in the Theological Seminary at Newburgh, N. Y., and editor of the *Repository*, etc., has been appointed to foreign mission work in India, with a view specially to his establishment of a theological seminary for the training of native students.

—The total expenditures for school purposes in St. Louis last year were $795,548, in Cincinnati, $687,195, in San Francisco the estimated expenditures for the present year are $821,970, in Chicago over $1,000,000, and in the Middle States, the South, West, Mississippi Valley, then, perhaps, a strong tendency to manufacture heads by advance in the same direction, and the indications are that twenty-four hours in a day will not be long enough for many of the heads now being manufactured. Take, for example, the Bible. Some of the best scholars of the world have been engaged in the work of revising the English Bible, and the result is the best version especially commends itself to men of scholarly attainments the general public will prefer the old version.

—Mr. William Bucknell, of Philadelphia, has offered to give $50,000 to the endowment fund of the Crozier Baptist Theological Seminary, at Lewisburg, Pa., provided that the further sum of $100,000 is secured and permanent investments be derived by selling all the property belonging to the University to the extent of $150,000 and using the real estate in the University campus, Lewisburg, and that an additional sum of $50,000 be raised by the board of trustees. The offer is to remain open until November 1st next.

PUNGENT PARAGRAPHS.

—Tailors are taking measures to enlarge their business.—*Lowell Citizen.*

—"I'm mashed on you," remarked the mosquito to the young lady, as she slapped it.—*Bit and Weekly.*

—"What is life?" is often asked us. "It's a race for what's called 'ills,'" Which some clothes to wear, throws in.

—Almost any good singer can get up on a high note, but it is the long notes that trouble the average citizen.—*Yonkers Statesman.*

—"Who are you alive yet, my old friend? I heard you were dead." "Nice friend you are. You didn't even come to my funeral."—*Texas Siftings.*

—"Health is wealth," says a patent medicine advertiser. You are wrong, respected sir. If health was more universal, you'd see a wholesale bankruptcy. —*Philadelphia Chronicle-Herald.*

—A patent medicine advertisement is headed "Women never Think." But let one find a perfumed note, written in a feminine hand, in her husband's coat pocket and she will think to a purpose, might and main for upward of consideration.—*Norristown Herald.*

—The proper time to run a lawnmower is about five o'clock a. m. Then you not only cut the grass, but you scare the neighbors from oversleeping and bring late to breakfast, and the fact that they hope you'll get your fingers cut off doesn't hurt you any.—*Boston Post.*

—"Sambo says his church ought to organize a base ball club," said a man who hails first and social base. The organist can always get a base struck out on the organ. What's the matter, seeing he has a good field, pitches into the congregation, who have to knock a few musicians in any way save by the use of its squeal ng apparatus, and consequently squealing vociferously from morning till night. Out-doors, in the baby-carriage, would draughts of air be guarded against, and a load of extra wrappers completely counteract the healthful influence of fresh air. Think with nausea and suffocating heat the little tiannged figs sometimes sit on back, in the sunshine in its white surplice, a candidate for the honors of a life whose every movement of a natural impulse will be suppressed as a revival of barbarism and superstition against the heathen Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. How the Weather Bulletins Are Received.

At the Signal Service Bureau in Washington the weather indications are recorded as they come, as often as four p. m. and eleven p. m., daily. A reporter undertakes to tell how the work is done, and this is what he says:

Take a seat in the indication room with me, and we will see how the weather is gotten up. It is now four o'clock, Washington time, and telegrams are pouring in from all parts of the United States, Canada, British America, West Indies, Nova Scotia, and falling into the lap of the sergeant in charge. The territory covered is from Olympia, in Victoria, on the northwest coast of British America, across to Sydney, slopes Newfoundland, throws down to Havana, across to San Diego, California, and thence back again. There's a girth for *Puck*. At certain hours of the day—three o'clock Washington time—observations are taken at all the stations, and these ought to become interesting each other over the wires pell-mell, like a crowd of young reporters possibly be devised. At an age when the rapid development of the human organism requires the utmost freedom of movement, our children are kept in the close confines of garments that check the activity of the body every way; swaddling clothes, underskirts, overskirts, neck-wrappers, trailing gowns, garnitures, flounces, and sashes reduce the helpless humanbeing to a bundle of dry-goods, unable to move to turn, incapable of suffering or enjoying its uneasiness in any way save by the use of its squeal ng apparatus, and consequently squealing vociferously from morning till night. Out-doors, in the baby-carriage, would draughts of air be guarded against, and a load of extra wrappers completely counteract the healthful influence of fresh air. Think with nausea and suffocating heat the little tiannged figs sometimes sit on back, in the sunshine in its white surplice, a candidate for the honors of a life whose every movement of a natural impulse will be suppressed as a revival of barbarism and superstition against the heathen Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. Den de Little Gal, she ax 'im wunt he dance, an Brer Rabbit, he 'spon' how in de name er goodness he wuz dance w'iles he all tie up in dis away, an den de Little Gal, she say she kin untie 'im en Brer Rabbit he say sho' 'nough' she do. Wid dat de Little Gal, she patch down en undoove de tan-line, en Brer Rabbit, he sorter stretch hisse'f en look 'roun.'"

Here Uncle Remus paused and sighed, as though he had relieved his mind of a great burden. The little boy waited a few minutes for the old man to resume, and finally he asked:

"Did the rabbit dance, Uncle Remus?"

"Wha? Him?" exclaimed the old man, with a queer affectation of elation. "Bless yo' soul, honey! Brer Rabbit gedder up his fixes nuff 'im, en he dance under dat gyarden, en he dance home. He did dat! She'ly you don't 'spec' dat a old-timer w'at done had 'sperunce like Brer Rabbit gwine ter stay shar on let dat ar Mr. Man seekytine' 'im? Shoo! Brer Rabbit dance, but he dance home. You hear me?"—*Uncle Remus, in Scribner's Monthly.*

How to Dress the Children.

The capacity of our ancestors to accommodate themselves to every climate depended not only on their physiological faculty of adaptation, but also on their skill in protecting themselves by artificial means from the inclemency of the higher latitudes. Houses and clothes are a blessing if they answer this purpose by a wise imitation of Nature's own plan in sheltering her children from atmospheric vicissitudes; but in degree as they deviate from that plan their hygienic disadvantages balance, or even outweigh, the gain in other respects. A swallow's nest protects her brood from cold and rain without debarring them from the fresh air; a human domicile, too, should combine comfort with the advantage of perfect ventilation; and our clothes, like the fur of a squirrel or the feather-mantle of a hawk, should keep us warm and dry without interfering with the cutaneous excretions and the free movement of our limbs.

Measured by these standards, the dress of one of an American schoolboy is scarcely less. the summer dress of the average American, French, and German mother is redressed in the worst that possibly be devised. At an age when the rapid development of the human organism requires the utmost freedom of movement, our children are kept in the close confines of garments that check the activity of the body every way; swaddling clothes, underskirts, overskirts, neck-wrappers, trailing gowns, garnitures, flounces, and sashes reduce the helpless humanbeing to a bundle of dry-goods, unable to move to turn, incapable of suffering or enjoying its uneasiness in any way save by the use of its squeal ng apparatus, and consequently squealing vociferously from morning till night. Out-doors, in the baby-carriage, would draughts of air be guarded against, and a load of extra wrappers completely counteract the healthful influence of fresh air. Think with nausea and suffocating heat the little tiannged figs sometimes sit on back, in the sunshine in its white surplice, a candidate for the honors of a life whose every movement of a natural impulse will be suppressed as a revival of barbarism and superstition against the heathen Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. Den de Little Gal, she ax 'im wunt he dance, an Brer Rabbit, he 'spon' how in de name er goodness he wuz dance w'iles he all tie up in dis away, an den de Little Gal, she say she kin untie 'im en Brer Rabbit he say sho' 'nough' she do. Wid dat de Little Gal, she patch down en undoove de tan-line, en Brer Rabbit, he sorter stretch hisse'f en look 'roun.'"

Here Uncle Remus paused and sighed, as though he had relieved his mind of a great burden. The little boy waited a few minutes for the old man to resume, and finally he asked:

"Did the rabbit dance, Uncle Remus?"

"Wha? Him?" exclaimed the old man, with a queer affectation of elation. "Bless yo' soul, honey! Brer Rabbit gedder up his fixes nuff 'im, en he dance under dat gyarden, en he dance home. He did dat! She'ly you don't 'spec' dat a old-timer w'at done had 'sperunce like Brer Rabbit gwine ter stay shar on let dat ar Mr. Man seekytine' 'im? Shoo! Brer Rabbit dance, but he dance home. You hear me?"—*Uncle Remus, in Scribner's Monthly.*

The Light-Fingered Monkey.

If the mental characteristics of the four-handed folk have anything in common with the archetype of our race, there would seem to be a strong presumptive evidence that man is not per se a law-abiding animal. The Malaiut may have stretched his poetic license when he asserted as that all monkeys are liars, but there is no doubt that all monkeys are thieves. They all steal in their native land depredation forms their daily and constant employment, and Nature has been peculiarly utmost to equip them for their trade. The monkey Hanuman is the Indian Mercury, the patron saint of delightful knaves and boasters. Light-fingered, quick and prehensile, his four hands seem especially adapted for pillage; he carries a double "kit," a pair of capacious cheek pouches, for *storing his plunder*; his arboreal domicile furnishes him readymade ambuscades and lurking places; he cannot be caught napping, his head moves on a versatile fulcrum, and his vocal organs are of the finest. It is wholly impossible to cure a monkey of his thievish propensities; you may as well cure him till he makes your lips his favorite hiding place, you may surfeit him with edibles, but the moment you turn your back he will ransack the room from top to bottom, and will make pouches with everything bearing the faintest resemblance to comestibles. In a menagerie Hanuman enjoys all the privileges of the Mohammedan lunatic, being granted the run of the whole premises; pussy, desiccate the rice crop and rob all the birds' nests they want; but, notwithstanding the unbridled licentiousness, they pillage the cottages of the *Rajpoots*, etc., have been given over to foreign mission work in India, with a view specially to his establishment of a theological seminary for the training of native students.

—The total expenditures for school purposes in St. Louis last year were $795,548, in Cincinnati, $687,195, in San Francisco the estimated expenditures for the present year are $821,970, in Chicago over $1,000,000, and in the Middle States, the South, West, Mississippi Valley, then, perhaps, a strong tendency to manufacture heads by advance in the same direction, and the indications are that twenty-four hours in a day will not be long enough for many of the heads now being manufactured. Take, for example, the Bible. Some of the best scholars of the world have been engaged in the work of revising the English Bible, and the result is the best version especially commends itself to men of scholarly attainments the general public will prefer the old version.

—Mr. William Bucknell, of Philadelphia, has offered to give $50,000 to the endowment fund of the Crozier Baptist Theological Seminary, at Lewisburg, Pa., provided that the further sum of $100,000 is secured and permanent investments be derived by selling all the property belonging to the University to the extent of $150,000 and using the real estate in the University campus, Lewisburg, and that an additional sum of $50,000 be raised by the board of trustees. The offer is to remain open until November 1st next.

PUNGENT PARAGRAPHS.

—Tailors are taking measures to enlarge their business.—*Lowell Citizen.*

—"I'm mashed on you," remarked the mosquito to the young lady, as she slapped it.—*Bit and Weekly.*

—"What is life?" is often asked us. "It's a race for what's called 'ills,'" Which some clothes to wear, throws in.

—Almost any good singer can get up on a high note, but it is the long notes that trouble the average citizen.—*Yonkers Statesman.*

—"Who are you alive yet, my old friend? I heard you were dead." "Nice friend you are. You didn't even come to my funeral."—*Texas Siftings.*

—"Health is wealth," says a patent medicine advertiser. You are wrong, respected sir. If health was more universal, you'd see a wholesale bankruptcy. —*Philadelphia Chronicle-Herald.*

—A patent medicine advertisement is headed "Women never Think." But let one find a perfumed note, written in a feminine hand, in her husband's coat pocket and she will think to a purpose, might and main for upward of consideration.—*Norristown Herald.*

—The proper time to run a lawnmower is about five o'clock a. m. Then you not only cut the grass, but you scare the neighbors from oversleeping and bring late to breakfast, and the fact that they hope you'll get your fingers cut off doesn't hurt you any.—*Boston Post.*

—"Sambo says his church ought to organize a base ball club," said a man who hails first and social base. The organist can always get a base struck out on the organ. What's the matter, seeing he has a good field, pitches into the congregation, who have to knock a few musicians in any way save by the use of its squeal ng apparatus, and consequently squealing vociferously from morning till night. Out-doors, in the baby-carriage, would draughts of air be guarded against, and a load of extra wrappers completely counteract the healthful influence of fresh air. Think with nausea and suffocating heat the little tiannged figs sometimes sit on back, in the sunshine in its white surplice, a candidate for the honors of a life whose every movement of a natural impulse will be suppressed as a revival of barbarism and superstition against the heathen Brer Rabbit, he up'n 'low dat he kin dance mo' nimer dan what he kin sing. Den de Little Gal, she ax 'im wunt he dance, an Brer Rabbit, he 'spon' how in de name er goodness he wuz dance w'iles he all tie up in dis away, an den de Little Gal, she say she kin untie 'im en Brer Rabbit he say sho' 'nough' she do. You hear me?"—*Uncle Remus, in Scribner's Monthly.*

For Young Readers.

WHY I LOVE HER.

I know she isn't pretty;
Her cheeks are much too pale,
Her eyes and nose are all one shade
Of dainty pinky tint.
Her hair's too short and kinky,
I cannot wear it neat;
No number, since its carvings
Of shingle's shocking test.

But, oh! she s such a comforter!
When I am sick in bed
We go and gabble to the brook,
Or help to make mud pies.
We dig fields in the garden
And plant potatoes in the dirt.
Then when the crop comes over hay,
I'm sick, she stays at home.

If I am sick or sorry,
And when I'm bad, and somma scolds,
She comes and sits by me,
And never says a word.
When we're in bed at night
We always say our prayers,
And then we cuddle close
And tell each other stories.

I know she could say nothing
Against Bob's plank after that; but all it was a effort to what was coming. A few days later came on the greatest race of our lives, and we were so hard pressed on the left (where my regiment was) that at last there was nothing for it but to fall back. We formed again under cover of some thickets, but even there we were unable to do so for any ground, for the enemy had brought up several guns, and were giving it to us pretty hot.

"Suddenly, between two gusts of smoke, one of our men saw a lying out on the open plain, was seen to wave his hand feebly, as if for help. It was one of our lieutenants, who had been hard-er than anyone upon 'Gentleman Bob,' and his change was a great one, for it seemed certain death to try and reach him through such a salt-of shot, while a bullet didn't finish him, the scorching sun was pretty sure to do it.

"All at once a man was seen to spring out from the sheltering thicket, and that man was 'Gentleman Bob.' He never looked to right nor left, and we were so hard to where his persecutor was lying helpless, and held to it until he reached him. Then the French banged away at him like fury, but when they saw what he was doing, several officers called out, 'No tirez pas, mes enfants' ('Don't tire, my boys'), and raised their caps to him in salute. Bob lifted the wounded man gently in his arms, and shielding him with his own body, brought him back into our lines; and such a cheer as went up then I never heard before or since.

"And did that horrid lieutenant die, uncle?"

"Luckily not," answered the Colonel, laughing. "For I'm sorry to say the 'horrid Lieutenant' was no other than myself."

"Oh, uncle! were you ever as naughty as that?" lisped a voice, in tones of amazement.

"But what became of 'Gentleman Bob?'" asked an impatient boy.

"He's now my respected brother-in-law, and your papa," said the Colonel, exchanging a sly look with a twinkle lurking man on the other side of the room, who had been listening to the story with a quiet smile. "And now that you've had your tale, go and say good-night, for it's high time for you."—*Harold Ker, in Harper's Young Folks.*

A Boy's Speech on Early Rising.

"Early to bed and early to rise
Makes a man healthy, wealthy and wise.

Ladies and Gentlemen:

The text I have chosen for my discourse is the most beautiful to me, but it contains the keen kernels of truth, without fuss or stuff. All the brute creation shun their peepers at the setting of the sun, save such as see best without the aid of candles, a little sugar and nutmeg, all beaten up together with the flies. Fill a small, flat dish for three-quarters of an hour.

—To keepless in a sick room, cut a circle of muslin large enough to cover the top of a tumbler and fasten it over the tumbler with a rubber band. Then slash it over its side, like the paper cover in a preserve jar. Into one put some water, your thought and will, what he cannot do. Never use it with their food, so that they are compelled to take it whether they wish it or not. More and better butter can be made from the milk of a cow when she has free access to salt than when she is deprived of it, or having an irregular supply, and it also takes less time to churn when the cream is ripened with salt.

—Rise early and be careful of rice in milk until it is well swollen; add three eggs well beaten, a quarter of a pound of seedless raisins

Charlevoix Sentinel.

CHARLEVOIX, JUNE 28, 1881.

WILLARD A. SMITH, } EDITORS AND PROPRIETORS.

BOARD OF SUPERVISORS

Report of Supervisors of Charlevoix County.

MONDAY, June 13, 1881.

At a regular meeting of the board of Supervisors of Charlevoix county, held in the village of Charlevoix, on Monday, June 13, 1881. The several townships in said county were represented by their respective supervisors as follows:

Bear Lake, E. C. Pfettepiace.
Boyne Valley, Wm. Mears.
Charlevoix, S. M. Soo.
Chandler, A. P. Hoasley.
Evangeline, A. J. Stroud.
Eveline, Asa Smith.
Hudson, Oscar Tillotson.
Hudson, Oren Miller.
Marion, John Ward.
Melrose, J. E. Darrah.
Norwood, Wm. Harris.
Reiser, C. J. Wooden.
South Arm, John Stevenson.
Springvale, S. H. Thatcher.
Wilson, Geo. W. Bailey.

The board was called to order by the Clerk, and on motion of Mr. Darrah, Wm. Harris was elected temporary Chairman.

Moved by Mr Bailey that the Board proceed to the election of a permanent Chairman. Carried.

Whole number of votes for permanent Chairman, 15. John Ward received 7 votes, Wm. Harris, 5; J. E. Darrah, 3; Geo. W. Bailey, 1.

On motion Mr. Mears, seconded by a second ballot as follows: John Ward, 6; J. E. Darrah, 6; Wm. Harris 2; Geo. W. Bailey, 1.

On motion Mr. Bailey, proceeded to a formal ballot as follows: which number of votes cast, 15. J. E. Darrah, 8; John Ward, 7. J. E. Darrah receiving a majority of the whole number of votes cast, was declared duly elected.

On motion Mr. Ward, the rules laid down in Tibbitt's Supervisors manual were adopted by the Board.

On motion Mr. Mears the Board took a recess of one half hour for the purpose of giving the chairman a chance to select the several committees.

Board called to order by chairman and the following standing committees appointed:

Equalization—Harris, Bailey, Miller, Stevenson, Hoasley.

To Settle with County Treasurer—Mears, Ward, Stroud.

To Settle with County Supt. of Poor—Stroud, Pfettepiace, Tillotson.

Ways and Means—Bailey, Smith, Soo.

Rejected, charged back and Delinquent Tax—Smith, Bailey, Thatcher.

Superintendent — Hoasley, Tillotson, Wooden.

County Printing—Miller, Bailey, Stroud.

Claims—Soo, Pfettepiace, Harris.

Roads, Bridges and Dams—Tillotson, Hoasley, Smith.

Insurance—Wooden, Stevenson Stroud.

Ferry Licenses—Stevenson, Tillotson, Wooden.

The following Preamble and Resolutions was presented by Mr. Stevenson:

Whereas, The Township of South Arm and all that part of Charlevoix county lying to the East and North, west, and a large part of Antrim county within the Township of Kearney and four tiers of sections in the West of South Arm, of Pine Lake, Township of Evangeline, That this council do raise by taxation on the property thereof, the sum of one thousand ($1,000) dollars, to be used by the Township of South Arm, in the construction of a safe and substantial Bridge across the River at South Arm, if Pine Lake, and Township of Evangeline will raise by taxation the sum of Five Hundred dollars for said purpose.

Referred to the committee on Roads Bridges and Dams.

Claims were read by Chairman and Clerk and referred to the committee on Claims.

On motion Mr. Mears the Board adjourned until eight o'clock to-morrow morning.

TUESDAY, June 14, 1881.

Board called to order by the Chairman pursuant to adjournment. Roll called, full board present. Journal read and approved.

The following Resolution was offered by Mr. Stroud.

Whereas it is deemed by the Board of Supervisors of the County of Charlevoix, that the public interest will be subserved by the location of said county seat at the village of Charlevoix, in a building to be erected by the citizens of Charlevoix, for a term of years, not less than ten years, and whereas, the citizens of Charlevoix have come forward with a generous offer of said building, and the ground upon which the same is to be erected, and have further agreed to furnish the County Clerk's office, and the Register of Deeds office, rent free, and have further agreed to furnish the Circuit Court room, and the Supervisor room, and the Probate room, and the Jury room, and the Grand Jury room, and

THE SENTINEL.

WILLARD T. SMITH, Editor and Proprietor.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

On the 24th the New York City school teachers celebrated the 100th anniversary of the adoption of the American flag by a reception at the Grand Central Depot.

FATHER MADDEN, the alleged miracle-worker of Erie, Pa., who was arrested on the charge of obtaining money under false pretenses, has been discharged because he had not collected money for doing his miracles.

THE production of anthracite coal for the first five months of the year was 20,883,273 tons, an increase of 1,680,233 tons over the production for the same time last year.

FOREIGN imports at New York for eleven months of the fiscal year 1881 were $407,261,-70, an increase of $54,000,000 over the imports of 1880. The exports for the same period were $390,000,000, an increase of $20,000,000 over those of the preceding year.

SECRETARY WINDOM positively refused on the 24th to give out for publication the report of the committee that investigated THURMAN, the Deputy Treasurer in Washington. Mr. WINDOM said the report was made up and submitted to him for his official information, and while he intimated that he would act upon it very soon, he emphatically refused to give out anything of its contents. He stated, however, that the report contains the charge of irregularities and reckless management, and even worse, and that these irregularities had been going on for several years.

A WASHINGTON special of the 25th says: It was generally said in the Government would not be prepared to lay its case in the matter of the prosecution of the "Star-route" thieves before the Grand Jury until about the first of July. All the witnesses necessary to secure an indictment would be brought to that city before the prosecution opened.

THE National Department of Agriculture places the wheat crop at 84 per cent. of last year's yield for spring and 78 for winter.

BIRAM M. WAITE, ex-President of the First National Bank of Brattleboro, Vt., pleaded guilty on the 24th to the charge of making false returns under the National Banking Act, and was sentenced to a year's imprisonment in the House of Correction.

TWO of the Pierrepont warehouses in Brooklyn, N. Y., were burned on the 24th, causing damage to the amount of nearly $120,000, on which there is insurance. Two and another fatally injured. Henry L. Pierrepont, Jr., was severely burned.

THE firm of P. Caudert & Co. resigned extensively in the fruit business at Boston, has failed, owing to the depression in that branch of trade. The liabilities are estimated at from $60,000 to $70,000.

BUSINESS failures in the Lehigh and Schuylkill Valleys, Pa., stopped operations on the 24th, on account of the low prices of pig iron. It was said more would follow unless prices should improve within the next few days.

IN the suit of Mrs. Elkins against a Philadelphia sawdust and the owner of the building in which it was kept, to recover for damages for having, in spite of her protest, and threatening threats, set fire to a building—a small wrist, causing him to squander all his earnings and neglect to support his family, for many years—he was and has been discharged. Mr. Elkins has instituted another suit against Mrs. Elkins' mother, brother of the other defendant, for $50,000 on the same grounds.

DURING the three days ended on the 26th the weather at New Orleans was excessively hot, and thirteen cases of sun-stroke, several of which proved fatal, occurred. At Vicksburg the thermometer reached 104 in the shade on the 26th.

IT is alleged on the authority of a responsible New York grain merchant, who has made extensive use of the cable to obtain the facts, that the crop prospects in France are fine, and that the Russian harvest will be the largest for many years. It is asserted that Europe will not only be independent of America's wheat, but that Russia will offer considerable competition to our grain-growers. Germany, Austria, Roumania and Switzerland will not be the most encouraging reports.

A LAD at Canton, Ohio, named Edward Shumaker, was dying on the 24th from lock-jaw, caused by a wound from a toy pistol.

DURING the month of May of this year 117,482 immigrants arrived in this country, and during the eleven months ended May 31 the number of arrivals was 695,284, 189,031 more than 1880. Of the latter number 175,386 were Germans, 109,611 came from Canada, 62,788 from Ireland, 57,861 were English and Welsh, 12,620 Scotch, 7,642 Chinese, and 129,649 came from all other countries.

THE United States steamer Alliance sailed from Norfolk, Va., on the 16th for a four-months' cruise between the 30th and 40th degrees in search of the missing steamer Jeannette.

TWO STATES running between Alma and Fayetteville, Ark., were recently stopped by armed men, who robbed the mails and escaped on mail-bags.

A FEW days ago a resident of Newport, Ohio, was fined $25 for putting a split stick on his son's tongue.

THE one hundred and ninth anniversary of the Battle of Bunker Hill was celebrated at Boston on the 17th. A specially interesting feature of the day was the formal dedication of the bronze statue of Colonel William Prescott, the hero of the fight of 109 years ago. The Governor and other dignitaries were present. Ex-Mayor Lincoln presided, and the oration was delivered by Robert C. Winthrop.

THE Republicans had fatal cases of sun-stroke in New Orleans on the 17th.

IN a recent base-ball match at New Haven, Conn., between the Yales and Nationals, the pitcher of the former, Hutchinson, struck out sixteen men in succession. Strikeout and sprain, tendency to, we know, and think, the Amherst's pitcher, had his left arm broken by the ball.

THE number of cases on the Chicago City Directory for 1881 indicate a population in the city of over 500,000.

BY the explosion of an oil lamp the Sweepsen Mills at the Falls of Fenne, N. C., was set fire to and destroyed on the 17th. The mill gave employment to 300 operatives, and was valued at $200,000; insurance, $70,000.

GREENFIELD, the Syracuse wife-murderer, upon whose prosecution $40,000 has been spent, and who has endured imprisonment for five years, has for the eighth time been sentenced to death, the date fixed being August 5.

RICHARD BULLEN, a Detroit grave-robber, has been sentenced to five years in State Prison.

MARTIN MAHER, an Elizabeth (N. J.) lunatic, recently fired two shots at Miss Fannie Walker, because she declined to marry him, and then killed himself.

Personal and Political.

THE Secretary of the National Greenback Committee says that the Greenback members of the next House are pledged to meet in Greenback caucus and determine upon and carry out Greenback politics.

THE investigation into the alleged bribery at Albany, N. Y., was continued on the 18th, Mr. Bradley completing his statement before the committee, and directly charging that Mr. Sessions had given him $2,000 to vote for Depew, instead of Platt. Senator Sessions also appeared before the committee, and, while emphatically denying that he had given any money to Bradley, and asserted that Bradley had told him he would vote for Depew because he thought that by so doing he would be acting in accordance with the wishes of his constituents.

HIRAM STUTLER SENER, of Wyoming, has decided that the recent marriage at Denver, Col., of a Chinaman and a white woman, being legal in Colorado, must be recognized as valid in Wyoming. Judge Chitz's compatriots, however, declare that the case has disgraced himself by marrying a "Mellican" woman, and have cast him off.

MISS M. M. GILLETT, of Wisconsin, has now a resident of Washington, and a few months ago was appointed a Supervisor of the census, and has been given a position in the Census Office at Washington.

THE Hon. Greenbackers held their State Convention at Lansing on the 7th, with 120 delegates being present. The following ticket was nominated: For Governor, John Q. Adams, of Ionia; Lieutenant Governor, Charles A. Jones; Supreme Judge, Joseph Warner; Attorney-General, E. M. Tuttle; Treasurer, W. P. Lloyd; Member of Board of Public Works, H. L. Morrison. The platform adopted declares the right to make and issue money is a sovereign power to be maintained by the people for the common benefit; this all moneys, whether metallic or paper, should be issued and controlled by the Government alone, and that paper money should be paid as rapidly as possible; that legal-tender currency should be substituted for notes of National Banks; that the National banking system should be abolished, and the alleged inherited privilege of said act established by law; demands equal protection for the farmer and laborer; opposes all monopolies; declares that freereads and transportation companies' rates should be regulated by law; demands that property should bear its proportion of taxation, and a graduated income-tax; favors the eight-hour law; endorses the present position of Public Instruction. The resolutions reaffirm the National platform of 1880; declare for tariff reform; oppose monopolies; here and the proposed Prohibition amendment; favor an appropriation for the improvement of the Missis-sippi and its tributaries; etc., etc.

W. N. DEBERRY, United States Marshal of Indiana, was on the 16th appointed Commissioner of Pensions, vice J. A. Bentley, resigned, and Judge Noah C. McFarland, of Topeka, Kan., Commissioner of the General Land Office, vice General Williamson, resigned.

SECRETARY WINDOM on the 17th summarily dismissed Custodian Finney from the public service, and abolished the office of Custodian of the Treasury. A Washington dispatch says: "There never has been any law authorizing the place of Custodian. The position was created in the Treasury Department some years ago, and the Custodian's salary has been paid out of the appropriation for janitors, messengers and superintendents of public buildings. Secretary Windom ascertained this, and thus abolished the place, saying it has no right to exist. The duties heretofore performed by the Custodian are imposed by the order of the Secretary abolishing that office upon Chief Clerk Power, who has been diligent and persistent in working up and exposing the frauds of the Custodian ring. Finney is likely to escape any penalty, except that of his dismissal, as in-will and frolic. The situation is quite tight ahead with the investigation."

MOODY evidence was taken before the Military Investigating Committee at Albany, N. Y., on the 17th, at the conclusion at which the committee adjourned to the 23d.

EX-PRESIDENT GRANT and wife reached New York City on the 17th from Chicago.

Foreign.

AN explosion of gas in the office of the English Loan Company at London, Ont., on the night of the 17th, wrecked the building, the window and burned him severely.

IT is officially stated that 642 houses were destroyed by the great fire at Quebec, and families were rendered homeless, and that one of the 6,000 sufferers from this fire is dead, all, and were rehoused. Ten per cent. of the subscription paid to the Relief Committee, it would be given to the Dufferin monument.

ADVICES from PRIMMA, received on the 16th, were to the effect that the canal situations had been abandoned, workmen had been disbanded, and the engineers had returned to Paris.

INSOLATE, the American racer, won the St. James Palace Stakes at the Ascot races on the 12th.

IT was reported on the 16th that the South Dublin Guardians of the Poor had resolved not to feed any persons under thirty-seven years of age who applied for relief at the workhouse from three to twenty-four years. The new President of the Guardians, Mr. Alderman Tunis is a person who for many years has been famous for economy.

AN insurgent tribe in Algiers has been annihilated by native troops, who captured and destroyed their village. Only 50 of the tribe escaped.

AN attempt was made on the 18th to blow up the statue of Thiers at St. Germain, France.

ANTHAW (Gen.) dispatch of the 19th says a man in that city named Martel had built a submarine ark, with which to escape the second deluge which he believed was sent down the world on the 19th. His wife had left in protest, which she thought was preparing all the week. Another resident of that city had been taken to the lunatic asylum, and when arrested, to board it as the law requires." He says that the work of inspection will be done by the Government. The Comptroller to-day decided that under the law of Congress transferring Alaska to the State for registration vessels of the state, and that, having sold the estate, Alaska had no claim upon the Government, but that it seemed to him that the provision forbidding Treasury Department rejection was

MICHIGAN STATE NEWS.

THE June term of the Supreme Court began at Lansing on the 7th, with 120 cases on the docket.

AN incendiary fire destroyed Van Epps' tannery at Mound Prairie the other day. It was valued at $5,000.

AN assignment has been filed in Schuler & Co., jewelers, of Detroit.

A few nights ago Leon La Salle was fatally injured at Hoy Bulman & Co.'s mill at Grayling. He was standing near the track upon which round saw logs were made the way was ascending the incline with a load of logs. When it was about half-way up the mill the chain snapped, and the rear attached to the wheel flew back with almost lightning speed, striking La Salle in the side, breaking two of his ribs and otherwise injuring him in such an extent that he died.

A crazy woman has the freedom of the city at East Saginaw and sleeps wherever she finds a four-sheeted. The Herald says she entered the house of Colonel Ireland one night recently, and slept in a spare bedroom. The family not knowing of her presence until she arose to leave in the morning.

Diphtheria has carried away over one hundred children at Lexington, and the public schools are closed.

The store and residence of H. Rosenthal, at Bay City, were burned a few days ago. Loss, $2,500.

The Board of Control of the Reform School has let the contract for building a new laundry room to James L. Hilliard for $1,120. Hilliard's bid for the new dormitory was as high as $30,000. The building is to be finished by October 1, and completed by January 1.

A circular just issued from the office of the Secretary of State gives an estimate of crop and stock reports received at that office from 200 townships, and shows that there are 1,308,826 sheep sheared in 1881, yielding 10,120,993 pounds of wool. This is an average of 7.63 pounds per head. The reports also show that the number of sheep in the same townships in 1881 was 1,970,287, which is 34.5 per cent. more than the number sheared in 1880. If there has been a corresponding increase in the remaining 167 townships, there will be 2,653,385 sheep sheared in the State the present year, and the total yield at the above average per head will be 20,074,163 pounds.

While engaged in pruning bark in the woods near Coopersville, Augustus Allen was recently arrested for grand larceny in New York, on a requisition from Governor Cornell.

At East Saginaw a few days ago Fred E. Lyon, seventeen years, son of Captain Lyon, a prominent citizen, while attempting to climb upon a freight-car at the Genesee Street crossing, fell under the train and was killed.

Harry S. Bartlett, a freight-conductor on the Grand Rapids & Indiana Railroad, was instantly killed, between Belmont and Rockford, another conductor, named Smith, was also killed.

The newspapers in Fenimore have been forbidden to discuss politics or create schisms in the Government. Two papers have been suspended and three have been raided.

Chicago has offered an asylum to the Jews expelled from Russia, and expects that 60,000 of them will settle within her borders.

It is stated that all Life-saving stations and all steamers which passed through the Soo Canal from September 1 to August, 1880, not one carried the American flag.

Hiram Wilson, who shot his boy Farrell in the streets of Dublin on the 4th of July, has been sentenced to penal servitude for life.

Mrs. Mary Ann Bickerdyke, the noted army nurse, has been elected by the Soldiers' Home Association, of Grand Rapids, to the position of matron of the institution.

The following are recent official rulings and decisions by the Superintendent of Public Instruction:

1. A District board must act together. It is not necessary for valid official action that all the members of a board be consulted, but an opportunity must be given to all the members to express themselves and vote upon the question at issue.

2. The authority for suspending or expelling pupils from schools is given to the Board of Education, and not to the Superintendent or Principal. The latter officers may suspend pupils for misconduct, but in the suspension of pupils in case a decision by authority of the board.

3. Section 39 of the Revised Statutes does not apply to School Districts. It shall not be a violation of said statutes to be used in the purchase of land, but the district may purchase such land as may be necessary for the erection of a school-house, and may issue bonds for the payment of the same, as provided in section 39 of the Revised Statutes.

4. Section 39 of the Revised Statutes does not apply to School Districts. It shall not be a violation of said statutes to be used in the purchase of land, but the district may purchase such land as may be necessary for the erection of a school-house, and may issue bonds for the payment of the same, as provided in section 39 of the Revised Statutes.

5. The county of the district board in the township in which the district is situated is authorized to levy a tax sufficient to pay the interest on the bonds, and to provide for the payment of the principal when due. The township boards are required to determine for the payment of the principal when due. The township boards are required to determine for the payment of the principal when due. The township boards are required to determine

BREVITIES.

—Henry Burns is erecting a cottage near the Chicago Resort Grounds.

—The furniture for the Chicago Resort Club House arrived on the propeller Lawrence Sunday.

—The Township Board have reduced the fine for trotting across the bridge from ten to five dollars.

—Byron See has the frame of his new store up, and expects the brick from Sheboygan, Wis. soon.

—The Ladies Aid Society of the M. E. Church cleared something over $60. at their stand on the Fourth.

—Isaac Winn, Austin, of Hayes, was locked up by Marshall Miller Saturday, for being drunk and disorderly.

—Dr. Snyder the dentist, has bought a cottage in this village and will hereafter make this his headquarters. He has also leased a room in the second story of Lewis's new building for an office.

—The busier and engine for Sec, Mann and Ock Sash and Door factory arrived last week, and is being placed in position.

—John Stevens of Toronto, Ont. has built a blacksmith shop just in the rear of J. Milo Eaton's law office, and will do a general blacksmithing business.

—The Fourth of July at Charlevoix was celebrated by an immense crowd, the streets being thronged from 9 a. m. until evening. The heat was intense.

—C. Sutherland, the government contractor, with his family, are quartered in the new residence of E. S. Hawks, on the bluff at the west end of Main street.

—Cooper and Ishair, the grocery and feed merchants of this place, have leased the new store room by Dr. Lewis now building and will remove their stock thereto a least August first.

—Chas. B. Bellinger, a popular jeweler has an enlarged advertisement in this issue. He has received a new stock of Jewelry and Silverware. His place is near Nettleton's Wagon shop.

—Elder John Sisley, of the Battle Creek Advocate, has a tent erected in the south part of the village and is holding meetings. The comet, with the assistance of Elder Sisley may bring the world to an end, but we are prepared.

—Frank McCarty, a carpenter employed on the Chicago Club House, fell from the town through a scuttle to the second floor of the building one day last week, a distance of twenty-eight feet. Strange to say he was not seriously injured.

—The ball at Lewis' new hall Monday evening was the largest ever held in Charlevoix county—one hundred and ten numbers having been sold. The hall at the Chicago Club House was also a success, seventy-four numbers having been sold.

—The report of the President's death on Friday, and of his extremely critical condition on Saturday, had the effect of reducing the ardor of the Celebration committees, and lessening their efforts. As a consequence the amusements and denials were not perfected as they should have been.

—Charlevoix real estate is still in good demand. J. Milo Eaton made a sale last week of the Allis Chamberlain property, three lots on the corner of Bridge and Clinton streets, for $1,500 cash. The purchaser is George H. Hill a wealthy citizen of Cortland, who will make such improvements thereon as the business of the village may justify. This is the largest sale of real estate which has been made for some time, and shows the opinion of outsiders as to the future of Charlevoix.

—The burglars were around Friday night. Fox's store was entered by a rear window, and the cash drawer rifled of about $27. Lewis & Ackert's drug store "touched" and two gallons of whiskey captured. At Schuler's saloon the thieves entered, but the day gave the alarm, and they fled without plunder. At Fox's store the burglars left the sash with which they forced the window and cash drawer. They were a small gauge and a scratch awl. The burglary was committed between the hours of eleven and two, as it was at that hour the thieves were driven from Schuler's saloon.

—Hon. D. Darwin Hughes, the attorney for the G. R. & I. R. R. Co., was in town Friday, and took a stroll through our beautiful village. Mr. Hughes was outlawed in his expressions of surprise and pleasure at the appearance of the town, and was not backward in stating that he considered it the finest town in Northern Michigan, and destined to become the leading summer resort. He believes that Charlevoix is coming into prominence very rapidly, and will not be long without a railroad, and will recommend the town to the officers and stockholders of the road which is to build a branch.

—The name car of the officers of the G. R. & I. railroad company, containing A. H. Ives, general passenger agent, and a number of railroad officials and friends, was side-tracked at Mclenny lately, and the party have gone into camp on their grounds on Bear Lake. The company have some fifty-four acres of beautiful land on the point between the two arms of Bear Lake, formerly an old Indian garden, and during each summer the railroad officials, with their wives, sons, daughters, cousins, uncles and aunts, drive dull care away in that beautiful retreat. A telegraph wire connects the camp with the main line, and as an operator is generally present, the officials know what is transpiring on the entire line of the road, the same as they would at Grand Rapids.—*Traverse Democrat.*

Marine Matters

—The following are the clearances from the port of Charlevoix for the week ending to-day:

June 28—Steamer Chester Wardell, 150 cords wood, 60 cords bark, owner to Chicago.
June 29—Schr. Mason, 35 cords wood, Newton to Milwaukee.
June 30—Steamer Blue Belle, 300 cords bark, owners to Pere Marquette.
June 30—Schr. Hercules, 150 cords bark, owner to Chicago.
July 1—Boom Supply, 90 cords bark, owner to Milwaukee.
July 2—Schr. Belle Brandt, 80 cords wood, Gaskill to Chicago.
July 2—Schr. Woodcock, 150 cords wood, Gaskill to Chicago.
July 2—Steamer Officer Krause, Allen Bay, Munich to Chicago.
July 2—Steamer Gem, 100 cords wood, 150 cords bark, Fox to Chicago.
July 2—Schr. Belle Brandt, 80 cords bark, Fox to Chicago.
July 2—Steamer Calypso, Old Lake Bay, Hines, Bear Lake, Fox to Chicago.

Now in port:

Schrs. Hiawatha, Wetherbee, Pleasure, Lake Geneva, Lansing, Sea Gull, Fair Play, Anna I. McGee.

GARFIELD SHOT

An Assassin Makes a Dastardly Attempt to Kill the President.

He Fires Two Shots, One of Which Threatened to Prove Fatal.

Garfield Sinks Steadily Till the Doctors Give Up All Hope,

When He Revives and at Last Accounts Was Improving.

A Growing Probability That the President May Recover. After All.

The country was startled and shocked Saturday morning by the announcement from Washington that President Garfield had been assassinated. While he was waiting at the Baltimore & Potomac depot, to take the train for his New England trip, Charles J. Guiteau, a man who was evidently insane, fired two shots at him, one of which took effect in one arm and the other in the abdomen. It was at first supposed that the latter wound must prove fatal, and, although the President retained consciousness, his condition grew steadily worse during the afternoon, until, when Mrs. Garfield arrived from Long Branch between 7 and 8 o'clock, the doctors had almost given up the last hope, and held out no promise that he would survive more than a very few hours.

At this time reports went through the country that the President was dead, and many cities and villages were draped in mourning, and steps taken to turn the celebrations of the Fourth into general mourning. At Charlevoix, Petoskey, Grand Rapids, and all Northern Michigan towns, buildings were draped, and a general gloom cast over the people.

Almost half past 8, however, a change in the aspect of affairs began to be noticed, and upon waking up, three quarters of an hour later, appeared in a more hopeful condition than at any previous time since he was struck down. His condition continued to grow more favorable during the night, and although it is exceedingly critical, and it will be almost a miracle if he recovers, the latest reports from his bedside indicate that there is at least a chance of his living out his four years term.

Guiteau is of French descent, and has always been a person of little mind himself. He lived for some time in Milwaukee and Chicago, several years ago, during which time he was a member of the Oneida Community, which is a religious fanatic, and making a complete failure in every attempt at practicing law or otherwise earning a living. His more lines near Milwaukee, and an interview, which a Sentinel reporter had with her, shows that Guiteau has always been flighty and half crazy. There is no evidence whatever that any other person had the slightest connection with the crime, or even the faintest intimation that he contemplated it.

THE LATEST

Telegraphic advices received at the Sentinel office on the P. M. yesterday, state that the President sleeps some, takes liquid nourishment, suffers but little pain, and feels better than at any time since being shot. His surgeons consider his case hopeful.

During Saturday P. M. Sunday, and Monday the Western Union telegraph office in this place exhibited the condition of the President frequently and kept his people fully enlightened free of charge.

For Sale.

A second-hand thresher excelsior, with ten horse power, in excellent condition for sale cheap. Paid cash. Call soon at Charlevoix Livery Stable.

7 J. MILO EATON.

Theatrical.

The Gilberts, supported by Fox's New York Comedy Co., played an engagement of four nights at Lewis' hall in this village last week. Charlevoix had been blessed with three shows in rapid succession, just previous to the arrival of the Gilberts, and our people were not hungry for amusements. As a consequence, the first night of their engagement was poorly attended; but no better evidence of their popularity can be asked than the fact that the attendance increased on subsequent nights, the last night the large hall being full. Maggie Mc Gilbert are the "stars," and they well deserve the distinction. Mr. Gilbert is a comedian capable a degree of perfection in the more distinguished roles in which he appears which elicits the admiration and applause of his audiences. As "Joshua Whitcomb," Denman Thompson's great role, he personates the New Hampshire farmer most admirably. As "Old Soldier" in which character John T. Raymond won so great honor and fortune. Mr. Gilbert exhibits a degree of genius and talent which in so young a man is rare and truly wonderful, and as a leading actor in the profession, Mrs. Gilbert was the center of all. As "Mlle. Cigarette" in "Fun in a School," "Cherokee" in "The Inebriate at the Restaurant," and "Clubs" in "Fun in a Photograph" her performances are true to the conception of the character, and have in them a vivacity and spirit which is actually charming. In her solos she elicited the heartiest applause, and was frequently encored. The support of the Gilberts is uniformly good—the company has no poor or indifferent actors.

They left Charlevoix with the good opinion of our people, and with the assurance of a hearty welcome on their return here in August, when they will play an engagement of six nights, with a new repertoire of plays, which will include "Pocahontas," "Huckleberry," The Duties" and other eminent dramas. They need have no fears of being well received here.

Charlevoix Summer Resort Notes.

—Mr. Sniff, of Newaygo, O., is building a neat cottage.

—Geo. Stanley and family of Kalamazoo, arrived Friday.

—A. S. Whipple of Kalamazoo, is erecting a cottage to rent.

—L. D. Bailey, of Kalamazoo, has moved into his cottage.

—Hon. Thos. Perry of Kalamazoo is sojourning at the Resort.

—Mr. Caulfield, mother of C. V. Cook, has arrived at the Resort.

—The Harwood family of Ann Arbor are occupying their cottage.

—J. P. Hart, of Ionia, is building a cottage, and will occupy it soon.

—Mr. Mitchell, of Kalamazoo is preparing his cottage for occupancy.

—C. N. Hedden and family of Chicago are quartered in their cottage.

—Mr. Van Vleck of Ionia has arrived for the season, with a $1000 new boat.

—C. H. Wood is grading and handsoming the terrace in front of his beautiful residence.

—C. V. Cook is greatly improving his beautiful cottage by the addition of a bay-window and other changes.

—Prof. V. M. Spalding, assistant professor of Botany at the Michigan University is sojoring at the Resort.

—J. L. Sabring and family are spending their summer in the East, and will not occupy their cottage this season.

—Mrs. Howland and family of Ypsilanti are at the resort, and are accompanied by a daughter Paul Spencer, of Ypsilanti.

—Arrivals at the Hotel Mrs. E. T. Judd and F. H. Judd, East Saginaw; Dr. L. Briggs, Auburn, N. Y.; H. Woodhouse and family, Kalamazoo, M. J. Gow and wife, Parkeville, Mich.

Hastings From Hayes—By Gum.

—Some of our farmers have commenced cutting clover.

—The gentle warblings of the hitch'em table-cloth peddler is heard in the land.

—There will be singing exercises at Lakeview on Sunday the 9th at 2 o'clock p. m.

—Mr. Amo Stafford took a trip over to Milwaukee on the Supply last Monday and returned on Wednesday. He enjoyed the trip highly.

—Mr. A. Ross had New Early Rose potatoes to eat the last day of June. We can not possibly let an over the North Pole as some people imagine.

—The comet that is visible in the northern sky produces a fine appearance during a clear knee night. It is said to be traveling not less than 9,000,000 miles of tail behind it.

—The Overseers of Highways are now engaged by repairing the roads. Those many who have to work on the road are working to amend the eight hours law. A day's work and pay is [illegible]

The Questions of Children.

Hunger is a constant trait of childhood. Its appetites are well-nigh omnivorous. It is always clamoring for something to eat. In the middle of the day, and at the middle of the night, and between times, it asks to be fed. This craving for food grows curiously, not only the body but the mind of children. Curiosity—only another name for the hunger of the intellect—is an unfailing sign of a fresh, spontaneous, growing state of the child faculties. It is loath; children are intensely curious to find out things, are insatiable in their mental appetites; are perpetually on the qui vive; fairly bristling with inquiries; are swimmingly with irrepressible, startling, vivacious and curious questions. They form a sort of universal committee of investigation. They are constituted by nature that they must pry into things.

I remember a common answer which I used once in a while to hear after asking almost anything that had whetted my childish curiosity. "What is this for?" I had in my simplicity inquired "It is to make little folks ask questions." was the provoking reply. This phrase, which is often intended as a satirical rebuke, is expression of smart ness and as a piece of senseless wisdom all in one, has in it more truth and depth than any one knows who has ever in earnestness used it to choke off and keep back the current of inquiries which bubbles up from the mind of childhood that has in reality created the universe so as to make little children ask questions. It has so set things up as that they prompt inquiry and inspire investigation and stand all agape at the terrific. He has endowed the mind with its restless desire after information, its insatiable quickness to question, its unbounded inquisitiveness. It is He who keeps up the curiosity alive on the earth a generation of animated interrogation points.

Well, now, this being so, what of it? Surely, these questions afford numerous and invaluable opportunities to instruct children. Hearing without saying a word, the teacher is advantaged by the receptiveness of his pupils' minds. If they are curious, often, above all, is the very time which he wishes to explain and enforce their answers to his own queries are sure. That movement is his golden opportunity, his one chance, the accepted time to drive home, first and heaviest, his fastest the truth in the soul. This state of clearness, of receptiveness, of attention, of interest, is denoted in children by the questions they ask.

Do not reprove a child, then, for asking questions. Each time its lips and eyes and voice interrogate you, there stands at an open door, inspecting out the thing upon world where we live, a tiny human spirit waiting to know what is going on outside of itself, eager to get knowledge, brimming with desires after information. Do not rudely slam the door in the face of that inquiring and pleading soul. Let not the agonized and struggling little being be driven for the time, by a harsh and cruel rebuke, back into the dark and lonely caverns of its mind again. Respond sympathetically and kindly to its inquiries. Give what attention to its questions, and by all means use the opportunities wisely and faithfully that the questions often afford.

Again, the interrogations of children reveal their characters. They show the best, the ludicrous, the turn, the trend of the mind. Some of the very oddest assumptions for days ponder some fact in nature, or some occurrence in the household, or some incident in his history, without giving sign of what has been occupying his thoughts. At last out will pop a question involving the whole subject. Here the parent or teacher has a means of sounding the hidden depths of the mind, of fathoming the lower strata of the spirit, of finding out some of the things that are engaging the attention of the child. Note what sort of questions the child is fond of asking, around what center they usually revolve, what kind of curiosity it has, and you will have valuable material for the study of the child's character.

I suppose I need hardly suggest, in passing, that the questions of children are often of much service to grown people, in setting them on the track of knowledge which they could not find out themselves, and which they could not easily seek without such prompting. Not half the questions of the average child can be answered off-hand by the average man or woman. Many of them cannot be answered at all by the very wisest of our teachers, living or dead. Such serve to show us how far we are on the horizon of our ignorance, how small the orbit of our knowledge.

Very often a child question proves to be one which has been asked by profound philosopher and sage—also! in vain—for thousands of years. Even then it may start trains of thought more deep and profitable than any suggested by your own meditations

If you heed at all the questions of the little ones around you, you will be driven all the time to the cyclopedia, the atlas, the globe, the Bible, in order to qualify yourself to give intelligent answers. You will need to study the questions of your own mind with a greater audacity and closer scrutiny. The sum of their investigations in natural science will stump you. The solutions which children have made to the sum total of knowledge in the world to this way are considerable. The race is vastly wiser today because the children all through the ages have pestered the old folks with penetrating and perseving questions. They have probed and searched everybody within reach by their restless intellects, as just as a means of protection, an armor of defense, answers have been sought out and hold in readiness as a ward off and keep in check the attacks of these inverents cross-questioners. A single suggestion will close what I have to say: Make a list of the questions asked by children with whom you happen to be associated. Put down, for a week or two, every inquiry they put to you.

You will be interested, instructed, amused and amazed at the result. As an illustration of the following which I have noted as they were asked at intervals within the last twenty four hours, by an eight-year-boy of my on his summer vacation:

If Adam and Eve were white, how did they "born" children who were red and black and yellow?

How did the Indians get over to America?

If the climate over here made the Indians red, why did not Columbus and his party grow red, too, when they came over, and why are we not that color?

What makes the sun keep burning? Does God put things in it all the time to keep up the fire?

Sometime won't the sun quit burning when everything is burned up?

If this earth is even going to be burned up, will it fall into the sun and turn up there?

Why cannot a balloon go up to heaven?

What do men do with batteries and bugs when they catch them in their nets?

Are there people living in the stars? How do the men know the stars are worlds like ours?

Why cannot a man build a ladder up to the moon?

What makes water run through the earth so that when you dig down you can make a well?

If there is fire in the center of the earth, who kindled it? And how does it cause that the water does not leak down and put it out?

What makes a whippersnapper snap?

How can a snake crawl when it has no feet?

Who first discovered fire?

Who first discovered God?

How does it cause that coal burns and wood don't burn?

Why does wine make people drunk?

Who gave names to things, such as spoons, leaves, trees and telephones?

My book says that elephants multiply very much, but none can be found in Asia and Africa, used to grow wild here. Why do they not grow here?—*The Christian Intelligencer.*

Emigration of Animals.

Badgers, says a naturalist, which are ordinarily solitary animals, have been known to emigrate in numbers, and under the guidance of an apparent leader, proceed on a tour of emigration. Migratory lemmings, attended by little sheep dogs, at midnight buried himself encountered by a badger, who knew the state well, would be safe to assume, that he began it; and that he was driven, first and heaviest, by a hedge at hand, and was well assisted by his dog, both dog and man were compelled to beat a retreat.

In another case of falling in with these wanderers by night, my informant judged the party to be nine or ten in number. They grunted and gallered almost like pigs, followed their leader through a field till he passed through a gate, and then left him to himself. Another person vounted twelve in company, and the smallest of these was distinguished by a slight limp of the foot. In the meantime the scouts by means of sheets, personal observations show that the insect hesitates to jump on to white-colored cloths, but has no objection to dark. The difference to the take on the different colored materials is striking. Of all the methods of extermination, the most effectual is the rubbing out with the foot in the early morning and in the evening when the nature of the ground will allow of its being adopted—for instance, when the locust descends to the plains in the minor stage of its growth. The insect on being first hatched weighs about 500,000 to the ton, and a closely packed line of men shuffling their feet obliterate whole armies.

MISCELLANEOUS.

—Astronomer Proctor says the world will last 241,883,600 years yet.

—A Boston gentleman paid $100 for one cent of the year 1875 at Philadelphia, the other day.

—Thung, a Chinese coxswain, steered Yale's right-oar last year, and will be in the same again this season.

—A Canadian court has decided that a bull dress, not being "ordinary and necessary clothing," is not free from seizure for debt under the Canadian exemption law.

—Fort Benton, Montana, built over thirty-five years ago, is almost a complete wreck. The winds and storms of nearly half a century have warped and eaten into the adobes.

—"I shall file," said an old English doctor the other day, "under the firm belief that human science will yet lengthen the years of life from an average of seventy to an average of 100."

—Of the famous Grenadier battalion that accompanied Napoleon I. to Elba after his first abdication at Fontainebleau, the last survivor, Johannes Raspail, expired in Paris a few days ago at the advanced age of ninety-six.

—A swarm of bees in the Sweetwater Valley, Cal., settled on a rattlesnake that was six feet in length, twelve inches in girth and had twenty-two rattles. They stung him violently, so that he was blinded and he was easily killed with a spade.

—A Washington girl has highly interesting hair. Its color used to be a light blonde. Dr. D. W. Prentiss reports to the Smithsonian Institution that he gave her jaborandi, a Brazilian plant, as a cure for blood poisoning. Her hair soon began to darken, and in four months was almost black.

—A "National Dress Society" has been formed in London, the object of which is to promote the adoption, according to British fashion and convenience, of a style of dress based upon considerations of health, comfort and beauty. The annual subscription is only half a crown.

—The London *Economist* estimates the average emigration of the entire capital-producing force, at $1,065, an estimate which agrees with the opinions of political economists generally. Looked at in this light the United States is being ravished at the rate of the amount of $4,000,000 to $5,000,000 daily.

—The clock in the old church-tower at Newark, N. J., has been keeping bad time. A thorough examination revealed a mass of hay, twine, cotton, grass and feathers tangled in the wheels. A pair of birds had tried for weeks to build a nest in the machinery, which tore their work to pieces. They kept on, notwithstanding, until their persistence stopped the wheels. They had so completely hidden their operation that they were carrying it on in cog.

—The widow of an Ambassador at Berlin took an immense fancy to a good looks and attractive manners of a young medical man, and, there being nothing the matter with her, demanded his constant attendance, besides introducing him to many of her friends. On visiting her lately, however, he was stopped in the hall, and presented her ladyship's own maid came to say that, unfortunately, my lady could not see him. "Going out?" "No, better; she's really unwell, and has had to send for a physician."

—Spanish history says that a ship sent to South America in 1809 to collect tribute from the colonies of Spain was sunk near the mouth of the River de la Plata, with $9,999,999 aboard. The money is supposed to lie under at least a hundred feet of the ocean, in a strong iron safe. An expedition has just sailed from Philadelphia to recover this treasure. The leader is Captain Charles A. Jones, who has already made a fortune in the South American wrecking business. He goes in an iron steamship, supplied with apparatus for removing the deep mud supposed to cover the dollars.

—Small-pox, writes Dr. W. B. Carpenter to the London *Times*, is the disease over which general sanitary measures have little or no control. Whilst cruscver contagion is conveyed, any "unprotected" person, is liable to be attacked by it. The experience of the Icelandic epidemic is most significant in this respect. An Icelandic sailor went to Denmark, there took the small-pox and died. His clothes were sent back to his family in Iceland, and from the importation of the poison, notwithstanding the quarantine of the population, was fatal to 18,000 persons in the course of six months—many, it is supposed, from not knowing the disease who had previously had it.

—A little Cincinnati boy has been dearly wanting away with money supplanted disease for several months. The German women of the neighborhood concluded that he was a victim of witchcraft, and sent a committee to inform the parents, who did not accept the explanation, but permitted an examination of the bed. There is a German superstition that witches cause feathers in a bed to weave themselves into a wreath, and that whoever sleeps on it will become ill, dying when the ends of the wreath come together. Sure enough, the women found in the boy's bed what they declared was a witch's wreath. It was sprinkled with salt and burned, in accordance with a traditional method.

—Assaf Pasha has sent 500 men to the plain of Troy to aid in the destruction of the locusts. In the line of the day they are taken by driving them on to sheets; in the morning and evening, when stationary and massed as bulk sheets, they are stamped or rubbed out with the foot. In the meantime the locusts by means of sheets, personal observations show that the insect hesitates to jump on to white-colored cloths, but has no objection to dark. The difference to the take on the different colored materials is striking. Of all the methods of extermination, the most effectual is the rubbing out with the foot in the early morning and in the evening when the nature of the ground will allow of its being adopted—for instance, when the locust descends to the plains in the minor stage of its growth. The insect on being first hatched weighs about 500,000 to the ton, and a closely packed line of men shuffling their feet obliterate whole armies.

SCHOOL AND CHURCH.

—The oldest educational institution in the country is the Boston Latin School.

—There are forty-two Baptist churches in the District of Columbia. Of those ten are white and thirty-two colored.

—It is said that the Rev. George Allen, of Massachusetts, is the only ordained living who attended the first meeting of the American Board of Foreign Missions.

—There are 266 city missionaries in New York City, and the number is so small they may make in the course of a year only the sick and poor is estimated at 40,000.

—An American lady is attending the lectures of the celebrated physiologist, Professor Virchow, at Berlin. This is the first instance of a female student at the University of Berlin.

—Tobacco is prohibited to the students of Oberlin College, Girard College and the Naval School of Annapolis. A similar rule has been recommended for the Military Academy Board of Visitors. Cornell University nearly all the students have voluntarily signed a pledge of abstinence.

—Most of the Methodist ministers in Arkansas receive very poor pay. Yet those self-denying men have just contributed from their own salaries enough money to support a foreign missionary. This was done in consequence of the presence of a resolution introduced into Conference at its recent session.

—The Baltimore Biblical Institute has finished its new building, in which it has facilities for educating 150 students. Ninety-six candidates for the ministry have been sent to it by the various conferences which have contributed to the support of this institution. Those are all colored people, as it is only for them that this theological school is carried on.

—The southwestern provinces of India have made astonishing progress in free education. There is hardly a village, within reach of a school, without audience, although in many it is taught reading, writing, arithmetic, geography and history of India, and in the higher classes algebra and the Euclid. These schools are governed by local committees made up of Europeans and native gentlemen.

—Bishop Wightman, of the Southern Methodist Church, has been confined to his house by illness since last October. He is now so much better as to have been unable to leave his bed. For some weeks his recovery was not looked for. He is now so much better that he has left Charleston for Summerville, which is about twenty miles off. He hopes to engage in his regular duties in a few weeks.

PUNGENT PARAGRAPHS.

—"This is sworn." as the man remarked when the bees went through his fingers.—*Hartford Journal.*

—Heavy weight clothing—suits for which the tailor waits for his pay.—*Hartford Journal.*

—It does not always follow that a man is a successful author because he is nothing the matter with her, demanded his constant attendance, besides introducing him to many of her friends. On visiting her lately, however, he was stopped in the hall, and presented her ladyship's own maid came to say that, unfortunately, my lady could not see him. "Going out?" "No, better; she's really unwell, and has had to send for a physician."

The Virginia Readjusters.

The general interest in the Readjuster party and movement in Virginia is not surprising. The Bourbon rule throughout "the South," is virtually a new, rugged resistance to the influences which would restore the prosperity of that part of the country. The primary and essential condition of sectional harmony is fair play, and especially a free vote and an honest count in the South-ern States. As long as it is known that the Solid South is kept "solid" by Democratic fraud and violence in order to control the 138 Electoral votes, which, with those of two or three Southern States, would give the Southern Democracy the power to rule under the National politics must be reactionary and sectional. This situation has injured every industry and interest by necessitating strict party discipline to insure success in the general election. How to change the situation, therefore, has long been the problem. The reason why citizens of the South-ern States do not care to ally themselves with the advocates of free votes and a republican name have been obvious. Yet it was plain that the color line must soon rise above party, and that as long as dishonest elections were the Democratic rule, the only hope of a party of white native citizens should appear in any State honestly resolved to protect and to defend the ballot. Even instead of ostracizing and suppressing leaders of a political breaking out should be opened.

This is precisely the chance which the Readjuster party of Virginia presents. It takes its name from a proposition to readjust the old debt by paying seventy-two-thirds of it, and leaving the other third to Free Virginia, proving that the repudiation is for the principle, to all holders, at a rate which the revenues of the State will warrant. The repudiation just so far as the rate which the revenues will warrant differs from the rate originally fixed, but the whole State is to make the revenues warrant the most economical rate. The rate is one on those only by taxation; but the bondholders, while denouncing the Readjusters as repudiators, do not necessary increase of taxation. To this end, the Readjusters propose to tax the colored voters, the Readjusters propose to repeal the capitation tax, which has disfranchised the poorer classes of the party colored citizens, to defend a free vote, and to secure a fair count. In other words, the party proposes to give the colored citizens fair play. As the Readjusters are now strong in the State, "the plain people," they are naturally very strong, and the vote-purchasing which they offer to Republicans, especially colored Republicans, is very powerful. It is an artifice of the Democratic party to seem long foreseen as the only kind under which the "solid South" is likely to dissolve, offering an alternative which has been presented to Republicans in every Southern State, and which, instead of bringing the honest financial policy of the Republican party in order to secure other advantages which seem to many such Republicans much more pressing.

The Readjuster platform contains a cordial and hearty proposition to strengthen the general good understanding of the country by honestly maintaining the public faith, and thereby laying a hearty welcoming and perfect basis of peace. It tried to all who choose to throw in their fortunes with those of Virginia. It is a frank and significant declaration. The Democratic Readjusters has not believed their words. They are Democrats who voted for Hancock, but who have broken with the regular State organization of their party; and while there is undoubtedly the thing on their self-seeking and hypocrisy among them while are fanatical in all parties, they share a genuine sympathy with the fundamental Republican policy of honest elections which contrasts most favorably with the action of the Bourbon Democrats, who are carrying on a campaign of intimidation and fraud in two States, and intending by more reactionary. The letter of a late correspondent in Missouri, an ex-Confederate soldier, says plainly that the essential significance of the Readjuster movement is not financial, but political. It is the insurrection of the younger Southern voters, who are weary and impatient of a domination which paralyses "the South," and as the debt question has become settled in one, it can hardly be doubted that the Readjusters who welcomed colored delegates to their Convention and nominated an old Union man and Republican as Lieutenant-Governor, will have a strong Republican support at the best practicable policy in the actual situation.—*Harper's Weekly.*

—Quite a notable engineering undertaking has just been completed in Italy, in the shape of a long bridge over the Volga, on the Syracuse-Catania railway, connecting the cities of Syracuse, in the interior of Sicily, with that of Sarnia. The width of the river is nearly a mile, and, as it is liable to the occurrence of heavy spring floods, the piers—of which there are fourteen altogether—had to be built very deep and above mean water level, the depth of the water being more than fifty feet. The great girders, 324 feet long and seventy feet wide, were all riveted and put together on the bank ready for the river, and then floated to their positions. The whole cost of the structure, which is regarded as a model of its kind, was 7,000,000 silver rubles.

—A new ballot-box has just been submitted to the French Government. It is very strong, and the voter goes to a different key, and an apparatus which clips a stub or corner from the ticket deposited by the elector, and drops the rest into one part of the box, the ticket getting into the other division. Simultaneously the machine registers on a tablet before the voter the number of tickets which have been deposited, so that any tampering with the stubs, and both with the "roll-tabs," and the voter sees for himself that his ballot has been cast and taken account of.

—Forty thousand wax candles are instantaneously lighted by a single match in the Palace Royal, Berlin. The wicks are previously connected with a thread spun from gun cotton, on fire, one end of which all the candles in the 700 apartments are lighted simultaneously.

The Chattanooga Reception.

It is a striking proof of the accomplished reconciliation of the North and South that the proposed Chattanooga reception to the Army of the Cumberland should be accepted by the country as a matter of course. It is announced that the ex-Confederate soldiers living in that vicinity have formed an organization for the purpose of making a demonstration of welcome on the part of the whole body of ex-confederates of the South. It is the first meeting of the army of the Cumberland on the South since the war, and it is designed that the reception shall be a notable tribute of friendliness from the conquered armies to one of the armies which conquered, and on the very scene of its triumphs. All the prominent surviving ex-Confederate generals will be invited, and it is believed that many will be present. The attendance of ex-Confederate soldiers and sailors and many regiments of the Southern States will be assured. When it is remembered that this demonstration will take place in a little less than eighteen months after the battles of Lookout Mountain and Missionary Ridge, and a scene so reconciliation on the battlefield itself will be a spectacle upon which the historian will look with a thrill and will excite the admiration of men in other lands accustomed to see the most horrible of civil wars prolonged for generations and often for centuries

It is a fitting time for a display of unity in the celebration, and the country will receive the demonstration without surprise. There have been many cordial gatherings before now of ex-Federal and ex-Confederate generals, among none, perhaps, which the surrounding circumstances were more appropriately suggestive as this. It will not be a new thing to see soldiers who have worn arms against each other now clasping hands and sighting their battle-cries as a sign of their peace. Remarkable as the Chattanooga reunion will be, when it is remembered how short a time has elapsed since the war, it will commemorate, it becomes still more remarkable that so few of that the country. Having grown used long ago to such scenes, will witness the demonstration but it may not get too much and dry. It should be trampled and packed as much as possible, and will be sent only moderately, and after two or three weeks, should be turned, so that the outside of the pile may be put into the centre and have its share of the heating and fermentation. If the weather is very dry it would be advisable to throw considerable water on the manure as it is piled.

—Queen Pudding.—One pint of bread crumbs, one quart of sweet milk, one cup of sugar, the yolks of four eggs well beaten, butter the size of an egg, grate the rind of one lemon, and bake until the whites of the eggs beaten to a froth and one teacup of white sugar, to be spread on the top of the pudding. After it has been baked until done but not watery; put in the oven carefully that it can seize any piece it selects to play or to receive from the board, are puzzles, says the London *Times*, which chess-players fond of problems may set themselves to solve.

—Some boys, swimming in Cane River, Louisiana, cornered a buffalo fish weighing forty pounds, and caught him with their hands.

The Culture of Special Crops.

Special crops are becoming both profitable and popular. It is a mark of enterprise for a farmer to leave the old and beaten track and lay out a new one for himself, and in no way often find that it pays to do this. Many farmers are merely scratching over their land in the course their incomes, which are narrowed and shortened by the low prices of grain and other staple products, which since the war immensely grown men Western land that is now a dollars per acre than upon farms costing ten times as much. As it has turned out this time have come the best in this direction who leave given their attention to special crops. Crops of this kind depend for their profit upon nearness to markets or upon the possibility of making a market for them. The large cities and towns supply good markets for such special products as poultry, sweet corn, cabbage, cauliflower, celery, small fruits, melons, cucumbers for pickles, and fresh vegetables of various kinds. But these crops require special knowledge, skill and attention, and are often not carried on by the farmer, but by gardeners. While nothing is wrong with us here in this country, we have a success for. As a rule, that cause which is the most successful is the result of a modern scientist, with all his jargon of incomprehensible technicalities covering his still more incomprehensible blunders or want of ideas, to ferret it out. To develop the means of readiness and to be used with success. As a phonographer, she says myself, I have had a chance to see a good deal of the use of shorthand, and I am convinced that it is destined to be very much more widely used than it is at present. Its practical value for taking down lectures, sermons, addresses, and the like, is very great. Many persons who would be glad to have such matter in their possession, and who would read it if they had it, are deterred from getting it by the fact that they cannot afford to pay for it. Shorthand would enable them to take it down themselves, and would thus bring it within their reach. Then, again, shorthand is a very useful accomplishment for a lady. It is a good thing for her to be able to write a letter in such a way that she can read it herself, and that no one else can read it. Besides, it is a very pretty accomplishment, and I am sure that many ladies would be glad to learn it if they could find a convenient opportunity. I should be very glad to see a class formed in Boston, and I would gladly give my services as a teacher, if I could be of any use."

Posing for Photographs.

A very stout gentleman, more than six feet in height, with a jolly face and a twinkling eye, sat in a capacious hotel chair smoking calmly and gazing critically at passers-by. He looked affably to every third man who passed, occasionally re-hanging a word or two with a friend. A prominent city politician passed, and his head, glanced at the large gentleman, stopped and said,

"How are you?"

"First-rate. How'd you like them?"

"Immense. Take care of yourself."

"Never fear."

Away went the politician. The large gentleman took a fresh cigar, winked at the writer, and said, with a chuckle:

"So I should judge. Dogs?"

"No. Pictures."

"You don't say."

"Yes, sir, pictures; photographs of himself that tickled him nearly to death."

"You're a photographer, then?"

"I'm a pachyderm. I pose persons, and have done so ever since 1850, when I began to earn a living by means of my art. I have the honor to be the oldest man in the business. I'm a special artist. Sit, and the whole machine is at your service. Dogs? Quite thin. It is. Pictures. Yes, sir, I'm a pachyderm. I pose persons, and have done so ever since 1850, when I began to earn a living by means of my art. I have the honor to be the oldest man in the business. I'm a special artist. Sit, and the whole machine is at your service. Dogs? Quite thin

The Questions of Children.

Hunger is a constant trait of childhood. Its appearance is nigh on to uncanny. It is always clamoring for something to eat. In the middle of the day, and at the middle of the night, and between times, it asks to be fed. This unvarying characteristic marks not only the body but the mind of civilized children. Curiosity—only another name for the hunger of the intellect—is an unfailing sign of a fresh, spontaneous, growing state of the child faculties. In health children are intensely curious to find out things; are insatiable in their mental appetites; are perpetually on the qui vive; fairly bristling with inquiries; are exuberant with impressible, startling, vivacious and curious questions. They form a sort of universal committee of investigation. They are as constituted by nature that they need pry into things.

I remember a common nuisance which I used once in a while to hear afterward about something that had whetted my childish curiosity. "What is this for?" I had in my simplicity inquired. "It is to make little tabs ask questions," was the prompt reply. This phrase, which is often intended as a settler, a rebuke, an expression of annoyance, runs on a par with "curiosity killed the cat," and other such like proverbs of ancient wisdom, all in one, has in it more truth and depth than any one knows who has never in summertime used it to choke off and keep back a torrent of inquiries which bubbles up from the mind of childhood. God has in reality created the universe as an immense question, and bids us ask questions. He has so set things up as that the proper and inspiring answers to questions and clear all manner of questioning. He has endowed the mind with its restless desire after information, its unconscionable questionings, its presistent inquisitiveness, in proportion as He has endowed the universe with its endless stores of knowledge in the world in this way are considerable. The race is vastly wiser than the child. Even the children of the third the ages have mastered the old folks with parrotting and fool asking questions, have probed and searched everybody within reach by their restless inquiries, so that as a means of progress, an armor of defense, answers have been forged out and held in readiness to ward off and keep in check the attacks of those innocent questioners. A single suggestion will close what I have to say. Make a list of the questions asked by children with whom you happen to associate. Do this for a week or two, every inquiry they put out.

You will be interested, instructed, amused and amazed at the result. As an illustration see the following week I have noted as they were asked at intervals, within the last twenty-four hours, by an eight-year-old boy off on his summer vacation:

If Adam and Eve were white, how did they "know" children who were red and black and yellow?

How did the Indians get over to America?

If the climate over here made the Indians red, why did not Columbus and his party grow red, too, when they came over, and why are we not that color?

What makes the sun keep burning?

Does Uncle Sam pay wages as we do?

Sometimes won't the sun quit burning when everything is burned up?

If the earth is ever going to be burned up, will it fall into the sun and turn up there?

Why cannot a balloon go up to heaven?

What do men do with lotteries and bugs when they catch them in their nets?

Are there people living in the stars? How do the men know the stars are worlds like ours?

Why cannot a man build a ladder up to the moon?

What makes water run through the earth so that when you dig down you can make a well?

If there is fire in the center of the earth, who kindled it? And we know it came that the water does not lock down and put it out?

What makes a shipwrecker soap?

How can a snake crawl when it has no feet?

Who first discovered fire?

What is electricity?

How does it come that coal burns and rock won't burn?

Why does sour cider make people drunk? Who gave names to things, such as spoons, knives, and buttons?

My book says that elephants and other animals that now are loosed in Asia and Africa used to grow on here. Why do they not grow here now? —*Jane Bowman Emery, in Cheerful Days.*

Emigration of Animals.

Badgers, save a naturalist, which are ordinarily solitary animals, have been found in societies in a troop, and under the guidance of an apparent leader, traversed on a tour of emigration. Many insects, attended by his sheep-dog, at midnight found himself encountered by half a dozen of these animals, whom he took to be parents with their young, proceeding to some distant spot. On his observing him they did not wait for the attack, but began it, and before he was rescued a stake from a hedge at hand, and was well assisted by the dog, both dog and man were severely wounded.

In another case of falling in with these wanderers by night, my informant judged the party to be nine or ten in number. They greeted and gathered round him, and followed him up closely through a field till he passed through the gate, and then they left him. Another person counted twenty-one in company, and the smallest of these were placed in the middle of the escort. That at these times they will attack any that they encounter in their way in the opinion of the few persons I have known who have had opportunities of observing these animals. In one case where a man was attacked he was compelled to kill a dozen of them before a defense and fling them at his assailants with all his might.

A similar habit in migration in lands is reported of polecats; and in our case, by accounts which I have had, a shark right a wayfaring man encountered a large number of these creatures, and driven off by the sounds they utter rather than by a kicking, and then accompanied by the sounds they utter rather than by a kicking, and then accompanied by their sight, when they announced his coming to the inhabitants of the burrows.

New York is sending corn to Ecuador to stock South American rivers.

MISCELLANEOUS.

—Astronomer Proctor says the world will last as long as 100 years yet.

—A Boston gentleman paid $100 for one cent of the year 1875 at Philadelphia the other day.

—Chung, a Chinese contraban, steered Yale's eight-oar last year, and will be in the stern again this season.

—A Canadian court has decided that a ball dress, not being "ordinary and necessary clothing," is not free from seizure for debt under the Canadian redemption law.

—Fort Benton, Montana, built over thirty-five years ago, is almost a complete wreck. The winks and storms of nearly half a century have warped and eaten into the adobes.

—"I shall die," said an old English doctor the other day, "under the firm belief that human senses will yet be developed in the years of life from an average of seventy to an average of 1,000."

—Sixth grade, writes Dr. W. H. Carpenter to the London *Times*, is a disease over which general sanitary measures have little or no control. Whitecrescent contagion is conveyed, as "unprotected" person is liable to be attacked by it. The experience of the Icelandic epidemic is most significant in this respect. An Icelandic sailor went to Denmark, there took the small-pox and died. The clothes were sent home to his family in Iceland; and that importation of the poison, notwithstanding the sparseness of the population, was fatal to 16,000 persons in the course of the epidemic, which is expected to subside.

—Mr. Frederick Law Olmsted, who has declined as new building, in which it lies dedicated as new building, in which it lies feed to the accommodation of 150 students, sents to the Smithsonian Institution that he gave her photograph, a Brazilian plant, and is sure the blind sonnetist. Her half sons began to darken, and in four months was almost black.

—A National Dress Society" has been formed in London, the object of which is to promote the adoption, according to individual taste and convenience, of a style of dress based upon considerations of health, comfort and beauty. The annual subscription is only half a crown.

—The London *Economist* estimates the average munigrum, in capital or capital-producing form, at $1,000, an estimate which agrees with the opinions of political economists generally. Looked at in this light the United States is being enriched at present to the amount of $1,000,000 or $2,000,000 daily.

—The clock in the old church-tower at Newark, N. J., has been keeping bad time. A thorough examination revealed a mass of hay, twine, cotton, grass and feathers tangled in the wheels. A pair of birds had tried for weeks to build a nest in the machinery, which tore their work to pieces. They kept on, notwithstanding, until their persistency stopped the wheels. They had so completely hidden their operation that they were carrying it on in cog.

—The widow of an Ambassador at Berlin took an immense fancy to the whole family of the late Ambassador to Washington. Hence the other day, when she was about to leave Berlin for a visit to Paris, she sent for the children and presented to each of them a gold watch, with her portrait set in the cover for a keepsake. The gift was accompanied by a request that they would not show the watches to their father, as she wished to surprise him with them herself.

—Mr. Lee Meriwether, a Georgia editor, has been in Washington for some time, and has been interviewing the Supreme Court Judges. He has published the result of his labors in the Atlanta *Constitution*, and has given a very interesting account of the personal appearance and habits of the Judges. Mr. Meriwether says that Justice Field is the most striking figure on the bench. He is a tall, slender man, with a long, white beard, and a face that is full of character. Justice Bradley is a large, fine-looking man, with a massive head and a strong face. Justice Miller is a big, burly man, with a rough, weather-beaten face, and a general appearance of ruggedness. Justice Harlan is a handsome man, with a fine head and face, and a splendid physique. Justice Gray is a small man, with a delicate face and a nervous temperament. Justice Bradley is the most scholarly looking man on the bench. Justice Miller looks like a man who has had to fight his way through the world. Justice Field looks like a man who has had a good time. Justice Harlan looks like a man who is having a good time. Justice Gray looks like a man who is not having a good time.

SCHOOL AND CHURCH.

—The oldest educational institution in the country is the Boston Latin School.

—There are forty-two Baptist churches in the District of Columbia. Of these ten are white and thirty-two colored.

—It is said that the Rev. George Allen, of Massachusetts, is the only minister living who attended the first meeting of the American Board of Foreign Missions.

—There are 261 city missionaries in New York City, and the number of calls they may make in the course of a year on the sick and poor is estimated at 500,000.

—An American lady is attending the lectures of the celebrated physiologist, Professor Virchow, at Berlin. This is the first instance of a female student at the University of Berlin.

—Tolstoy has prohibited the students of Oberlin College, Girard College and the Naval School of Annapolis. A similar rule has been recommended for West Point by the Board of Visitors. At Cornell University nearly all the students have voluntarily signed a pledge of abstinence.

—Most of the Methodist ministers in Alabama receive very poor pay. Yet these self-denying men have just contributed from their scanty means enough money to support a foreign missionary. This is done in consequence of the pressure of a resolution introduced into Conference at its recent session.

—The Baltimore Biblical Institute has dedicated its new building, in which it lies dedicated as new building, in which it lies feed to the accommodation of 150 students, sents to the Smithsonian Institution that he gave her photograph, a Brazilian plant, and is sure the blind sonnetist. Her half sons began to darken, and in four months was almost black.

—A "National Dress Society" has been formed in London, the object of which is to promote the adoption, according to individual taste and convenience, of a style of dress based upon considerations of health, comfort and beauty. The annual subscription is only half a crown.

—The London *Economist* estimates the average munigrum, in capital or capital-producing form, at $1,000, an estimate which agrees with the opinions of political economists generally. Looked at in this light the United States is being enriched at present to the amount of $1,000,000 or $2,000,000 daily.

The Virginia Readjusters.

The general interest in the Readjuster party and movement in Virginia is not surprising. The Readjusters are strengthening. The Bourbons are virtually a mere dogged resistance to the influences which would ensure the prosperity of that part of the country. The primary and essential condition of sectional harmony is fair play, and especially a free vote and an honest count in the Southern States. As long as it is known that "the South" is kept "solid" by Democratic fraud and violence in order to create fraud and violence in order to control the Electoral votes, which, with those of two or three Northern States, would give the Southern Democrats control of the Government, so long our National politics must be essentially and sectional. This situation also importunately affects all minor politics to encourage party discipline to insure success in the general election. How to change this situation, therefore, has long been the problem. The reasons why citizens of the South who are not to care to ally themselves with the colored citizens under the Republican name have been plain. But it was plain that the color line must mark the division between the parties so long as dishonest elections were the Democratic policy. But whenever a party of white men arises which can appear in any State honestly resolved to maintain an honest ballot-box enough interest of estranging and suppressing it, a chance for a political breaking would be created.

This is precisely the chance which the Readjuster party in Virginia offers. It takes its name from a proposition to re-adjust the State debt, and it is the only party in it, and leaving the question entirely aside, it is the party which intends to West Virginia, providing that there shall be a fair count and equal opportunity at the polls. It appeals to all holders, at a rate which the revenues of the State will warrant, and to all the people of the State to make the revenues warrant the largest possible rate. This can be done only by taxation, but the Readjuster party, keeping steadily in mind the general principle, does not propose the necessary increase of taxation in the form of a tax upon property. In support of the colored voters, the Readjusters propose to repeal the capitation tax, which bears heavily upon great numbers of the poor colored citizens, to whom it is a fair sum. In other words, the party proposes to give the people what they want. And the Readjusters are composed large of the plain people, they are entirely in earnest, and the attraction which they offer to Republicans, especially to colored voters, is very great. Whether it is an alliance of the kind which has been proposed between the Republicans and "the solid South" is likely to be seen in the coming election, but the obstacles, offering an agreement between the Republicans in many Southern Congressional districts, of recognizing the Readjuster principles of the Republicans party in order to secure other and larger results, would be very much Republicans much more pressing.

The Readjusters' platform contains a cordial and liberal resolution to strengthen the general government, regarding of the country by honestly maintaining equal rights, and by promoting the welfare and prosperity of every class of its people. The Readjuster party is in favor of the Union, and it is a frank and significant declaration, which no Democratic platform in the land, and the conduct of the Readjusters has shown that the platform is sincere. They are Democrats who voted for Hancock, but who have broken away from the organization of their party, and while there is undoubtedly a personal opposition to Mahone, the hypocrisy among them which are familiar in all parties, they have no sympathy with the fundamental Republican policy of honest elections which contrasts so disgracefully with the action of the Bourbon Democrats, who are ready to use fraud, and intimidation, and violence to secure their ends. There is more reactionary. The letter of acceptance recorded in Garfield and Conkling's Cumberland in the South since the war, and it is the growth of the Readjuster party. It has been found easier to conceal elections by fraud than by force, the last that has been so openly practiced in the South by freely submitted by the Democrats themselves, after having been proved over and over again by volume on volume of testimony. Would any of those who deny the existence of Confederate sentiment and many regiments of the Southern militia is also said to be existent. When it is remembered that this demonstration will take place in the first Spring after seven years after the siege of Chattanooga and the battles of Lookout Mountain and Missionary Ridge, such a scene of reconciliation on the battlefield itself is a significant comment upon the line which the Democratic party have had it power to draw between the North and the South that "those battle flags were furled in the Spring." Again we see the Bourbon

Charlevoix Sentinel.

CHARLEVOIX, JULY 2, 1880.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Exeter will exhibit 84 species of the electric invention at the Paris exhibition congress.

The queen didn't think Kentucky whisky left, and has ordered a barrel sent to her summer home.

Martha Lamb has taken up the cudgel in behalf of the Ute and in opposition to the Interior.

The Virginia Rivelings argue, the Richmond *Dispatch*, is leading only to the straightest Republicans of that state.

The Cincinnati Commercial thinks Richard Jordan stands a better chance to be next Presidency than Gen. Logan.

Dr. Schliemann has returned to Athens happy in the belief that he has found the site of the altar of the Twelve Gods in the Troad.

Rosa Bonheur has a genius for what Rosa Bonheur has genius for. She is the only lady painter in the Salon, is 58 years old, and has often made $800 a day with her brush.

The Cape has discovered that the Spanish race-crossed on the custom of a man at any house for the reason he abandoned, and the navy will go to back of us soon.

The Philadelphia *Press*, which knows oceans of everything, speaks of Hancock's views on a tariff as if they formed an obstacle to his election to the chair of state.

The Canadian Indians say Sitting Bull is a Canadian Indian who lived on the north shore of Lake Superior, and was educated at the college of Montreal.

A Lisbon apple tree has been in bloom since May and bearing fruit and flowers in June by the undermost accumulation of blossoms, was called to get those now fully ripened by the sun.

When Vennor predicted November weather in June he was derided. When the prophecy was fulfilled, Vennor was denounced. And yet, as the German said of the good sermon: "Dot vas vhich vorth pein shtill as goot a vas it vash not heerplained."

Out of a total of about 72,000 votes in Ohio last year, the Greenback party polled 3,331. Bad like, you going through the motions again this year, with a similar load of mule tucker who was a Copperhead Democrat during the period of the war and conscience.

The New York *Tribune* very pertinently remarks that in his letter of acceptance Mr Conkling was moved to assure that this memorable step was timely, because the Legislature was then in session and soon Report from it magnify. At that time he recognized the fact, as this position proves, that it was I be treachery to the party which had honored him to put in peril its supremacy in the Senate. He was careful to note that the party could take no part, because an appeal to that particular Legislature would be sure to result in the return of two Republicans to fill the chairs left vacant by himself and his colleague. But now, as everybody sees and knows, he and his friends are struggling to prevent a verdict from the party to which he appealed, and to throw the whole matter over to the chances of a popular election. And yet the men who follow him obediently and complacently, as in treason to the party grows more bold and open, call themselves Stalwarts, and assume to be in a special way the representatives of genuine, unadulterated Republicanism.

Crane W. Farce is of the opinion that electric motor power for railroads is feasible, and thinks that its application will not be a very remote event. Experiments are now in progress in Pennsylvania in a measure to demonstrate the success of the experiment of Siemens and Halske in Berlin. A correspondent of the New York *Times* says that their experiments were satisfactory, especially that made a mile from a small village, called Lichter Felder to the principal city situated in Germany, and is one and three-quarter miles in length. The rails are of steel, and rest on cross ties of wood, and this is all the outside story have. The electric engine is placed midway between the wheels of the car, and power is communicated to the latter by means of pulley and belts. The car can be run either way without turning, and is easily stopped and started. It has easily reach a speed of thirty miles an hour with a load of twenty passengers. Regular trips are made on the road and passengers are carried. The advantages of an electric motor are that it saves weight not only in its own machinery, but in dispensing with wood and water, it is better than a steam locomotive, because it is used to make a road it is almost noiseless. The *Times* correspondent does not state what the cost of the experiment so far has reached, expense of the electric motor per horse power light. The system will speedily answer the question of economy in railroads, and if the experiment succeeds, will cause others to replace horses and steam.

Near the Bridge.

Is the Georgia Republican responsible for little the nominee that may, Gov. Bullock will be their candidate for governor. He is one of the most popular men in the state.

Pantaloon's recent visit to Washington was to look after his favorite hobby, which has become badly out by an attempt to stabilize a fluted wire hinge. The administration had nothing to do with it.

The Supreme Court of Delaware decides that the word "white" is out of fashion. That settles it. Now, where is that soiled Democrat who was so anxious to know of his Republican neighbor: "Do you want your choice to survey a negro?"

Mrs. Cleary was quite excited in Chicago the other day, for mistook and burning a neighbor. Mrs. Cleaver was the washes all Friday that caused the cow with a crumpled horn that kicked the lamp out in the barn, and lit the straw that made the blaze that started the fire that burned Chicago.

The Grand Rapids *Eagle* says that one of the oldest and most respected farmers of that county met on the prospect for wheat, that it will turn out a better crop than the three years have accustomed that it will not be the extra crop, but that it is going fairly and will worth better than was expected in the spring.

Dr. Mary Walker is quite anxious to be regarded as a member of the United States senate by force of Conkling or Platt. She may also ask parliamentary rules, and the general house of a United States senator is already speaker on all a speech of legislation, interest and general of moral courage and moral courage. All these points she states to have secured in the Legislature of New York.

When Forbes paints a red color, as it most certainly will do in a few years, it will be desirable to know the date of growth of different trees, in order to learn what will grow quickly and be serviceable in a short time. Observation tends to show that the growth of twelve years is about as follows: White maple, one foot in diameter, twenty-five high. Ash, one foot in diameter, twenty-five high. White willow twelve inches in diameter, fifty feet high. Yellow willow one and a half feet in diameter, three feet high. Lombardy poplar, ten inches in diameter, forty feet high. Blue and white ash, ten inches in diameter, twenty-five feet high. Black walnut and butternut, ten inches in diameter, and twenty feet high."

Lazy Thomkins, Wm. C. Sloat, a locally prominent citizen of Westmoreland county Pa., was married with grand surroundings to a daughter of Mr. Wm. Douglass. The next evening, having borrowed $100 from his bride and another from her brother, Mr. Stone left Mrs. Newton, where he took Miss Maggie Paul, to whom he was engaged, and married with her and her two brothers, for Pittsburg, where he proposed to marry also and 22 ladies. The brothers having landed the happy pair in Pittsburgh, returned home, while Mose and Maggie disappeared from friendly gaze. Detectives are on their track, and are strengthened by the fact that brothers of both the ladies are with them as very alert and enterprising detectives.

The Chicago *Journal* is trying to keep track of the additions to political nomenclature, so rapidly growing in New York state, and thinks an appendix will soon be needed in the standard dictionaries, to include them. In 1877 Mr. Blaine applied the epithet "Stalwarts" to those Republicans who distrusted the south, and who were in the habit of waving the "bloody shirt." Curiously enough, it has been appropriated now by Mr. Conkling and his adherents, and it signifies the men who run with what the "Independents" is "Scratchers," and the machine. The "Half Breed" is the man who is opposed to Conkling, and the "Back" is the man that votes for him first, last and all the time. The "Jeff-Fish" is the fellow who imbibes about, comes out for one candidate and then for another, which is a sign that reads, "Come and buy me." The "Volcano" is the condition one consider, not a resident of "York State," but one who goes up to Albany to help one side or the other. Then there are the "Feather Bunks," and if the charges of lumber are quantity we shall soon hear of the "Lousy Flags."

Gen. Grant, who is now in New York on business connected with his Mexican railroad enterprise, declares his intention to be to make that city the permanent residence hereafter.

It is officially stated that 612 houses were destroyed in the recent fire at Quebec, making home less 1,211 persons, and leaving of 6,026 ~~persons~~ 5,815 of whom lost all their personal.

The southern states are now spreading through taxation over a million dollars annually for the support of Negro schools. The position and influence of Northern teachers in the south are increasing every year.

Senator David Davis, of Illinois, is said to own more land in Illinois than any other resident of that state. A Bloomington correspondent estimates his wealth a $6,500,000. He pays $70,000 in taxes yearly.

Gen. J. B. Steedman, whose name has been talked of in connection with the Democratic nomination for Governor of Ohio, is dead. He was a native of Ohio, an unscrupulous carpetbagger, and a murderer of both the name and the dead. Tom Steedman's address, Fort Schuyler, N. Y. Terrible.

A circular issued from the Secretary of State at Lansing, dated June 19th, says that crop and stock reports received up to that date from 780 new shows that there were 7,949,091 sheep, shorn in 1879, yielding 18,198,581 pounds of wool. This is an average of 2.29 pounds per head. The reports also show that the number of sheep in the state on spring in 1881 was 1,077,150 which is 0.41 per cent more than the number housed in 1880.

New York *Tribune*: It is not always responsible for fourteen cent. It is better that the Indians have rights as well as other people. Scarcely more the Utes are moved upon than new reservations, when a railroad company establishes a station upon their lands and against the strenuous opposition of the Indians. Secretary Kirkwood has wisely directed the removal of the intruders and their buildings. The railroads are allowed to create the communication as a matter of public policy, but they abuse the privilege when they treat the lands of a tribe as though they were anybody's property who might choose to take possession.

FARMING LAND!

500,000 ACRES

OF

Michigan Lands

FOR SALE BY THE

G. R. & I. R. R. Company.

50,000 Acres in Charlevoix County.

These lands are timbered with beech and maple, hemlock and white pine, and are accessible by land and water.

WATER AND RAIL.

And are a part of the State unequaled for health, well watered, and will soon be in the front rank in the section of the east side of Lake Michigan.

The Grand Rapids & Indiana Railroad runs through the center of the grant.

The part of Michigan in which these lands are situated is

NOT A WILDERNESS, BY ANY MEANS.

It contains a population of two thousand and fifty, [illegible] acres and a rapidly filling up with settlers from almost every State in the Union.

Over 200,000 acres of the lands of this grant have already been sold.

Applied for English or German pamphlet

ADDRESS W. H. HOLLIST,

Commissioner of Lands, Saginaw, Mich.

MISCELLANEOUS.

This Snuff is superior to anything yet known for removing the Catarrh, Cold in the Head, and the Headache. It opens and purges and all obstructions, strengthens the glands, and gives a healthy action to the secretions of the nasal organs. It is a mild, safe remedy. Beware of counterfeits. Every genuine bottle has the facsimile signature of the inventor.

Dr. J. Marshall

M. C. RIDLEY & CO., Prop'r, BUFFALO.

Beware of Chas. Bowne's Counterfeit.

All those wishing to purchase the GENUINE DR. MARSHALL'S ARCTIC CATARRH AND HEADACHE SNUFF should purchase that of which M. C. Ridley & Co. are proprietors, as I have given them personally the right to manufacture and sell the article.

I CERTIFY, that the above article is the only one for which I have given the right to manufacture and sell. I have given to no other person or persons whatever.

IGNATIUS WOODY,
Attorney, Va., Jan. 19, 1880. Judge

DR. JACK'S

SANTONINE LOZENGES

Are a safe and sure remedy for Worms. Are pleasant to the taste, and harmless in their action.

Conger's Tonic Liver Pills

Purify the blood, and thereby restore the healthy action of the stomach and bowels. They are a mild cathartic, and a tonic to the system.

FARRAND'S

JAMAICA GINGER

Is Superior to All Other Preparations

—FOR THE—

DYSPEPSIA, FLATULENT COLIC

It is a genuine stimulant and carminative, and acts with certainty and safety. It is an excellent remedy for Nausea, Vomiting, Sick Headache, Cramps, Spasms, Diarrhœa, Dysentery, Cholera Morbus, Cholera Infantum, Colic, Chills, Fever, Ague, and all Malarial Diseases.

It Aids the Inebriate in Reform

as it enables him to dispense with opium.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

On the afternoon of the 25th an east-bound train on the New York, Pennsylvania & Ohio Railway, about twenty miles south from Cleveland, struck a buggy in which were riding Thomas Garfield, married Pease, about thirteen, and Miss Alzina Garfield, sister of Dr. Houston, a cousin of the President. Thomas Garfield was instantly killed and Mrs. Arnold's skull so badly fractured that her life was despaired of. The buggy was dragged about 200 feet before the train stopped. Mr. Garfield was eighty years old and leaves seven children.

At the Commencement of the Virginia Theological Seminary, near Washington, on the 25th, Bishop Lee, of Delaware, who was one of the American revisers of the New Testament, denied the story that the American revisers were not properly treated by the English revisers. He said, further, that the Committee claimed that they were correctors, not mere advisers, and all was recognized, and that, in many instances, the views and decisions of the Americans were accepted by the English revisers. Bishop Lee said the revisers had no apology to make for their work, that they had done it faithfully, and are satisfied that a time for revising the New Testament will be generally approved by all Episcopalians.

Four barges of wheat recently shipped from St. Paul for New Orleans, thence to be sent to Liverpool, are found to have been badly heated, owing to insufficient ventilation.

It is announced that Prof. Samuel J. King has secured funds for an experimental balloon voyage and will fall from the Brooklyn Bridge to the Atlantic seaboard.

A mail-car of Baltimore & Ohio train left Cumberland on the morning of the 26th for New Jersey in an antique wagon brought from the Revolutionary days. Before the 27th, stating that they rode thirty-seven miles through bogs and yells, the people were using fines and calling them child-stealers. They would return to Europe by the next steamer.

A Reuter's telegram of the 25th says two simultaneous dispatches had been received at Prof. Smith, of the Washington observatory, by which it appeared that another great comet had been discovered. Prof. Sheptieus, of Harvard College, Pennsylvania, said that "L. T. Edwards saw it with the naked eye this morning, and Edward L. Larkin, at New Windsor, Ill., also reports seeing it, and that it is large." Its exact place is located in the constellation Aurora, about eight degrees from the star Capella. It is considerably brighter than the much-expected comet of 1812, which should appear not far from the end of 1880. There is some question as to who has the honor of the discovery and to whom the Warner prize of $5,000 belongs. Both are claimants.

Up eleven cases of sunstroke in New Orleans on the 25th, seven proved fatal.

The Methodist Book Concern, in addition, an anti-secret society organization, held its annual meeting in Chicago on the 25th. During the year $15,000 has been collected and $12,500 disbursed. Rev. L. S. Stratton was elected President for the ensuing year; J. B. Nutting, Recording secretary, and Rev. J. T. Stoddard, Corresponding Secretary and General Agent.

THE Choctaws and Chickasaws have brought on a strong fight for the removal of jugglers in Indian Territory. United States cavalry have been ordered to co-operate with the United States Marshals in making the raid and their stock. It was stated on the 26th that three hundred families had been warned and crossed the borders during the previous ten days, leaving all their property behind. The Choctaw forces were organized and mobilized, three hundred strong.

The assessors in the Brooklyn, N. Y., are taxing the parsonages of the different churches.

TOMBSTONE, Arizona, had a large fire on the 25th, which destroyed $2 worth of property, rendering 800 people homeless. The losses aggregated about $250,000.

THERE was a fatal case of genuine Asiatic cholera at Cincinnati on the 25th, a Mrs. Noellinger being the victim.

HENRY A. GROVER, of Foxboro, Mass., recently bought a cow of Mr. Atherton, and started to ride home, but fell off and broke his neck on the way.

A MEETING of the National Division of the sons of Temperance was opened at Saratoga, N. Y., on the 26th, Grand Worthy Patriarch Evarts S. Mc'ffe, of Cincinnati, Most Worthy Patriarch. About 100 delegates representing the twenty-nine Grand Divisions of the United States and Canada, were present. The loss of members for the year was 4,465. The Grand Division is out of debt, and has $1,400 in the treasury.

EXTENSIVE reports are given in the Chicago Tribune of the 26th from the winter wheat producing States in regard to the present season's crops, the general tenor of the articles from nearly every section being that the yield of this cereal will be much less this year than in 1880. That paper says: "The weather for some time has been that of an exceedingly unfavorable nature for the growth of grain, and chinch-bugs now threaten to seriously damage the corn crop. These remarks apply more particularly to Illinois, Missouri and Kansas; but in Ohio, Indiana and Michigan the lack of rain during the past few weeks cannot fail to some measure to reduce the yield of cereals, although no fair estimate of the crops in those States can be made for three weeks to come."

THE new directory of the City of New York contains 205,477 names, an increase over the previous year of 11,261. It estimates the population of the city at 1,321,504.

CAPTAIN PAUL BOYTON, the celebrated swimmer, arrived in Utica, N. Y., on the 26th, having swum from St. Paul, a distance of 1,365 miles, in twenty-three days and five hours' sailing. He swam the last 700 miles, from St. Louis to Cairo, without leaving the water.

A CHICAGO saloon-keeper, named James Kelly, has been recently fined and committed in the Criminal Court of the city, on the charge of selling liquor to an inebriate named Booth, notwithstanding the protests of Booth's wife. He was sentenced to twenty days' imprisonment and to pay a fine of $50.

IN the United States District Court at Chicago on the 26th John Bare, being known as Dr. Ellis, was sentenced to imprisonment for three years and a fine of $100, and Dr. Jay Gau was given one year and $100. Their offenses were the use of the mails for the circulation of demoralizing literature. James B. Doyle, the counterfeiter, was sentenced to labor for ten years.

THE Federal Government has received $50,000 from Chicago banks for back taxes, and nearly as large an amount is pending settlement.

Personal and Political.

WALLER Q. SCOTT, of Easton, Pa., has been chosen President of the State Agricultural College, and Hon. H. Chamberlain, of Bowdoin, President of the Northwestern University at Evanston, Ill.

W. H. TURNER, one of the principal clerks in the Internal Revenue office of the Post-office Department, who had charge of the star-routes in most of the Western States, was dismissed on the 21st, and George W. Sweeney was appointed in his stead.

CHARLES H. HOWARD, brother of General O. O. Howard, has been appointed Indian Inspector, vice J. L. Malson, resigned.

JOHN A. WILSE, formerly a banker in Washington, has brought suit in the Supreme Court of the District of Columbia against Thomas J. Brady, to recover $25,000 for money loaned in behalf of Brady when he was Second Assistant Postmaster-General.

OTIS WILSON, E. A. Walley, of Ohio, was examined before the British investigating committee at Albany, N. Y., on the 21st. He stated that he had a conversation with Assemblyman Bridge Lane, in which witness told him (Bradley) he was a pretty severe lecturer for temperance, and that all his constituents were opposed to their habits. Bradley suggested he could find something would turn up in a few days which would surprise everybody.

A CONVENTION of the National Temperance Convention at Saratoga on the 23d resolved unanimously and affirming the undoubted duty of total abstinence, indorsing the movement for the introduction of text-books on temperance principles as well as the fitting grounds into our schools and colleges, declaring that Christian people should pledge themselves to total abstinence as a protest against the liquor traffic, and recommending the work of inculcating temperance in church organizations, and as auxiliary to the temperance cause. The sale of liquor on the Lord's Day was denounced, and the use of alcoholic wines in the communion service was condemned. Congress was urged to amend the people's Constitutional Amendment prohibiting forever the manufacture and sale of alcoholic beverages in this country.

MR. COCHRANE addressed a Stalwart convention at Albany on the 23d, and denounced his merger "to be steadfast to the party of true Republican ideas and principles, and yet to oppose the corrupt gangs of politicians who are striving to destroy that party and its principles." He warned them against "the men who are approaching them with specious professions, and returning, in the language of Senator Conkling, to their old tricks and their old practices." He said: "Let it be understood that the effort to control the Assembly Committees of this State, by the employment of legislative agents, in the interest of railroad corporations, will be resisted to the bitter end, and that the man who attempts it will be marked for political destruction."

THE Missouri River Improvement Convention, in session at Council Bluffs, Iowa, on the 23d, adopted resolutions demanding $5,000,000 from the public Treasury for the improvement of that stream, $600,000 to be expended in 1881 in extending snags. The policy was urged that no vote be given by Western men in Congress to a River and Harbor bill which fails to contain the above appropriation.

THE administration members of the New York Legislature held a largely-attended meeting at the evening of the 23d, at which there was a general feeling expressed in favor of concentrating their strength in support of Messrs. Wheeler and Depew as successors to Messrs. Conkling and Platt.

COLONEL CASEY, of South Carolina, who killed Colonel Shannon in a duel, has resigned.

A CONFESSED land robber in the United States Land Office at Grand Rapids, Minnesota, ex-Member of Congress, as guilty of subornation of perjury, and as having manufactured evidence before the Pension Commission upon which he was paid many thousands.

REV. DR. HENRY MCCRACKEN, pastor of the First Presbyterian Church of Toledo, Ohio, and elected Chancellor of the Western University of Pennsylvania, located at Pittsburgh.

IT is announced that Parnell, the Land Leaguer, will revisit the United States in July.

IN the military investigation at Albany, N. Y., on the 26th, James Tillinghast, of the New York Courant Rouk, explained what use he made of $9,000 in currency in his business. Colonel Bushnell, John L. Davenport testified that he was authorized by Henry E. Pierrepont, of Washington, to tender a Marshalship to Senator Conkling.

GENERAL HOWE, ex-Assistant Postmaster-General, made application in the Criminal Court of Washington on the 23d to have the charges of bribery made against him tried at once. Colonel Cook, the special counsel for the Government, stated to the Court that not a single case was yet ready for submission to the Grand Jury, and that complete failure would result from using the testimony in its present condition. The Court, therefore, declined the cases go over until septem er, to which date the Grand Jury has a recess.

THERE was a gathering of representative white Republicans from Virginia at Washington on the 23d to express to the Administration their desire for a coalition with Mahone.

THE Maryland Democratic State Convention met at Baltimore on the 23d and nominated Thomas J. Keating for Comptroller.

JOHN R. BUCHTEL, of Akron, Ohio, has given another check to the college bearing his name. His gifts to the institution aggregate $200,000.

A SAN DIEGO (Cal.) dispatch of the 23d says of the new Tichborne claimant that he is well known in that vicinity, and is a pure delusion.

THE Allman (N. Y.) Bribery Investigating Committee continued the taking of evidence on the 26th, and notified counsel to hand in their briefs by the 28th.

WILLIAM P. FRYE, of Pittsfield, has been nominated by the Prohibitionists of the Second Congressional District of Maine, to succeed William P. Frye.

LEANDER WARNER, commercial editor of the Baltimore Sunday, died suddenly on the 24th, of heart disease. He was sixty-two years of age.

SILAS C. HERRICK, the noted safe manufacturer, died suddenly at Plainfield, N. J., on the 24th.

JUDGE SAMUEL H. WOODSON, ex-member of Congress from the Independence (Mo.) district, died at that place on the 24th.

Foreign.

HAYTI SAYS, the noted Nihilist, is about to leave London for New York.

THE steward of the Bey of Tunis has taken refuge at the English Consulate in that city, charged with embezzling a million and a half francs.

THE deaths from yellow fever and twenty from small-pox occurred at Havana during the week ended on the 23d.

A LONDON dispatch of the 23d says the census of the United Kingdom, which was taken on the night of April 4, 1881, will show a total population of about 35,000,000, an increase of about 1,500,000 during the last decade.

A PARIS dispatch of the 24th says that of the 242 policemen discharged at Nantes 50 had been liberated and 30 would be tried for treason. The commissioner of police had rendered free passage to Italy to all afraid to remain, and 600 had taken advantage of the offer.

IT is stated that the emigration from Sweden to the United States will reach 70,000 this year. This is about one-seventh of the entire population.

A reservoir was covered from the Spanish fleet at Cuba on the 25th, which stated that 100 Spaniards were massacred in the island in the temperance cause. The sale of liquor on the Lord's Day was denounced, and the use of alcoholic wines in the communion service was condemned. Congress was urged to memorialize the people's Constitutional Amendment prohibiting forever the manufacture and sale of alcoholic beverages in this country.

MICHIGAN STATE NEWS.

A few days ago Chester Tubbs, of Ithica, eight-ohio years old, committed suicide by shooting himself through the head with a rifle.

Smith Brothers' mills at Cheboygan, including the saw-mill, planing, sash and door factory, dry-kiln, storehouse and boarding-house, were burned to the ground a few days ago, involving a loss of $20,000. It is claimed that sparks from a tug set the mill on fire.

At an early hour on the morning of the 23d about twenty citizens of Lamont reached the jail at Grand Haven with battering-ram upon finding Vinkamp, the murder of Lyman Cady. By false pretenses an entrance to the jail office was easily effected, when the keys to the cells were taken by force. The Sheriff's wife told the mob where the keys were, and they started in a body for the jail. Vinkamp, on hearing a noise of approaching feet, and seeing the battering-ram coming, made his escape through a rear window, and succeeded in getting some distance from the jail before he was discovered. The mob then broke down the door of the cell where Vinkamp had been confined, and, finding he had escaped, returned to their homes.

The Democratic Senatorial Committee of the Eighth District met at Ann Arbor on the 23d, and decided to call a convention at Jackson on the 29th inst., to nominate a candidate for Senator.

The Democratic Senatorial Committee of the Fif

Charlevoix Sentinel.

CHARLEVOIX, JULY 8, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Personal Mention.

—Miss Bertie Russell, of Lake View, Antrim county, is visiting friends in Charlevoix.

—Mrs. A. Fox and Mrs. Dr. Lawrence returned home from their Petit Hamlet visit Friday.

—S. M. Moore and family will be conducted with Bay View Novelty hotels for cottages on the Chicago resort grounds in competition.

—Hon. H. Nobse of Six Rapids, gave us a call Thursday. He was on a tour of observation among the farmers of Northern Michigan.

—By Kimball Brooks, President of Kalamazoo College with his family has declared for the season. Dean Brooks now—hour at Boyne is expected to arrive.

—L. P. Hildreth, clerk keeper for the Pine Lake Iron Co. has resigned his position. He is succeeded by a Mr. Smith from Washington D.C. Mr. Smith will also represent him as P. M. at Ironton.

—Hon. John A. Anderson, of Manistique, State Representative of the Upper Peninsula and Deputy of Knower, has been in town during the past few days. He goes into camp on the Jordan this week. He is a pleasant gentleman.

—At the Fountain City House, Hon. John A. Anderson and Son, of Manistique, Sanford J. W. Sweeny, S. M. Moore, Frank Gomez, Ray Jones, John Wilcox, E. Nolan, John Porter, Miss Jennie Veath, Miss Maggie Kennedy, W. G. Woodward and wife, H. H. Bohemia, Geo. G. Robinson and wife, P. H. Chandler, all of Chicago.

I. O. O. F.

The following are the officers elected by Round Lake lodge No. 295, I. O. O. F., for the ensuing term, and who are to be installed at its next meeting:

[illegible]

All the Pauls has been promoted and appointed to office in our active line, and he is to keep the same which has been so well cared for the appointment of Hon. Jason Woodman, Colonel on the Governor's staff. Colonel Jay is the person who will receive in these parts but I understand that Jay England has at his pockets several shining medals from Lansing and where the tea song, and then adieu for ever, from the page. Granted Mr. Jay leaves us to choose her by the popular conviction of our native land, she will fix the time of it even for her election as 22d and for the first time. This is very commendable when it is considered that the entertainment will be simply current coin of the realm, and that her manners will remain as a custom, a beauty, a statesman, a soldier, free as all. Equally decided, this would give the performer $3 each to each $5 held by the committee and all will equally divide with her among the natives. Nothing could more fair for, that is quite dividing the proceeds. A $25 a ticket time and all to boot.

New York Tribune (Rep.): If the report is true that Sir John A. Macdonald is to be raised to a peerage and made Governor General of Canada in place of Lord Lorne, the Dominion will have for the first time a Chief Executive taken from her own people. The change may prove an important one in the direction of closer commercial intercourse. After the Canadians have once had a Governor-General of their own they may object to England's having ever again a man for politicians as her Royal Lord's representative to maintain close alliance. They may say that no longer time lies shall have the same right to choose as their Chief Magistrate that they have to select the members of their Parliament. At all events, even if the new ministry leaves which attach Canada to Great Britain will be severed, as soon as the practice of sending over Englishmen to fill the office of Governor General is departed from.

H. F. Tyson, of Paris, Kansas, a gentleman closely connected with the murderers of General Bagole made his during the last days of his stay with the Bagole gang. Mr. Tyson was described by those who have seen him at the west, as very exciting. The case has two scenes of four horses, each hitched to a chariot similar to the pictures of the old Romans, two wheeled chariots, one driver by a reward and the other for a song. All the horses thoroughbreds, and each one wears a gaudy saddle on which is hanging such costly [illegible]. This appears when it is known that the chariots may run their half miles, frequently, in 2.10 to 2.20 seconds.

Gen. Pearson has appointed T. T. Lyon, of Scott, Brook, J. G. Hamlin, of Traverse City, W. K. Gillespie, Antrim, Dan. W. J. Judd of Banning and Hiram H. [illegible]

HARDWARE

Having just returned to my new and commodious quarters, I would respectfully state to the people of Charlevoix and adjoining counties, that I propose to fully meet their wants in my line. Believing that the interest of the consumers is my interest, and carrying but one line, I can give the public better bargains than any general store. I make a specialty of Cutlery and Pocket Stoves, Ranges, Table and Pocket Cutlery, Lumbermen's Supplies, and Builders' Hardware, at prices that cannot be undersold in the Grand Traverse Region. I pay for cash, and can give my customers the benefit. I invite all buyers from a distance to make my store their headquarters while in town, and will cheerfully and fair treatment merit their patronage.

Very Respectfully,

M. J. STOCKMAN.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Personal Mention.

—Miss Dora Bowe, of Boyne City, is visiting friends in this village.

—Mrs. A. Fox and Mrs. Joe Lawrence returned home from their Bay Shore visit Friday.

—N. M. Murray and family will be quartered with Rose Judge Nichols, until his cottage on the Chicago tower is completed.

—Thos. H. Sohn, of Ed Bagley, gave us a call Thursday. He was on a tour of observation among the farming of Norwood and Melrose.

—Dr. Kimball Brooks, Professor of Medicine at Rush Medical College, with his family has arrived in Boyne City, and will be found there as a permanent resident. Dr. Brooks is a gentleman of culture and ability, and we welcome him to our midst.

—Mr. F. Hildreth, lately keeper on the Pine Lake Iron Co. has engaged in business. He is associated with Mr. Smith, from Washington D. C. Mr. Smith will also conduct him as P. M. at Boyne.

—Hon. John A. Kasson, of Waterloo Iowa, Representative of the First Congressional District, of Kansas, has $2.50 to own distance for past few years. He goes into camp on the Jordan this week. His son accompanies him.

—At the Fourteen Mile House, Hon. John A. Anderson and son, of Manistique; Isaiah J. W. Standish & Mr. Munn, Pinnebog; Rev. Augustus Wilson, St. Ignace; John Perrie, Miss Jessie Vogel, Miss Maggie Kimball, W. G. Woodward and wife, H. H. Babcock, Geo. G. Rollo and wife, P. D. Crandell, all of Chicago.

1908

The following are the officers elected by Round Lake lodge No. 285, A. M. & F., for the ensuing term, and who are to be installed next regular evening:

[illegible]

Adam Ford has been graciously appointed to come to surrender here, now he can see the "cats and dogs" life as well as the ordinary citizen of Boyne and become one. Grandpa by the way has by the clerks to surrender, and will return to them after his Assessment tours, per Bagley, for a $5 [illegible] and a big laughing scene ever European city where he has been, and then retire to private life, now the stage. Grandpa for his favors to Boyne has by the grateful remembrance of our whole land, one will fix the price of tickets for our concerts at $50 each for the front row. This is very reasonable when it is remembered that the entertainment will be simply a concert, instead of opera, and that her assistants will be simply a comedian a basso, a tenor and a soubrette, in no [illegible] situated, that would give the performer $1 each for and $25 total to the company and $25 will equally divide it to her assistants, of course. Nothing seems easier to her, than equally dividing the proceeds. At $50 a ticket there may not be many.

New York Witness, March 17: If the report is true that Sir John A. Macdonald is to be raised to a peerage and to be governor-general of Canada in place of Lord Lorne, the Dominion will have for the first time a Chief Executive taken from its own people. The change may prove an important one in the direction of practical economy. After the Lansdowne [illegible] once had a Governor-General of more than any one object to England's sending over any more of her politicians or her Royal family's connections to administer their affairs. They cost step and by to much than they had been the value right to choose their Chief Magistrate that they not have to select the members of their Parliament. At all events, one of the few remaining boasts which Canadians can claim British will be surpassed as soon as the practice of sending over Englishmen to fill the offices of Governor General is departed from.

H. E. Parsons, of Paris, Kansas, is the one citizen more on the move track at Grand Haven each time during the last week for each. The Tribune says there are two kinds of [illegible] by those who have seen them in the west, as very exciting. Those are very large of our towns, each lighted a thorough similar to the pictures on the one hundred thousand [illegible] and drawn by a young and [illegible] for a song. All the hotels are thoroughly [illegible] and each room is quite as attractive as we [illegible] are in such quarters. This is a great week when it is known that the [illegible] hour can last half mile, frequently, in a [illegible] minutes.

Capt. Pearce has purchased T. T. [illegible] of South Haven, J. G. Bramhall, of Traverse City, and W. K. Hilton, of Boyne City, W. J. Isaac, of Saginaw, and Wm. H. Adams, of Ann Arbor, to organize a [illegible] company, with a capital stock of $50,000, to operate a line of steamers between Chicago and Charlevoix. The company will [illegible] the steamer Gazelle, and will put on another steamer, to be built at Manistique, early in the spring. The Gazelle will leave Chicago every Tuesday and Saturday, and Charlevoix every Wednesday and Sunday, touching at Petoskey, Harbor Springs, Mackinac, Cheboygan, Alpena, Oscoda, Au Sable, Tawas City, Bay City, Saginaw, Port Huron, Detroit, Monroe, Toledo and Sandusky. The boat will be fitted up with all modern conveniences, and will be run in connection with the Lake Shore railroad. The company is composed of men who are well known in this section, and who will do all they can to make the line a success.

OUR DEAD SOLDIERS.

The following extracts are taken from an address delivered on the occasion of the decoration of soldiers' graves in the cemetery at St. Joseph, Mich., by the Hon. Thomas W. Palmer, of Detroit:

FELLOW CITIZENS: A sin never grows cold as an accessory like this—it never shows the obliquities of your dead brave without the obliquities of that cold culprit passing through my mind. Pass away from me, I say, sin! go not to it ever more, and like the Lord's peace will never grow old.

Whether in the saddest light or in the basest, it's vain.

The first reason for man to die is where he dies for man.

If one man and laid down his life on this spot in defense of a great principle, such deeds would come home to broke his grave with their fragrance. If forty or a half a hundred might down their dyes like Egmont there or John of Barneveld this sward would leave the Means of thirteenhundred-year wind like a dirge of the greatest kind. A man who scorns the scaffold to remain a noble sentiment or grand idea to some that follows will be tender of his memory. With one short space he slips away the faults and stains of a life-time, and stands at once particularized among the immortals. Such a death recompensed by such occasions has its inspiration. But these men had no such stimulus. The most fortunate fell in battle with their clothes stained with blood, and the dying strikes less torment—died of wounds or of exertions broken in the road—or of sickness which smothered amidst their lives to medicines and to the most comfortable beds, or in the wilderness burned to death when help, if it could have come, would have come after their lives—and these were a part—not of the glory and pride of battle, but of the sorrow and pain that hinges under the flag.

Tabb's diarrhœa was the one that was away from the Michigan University and went to Detroit. "Time of two alone sorrier." I am one of the two!

On a Christmas morning many years ago I stood upon the deck of a merchantman in the harbor of Cadiz. The sailors of the vessel and ourselves were rowing out their ovals in a pleasure-boat, and the bells of the city, which two thousand years ago, brought the Romans of Hannibal's time to their feet, were ringing out their merry chimes in honor of the day. The sun was shining upon the Mediterranean, and the white, two-thousand-years-

Charlevoix Sentinel.

CHARLEVOIX, JULY 15, 1881.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR

THE GREAT SLEEPER
From the Detroit Post and Tribune.

President Garfield never appeared in a more admirable light before the country than he has since the criminal assault upon his life. The people have seen him researching out of poverty; have seen him a plodding laborer; an earnest scholar; a devoted patriot; a brave and skillful soldier; an brilliant orator; a profound and honest statesman; a champion of the weak and oppressed, and finally a firm and impartial President, superior to flattery; undisturbed by vituperation and unmoved from the path of duty by either friendships or hatred.

When on the day of his inauguration he turned from the plaudits of assembled thousands to bestow a kiss upon the wrinkled cheeks of his aged mother, he crowned upon the people in a new aspect, and there his wrestling the loss revealed to true greatness as it never was before.

From the moment he fell upon the floor of the depot, he appreciated the full gravity of his situation, and he experimented it with heroic Christian calmness. His faculties have been methodical, and he comprehended all there has been said and written, heard and read.

A moment after he screamed, when the pain of the first shock was upon him, he thought himself in his bedroom, crowned with so long a beauty, and he desired to have a doctor marked for its thoughtful tenderness.

To the physicians who examined him at a critical moment, he said: "Gentlemen, perhaps from my looks, he remember that I am not afraid to die." When the evidence of internal hemorrhage became unmistakable and all the medicines failed to "stop the flood," he, the President to be, first and only asked: "Are the prospects bad, doctor? Don't be afraid; tell me frankly. I am ready for the worst."

"Sir, President," replied he, "your condition is extremely critical. I do not know you can live many hours."

"God's will be done," he finally responded, "it is ready to go anytime has come."

And afterward there was neither moaning or despair. Weeping eyes looked down upon the wounded man, low and sweet surrounded him, and the stricken President, to whom death was summoned, was the one cheerful man in the room. All the cabinet heads were summoned to a parlor adjoining, and a wonderful touch of unselfishness it affords. The scene was front upon his wife, children and his mother. He forgot that he was a sufferer by remember that he was a husband, a father and a son. He bore the effect of the terrible news upon Mrs. Garfield, and he was anxious to have her and their daughter Mollie with him, that he might reassure them, if possible, and look upon them for the last time if it was decreed that he should die. And after his wife came cool was closeted with him, a new cheerfulness took hold of him. What passed between the husband and wife in this fifteen minute interview may never be known, but its effect upon the wounded man was wonderful. A correspondent of the New York Times writes: "At the end of about 15 minutes the door opened, and Mrs. Garfield came slowly out. There were no tears in her eyes, and she walked with a firm step and took her seat in the library. She was very brave and bore up nobly under the great blow which had fallen upon her. As she left the room Mrs. Barnes passed in. The President was smiling and his husband with his finger to his lips to approach. She leaned over the President, and he said: 'Have you met Crete?' Mrs. Garfield's Christian name is Lucretia, and Crete is the pet name by which the President always calls her. 'Yes,' Lucy told her, and Mrs. James, 'And how did she act. Has she the best in?' was the next eager question. 'She knew it like the true wife of a true soldier,' answered Mrs. James. 'Ah, the dear little woman,' exclaimed the President, 'I would rather she than that this should come as upon to her.'

A little later the President turned to Mrs. James, wife of the postmaster-general, who was watching by his bedside, and asked, 'Did you know where Mrs. Garfield is now?' 'Oh, yes' Mrs. James answered. 'She is calmly watching and praying for her husband.' He looked up to the lady with an amazing face, and said: 'I want her to go to bed. Will you see her that I say it she will endeavor, and to tell I will turn right over, and I feel sure that when I know she is in bed I can go to sleep and shall all night. Tell her to exhausted with sudden energy, what I said that all night if she will only do what I ask.'" Mrs. James conveyed the message to Mrs. Garfield, who replied to her in tears: 'Oh back and tell him that I am endeavoring.' She returned with a whisper, and the President turned over in the right side and dropped into a sleep of almost instantly.

Thousands will read this little tender of with moistened eyes and trembling [illegible] and [illegible] of [illegible] [illegible] [illegible]

THE SENTINEL.

WILLIAM J. SMITH, Editor and Proprietor.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

According to the revised and finally approved census of Boston, that city had 364,839 inhabitants when the inauguration was made last year.

In the eight-oared race of four miles on the Thames River, near New London, Conn., on the 27th between the Harvard and Columbia College crews, the former won in three lengths in twenty-one minutes and forty-five seconds.

Nearly 400 masons and other bricklayers of Newark, N. J., struck on the 29th because the bosses refused to grant half-holidays Saturdays with full day's pay. The employers said they could not afford to pay for holidays, and went for other workmen to New York and elsewhere.

The board of agriculture of Ohio estimates the wheat crop of the State this year at 41,000,000 bushels.

All the passenger houses of St. Louis have been closed, on account of the legislative declaring the keeping of such houses a felony having recently gone into effect.

A terrific thunder-storm passed over Washington on the evening of the 28th, and struck Ford's Opera-House, the Art Hall and a large number of residences.

A Reading (Pa.) dispatch of the 27th states that the attending physicians of the Lehigh County Alms-House, with physicians, visitors, went to the Poor-House the morning before to see the Sleeping Hypnotist. When they entered the room they held a white carnation flower to his nose, which caused him to awake. Dazed, he looked at him a flower, when he said "Roosevelt," which is, "I thank you," and immediately fell asleep, the time selling down two clocks. This was the first time he had uttered a word since he was taken into the Poor-House—16 days before. Afterward, when they had left the room, he spoke to his keeper in German, and said: "I cannot speak the Hungarian language, but Slavonic." After this he fell into a deep sleep and could not speak an word.

The Grand Army encampment at Buffalo on the 27th the largest number from Michigan that ever passed through the great lakes. Headquarters at Niagara Falls.

A battle recently occurred in the mountains of Utah between a party of ranchmen and a band of Piutes, which resulted in the death of eleven Indians. Several Indians were killed and the white men had one wounded.

Edward Murphy, a Chicago Election Judge, has been convicted in the Criminal Court of ballot-box stuffing, and sentenced to one year's imprisonment in the House of Correction and a fine of $1,000. He will be worked out unless paid. Judge Hawes, in sentencing the prisoner, expressed a regret that the statute did not provide for a severer punishment for the crime.

The Democratic Southern leaders are cheering. The wheat is of excellent quality, but the acreage is only fifteen hundredths per cent. as compared with the last crop.

The Cincinnati police on the 29th arrested several persons engaged in selling posts on horse-races.

In the case of a negro woman who was born in bondage prior to its cessation in the United States, and who filed a claim before the Franco-American Commission for $30,000 damages for loss of property, a decision has been rendered that the claim is invalid because all residents of the ceded territory in that alliance at the United States, and the claim was disallowed.

J. P. McCullan, principal chief of the Choctaws, in council and proposing to the agents of the United States now cultivating land to continue at less that there surrender it with posts and pay the usual rent to the Choctaw authorities, in which case that can remain on the land for the remainder of the year, free of rental. Governor Kirk-wood has also instructed Agent Perry, at Muskogee, to give notice that intruders may have the month of July in which to comply with the provisions of the Choctaw and Chickasaw Treaties.

Another Chicago schoolma'am, named Mallory, has been sentenced to pay a fine of $50 and to a term of twenty days' imprisonment, during which time she will be boarded.

General Beauregard, a colonel horse which recently killed two grooms in New York, and had been in charge of Operation inventor on one dared to attend him, was shot in his stall as an insane beast on the 29th.

The acting Superintendent of the Department of Agriculture estimates the Illinois wheat crop as follows: In 1881—estimated acreage, 3,000,000; product, 38,000,000 bushels; 1880—increase this year, 26,0[illegible]; 1881—estimated yield, 31,[illegible] bushels; 1880—increase, 7,[illegible]; 1881—estimated average, 12.[illegible] bushels; 1880—increase, 2.29,875 bushels.

The boilers of the Ohio River steamer Phenton exploded near Maysville, Ky., on the 29th, completely wrecking the cook, and killing Dick Sayre, the engineer, and Jack Reynolds, the pointer; Joseph Carr (colored) and Joseph Baker, deck hands, and a lady passenger whose name was unknown. Six persons were injured, one of them very seriously.

A Washington telegram of the 29th ult. says the sunset was extremely fine at Naval Observatory to be at that time about 30,000,000 miles from the earth. Its nucleus was 200 miles in diameter, and the envelope about the nucleus 20,000 miles in diameter. The tail was estimated to be 5,000,000 miles in length. The dispatch says: "The fact that its orbit lies within the orbit of the earth explains the apparent paradox of its receding from the earth while approaching the sun. On the 26th of June last it was nearest the earth, being then but 10,000,000 miles away, and some astronomers here think it probable that the earth then passed through the tail of the comet."

The jury empaneled to inquire into the western Lake Shore & Michigan Southern Railroad disaster at Ashtabula, which, it will be remembered, occurred on the 29th of December last, by the breaking down of a bridge, resulting in the death of about seventy persons, have rendered a verdict to the effect that the accident was caused by the breaking of the bridge, and that the bridge was broken down by the weight of the train, which was in good condition and not overloaded. The jury censured the officers of the road for using bridges of such construction, and recommended that they be replaced by bridges of iron or steel.

The Grand Jury at Albany, N. Y., on the 30th ult. brought in an indictment against A. B. Barber on the charge of paying R. R. Pledge $12,500 for the purpose of bribing State officers. Pledge fled from Albany and was admitted to bail in the sum of $8,000. L. R. Pledge was also arraigned and placed under bail in the same amount, after a plea of not guilty. Charles A. Edwards was also indicted on a charge of receiving from Joseph Dickson $7,000 for the purpose of bribing State officers. All the cases were held over till the next term of court.

Ex-Governor Thornton, for several years British Minister at Washington, presented his letter of recall to President Garfield at the Executive Mansion on the 30th ult.

There was considerable excitement in Albany, N. Y., on the 30th ult., over a report that a colossal bonding swindle had been exposed involving $200,000 or $300,000. Cash in Treasury, $[illegible],911. Cash in Treasury, $1,381,[illegible]. Decrease during June, 1[illegible]. Decrease since June 1, 1880, $[illegible].

Grayson, the Tillage fasser, began the thirty-fifth day of his confinement in each of the Tombs jail cells on the 30th ult. His weight at that time was 126½ pounds, showing a loss of one and three-quarter pounds. He expected next evening twenty-four hours, and of thirty-eight and one-half pounds since the beginning of his fast.

Secretary Windom on the 30th ult. appointed Mr. French of his staff to the position of Railroad Commissioner. Mr. French thereupon tendered his interim resignation at once. This action of the Secretary had been decided on at a cabinet meeting.

The vote in the New York Legislature on the bill for United States Senator to succeed Mr. Conkling resulted as follows: Platt, 68; Wheeler, 28; Conkling, 28; Lapham, 13; Cornell, 6; scattering, 7. No choice. When the Chair called for a fourth ballot Platt arose and announced that Governor Cornell had withdrawn in favor of Thomas C. Platt, but now, at his request, and in the interest of the Republican party, he withdrew Mr. Platt's name as a candidate, and would, when his name was called, vote for Richard Crowley.

The Chicago Board of Trade on the 30th ult. reported that 1,000,000 bushels of wheat were burned, by collision with a bark, and six of her crew were drowned.

At the Wilhelm Seminary in England, on the 29th ult. Morgan Townshend was fined £100 and costs and bound over to keep the peace for one year, for horsewhipping Lord Edward Thynne. The latter had addressed the Marquis's wife.

On the 30th ult. a flying column of troops and police went to the new shanty of Mr. Gibbons, Ireland, to enforce evictions, but in each case the tenant paid in full. Fifteen persons were injured in a charge on the factory.

A Constantinople dispatch of the 30th ult. says four regiments of Turkish troops were mobilized for Tripoli, and war-ships and transports were ordered to the coast of the native province. The French were considering the propriety of a naval demonstration in the waters of Tripoli.

The announcement was made on the 30th ult. that the Dr Lesseps scheme was practically completed the purchase of the Panama Railway for $17,000,000, and that the canal would closely follow the line of the track.

In the Henley (London) regatta on the 30th ult. the Cornell boat was injured by a foul, and the Cornell club will protest, claiming a halt for repairs. On the second start, the Americans lost the race by bad steering.

The Canadian Government on the 29th ult. notified the United States Government thereafter they would not be permitted to use their mills of any denomination under $5. All bills under that figure will be issued by the Government.

A secret festive gathering of thirteen gentlemen at Prague was attended twice by the weather, taken under the direction of the Minister of Agriculture, Count Zierotin. Before the meeting was opened the doors were locked, and no one was allowed to leave the room during the meeting. The object of the meeting was to discuss the question of the Emperor's visit to Prague, and to consider the best means of preventing it. The meeting lasted from 10 o'clock in the morning till 4 in the afternoon, when the doors were opened and the gentlemen left the room.

Michigan State News.

A bill in relation to the compilation and repeal of the laws in force in the State, known as the Howell bill, passed both branches of the late Legislature, and was vetoed by the Governor because it would be considered its unconstitutionality. But before submitting the matter to the Legislature he submitted the Legislature passed the other bill which the Governor considered even more objectionable than the first and which he has since vetoed. The other appointed to the Supreme Court bench, to succeed Judge Cooley, resigned, was Judge Isaac P. Christiancy, who was connected with the Indian Treaty Commission for several years, and resigned his commission.

Bennett Bros., dealers in general merchandise, and lumbermen, at Rockwood, have suspended. Liabilities estimated at $50,000.

The Supervisors have voted to build a new court-house at Saginaw, costing $100,000.

A shoemaker of Detroit, named Bowne, was arrested on a charge of bigamy for living with Catherine Bowne, Charles A. Davis, who married the latter from the Soldiers' Home, and made an assault with a piece of scantling.

D. A. Chapin, of Charlotte, recently eat his dinner at the County Poor-House with his own family. He is said to be but about 37 years of age, and leaves a wife, 4 children, also a farm in the county.

A call has been issued for a Republican banker in Detroit not receive a regular stipend of one dollar per week from the Democratic committee of that city.

Hiram Tucker was killed at E. J. Hodge's shingle mill in East Saginaw the other day by a piece of timber striking him on the head.

The Constantinople Court issued several decrees of death on Midhat, Mahmoud and Nouri Pashas, and the six persons of minor rank connected with the Yildiz Kiosque conspiracy. Of these, two received sentence of ten years' penal servitude.

On the 29th ult. an avalanche in the Canton of Grisons, Switzerland, overwhelmed thirteen houses and destroyed the church in the Canton of Berne; a train of wheels were set on fire, and a large number of the inhabitants killed. The avalanche is still sweeping down toward the lake.

The French fishing-boat Bull Kressling has recently sunk off the coast of New Brunswick, by collision with a bark, and six of her crew were drowned.

At the Wilhelm Seminary in England, on the 29th ult. Morgan Townshend was fined £100 and costs and bound over to keep the peace for one year, for horsewhipping Lord Edward Thynne. The latter had addressed the Marquis's wife.

On the 30th ult. a flying column of troops and police went to the new shanty of Mr. Gibbons, Ireland, to enforce evictions, but in each case the tenant paid in full. Fifteen persons were injured in a charge on the factory.

A Constantinople dispatch of the 30th ult. says four regiments of Turkish troops were mobilized for Tripoli, and war-ships and transports were ordered to the coast of the native province. The French were considering the propriety of a naval demonstration in the waters of Tripoli.

The announcement was made on the 30th ult. that the Dr Lesseps scheme was practically completed the purchase of the Panama Railway for $17,000,000, and that the canal would closely follow the line of the track.

In the Henley (London) regatta on the 30th ult. the Cornell boat was injured by a foul, and the Cornell club will protest, claiming a halt for repairs. On the second start, the Americans lost the race by bad steering.

The Canadian Government on the 29th ult. notified the United States Government thereafter they would not be permitted to use their mills of any denomination under $5. All bills under that figure will be issued by the Government.

A secret festive gathering of thirteen gentlemen at Prague was attended twice by the weather, taken under the direction of the Minister of Agriculture, Count Zierotin. Before the meeting was opened the doors were locked, and no one was allowed to leave the room during the meeting. The object of the meeting was to discuss the question of the Emperor's visit to Prague, and to consider the best means of preventing it. The meeting lasted from 10 o'clock in the morning till 4 in the afternoon, when the doors were opened and the gentlemen left the room.

Latest News.

The 104th call for outstanding bonds was issued by the Secretary of the Interior. It is for five per cent. registered bonds, issued under the acts of July 14, 1870, and January 20, 1871, which will be paid October 1, 1881, interest to cease on that date; of 1 registered bonds, viz.: Nos. 1 to 250. At presentation at any time prior to the 1st of October, inclusive, of 1881, at the U. S. Treasury, in the District of Columbia.

THE CHICAGO REPORT

The Strong Man.

While President Garfield lies prone, struggling calmly, but with the inestimable and powerful force of a giant, to rise from the deadly blow of the assassin, all the world stands reverently in fearful awe contemplating the majesty of the scene. From all quarters of the globe expressions of indignant horror of the atrocious deed, and fervent aspirations for the recovery of the illustrious sufferer. Every where there is excitement and feverish anxiety in everywhere prayers for the preservation of the victim's life constantly ascend. But in the room of the prostrate Chief Magistrate there is profound peace. Equal to either fortune, the great, good man, on the slightest variation of whose pulse-beats all the civilized peoples of the earth hang with absorbing interest—the strong man, unmoved, unterrified and unshaken, touched to the destiny of all mankind, but conscious of the battle thrust on which his life depends—exclaims: "God's will be done!" Virginia will exercise the noblest patience, because there the opposition to Bourbonism has the most prominent and powerful organization. If the Virginians can succeed in defeating the reactionary regular Democrats, the work of Democratic disintegration will proceed with rapid, but

An injustice done to the State credits can be remedied. It is not a final and fatal wrong. It has no brand of infamy in its bosom, such as secessionism the present fraudulent ballot-box policy. An injustice to creditors may be remedied at any time. But if the fraudulently-counted vote of Virginia should be used to determine a close Presidential election more evidently than anything else could. What they would be no man can foretell.

Statements received from all quarters of Virginia and from the most reliable sources, leave no doubt that the greatest portion of the colored people, who comprise more than nine-tenths of the Republican voters, favor the Mahone movement, and do so because they see in it a prospect of good, while they can see no other way of realizing. The Republican leaders in Virginia will be unable to influence them. They may hold off enough Republicans to defeat the Mahone party, and defeat themselves, and thus rivet the Bourbons more firmly around the neck of the State. But in doing this they will not have the excuse that they have preserved the honor of the State for the Bourbons; propose nothing more honest, and nothing so practicable as that proposed by Mahone and his friends.

All these matters should be fully considered before the Virginia Republican leaders place themselves in irrevocable opposition to the Mahone liberal movement. What good can come from defeating the Mahone ticket? What good can come from its success? Both questions should be carefully examined. And then the Virginia Republicans should take whichever road promises the greatest benefit to all the country.—*Detroit Post and Tribune.*

—Who etcetera?

The President.

President Garfield was shot by a lunatic at Washington, July 2, 1881. That is a cruel sentence to meet the eyes of men now living, and a terrible one for the present generation to send down to future ages. The chosen Executive of fifty millions of people; a statesman ripe in experience and rich in the graces of a long and useful public life; a gentleman, warm-hearted and generous, a cause of courage or conspiracy; but because it was the whim of a lunatic to shoot. Of all the sad things to be sung, of all the tragedies to be set to music, of all the pathetic and distressing fact on Saturday, none stirred as this had been done before in the history of the country. Never before was there such a shudder as that London's westends shown just at the time when the refrain of the song-hour grew worst, were looking to him with solemn, sad hearts. As much as this ill-starred life typifies, at the beginning of a promising Administration, with the country at peace and enjoying prosperity, so much all at the hands of a lunatic.

There is something so sickening and appalling in the suggestiveness of the scene at the depot in Washington, where it reaches the unsophisticated of the million, and well-nigh paralyzes the intelligence of the boldest, that a great people stand with hands bound and lips closed while a gibbering maniac, or a cowardly fiend, or a wild lunatic rushes with molotov-cocktail brawdo between them and the secret of good government? All arms are ready to answer me, and all hearts are ready to pour out curses that about them and around them is the gathering darkness of despair, and crime with a great calamity.

That President Garfield has always been near to the people. Neither his strong conviction nor his aggressive partisanship ever estranged either party or people at large to the noticed hiechance and unquestioned honesty, his purity of purpose, or his kindly intentions. Never, perhaps, did a President of the people's honest President in all contest with so little zeal against him, and so few enemies. And yet only never did a man walk through the dissensions in his own party so serenely above the strife in the hearts of the people as did the President in his every-day life. Not a man in New York complains. There were men pledged to oppose him to the bitter end in one matter, but no one ever got their consent to say a harsh word against him and when the struggle was over, there was neutral as only men who have an honest liking for a man can be.

There was no feeling of bitterness against him even in the Democratic party. He was the choice of every where with an earnest desire and an honest intention to be just to all. Even the dead of the whole people. His Administration opened with what seemed a period of prosperity, and business interests were settling into cool-grained channels, with easy, regular movement. Relieved somewhat from the worry of office-seekers, and the other day captured twelve out of fourteen as they were driven out of an ambush.

Traveling.

What vistas of magnificent scenery, splendid cathedrals, gorgeous hotels and big trunks (I think the antichrisus is a natural one) thus word brings to the mind's eye of my youthful reader. To travel. How delightful. But ah! the realities, I'll have to wait so long. Traveling's expensive, and I am not rich. My dear, what I write now is meant just for you. Those who are rich may make their traveling just as expensive as they choose, but those who are not can accomplish almost as much, at very little more than staying at home. Yes, I mean thought just as you do—that I couldn't afford to travel. Now I see that I can't afford not to do so.

First of all, consider that, at certain seasons of the year, most of the railroads sell excursion tickets at reduced rates, usually between the great cities and leading resorts in the North during the spring and summer, in the South during the fall and winter. By taking your trip at the right time you can save nearly half the regular fare, and so have an item.

Having thought over the question of cash and bank-fare, take up that of dress. Resolve to discard the big trunk, which is always for, under the most favorable circumstances, such a thing is more or less of a nuisance, and buy but one dress, and that the one you wear. Let it be of dark, serviceable material, such as flannel, that is long-lasting, and plainly made. Provide yourself with stout boots and a good shawl. Carry one suit of clean underclothing, and a few handkerchiefs. Pockets are a great help, and if done up compactly, with your comb, brush, etc., in a linen wrapping and shoot strap, it might be well, also, to have a flannel vest, in case of a sudden change of weather or latitude. Then, with a purse properly protect your dress, but afford convenient receptacles for little articles of use or convenience, and a pair of plain, walking or shade hat, and have an ample supply of veils, and you will be well provided for in case of its becoming discouraged, or, when musing a long journey, especially on the cars, or in bad weather, you do not wish to take down your strings. Take care of your hat and clothes, and use less expensive and less perishable time till; moreover, they are in better case for traveling.

This is positively all you need. It seems very little, but you will find it quite enough. If you visit white on your journey, and your dress really is elegant, a little extra gains with the ornamentation at the neck will make you appear to better advantage. Of course if you travel with the desire of showing your clothes, why, take your best bib and tucker. I have proposed to begin with, that you travel for the sake of seeing the country, something that will not stop long enough in one place to need any great change. Your money, economizing as you ought to last you two weeks. A little delay will enable you to send for more, should you desire to go on for a longer time, or you could send your soiled pieces home, and have clean ones sent you by express for a sum comparatively small, and which you would find quite worth while willing to give than be troubled with a large trunk or family; provided, of course, that you are as far away as to make it cheaper to buy new.

In planning out the trip and season's wardrobe, if you make up your mind to travel several weeks, you see that you will not need so many new dresses, as you will have less opportunity to wear them. Here, then, is another point for saving something toward your trip. Remember, also, that while you are gone some of your neighbors will be

The National Subscription Proposition.
New York World (Dem.) July 9.
Nothing could have been more prompt and more creditable than the meeting held in the Chamber of Commerce on Friday in the special meeting called to take action upon the munificent offer made by the President of the United States to present a gift when a generous and spontaneous impulse like that which has thrilled the people of this country for the past week is allowed to languish and the gift seem to indicate or to wound and to stop the course of action. In this case it would be precisely a gift. It has become a serious question of the safety of the surviving Chief Magistrate to permit the first surgeon and to its own skill, and carefully have been suggested which may have led to the loss of which the country could not afford to run. Public meetings for the same purpose are to be held in the Chamber of Commerce, duly called upon the Chief Magistrate should be generally expressed and a sufficient sum be subscribed at a single sitting to relieve the apprehension of the country. The committee would assume it to be entirely due to the whole Nation to the request upon its

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

OVER 800 Mormon immigrants, chiefly Scandinavian, arrived at New York on the 7th on their way to Salt Lake City.

TWENTY-THREE recruits recently deserted from a party enlisting in Canada for the Northwest mounted police, while in transit through the United States.

DOWN at a break in the floor-arm machinery of Indianapolis the bells of that city boiled for an hour on the 7th, creating the impression that the President had died of his wounds.

RICHMOND CARMEL, of London, is suffering nervous ill regard to burglars, discovered, early on the morning of the 5th, a human figure on the roofed an extension to his house, and fired a revolver, loading for the assault; all sleep his going on.

THE announcement was made on the 7th that the Tin Commissioners had returned, after a journey of 900 miles through Colorado and Utah, to the Pennsylvania capital at Indianapolis. They reported having 300 tons behind a new reservation.

AT St. Mary's Female Academy, near Leavenworth, Kan., on the 7th, the clothing of two sisters of Charity took fire, and they were burned to ashes before they were discovered.

An eleven-year-old boy, named Robert B. Maxwell, died at Louisville, Ky., a few days ago of lockjaw, resulting from the cut of a knife on the finger. The knife was about two weeks before.

IT was stated on the 8th that three cases of yellow-fever had appeared on board the British bark Patsesmi, for Vera Cruz, at the quarantine station in New York harbor. The collector of Customs at Pensacola was officially notified of the fact. The case were of a pronounced type.

THREE fatal cases of sun-stroke were reported in Chicago on the 7th, and the only deaths from cholera infantum. The burial permits reached the extraordinary number of seventy-nine.

AT Piscataqua, N. H., early on the morning of the 9th Treasurer Bickford and two burglars rifled his pockets. He seized one of them and fired two shots with him. The latter came to her husband's aid with a revolver, and pounded the thief's head until he escaped. The other fellow were called, and, after taking away the injured burglar, they captured the other.

THE necessity of the treasury submitted to the Attorney-General the question whether National Banks were permitted to deposit any lawful money other than greenbacks to the credit of the fund for the redemption of circulating notes. A decision has been prepared holding that gold and silver can be deposited for the redemption of circulating notes, and that coin may also be paid out to the Treasurer for redemption of National Bank notes.

THE American Bible Society met in New York on the 9th. The receipts of 1881, during the month of June was acknowledged. It was reported that 197,786 volumes of the scriptures had been distributed during the month.

MRS. HENRY defense Ladies' Deposit Bank, Boston, will pay depositors five cents on the dollar.

IN Iowa a thunderstorm in the vicinity of Decatur, Ala., a few days ago, lightning struck a barn where a number of mules were sought shelter, and four passons were killed and eight others seriously injured.

THE Cincinnati Board of Trustees, near the steel-yards at Hillside, N. Y., took fire on the afternoon of the 9th, and 365 head of cattle were burned, on which the loss was $20,000.

BY the payment of $25,000, the Erie County Savings Bank of Buffalo, N. Y., has recovered $80,000 in stolen securities.

J. W. Hornsby, a mining engineer in San Francisco, has fixed a petition of insolvency, with liabilities of $500,000.

Personal and Political.

A WASHINGTON special of the 5th says it was stated on good authority that a proclamation convening Congress in special session had been prepared and signed by the President, to be issued in the event of his illness taking an unfavorable and necessarily a fatal turn. The object of the action, which, it was said, had been taken with the approval of the Cabinet and Vice-President Arthur, was to provide against any possible contingency. The session would be called to elect a President of the Senate pro tem and Speaker of the House of Representatives, and no other business or business would be likely to be considered.

IN a letter to the Attorney-General, published on the 7th, Mr. Conkling calls attention to the broad distinction between assisting the life of an individual and an attempt to take a life of special value to the whole people, and suggests rigorous punishment for assault on high Executive officers.

A NATIONAL FREEDMEN'S CAMP-MEETING is to be held at Bismarck Grove, near Lawrence, Kansas, thirty-eight miles west of Kansas City, beginning Monday, August 1, and to last through the week. Bishop Cooper has been invited to preside at the meeting, and the opening address. Among the able orators will be made by Generals B. H. Weaver.

THE British Government has appointed J. L. West as Minister at Washington.

IN accordance with the arrangement of the previous day, Sheen Senators and fifty-one Assemblymen of the New York Legislature met in caucus at Albany on the 8th to place in nomination two Republican candidates to succeed Messrs. Conkling and Platt. At the opening of the caucus a letter was read from Chauncey M. Depew, declining to be a candidate, who had voted for him during the previous five weeks, and said that he could no longer allow the use of his name in connection with the Senatorship. This course he adopted, he said, in the interest of harmony, and that New York may not be without representation in the Senate when Congress meets. It was determined that fifty-four votes were necessary to a nomination, and that the nominee for a successor to Mr. Platt should be first selected. On the fourth ballot Congressman Warner Miller received sixty-two votes, and his nomination was made unanimous. Gen. Garfield nominated Mr. Conkling were then balloted for, and on the second ballot Congressman Bridge G. Lapham received sixty-five votes, all that were cast, and was declared the nominee of the caucus, who then adjourned.

PROF. C. V. RILEY has been appointed Entomologist of the Department of Agriculture, in place of J. H. Comstock, resigned. Prof. Riley formerly held the same position.

Foreign.

THE International Monetary Conference at Paris on the 5th adopted resolutions proposed by the French and American members, expressing a desire that negotiations should be opened between those States which took part in the Conference, and that another conference be summoned to meet April 15, 1882, at Paris, the work and its details. The conference then adjourned.

A LONDON telegram of the 5th says: "Dr. Hickey, of the London Hospital, believes cannot be in full possession of his mental faculties, but a moral idiot, incapable of feeling an affection and utterly deathless of conscience, and he should be killed like a mad-dog, or be in dangerous to be at large."

LEDRUC, the English newspaper reporter who recently murdered a Mr. Gould in a compartment of a carriage of the London & Brighton Railway, and threw the body of his victim out of the car window, was arrested in Dark London on the 8th. He made a full confession of his crime.

ON the 8th Mr. Forster, Secretary for Ireland, received a deputation of Irish laborers and presented relief for the distressed districts, but a moral idle, incapable of feeling an affection and utterly deathless of conscience, and he should be killed like a mad-dog, or be in dangerous to be at large."

THE announcement was made on the 7th that the Tin Commissioners had returned, after a journey of 900 miles through Colorado and Utah, to the Pennsylvania capital at Indianapolis. They reported having 300 tons behind a new reservation.

AT St. Mary's Female Academy, near Leavenworth, Kan., on the 7th, the clothing of two Sisters of Charity took fire, and they were burned to ashes before they were discovered.

A TWO-YEAR-OLD boy, named Robert B. Maxwell, died at Louisville, Ky., a few days ago of lockjaw, resulting from the cut of a knife on the finger. The knife was about two weeks before.

IT was stated on the 8th that three cases of yellow-fever had appeared on board the British bark Patsesmi, for Vera Cruz, at the quarantine station in New York harbor. The collector of Customs at Pensacola was officially notified of the fact. The case were of a pronounced type.

THREE fatal cases of sun-stroke were reported in Chicago on the 7th, and the only deaths from cholera infantum. The burial permits reached the extraordinary number of seventy-nine.

AT Piscataqua, N. H., early on the morning of the 9th Treasurer Bickford and two burglars rifled his pockets. He seized one of them and fired two shots with him. The latter came to her husband's aid with a revolver, and pounded the thief's head until he escaped. The other fellow were called, and, after taking away the injured burglar, they captured the other.

THE necessity of the Treasury submitted to the Attorney-General the question whether National Banks were permitted to deposit any lawful money other than greenbacks to the credit of the fund for the redemption of circulating notes. A decision has been prepared holding that gold and silver can be deposited for the redemption of circulating notes, and that coin may also be paid out to the Treasurer for redemption of National Bank notes.

THE American Bible Society met in New York on the 9th. The receipts of 1881, during the month of June was acknowledged. It was reported that 197,786 volumes of the scriptures had been distributed during the month.

MRS. HENRY defense Ladies' Deposit Bank, Boston, will pay depositors five cents on the dollar.

IN Iowa a thunderstorm in the vicinity of Decatur, Ala., a few days ago, lightning struck a barn where a number of mules were sought shelter, and four passons were killed and eight others seriously injured.

THE Cincinnati Board of Trustees, near the steel-yards at Hillside, N. Y., took fire on the afternoon of the 9th, and 365 head of cattle were burned, on which the loss was $20,000.

BY the payment of $25,000, the Erie County Savings Bank of Buffalo, N. Y., has recovered $80,000 in stolen securities.

J. W. Hornsby, a mining engineer in San Francisco, has fixed a petition of insolvency, with liabilities of $500,000.

Personal and Political.

A WASHINGTON special of the 5th says it was stated on good authority that a proclamation convening Congress in special session had been prepared and signed by the President, to be issued in the event of his illness taking an unfavorable and necessarily a fatal turn. The object of the action, which, it was said, had been taken with the approval of the Cabinet and Vice-President Arthur, was to provide against any possible contingency. The session would be called to elect a President of the Senate pro tem and Speaker of the House of Representatives, and no other business or business would be likely to be considered.

IN a letter to the Attorney-General, published on the 7th, Mr. Conkling calls attention to the broad distinction between assisting the life of an individual and an attempt to take a life of special value to the whole people, and suggests rigorous punishment for assault on high Executive officers.

A NATIONAL FREEDMEN'S CAMP-MEETING is to be held at Bismarck Grove, near Lawrence, Kansas, thirty-eight miles west of Kansas City, beginning Monday, August 1, and to last through the week. Bishop Cooper has been invited to preside at the meeting, and the opening address. Among the able orators will be made by Generals B. H. Weaver.

THE British Government has appointed J. L. West as Minister at Washington.

IN accordance with the arrangement of the previous day, Sheen Senators and fifty-one Assemblymen of the New York Legislature met in caucus at Albany on the 8th to place in nomination two Republican candidates to succeed Messrs. Conkling and Platt. At the opening of the caucus a letter was read from Chauncey M. Depew, declining to be a candidate, who had voted for him during the previous five weeks, and said that he could no longer allow the use of his name in connection with the Senatorship. This course he adopted, he said, in the interest of harmony, and that New York may not be without representation in the Senate when Congress meets. It was determined that fifty-four votes were necessary to a nomination, and that the nominee for a successor to Mr. Platt should be first selected. On the fourth ballot Congressman Warner Miller received sixty-two votes, and his nomination was made unanimous. Gen. Garfield nominated Mr. Conkling were then balloted for, and on the second ballot Congressman Bridge G. Lapham received sixty-five votes, all that were cast, and was declared the nominee of the caucus, who then adjourned.

PROF. C. V. RILEY has been appointed

THE ATTEMPTED ASSASSINATION.

Interesting Incidents Connected With the Dastardly Attempt Upon the Life of the President—Full Medical Details.

A Washington dispatch of the 8th gives Colonel Rockwell's account of the tragedy as follows:

"I had several pieces of baggage to dispose of, and as those directly in the President's party were strong, there should be a Saint Bernard dog among them. The Fourth of July, to give expression to the popular rejoicing.

It was stated on the 7th that the physicians had to restrict the visits of Mrs. Garfield to the sick room, as her health was by no means good. Her presence in the sick chamber seemed to have a most soothing influence on her husband. When she appeared the pain left his face, lighted up as if by magic. He manifested a great desire to talk with her, but was specially checked by her looks and the presence of her family physicians by her wonderful nerve and courage. She seemed the first and set as if it were answering to sublime her grief and be cheerful in order to cheer and encourage her husband.

At the evening session of the 7th Postmaster-General James received a telegram requesting him to be on hand at the usual time, the members of the New York Chamber of Commerce had subscribed $50,000 to the Garfield fund and had selected Secretary Windom to present the check. Mr. James was absent from the Cabinet meeting, but returned in time to be present at the session. The check was presented by Secretary Windom, who made a few remarks, to which Mr. James responded. He then read a letter from the Chamber of Commerce, inclosing the check, and expressing the hope that the President would recover, of which there were then strong hopes, there should be a National celebration, as a sort of jubilee, on the

General Sherman on Jeff Davis.

There is a good deal of satisfaction in having a General of the sons who can talk as well as fight. The former faculty may admit men betray on old soldiers into controversies that might better be avoided, but it also enables him to defend himself, his associates, and his country on public occasions against misrepresentation and malice. The late reunion of the Army of the Potomac at Hartford gave General Sherman such an opportunity, and he improved it with a frankness, skill, and vigor that will make his new friends and win him new laurels throughout the land. He took up and extricated as he has read from Jeff Davis' rent-at-book and exposed their falsity in terms that will make the ex-President of the ex-Confederacy squirm when he reads General Sherman's remarks.

General Sherman proved conclusively that no law as have purported to give the true history of the "March to the Sea," and especially in regard to the removal of the non-combatants from Atlanta and the burning of Columbia. Have has made a delicate task and performs assistant to falsify history. The facts in regard to these incidents form no recent mean the prevailing sentiment of the South as the close of the war. They have been investigated by impartial juries by the humanity and decency shown by the removal of the non-combatant population of Atlanta has been fully attested in Major General Chara, a confederate officer who was a representative of General Hood, and the international opinion of the British claims for the loss of property in the burning of Columbia proved that the city was not fired by Sherman, but perished as the result of Confederate non-resistance and cowardice. To keep it out of the hands of the Union army, Jeff Davis is thus convicted of an effort to create a feeling in the North at the expense of demonstrated facts, and to keep alive the sectional feeling of the South among future generations, by vaunting for the ruinous and treasonable task there is among a vanquished people at a time when they were not capable of judging fairly.

The strongest point which General Sherman made against Jeff Davis, however, was his defence of the Confederate Government against the assaults which Davis made upon them as a means for glorifying himself. Davis charges that Johnston disobeyed his orders by surrendering, when he (Davis) had ordered one Beauregard to succeed Joseph E. Johnston. Upon that charge General Sherman makes the following comments:

> Now, mark however and read my letter to Johnston, and you will see that I did not order him to surrender, but left the whole question entirely with the officer himself. Whatever was to the judgment of assistant in that premises, and I was willing to take the responsibility of the North or South in that matter. Mr. Davis' statement that I ordered Johnston to surrender, when I knew he had no power to do so, is simply false. Johnston's letter of April 26th, from one of my staff, expressed the opinion that the terms I had been made a questionable crime against humanity, and I was willing to take the responsibility of such an opinion rather than see the country drenched in blood for four years more. Mr. Davis' letter of April 27th, from which I have quoted, revealed the truth as I then believed it to be, and I was willing to take the responsibility of it.

Now, more than ever and more than ever, the country is in need of a statesman who will not be afraid to say what he thinks, and who will not be afraid to say what he thinks. Whatever was to the judgment of assistant in that premises

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

IN Chicago at noon on the 12th John Urie son finished the voluntary feat of forty-five days, having gone that length of time without partaking of any solid nourishment other than furnished by the water he drank. At the time he started in on the experiment (May 28) his net weight was 197 1-4 pounds; at the close of the fast, 147 3-4—a loss of 49 1-2 pounds in the forty-five days. And before the close of the fast Dr. Harrison, who had had the case in charge, closed the 20 people present that from his own knowledge, and the knowledge of the men who acted as his assistants, the fast had been an honest one in every respect, and that Urieson had not tasted anything, other than water, for forty-five consecutive days. Mr. Urieson then said he had suffered during the last few days from indigestion, but he was not in good health. After a few remarks relating to the benefit of such fasting he partook of a couple of glasses of milk and then of some cold food, apparently without any inconvenience resulting therefrom. The total amount of water drank by Urieson during the forty-five days was 1,351 ounces, or an average of nearly 32 ounces a day. His average loss in weight was a fraction over one pound and one-tenth per day.

THE temperature throughout the West continued extremely low on the 12th. At Indianapolis the degree of heat was 90, and there were numerous cases of sunstroke, among the fatal cases was that of Daniel Hogue, Clerk of the Indiana Supreme Court. At Chicago the thermometer marked as high as 86. All public works were stopped and business was suspended. Many persons were prostrated while on duty a few hours in the morning. There were numerous cases of insensibility reported, and about fifty proved fatal. The heated term continued at St. Louis. At New Orleans the heat was so great that a recurrence of yellow fever was feared.

THE total value of exports of petroleum and petroleum products for the month of May, 1881, was $7,242,146; same month in 1880, $8,264,851; eleven months ended May 31, 1881, $81,502,285; eleven months ended May 31, 1880, $88,296,372.

SECRETARY KIRKWOOD has decided that when a private withdraws from a soldiers' home he can receive his pension directly.

A CYCLONE swept over the vicinity of Fairfield, Miss., after dark on the evening of the 11th, killing four persons and wrecking all the houses and bridges in the village.

DURING the sessions of the Presbyterian Board of Missions at Detroit, a mission to the Indian tribes has been established at Sitka, with twenty pupils as a nucleus.

HON. E. H. Rollins and Edward F. Jarvis, the one fourteen years of age, the other eleven, recently bicycled from Portland, Me., because he refused to give them twenty-five cents which he lost.

AT Pittsburgh, Pa., on the 12th Maud S. trotted a mile in 2:17¼, the best time ever made on any track in any country by one-quarter of a second.

THE damage done by the floods in Iowa is even greater than at first reported. East and west of Marshalltown the Chicago & Northwestern Railroad is reported to be a total wreck, and will not be in operation for a long time.

SCHLAUBER & AMEND, lager beer brewers of New York, have failed for $150,000.

ATTORNEY-GENERAL MACVEAGH holds that the Disembursers of Soldiers' Homes are not entitled to the fees and mileage returned over to them as the effects of deceased soldiers.

UP to the 14th several deaths had taken place in New York from heat—two sunstroke and by explosions of fire-crackers on the Fourth of July. Thirteen deaths from the same causes had occurred in Baltimore, and numerous other persons were burned more or less severely. Several deaths from the same causes are also reported from various other cities and towns throughout the country.

A HOUSEKEEPER in Chicago, on the 14th says Fred. Smith had reported that it was the opinion of astronomers generally that the comet is identical with the one discovered in Brazil, May 26, called in Europe by the name of Iona Peirce. There is no division of the comet, and it is probably near to the astronomers.

AT the instance of the State's Attorney at Hot Springs, Ark., a constable recently stopped the gambling business of their spare time and burned it in the street.

BY the explosion of kerosene which was being used to hasten the frying of fish for Mrs. Mary Kray and her daughters, Mrs. Hattie Monahan and Hattie Frye, were severely burned at Bellevue, O., on the morning of the 14th.

THE wheat crop of Kansas is estimated at fully 20,000,000 bushels. That of Michigan at 17,000,000.

THE National Bureau of Agriculture reports that the returns up to July 1 from all parts of the country indicated the average condition of the entire crop to be about 95, as against 100 for last year; wheat, 85, against 100; corn, 96, as last July.

THE Chicago Tribune of the 16th says reports from all parts of Illinois indicated that the corn crop will be a fair average, while the fall wheat crop will hardly yield one-third of an average. Meadows were in good condition, and the hay crop promised well. Clover was heavy, but timothy was rather light. The oat crop will be fully up to the average. Pastures were in excellent condition. Another report says it was estimated that the wheat yield in Illinois will be 32,000,000 bushels less than the yield of 1880, Michigan's yield will be 14,500,000 bushels less, Ohio 12,000,000 bushels, and Iowa 17,000,000 bushels. The total decrease for the four States, therefore, will be 80,500,000.

A DARING robbery was committed in New York on the 15th. A cashier's office in which were three men, supposed to be peddlers, ran into a light wagon driven by Charles Sonnenberg, backed to the empty of Jacob Ruppert's brewery. As soon as the collision took place two of the supposed peddlers sprang from their wagon, attacked the clerk, and took from him a package of currency containing $8,300, and a bag of silver coins. The latter was subsequently dropped, but the robbers got away with the currency.

JUDGE BARNARD, of New York, has restrained the Union Trust Company of that city from paying the checks issued on their fireworks at night testified to the general enthusiasm.

IN a private letter to King Humbert, published on the 16th, Pope Leo makes bitter complaints against the Italian Government for not preventing recent disturbances, and declares his still appeal to Europe against the question occupied by the Pontiff at Rome.

IN the 15th 300 journeymen brewers of Cincinnati made a demand for a reduction of their hours of labor from 12 to 10, to which their employers consented.

THERE were six cases of murder at Cincinnati on the 15th. The total number of deaths for six days from heat, as reported by the Board of Health, reached 205.

TICKETS from Chicago to New York were sold on the former city on the 15th by the trunk lines for $11.00, and hucksters for $8.

NOTWITHSTANDING Charles F. Jenks, the St. Louis murderer, had secured from Judge Sherwood a stay of execution, the Governor Attorney on the 15th ordered the Sheriff to proceed with the hanging. But that official consulted his counsel and decided not to take the risk. The Governor ordered to move in the matter without an order from the Court of Appeals.

THERE was considerable excitement in the cotton market at New York and New Orleans on the 15th, and an advance of one and one-fourth cents per pound took place.

IT is said orange pennyroyal, a wheat field of nearly one hundred thousand acres from the territory east of the Cascade Mountains, will yield a gain over last year of at least thirty per cent.

AT the conclusion of the second heat in the 2.20 race at Pittsburgh on the 15th the gelding Jay Bird fell lifeless, and was found to have died from heart disease.

THE Chicago Tribune of the 16th says reports from all parts of Illinois indicated that the corn crop will be a fair average, while the fall wheat crop will hardly yield one-third of an average. Meadows were in good condition, and the hay crop promised well. Clover was heavy, but timothy was rather light. The oat crop will be fully up to the average. Pastures were in excellent condition. Another report says it was estimated that the wheat yield in Illinois will be 32,000,000 bushels less than the yield of 1880, Michigan's yield will be 14,500,000 bushels less, Ohio 12,000,000 bushels, and Iowa 17,000,000 bushels. The total decrease for the four States, therefore, will be 80,500,000.

AT the conclusion of the second heat in the 2.20 race at Pittsburgh on the 15th the gelding Jay Bird fell lifeless, and was found to have died from heart disease.

Personal and Political.

IT was reported at Springfield, Ill., on the 12th that Mrs. Abraham Lincoln had greatly improved in health, and was able to take short drives in her carriage. The news of the attempted assassination of President Garfield almost prostrated her, and induced a return of illness which lasted till mid-day.

THE National Greenback State Convention of Wisconsin was held at Watertown on the 12th, and was largely attended, delegates present, representing each of the eight congressional districts. A platform was adopted, and the following for Chief Greenback platform, recognizing in the attempted assassination of Lincoln the spirit of the age, and declaring the election of all public officers, as far as possible, by the people, favoring woman suffrage, and that the $300,000,000 of National Bank loan be called in and replaced by the payment of the No. issued. The Saturday state ticket was nominated by acclamation: For Governor, H. E. Dunn, of Milwaukee; Lieutenant-Governor, Isaiah Gebhinger, of Fond du Lac; Secretary of State, Wilson Hopkins, of Hopkins; Treasurer, Gerhart Lammers, of Sheboygan; Superintendent of Public Instruction, A. J. Cothrell, of Wood; Attorney-General, Joel Foster, of Plover; Railway Commissioner, O. H. Brundage, of Racine; Insurance Commissioner, L. Merrill, of Dodge.

THE Ohio Democratic Convention was held at Columbus on the 13th. The platform adopted contains resolutions declaring in favor "of a tariff-service reform, whenever offices shall be held to be a public trust, to be administered for the public good. Not spoils to be enjoyed as the reward of partisan service" against monopolies and unnecessary legislation; that tax-power delegated to the general Government "to regulate commerce among the several States" as well as the power reserved to States to regulate commerce within their own borders, should be both exercised to prevent unjust discrimination and unreasonable charges by our railroads; in favor of a tariff for revenue, levied and adjusted in its details with a view to equality in the burdens and the encouragement of productive industries, without creating monopolies. A resolution was also adopted "that we deeply deplore the recent attempt upon the life of the President of the United States by an assassin, and denounce assassination in a Republic as the highest and most revolting of crimes, and we extend to the President and his family our deepest sympathies and earnest prayers that a speedy recovery be consummated to him." John W. Bookwalter, of Springfield, was nominated for Governor; Major M. Thompson, of Indiana, Lieutenant-Governor; E. F. Bingham, of Cincinnati, for Supreme Judge; A. F. Winslow, of Chestnut, for State Treasurer; Frank C. Dougherty, of Highland County, for Attorney-General, and Silas Green, of Defiance, for superintendent of Public Works.

JOHN A. STEVENSON, a member of the publishing firm of H. Appleton & Co., died in New York on the 13th.

VICE-PRESIDENT ARTHUR arrived at New York from Washington on the 13th. Before leaving the latter city he called upon each member of the Cabinet and informed them that he had pressing matters of business requiring his attention in New York, but he did not care to leave unless the President's condition warranted. He afterwards called at the White House and had a short and pleasant interview with Mrs. Garfield. He expressed himself much more hopeful than he thought he could go away without any apprehension of any unfavorable turn in the President's case.

JUDGE CRESWELL, of the United States Supreme Court, on the 13th ordered the sequestration of a foot for gangrene.

MR. MCCOY, the evangelist, denies that Guiteau, the assassin, was in any way associated with him in the ministry. He says he always acted on the square, and never believed him to be dishonest and a little crazy.

IN the New Hampshire Legislature on the 14th a bill providing for the punishment of persons giving or receiving free passes on railroads was indefinitely postponed, by a vote of 176 to 85.

Foreign.

CANADIAN crop reports show that fall wheat is above a two per cent. better an average yield and spring wheat eight per cent.

BISMARCK has demanded that the Turkish Government refund the ransom money recently paid to Bismarckian brigands for the release of two captive Germans.

IT was reported on the 11th that the Silesian plague had appeared in the suburbs of Berlin, and was spreading with great rapidity among both men and horses.

IN the British House of Commons on the 12th one of the 18th Gladstone digressions arraigned the Home-rulers for systematically obstructing the Land bill.

ALLEN BETHERSTONE, an employee in the Montreal City Railway stables, has received information from Scotland that he has fallen heir to a rent roll of $80,000 per annum, and to the title of Earl of Tottie in the Scotch Peerage.

PARIS observed the late day of the Republic on the 14th in grand style. Flags and decorations by day and illuminations and fireworks at night.

MICHIGAN STATE NEWS.

MANISTIQUE is scandalized by the conduct of a widow who consented to have her twelve-year-old daughter marry a man old enough to be her father. Fortunately no officer could be found to perform the marriage ceremony.

EDWARD Hawley, a farmer near Potterville, Eaton County, died recently from the effects of poison received while working in a swamp.

ON the 10th the jewelry store of H. E. Dougherty, at East Saginaw, was robbed of property valued at $1,500 during the temporary absence of the clerk.

THE total lake shipments of iron ore from the Upper Peninsula the present season up to and including June 30 were as follows: From Escanaba, 57,140 tons; from Marquette, 16,615 tons; from Menominee, 12,560 tons, total, 86,315 tons—a falling off of 38,308 tons from the amount shipped during the same period of last year.

SAULT STE. MARIE expects to become a railroad center.

DETROIT needs a Frenchman, twenty-two men and girls over shot on base for refusing to work, all of whom were buried to death by a mob setting fire to the building.

The Wounded President.

THE bulletin issued by the physicians at seven p. m. on the 12th stated that the President had continued to do well during the day. The afternoon fever had been slightly higher and the pulse more frequent than in the morning, but the wounds of the attempted assassination of President Garfield showed improvement, and indeed all the favorable symptoms which lasted till next day.

THE National Greenback State Convention of Wisconsin was held at Watertown on the 12th, and was largely attended, delegates present, representing each of the eight congressional districts. A platform was adopted, and the following for Chief Greenback platform, recognizing in the attempted assassination of Lincoln the spirit of the age, and declaring the election of all public officers, as far as possible, by the people, favoring woman suffrage, and that the $300,000,000 of National Bank loan be called in and replaced by the payment of the No. issued. OWL AND ROBIN.

Knowing the owl to the task compleatest him
Now that the song of the robin restrained him
Wrongly of summery weather and sunshine
Feeling but cold-songs heard under heaven.

Woodland, where-dell corn-field, clover,
Ever and ever and ever and ever,
Fine, fine, fine, twelve or seven,
Nothing but cold-songs heard under heaven.
How can we sleep?

"Peep! you whistle, and cheep! cheep! cheep!
Oh, peep, if you will, and beep, if the cheap,
And keep things for me and mine cheap,
And a scrooging for fame and what shall be fame?
Each day a like game, for the last is worst,
And the summer is armed with the silly out-
cry of cold.
Till the Autumn's perspicuous and cheering,
By day; when all honest birds ought to be
heard,
Lord, what a fuss! And so out of all reason,
Have we had the head that each thing doth its
song.
Night and work in, night is for pay-time;
Good heavens, but daytime!

"A value Faust is the Sorley day,
The impudent, but, unsparing day,
Whose business is to be seen and not unfold—
Ins the reporter—the gossip of mankind.
Pah, Sleep! Sleep! Sleep! Sleep! Sleep!
When day-down the cockers may have come,
And the owls and the nightingales may have
flown begun that the worst amount raise at
last.
Ins kills. The leaf and the summer breathe
Ins the hills. The leaf and the summer breathe
Ins the hills. The leaf and the summer breathe
And quill up patchwork, nothing is saved
Has to do with the sun. Oh, shall I sing
Philosophers say and mankind grow tired
Ins the hills. The leaf and the summer breathe
Ins the hills. The leaf and the summer breathe
Through the livening drag of the dreadful day
And when they come to the end of the day
Shall be no heroes, forgotten of shame
For the sun is the sun, and the same is the same
Ins the hills. The leaf and the summer breathe
Ins the hills. The leaf and the summer breathe
Ins the hills. The leaf and the summer breathe

Charlevoix Sentinel.

CHARLEVOIX, JULY 25, 1881

WILLARD A. SMITH, Editor and Publisher.

The Post Office Department has issued an order to put a stop to "Post-office and Postal Card" scrip, and hereafter it will not be received in payment for postage.

The Democratic Congressional Committee of this district met at the Commercial House, in Alma, on last Saturday afternoon, and decided to call a State convention to meet at Saginaw on the 17th day of August next, at 10 o'clock a. m., for the purpose of nominating candidates for Governor, Lieutenant Governor, Secretary of State, State Treasurer, Auditor General, Commissioner of the State Land Office, Attorney General, Superintendent of Public Instruction, and two Regents of the University. The basis of representation in said convention shall be one delegate for every 300 votes cast for Governor at the last election, and one additional delegate for a fraction of 150 votes and upwards. The committee also decided to call a district convention to meet at Alma on the 10th day of August, at 2 o'clock p. m., for the purpose of nominating a candidate for Congress, and to transact such other business as may come before it.

The Democratic State Convention met at Detroit on Wednesday, and nominated the following ticket: For Governor, Josiah W. Begole, of Bay; Lieutenant Governor, Edward Bacon, of Wayne; Secretary of State, Edward Mundy, of Kalamazoo; State Treasurer, Jacob J. Speidel, of Washtenaw; Auditor General, Thomas Dolsen, of Ingham; Commissioner of the State Land Office, Edward Ferguson, of Kent; Attorney General, Don M. Dickinson, of Wayne; Superintendent of Public Instruction, Ira Mayhew, of Calhoun; Regents of the University, Thomas D. Gilbert, of Wayne, and Dr. Alonzo Sterling, of Ingham. The platform adopted by the convention is a strong one, and the ticket is a good one.

The Democratic Congressional Committee for the Eighth district met at Saginaw on Wednesday, and decided to call a district convention to meet at Saginaw on the 17th day of August, at 2 o'clock p. m., for the purpose of nominating a candidate for Congress. The basis of representation in said convention shall be one delegate for every 300 votes cast for Governor at the last election, and one additional delegate for a fraction of 150 votes and upwards.

Gen. Garfield's name has been mentioned for the office of Secretary of the Treasury, to succeed Secretary Windom, who has been appointed to the Senate to fill the vacancy caused by the death of Senator Ferry. Gen. Garfield is a man of ability, and would fill the office with credit to himself and to the country, but he is needed in the House of Representatives, and we hope he will not be taken from there.

Thomas Ryan will be arrested if he ever comes to Canada. He is charged with the murder of Patrick Hennessy, in Dublin, in 1867. Ryan was tried for the murder, convicted, and sentenced to be hanged, but escaped from prison before the day set for the execution arrived. He is now in this country, and the Canadian authorities are trying to get him back.

Lieut. Peary, who has gone on an exploring expedition to the northern coast of Greenland, has written a letter to the Secretary of the Navy, in which he says that he has reached a point 82° 30' north latitude, and that he has found the coast line trending to the northeast. He says that he has found no signs of animal life, and that the country is a desolate waste of ice and snow. He says that he has found no signs of Lieut. Greely and his party, and that he has no hope of finding them alive.

BREVITIES.

—The Sentinel subscription list is growing rapidly.

—Dr. Love has been appointed P. M. at this village.

—Dr. Love is putting the finishing touches to a fine new residence.

—S. Adair has purchased of S. C. Moffatt, at his office, one return excursion ticket to Flint, Mich. Adair has lot on Antrim street.

—If another saw mill is built in Charlevoix would be a paying investment.

—Workmen are rushing Baron See's new building rapidly toward completion, and the front Store of Hayes, Sellers & Company is now in the garden. Thanks.

—S. A. Waldron is building a new fence around his premises, and adding to the appearance of the same.

—Frank Wood is fitting up his barber shop with some fine chairs. Gentlemen will appreciate the change.

—The Fannie Ward has been laid up Wednesday on account of a broken rudder. Will be in the water to-day.

—S. H. Wentzel, of Hayes, Sellers & Co.'s store, has had a finger broken off at the first joint by getting it caught in a pinnacle.

—Albert Mason, Overseer of Highways in Evangeline, and J. Milo Eaton has been appointed by 50 the electors.

—Charlevoix postoffice issued money orders to the amount of $1,259.56, during the week ending Saturday last.

—Adam Andrew's new residence, on the north side, is nearly completed, and will be one of the finest in town.

—The properties Lawrence and Champlain, of the Northern Michigan line, sell brother enjoy the leather at the place.

—A last show with seventy-five snakes, a trained bear and other features, held forth two days last week opposite this office.

—Guests at Hon. J. S. Dunham's: H. E. Thompson, of Grand Rapids; Rev. M. M. Marvin, Royal Oak, Mich., Miss Darrah, Grand Rapids.

—J. M. Bier and wife, of Cadillac, and Mrs. Addie Faulkner, of Pentwater, have been the guests of Gen. W. Miller, during the past week.

—The Services has been designated by the Auditor General as the paper in which to publish the tax sales of Charlevoix county this year.

—D. H. Cool, of the firm of Cole, Ol & Co., Chicago, manufacturers of Grand Duplex Combined Seed Drill and Fine Land Harrow, was in Charlevoix and Pine Lake yesterday.

—J. J. Mason has three of his new gun boat finished in this city at Lake Avenue. It will be one of the best built on Pine Lake or South Arm.

—The affairs of the Hunter Sentinel Remembrance Association are closed up, all of their collected assessments paid and order revoked.

—J. M. Ross of Cadillac, a brother-in-law of Gen. W. Miller, of this place, has been appointed by the Republican committee for Judge of Superior.

—Endless amusement, medicine peddlers, Punch and Judy shows, and dancing dogs, monkeys, etc., are becoming plenty in Charlevoix. Street loafers and corner lounging fraternity are getting in their work.

—Mrs. Dr. Love has returned from Petoskey, where she has been visiting for some time past. Mrs. Love's many friends will be pleased to learn that she has greatly improved in health.

—A gentleman from Cadillac, owner of the Lumber Jack Saloon, of that place, has purchased of John Antrim the corner lot on the west side of Bridge street, and will erect a two-story building on the same.

—The machinery for the steam planer is to be used in repairing the Lumber Company's mill, which burned last winter, will now push the improvement rapidly forward.

—The buzz of the planer of See, Mason & Co.'s mill and door factory was heard for the first time Thursday. The rest of the machinery is being rapidly put in shape for business.

—The Charlevoix mill and door factory will be in full operation the last of this week. The planer and scroll saw are now in tune, and other machinery is being put in shape as rapidly as possible.

—G. W. Warren, a locomotive engineer, of Hempstead, Texas, is stopping in town for the benefit of his health. Mr. Warren was a railroad conductor of O. B. Hilton, of this county, thirty years ago.

—Mrs. L. N. Little of this village, has purchased of L. D. Bartholomew 25 feet in the center of the "Black lot," fronting on Bridge street, for $10 per front foot. She will erect a two-story building on the same.

—We are constrained to repeat the request made some time ago to those in arrears for the Sentinel for the settlement of their accounts. It may be fun for you to receive a newspaper for nothing, but it don't pay us to furnish it on those terms. If you see a cross on your paper, you know what it means.

—Traverse City *Herald*. These directionless is Grand Traverse Bay, which have been ordered by both the *Herald* and the Grand Traverse *Pilot*, to be removed, were seen three or four weeks past the water and been seen in good condition. Sea-level driftwood have been thrown from the bottom up several feet above the surface, while the water smelled and boiled as in a beer cauldron. What is it?

—Petoskey *Record*: Gen. Jansen, of Montgomery, Alabama, is among the summer visitors at Petoskey. He commanded a regiment under Gen. Bragg in the late war, and has a hundred slaves in the "peculiar institution." He was a personal friend of Governor Vanderbilt, Sr., and a school mate of his wife. Gen. Jansen has a wide acquaintance with noble men, both north and south, and is himself a gentleman and a consulting gentleman.

—The keeper of the Point Betsy lighthouse reports having found in a bottle a note written on board the Algoma October 15, 1880, by George A. Mc Morris, of Ann Arbor, Michigan, as engineer, and their abandoned sinking, as they were rescued on a pinnacle.

—One of the crowning features of Charlevoix's midsummer fêtings. Through out the village are numerous groves of magnificent maples, beech, and oak trees, which are being wisely preserved and protected by their owners. In future years these beautiful groves will be a source of pride to the citizens of the town. Let every tree and shrub be nurtured and protected.

—Bay View camp meeting was the excitement Sunday. The steamer Gazelle took over one hundred people from South Arm and back, and the Booth took the Boyne City people, and a good many from here, while the tug Gem had a load from Boyne. The propeller City of Grand Rapids stopped and took several, and Charlevoix was well represented there. The crowd at Bay View was greater than ever before.

—A land runaway occurred in this village yesterday. A team owned by the Charlevoix Livery Stable got frightened while standing on the dock and ran. There were three persons in the buggy, one lady, and two gentlemen. The lady was somewhat injured, one man thrown in the lake, the buggy badly damaged, as well as two other buggies on the dock, and one of the horses badly cut about the head. R. W. Porter was the driver of the team, and only escaped.

—Many of our city exchanges seem to congregate pale one place as north here, and that is Petoskey. We frequently read paragraphs of no account to any but Petoskey people or to Charlevoix, say so. Tell the truth and shame the devil.

—Next week the Sentinel will present its readers a communication from Gen. W. C. Reed, U. S. A., relative to the capture of Sitting Bull. Gen. Custer stopped the charge and losses of being killed in front of the commander of that unfortunate band, and the Sentinel is pleased to be enabled to lay before its readers the private facts from the pen of Gen. Reed.

—Mears of our city exchanges seem to congregate pale one place as north here, and that is Petoskey. We frequently read paragraphs of no account to any but Petoskey people or to Charlevoix, say so. Tell the truth and shame the devil.

Reed.

Personal Mention.

—H. R. Wolcott, of Batavia, Ill., is quartered at Hon. A. Bentley's.

—Wm. Kanagy is sick at his home in Banks.

—Dr. Parkhill, of Owosso, is quartered at Hon. J. S. Dunham's.

—Mrs. Booth Kneer, of Whitewater, Wis., is in town visiting relatives.

—Probate Judge Lorraine, of Toledo, O., is expected here with his family this week.

—Hon. Allen Potter and family are again at the Charlevoix Summer Resort.

—Lewis Miller and wife, of Traverse City, have been visiting at the residence of their son, Gen. W. Miller, of this place.

—Misses Kate and Jessie Smith, of Flint, nieces of the editor of this paper, are in town to stay a few weeks.

—Mrs. R. C. Newell, of Orwell, Ohio, is visiting at her sister's, Mrs. J. S. Dunham's.

—Hon. Perry Hannah was in town a few hours Friday, and visited the Chicago Club House.

—A. S. Pierson, a hardware merchant of Bay City, is in town visiting his brother-in-law, Nelson Cash.

—Mrs. S. P. Phelps, of Big Rapids, and Mrs. S. McLaughlin, of Lansing, were in town last week visiting relatives.

—Dr. Reed and wife, Rev. Mr. Williamson and family, and Mrs. Newton and daughter, all of Norwalk, Ohio, are guests of Hon. John Nicholls.

—C. D. Wilcoxon, of Eastport, is building a house on lot on Main street, in the village, and will hereafter permanently reside here.

—David Tribbe and wife, of Hudson, Ohio, N. J. and Mrs. W. F. Vincent, Mrs. Crosby, and Mrs. Howe and two daughters, of Toledo, Ohio, are guests of Aura Pine.

—E. W. Scott, President of the South Bridge Co., of Toledo, Ohio, is in town, and will stay a week. He is accompanied by his daughter, and Miss Cora Barney, and Miss Jennie Sadley, also of Toledo.

—If the imagination were to run wild in estimating the future of this grand northern country, we believe its enthusiasm would be felt and exercised. Many years ago, even since that paper ceased its existence a "monster" was written in this region. When Pinckney and Bay View were small, the former the old Hall House, as gardens, and their abandoned sanctuary, were redeemed with many sentiments of admiration and love. Charlevoix was early known as "Pine Rowe," a small ring station. The transformation has been swift, but not yet complete. Railroads and steam navigation are now bringing thousands of people to our midst, but tens of thousands are yet to be added to the honest tidal wave which inevitably rushes upon us.

Death of Ex-Gov. Bagley.

Ex-Gov. John J. Bagley died in San Francisco, Cal., on Wednesday last. He had been sojourning there for several weeks for the benefit of his health, and was thought to be improving, but serious complications of the disease which afflicted him caused his death. Mr. Bagley was well known and personally so widely known that it is unnecessary for us to mention his long and distinguished career. He was a leading lawyer, a successful business man, a prominent and patriotic citizen, a pleasant and polished social and political companion. Modest and unassuming to a fault, he never obtrusively thrust himself forward, but rather remained in the background, while others, of less ability, but more self-assertion, pushed themselves to the front and secured the honors and emoluments which he could have had for the asking. He was a native of Detroit, and was about 50 years of age at the time of his death.

The President.

So serious a turn has lately been the report from the bedside of President Garfield, that for a few days we were quite prepared to hear of his death. But the latest news is more encouraging. A report from Dr. Bliss, dated Monday morning, says that the President was somewhat improved.

—Mrs. Wm. Lumbard, of Boyne City, and Mrs. Lumbard, of Ellsworth, are visiting relatives in this village.

—Traverse City *Tribune*: Calling at one of our stores yesterday, we noticed a coveted green apple in possession of a individual, who, by the aid of a magnifying glass, was examining with painful interest a small horrible object, which lay on a sheet of white paper beneath. We discovered that the individual in question was the Hon. J. B. Haviland, who was startled with great vehemence—as it is on lower the incredulous smiles that played on the lurers of some of his hearers—that about twenty-three years ago, while in the harvesting field, a wheat or oat insect had accidentally lodged in his throat, where in spite of all his efforts to remove the unwelcome visitor, it had remained stuck fast until Sunday night last, when the Honorable gentleman claimed he had coughed it up. And he was satisfied that the object under the glass was the identical insect he coughed. This object we very add, is two or three inches long, and green in color, having much the appearance of grass.

Notice—Ten dollars will buy a good standard Singer sewing machine, but slightly used, over a Wheeler & Wilson, Howe, and several others. Call and see them at my residence.

CAPT. D. S. WAY.

Money to Loan on good farm security at lowest rates in Northern Michigan. Apply in person or address, W. S. Manson Loan Agent, Nanaimo, Antrim Co., Mich. (12-27)

Now is the time to buy a good harness. A full assortment at J. E. Wood & Co's.

Fatal Accident.

Another of those horrible events which are the result of the careless handling of firearms, occurred near Advance on Tuesday last. A party consisting of Joseph Graham, his brother, and John Stacy, with their guns, were in search of a bear which had been seen in the vicinity. Joseph Graham was detached from the party to drive the cattle home to their usual place upon them. Being unsuccessful in the effort, he approached them as they sat upon a log, with their guns upon their left arms. John Stacy's gun was cocked, and as Graham approached to within a few yards of him it went off, the ball passing through Graham's brain, killing him instantly. Graham was a newcomer in this county, having but recently come from Canada.

A Tempest in Ithio.

A tempest rages in the bosom of the unhappy family of political idolaters in Ithio. The staff themselves Democrats. The cause of this psycho-meteorological disturbance is the invasion of their quiet domestic household by a stranger of the name of Bookwalter, and his assault of the highest place in party honor, the candidacy for governor, in virtue of the right of highest bidder. Until a few weeks ago, the name of this stranger had never been heard in the party councils. Inquiry of his antecedents and pedigree show that he entered the tribe of Ithio from a hostile tribe less than one year ago, General Hancock being the first Buckeye "standard bearer" that ever received his vote. His origin was obscure. In his youth he was known to a limited circle of acquaintances as "Sawdog John." Being an unsettled genius, he made some investments in a water wheel which laid the foundation of a large fortune. With the acquisition of wealth, the name of Sawdog John was exchanged for that of John Bookwalter. At length ambition suggested to him the idea of exchanging the republican supplement for that of the Honorable John W. Bookwalter. To assist the change, he decided to be the "standard bearer" of a part in the fundamental electoral issue. It probably did not matter to him what party might be named, nor what might be the principles called its "principles." The main point was to become a party standard bearer. Being a practical man, he recognized that to his aspect in a practical, business way, by making a free use of money with his paid servitors and getting the nomination as he would have got any other thing after his election, he could charged to a settlement. Then he appears to be no doubt in any mind that the nomination of Bookwalter was procured in a manner to disgust and strikers who were loyal and paid expressly for the performance of that impersonal programme.

What was done in that business-like convention should excite the indignation of the virtuous Pendleton, Follett, Bishop, Long, Medley, Warner, Mayo, Flannigan, Dunn, Milligan and the rest of the Ithuna patriots, deserving and ordeal? These indignant conservators of the Democratic virtues have permitted the usurpation of the party, and the party is to be tried, which was to rule, and he claims credit for it where we slouchery "calcium." He says:

The Democratic party survives. After the Democratic party has seen in 1881 and 1883 errors and follies of the succeeding twenty years crowd upon it, and has seen its ranks thinned by the desertion of many of its best men, it still lives. Those men with self-assurance, not unbecoming a statesman, for those have been known when it has seemed to not to be absurd to be great. Perhaps the very limitations of genius and large character of the statesman are necessary to the statesman.

So me of this is historically true as far as it goes, but it does not go far enough. The Democratic party has not only made the "attempt" to take its own life in 1881, but the Sawdog wing of it attempted to take the life of the Republic also, and in this fruitless effort it was defeated only by a large mass of the party in the North. It was an unsuccessful attempt to the South under the name of the Confederacy, and an unorganized attempt in the North in 1881 and on "reconstruction," disloyalty, the Knights of the Golden Circle and other secret societies of treasonable societies. This great overt act of treason was followed by the assassination of Garfield, by the errors and follies of the succeeding twenty years, which probably have not gone as far as a pick-staff and which the Republican party has seen and in part corrected. Now the party has come to guard the country against. That we are the souls, prospectuses, patient, progressive people of the North is to be found in the fact of the Republican party. It has served the country and the party. It has served the country and the party. It has served the country and the

Lincoln's Early Love—His Proposal to Mary Owens.

Ignatius S. Jackson Gaffney, in the Chicago Sunday Inquirer, in extracts copied from the Chicago Inter-Ocean, entitled "Abraham Lincoln's Love," in which some serious errors that I am tempted to try to correct. The article referred to purports to be an interview with W. H. Greene, with whom I am well acquainted, in which a history of Mr. Lincoln's courtship with Mary Owens is given. The Mary Owens referred to is the same, and she, in 1837, had married Jesse Vit yard, was my mother, and while I am but 43 years old I know it is untrue for me to say anything, yet as the language attributed to her is such that no worthy son of my mother's education could have used, and as there is evidently a mistake with reference to her engagement with the ex-President I have concluded to send you the communication for publication. Mr Greene is a gentleman of excellent sense and judgment, and I know is no enemy to my family, and her attainments to be such that he and no one else should need to be her language even bordering on her illiteracy. In a communication to a biographer of Mr. Lincoln, when a description of Mary Owens was sought for publication Mr. Greene says of her: "She was tall, weighed 125 pounds and had large, blue eyes, with the finest trimmings I ever saw. She was considered a good wit and humor, had a liberal education and was quite intelligent." I do not say in a jest, or I am, have misunderstood it. If you, Mr. Editor, or the public otherwise, think such was used I have no objection to your doing so. For my part, I have already decided. What I have said I still must positively assert, provided you think it is my opinion that you had better do it. You have not been accustomed to back slop, and it may be more severe than you now imagine. I know that you are capable of thinking correctly on any subject, and if you deliberate maturely on this before you finally decide, then I am willing to abide your decision."

After Mr. Lincoln's offer of marriage had been declined, under date of Aug. 16, 1837, he again wrote to Mary Owens as follows:

"You will no doubt think it strange that I should write you a letter so soon the same day on which we parted; and I can only account for it by supposing that seeing you lately makes me think of you more than usual, while at our late meetings we had but few explanations of thoughts. You must know that I cannot see you or think of you with indifference, and yet it may be that you are mistaken in regard to what my real feelings toward you are. If I knew you were not I should not trouble you with this letter. Perhaps any other man would know enough without further information; but I consider it my privilege to you to plead ignorance, and 'you' bounden duty to allow the plea. I would say nothing else, to do right with you; and if I know it would be doing right, as I rather suspect it would, to let you alone, I would do it." Further on in the same letter he says: "What I do wish is that our further acquaintance shall depend on yourself. If such further acquaintance would contribute nothing to your happiness I am sure it would not to mine. If you find yourself in any degree bound to me, I am now willing to release you, provided you wish it, while on the other hand I am willing, and even anxious, to bind you faster, if I can be reconciled that it will in any considerable degree add to your happiness. This indeed is the whole question with me. If you would make me more miserable than to believe you miserable—nothing more hypothetical to know you were so—I cannot imagine. I've presented his suit with a frankness and candor, and with a sincerity of purpose that was characteristic of the man. Shortly after making this proposal, and after an intimation that his suit would probably be unavailing, Mr. Lincoln went to Springfield, Ill., as a member of the Legislature of that State from Sangamon county. Mary Owens a letter, dated May 7, 1838, which letter and others from the same writer are still among the papers belonging to the estate of my mother. A part of the letter reads as follows:

"Whatever woman casts her lot with mine, should say ever do so, it is my unbounded wish to all in my power to make her happy and contented; and there is nothing that I can imagine that would make me more unhappy than to fail in the effort. I know I would be much happier with you than the way I am, provided I saw no signs of dissatisfaction in you before marriage, as to me you have been in the way of a jest, or I am, have misunderstood it. If you, however, think you could be happier, I much wish you would think so now, while in the form of a proposal, and not defer it to a more convenient season. For my part, I have already decided. What I have said I still must positively assert, provided you think it is my opinion that you had better do it. You have not been accustomed to back slop, and it may be more severe than you now imagine. I know that you are capable of thinking correctly on any subject, and if you deliberate maturely on this before you finally decide, then I am willing to abide your decision."

After Mr. Lincoln's offer of marriage had been declined, under date of Aug. 16, 1837, he again wrote to Mary Owens as follows:

"You will no doubt think it strange that I should write you a letter so soon the same day on which we parted; and I can only account for it by supposing that seeing you lately makes me think of you more than usual, while at our late meetings we had but few explanations of thoughts. You must know that I cannot see you or think of you with indifference, and yet it may be that you are mistaken in regard to what my real feelings toward you are. If I knew you were not I should not trouble you with this letter. Perhaps any other man would know enough without further information; but I consider it my privilege to you to plead ignorance, and 'you' bounden duty to allow the plea. I would say nothing else, to do right with you; and if I know it would be doing right, as I rather suspect it would, to let you alone, I would do it." Further on in the same letter he says: "What I do wish is that our further acquaintance shall depend on yourself. If such further acquaintance would contribute nothing to your happiness I am sure it would not to mine. If you find yourself in any degree bound to me, I am now willing to release you, provided you wish it, while on the other hand I am willing, and even anxious, to bind you faster, if I can be reconciled that it will in any considerable degree add to your happiness. This indeed is the whole question with me. I would make me more miserable than to believe you miserable—nothing more hypothetical to know you were so—I cannot imagine. I know that you are capable of thinking correctly on any subject, and if you deliberate maturely on this before you finally decide, then I am willing to abide your decision."

—Architect (to Mr. De Newo Rich, who is considering the front elevation of a projected residence): "If you do not like those towers, Mr. Rich, we can have them eliminated." Mr. De Newo Rich—"They're real ban some as they be, but if 'liminatin' on 'em would make one less sooner, let's have 'em 'liminated."—*Osbornton Spectator.*

—The newest thing is to send artificial flowers with the favorite perfume of the wearer. Just think of a rose in a St. Louis man's buttonhole perfumed with old rye.—*Boston Post.*

The Spoopemykes On a-Fishing.

"Say, my dear," said Mr Spoopemykes, with a social sort of a grin, "how would you like to go fishing?"

"Wouldn't that be perfectly lovely?" smirked Mrs. Spoopemykes. "I never was fishing in my life, and I always wanted to try it. Where can we go?"

"Well, there are lots of places around Brooklyn. last summer I saw boys catch a good size fish off the dock at the foot of State street. We might go there."

"Just the place," conceded Mrs. Spoopemykes. "Perhaps we can catch some sardines. I'll bet a spool of thread I get the first shad!" and in her glee she walked across the room and back again.

Mr. Spoopemykes smiled pleasantly upon his wife and started out into the yard to get some worms, while Mrs. Spoopemykes rigged herself up for the impending excursion.

"Did any fish stoke?" she asked, as Mr. Spoopemykes returned, rather warm from his exercise

"I've got some fishing-rods. If that's what you mean," replied Mr. Spoopemykes curtly, "but I could only find four worms."

"Can't we break 'em in two?" inquired Mrs. Spoopemykes, anxiously.

"Could if we had a buzz-saw," grunted Mr. Spoopemykes. "Come along, if you're coming," and thoroughly equipped for the expedition Mr. and Mrs. Spoopemykes set out for the State Street pier.

"How long before they bite?" asked Mrs. Spoopemykes, hoisting her hook out at the water and examining the point of a worm for bunkard had impaled thereon.

"They'll probably bite at that as soon as they can borrow a stepladder," retorted Mr. Spoopemykes, eyeing the spring on his rod. "If you expect to get any fish, you'd better let that thing down in the water."

"Oh!" and Mrs. Spoopemykes, dropping the rod, "Oh you think I could catch a gold fish?" she inquired, after a pause.

"If I hold out there, I have—at times," ejaculated Mr. Spoopemykes, firing his hook up toward the Heights.

"So did I," exclaimed Mrs. Spoopemykes, as she fell over backward and shot her sinker into Mr. Spoopemykes's ear. "I declare, we both had bites!"

"What are you doing, demanded Mr. Spoopemykes. "Whale fishing? When I'm pulling in fish, you just sit still, will ye? Think my head's a fish pond? Stop it, I tell ye. Don't splash water. There! Now sit still and fish like a gentleman. Don't you get a bite?"

"Yes, indeed," replied the Major, who was a little cyprus and that morning having himself his mouth with coffee. "Yes, indeed, my dear, the life of an Ancient mariner is not so hard. There are no insults from the world. Just me and the sea, and I've been living for three years out of the dust and wind and big red round our glorious dowdy. Sometimes I get a bite, and then the wind or the current or something takes it away. But I'm not complaining. I'm satisfied with the consolation afforded you by the basted stock operator, who knows use the operations in almost every detail of the business of being where millinery and dressmaking generally does at the end of the season."

"Why, Major, how you do ramble on," exclaimed Mrs. Spoopemykes. "You would naturally suppose that the fishing on the Podgers' cruise will have to do to get you there, wouldn't you?"

"How's that?" asked the Major, instantly interested on the subject of fishing, which he held to be a much greater importance than the Irish land troubles.

"What I know about it," responded Mrs. Spoopemykes, "I read in a fashion paper, and I outglitter its large."

"Everything ought to be, Mrs. Mrs. Mrs. if only on account of its old age."

"Well, the article said," continued Mrs. Spoopemykes, pretending to ignore the Major's slur on her favorite reading, "that Arabian princesses, when they want to fish a polar bear, plant a big kinkle in the ice, with a bright light in the middle. They bait the kinkle with blood, and the bear comes along and licks it, and eats the kinkle, and then it freezes to his tongue, and he can't get away, and he bleeds to death. Isn't it dreadful?"

"Hist! Shh-h! Quiet now! I've got him! See me play him! Now I'll fetch him!" and Mr. Spoopemykes subsided in until he landed an old boot.

"I didn't know that fish had hurra on like a chestnut!" said Mrs. Spoopemykes, quivering with excitement. "Creek him and bite him and kick him! Crush your grandmother!" snorted Mr Spoopemykes, shying the boot up the pier. "He won't good to eat, anyway. I'll get something—"

"What's the matter with my stick? Let go, you nasty thing! Here's another one. Quick!

"Run him in, can't ye? You've got a bite. Haul up!" cried Mr. Spoopemykes, trying to untangle himself from the line and help his wife. "Lift him out of the water—"

"He won't let me," screamed Mrs. Spoopemykes, holding both arms out at full length. "Take him off! Scat! Go away, you monster!"

"Lift your pole straight up in the air!" shouted Mr. Spoopemykes. "Hoist the dod-gasted thing right up."

Mrs. Spoopemykes exerted herself and disclosed an eel dangling.

"It's a rattlesnake!" she yelled. "Don't go near him! Fire! fire! murder! police! police-e-e!"

"Hold your yawp, will ye?" bawled Spoopemykes. "Get him over the dock so I can catch him! What ye holding him out there for? Waiting for him to nip? Stick that pole straight up in the air. I tell ye!"

Mrs. Spoopemykes threw the pole over her shoulder and dapped the eel into Mr. Spoopemykes's countenance.

"Dodgast it!" he yelled as he scrabbled to get rid of the eel. "Get that slimy eel lightning off me! Let go, will ye? Hold it still, I say! Think you're a tree?"

"Don't touch him! Throw him overboard! He'll sting you to death!" gurgled Mrs. Spoopemykes, and, forgetting her fish pole still exercised an influence over the eel, she gave it a jerk and it slipped through Mr. Spoopemykes's fingers. That gentleman made a spring for it and washed into the water.

"Hon! blah! bah! waugle, gib, hic, gu, gaggle!" spluttered Mr. Spoopemykes, as some lightroom fished him out with the boat hook. "Can't I be left alone a gawl darned minute without solicitude, as they made their way home.

"If I did, I landed it," growled Mr. Spoopemykes, blowing mud like the exhaust of a tug.

"Anyhow, I caught an eel, didn't I?" asked Mrs. Spoopemykes, carrying the eel on the end of the fish pole and shoving it into Mr. Spoopemykes's face.

"What are you doing, demanded Mr. Spoopemykes. "Whale fishing? When I'm pulling in fish, you just sit still, will ye? Think my head's a fish pond? Stop it, I tell ye. Don't splash water. There! Now sit still and fish like a gentleman. Don't you get a bite?"

"Yes, indeed," replied the Major, who was a little cyprus and that morning having himself his mouth with coffee. "Yes, indeed, my dear, the life of an Ancient mariner is not so hard. There are no insults from the world. Just me and the sea, and I've been living for three years out of the dust and wind and big red round our glorious dowdy. Sometimes I get a bite, and then the wind or the current or something takes it away. But I'm not complaining. I'm satisfied with the consolation afforded you by the basted stock operator, who knows use the operations in almost every detail of the business of being where millinery and dressmaking generally does at the end of the season."

"Why, Major, how you do ramble on," exclaimed Mrs. Spoopemykes. "You would naturally suppose that the fishing on the Podgers' cruise will have to do to get you there, wouldn't you?"

"How's that?" asked the Major, instantly interested on the subject of fishing, which he held to be a much greater importance than the Irish land troubles.

"What I know about it," responded Mrs. Spoopemykes, "I read in a fashion paper, and I outglitter its large."

"Everything ought to be, Mrs. Mrs. Mrs. if only on account of its old age."

"Well, the article said," continued Mrs. Spoopemykes, pretending to ignore the Major's slur on her favorite reading, "that Arabian princesses, when they want to fish a polar bear, plant a big kinkle in the ice, with a bright light in the middle. They bait the kinkle with blood, and the bear comes along and licks it, and eats the kinkle, and then it freezes to his tongue, and he can't get away, and he bleeds to death. Isn't it dreadful?"

"Hist! Shh-h! Quiet now! I've got him! See me play him! Now I'll fetch him!" and Mr. Spoopemykes subsided in until he landed an old boot.

"I didn't know that fish had hurra on like a chestnut!" said Mrs. Spoopemykes, quivering with excitement. "Creek him and bite him and kick him! Crush your grandmother!" snorted Mr Spoopemykes, shying the boot up the pier. "He won't good to eat, anyway. I'll get something—"

"What's the matter with my stick? Let go, you nasty thing! Here's another one. Quick!

"Run him in, can't ye? You've got a bite. Haul up!" cried Mr. Spoopemykes, trying to untangle himself from the line and help his wife. "Lift him out of the water—"

"He won't let me," screamed Mrs. Spoopemykes, holding both arms out at full length. "Take him off! Scat! Go away, you monster!"

"Lift your pole straight up in the air!" shouted Mr. Spoopemykes. "Hoist the dod-gasted thing right up."

Mrs. Spoopemykes exerted herself and disclosed an eel dangling.

"It's a rattlesnake!" she yelled. "Don't go near him! Fire! fire! murder! police! police-e-e!"

"Hold your yawp, will ye?" bawled Spoopemykes. "Get him over the dock so I can catch him! What ye holding him out there for? Waiting for him to nip? Stick that pole straight up in the air. I tell ye!"

Mrs. Spoopemykes threw the pole over her shoulder and dapped the eel into Mr. Spoopemykes's countenance.

"Dodgast it!" he yelled as he scrabbled to get rid of the eel. "Get that slimy eel lightning off me! Let go, will ye? Hold it still, I say! Think you're a tree?"

"Don't touch him! Throw him overboard! He'll sting you to death!" gurgled Mrs. Spoopemykes, and, forgetting her fish pole still exercised an influence over the eel, she gave it a jerk and it slipped through Mr. Spoopemykes's fingers. That gentleman made a spring for it and washed into the water.

"Hon! blah! bah! waugle, gib, hic, gu, gaggle!" spluttered Mr. Spoopemykes, as some lightroom fished him out with the boat hook. "Can't I be left alone a gawl darned minute without solicitude, as they made their way home.

"If I did, I landed it," growled Mr. Spoopemykes, blowing mud like the exhaust of a tug.

"Anyhow, I caught an eel, didn't I?" asked Mrs. Spoopemykes, carrying the eel on the end of the fish pole and shoving it into Mr. Spoopemykes's face.

"What are you doing, demanded Mr. Spoopemykes. "Whale fishing? When I'm pulling in fish, you just sit still, will ye? Think my head's a fish pond? Stop it, I tell ye. Don't splash water. There! Now sit still and fish like a gentleman. Don't you get a bite?"

"Oh, you caught it!" piped out Mr. Spoopemykes. "You're a fish woman, you are. All you want now is glass sides and some bubbles running through you to be an aquarium. Another time when we go fishing you stay at home! You hear?"

And with this mathematical suggestion Mr. Spoopemykes hurried himself to his domicile and took a rum sweat.—*Brooklyn Eagle.*

—The American mosquito has appeared in London. How it crossed the Atlantic is not known, but it has opened business, and has, probably, ere this, some of the last blooded of the country in its veins.—*Texas Siftings.*

MISCELLANEOUS.

—Hibernor, the name of that part of long Branch where Grant stays and Garfield was visiting, is only short for Ex. L. Hirown, who laid out the grounds and built the cottages.

—Canadian women have been doing a thriving business in smuggling baby carriages at some point along the line by coming to the American side with an infant in their arms and stowing the blind back in a carriage.

—Cetawayo frets under imprisonment more and more. He has become despondent, longs to return to Zululand, and insists emphatically that Zadkiel is his. An extended statement of his has been forwarded to England.

—Senator Hoar for two visiting Westminster, Mass., seeking information concerning the former home of the Garfield family. It was from this little town that Solomon Garfield, grandfather of the President, departed after the army of the Revolution.

—"A good many of our editors," says a New York newspaper's sedate account of an inebriate sashay, "men of letter and great learning, have passed a week or so at this place, in order to recover, under judicious treatment, the command of their nerves and use of their stalwart nerves."

—A Japanese unknown tribe, called the Jarawas, has been discovered in the Andaman Islands, occupying the forest between Port Cornwallis and Aberdaman. They speak a language quite distinct from the Hindoostanee of the friendly Andamanese. They are represented as a very timid people.

—Wonderfully rapid work logging is to be done in Florida, in connection with the scheme for redeeming the lost lands in the Everglades. Several machines on flasks will scoop out the soft soil to a depth of forty feet and a width of forty-four. Nine million cubic yards will be thus excavated in about six months.

—A curious coincidence is found in the fact that the bullet which struck the President as nurse at the time of his birth died about the hour the assassin attempted his life. Her name was Mrs. Stewart C. Gardner and she died at the residence of her son, A. J. Gardner, in Mason Township, near Bowayne, Mich., at the age of eighty-seven years.

—Mr. Jas. Allaway, the Prince of Wales and Cardinal Newman are cigarette smokers; the Pope and King Humbert are snuff-takers; Gladstone, William and Thomas Joseph smoke big pipes; Lord Beaconsfield, Grevy, Gambetta and Queen Victoria don't smoke at all; Russia and the Sultan indulge in cigarettes, and Bismarck is a confirmed Havana tobacco.

—A pretender to the Russian throne has been giving the police in the rural districts of the empire much trouble. He appeared first in Poland in the character of the Czarewitch, who was reported to be dead, and subsequently he turned up under that name, been sitting up the pretensions of the palace, thereby proving that the Czarewitch is much alive, and not yet laid hands upon him.

—Three weeks ago the people were too much stunned to reason. On Saturday they began calling for the head of the editor of the Tokio Sabanshin, and "Mr. Matsuzawa, of the editorial staff of the same journal, was arraigned there by handcuffs and tied up with a rope round his loins. The report adds: "It is very sad to see journalists thus treated who have worked for the benefit of their country." Mr. Matsuzawa's sole offense is said to be that of publishing a statement that the Mikado had instructed the Minister of the Imperial Department of the Household to order Mr. Saionji to resign the editorship of his journal.

—Queen was the terror inspired by the plague that several houses in Edinburgh were shut up after the visitation and continued empty for a century. The Highland soldiers of Prince Charles Edward in 1745 broke into several of these deserted mansions and found many valuable articles, but no outbreak of the disease followed their temerity. In 1858 some houses were pulled down that had remained closed and uninhabited since the plague of 1645, and person in the vicinity were apprehensive lest a reappearance of the sickness should follow. These fears proved groundless. Yet in the first cholera epidemic in London many people believed that its appearance was connected with the disturbance of the sites of the old "plague pits," where the victims of 1665 had been interred.

President and People.

That this President, in his character of invalid, is counted as a member of every house circle in the land, received further and notable illustration a few days ago. The people had been for a week rejoicing over his rapid progress toward convalescence, as they were during the startling announcement that he was so much worse as to throw his physicians and bimonthlies attempting into a sort of a panic. The effect of this announcement was like reproof and rebuke to the over-acute people. There was not only no fear, but a little remorse pictured on each countenance. It was as though the people said pitifully: We feared you were dying. We rejoiced over the President's recovery before the official news of it had reached us. We believe that he was better even than his physicians reported, and that it was because of the delight that, with a man of Garfield's pluck and courage, the people could judge as well, or better, than the best surgeons, we had begun to think, or we should not have added and mystified the doctors. We had gone so far as to intimate that Bliss and Barnes were unnecessarily nervous and anxious as to the President's condition; we even blamed gayety in the White House as the effect that the doctors, anxious to keep their names before the public, had drawn the people into their net. Indeed, the President's illness, and now, God along, if you're reading," and thoroughly equipped for the expedition Mr. and Mrs. Spoopemykes set out for the State Street pier.

"How long before they bite?" asked Mrs. Spoopemykes, hoisting her hook out at the water and examining the point of a worm for bunkard had impaled thereon.

"They'll probably bite at that as soon as they can borrow a stepladder," retorted Mr. Spoopemykes, eyeing the spring on his rod. "If you expect to get any fish, you'd better let that thing down in the water."

"Oh!" and Mrs. Spoopemykes, dropping the rod, "Oh you think I could catch a gold fish?" she inquired, after a pause.

"If I hold out there, I have—at times," ejaculated Mr. Spoopemykes, firing his hook up toward the Heights.

"So did I," exclaimed Mrs. Spoopemykes, as she fell over backward and shot her sinker into Mr. Spoopemykes's ear. "I declare, we both had bites!"

"What are you doing, demanded Mr. Spoopemykes. "Whale fishing? When I'm pulling in fish, you just sit still, will ye? Think my head's a fish pond? Stop it, I tell ye. Don't splash water. There! Now sit still and fish like a gentleman. Don't you get a bite?"

"Yes, indeed," replied the Major, who was a little cyprus and that morning having himself his mouth with coffee. "Yes, indeed, my dear, the life of an Ancient mariner is not so hard. There are no insults from the world. Just me and the sea, and I've been living for three years out of the dust and wind and big red round our glorious dowdy. Sometimes I get a bite, and then the wind or the current or something takes it away. But I'm not complaining. I'm satisfied with the consolation afforded you by the basted stock operator, who knows use the operations in almost every detail of the business of being where millinery and dressmaking generally does at the end of the season."

"Why, Major, how you do ramble on," exclaimed Mrs. Spoopemykes. "You would naturally suppose that the fishing on the Podgers' cruise will have to do to get you there, wouldn't you?"

"How's that?" asked the Major, instantly interested on the subject of fishing, which he held to be a much greater importance than the Irish land troubles.

"What I know about it," responded Mrs. Spoopemykes, "I read in a fashion paper, and I outglitter its large."

"Everything ought to be, Mrs. Mrs. Mrs. if only on account of its old age."

"Well, the article said," continued Mrs. Spoopemykes, pretending to ignore the Major's slur on her favorite reading, "that Arabian princesses, when they want to fish a polar bear, plant a big kinkle in the ice, with a bright light in the middle. They bait the kinkle with blood, and the bear comes along and licks it, and eats the kinkle, and then it freezes to his tongue, and he can't get away, and he bleeds to death. Isn't it dreadful?"

"Hist! Shh-h! Quiet now! I've got him! See me play him! Now I'll fetch him!" and Mr. Spoopemykes subsided in until he landed an old boot.

"What's the matter with my stick? Let go, you nasty thing! Here's another one. Quick!

"Run him in, can't ye? You've got a bite. Haul up!" cried Mr. Spoopemykes, trying to untangle himself from the line and help his wife. "Lift him out of the water—"

"He won't let me," screamed Mrs. Spoopemykes, holding both arms out at full length. "Take him off! Scat! Go away, you monster!"

"Lift your pole straight up in the air!" shouted Mr. Spoopemykes. "Hoist the dod-gasted thing right up."

Mrs. Spoopemykes exerted herself and disclosed an eel dangling.

"It's a rattlesnake!" she yelled. "Don't go near him! Fire! fire! murder! police! police-e-e!"

"Hold your yawp, will ye?" bawled Spoopemykes. "Get him over the dock so I can catch him! What ye holding him out there for? Waiting for him to nip? Stick that pole straight up in the air. I tell ye!"

Mrs. Spoopemykes threw the pole over her shoulder and dapped the eel into Mr. Spoopemykes's countenance.

"Dodgast it!" he yelled as he scrabbled to get rid of the eel. "Get that slimy eel lightning off me! Let go, will ye? Hold it still, I say! Think you're a tree?"

"Don't touch him! Throw him overboard! He'll sting you to death!" gurgled Mrs. Spoopemykes, and, forgetting her fish pole still exercised an influence over the eel, she gave it a jerk and it slipped through Mr. Spoopemykes's fingers. That gentleman made a spring for it and washed into the water.

"Hon! blah! bah! waugle, gib, hic, gu, gaggle!" spluttered Mr. Spoopemykes, as some lightroom fished him out with the boat hook. "Can't I be left alone a gawl darned minute without solicitude, as they made their way home.

"If I did, I landed it," growled Mr. Spoopemykes, blowing mud like the exhaust of a tug.

"Anyhow, I caught an eel, didn't I?" asked Mrs. Spoopemykes, carrying the eel on the end of the fish pole and shoving it into Mr. Spoopemykes's face.

"What are you doing, demanded Mr. Spoopemykes. "Whale fishing? When I'm pulling in fish, you just sit still, will ye? Think my head's a fish pond? Stop it, I tell ye. Don't splash water. There! Now sit still and fish like a gentleman. Don't you get a bite?"

"Oh, you caught it!" piped out Mr. Spoopemykes. "You're a fish woman, you are. All you want now is glass sides and some bubbles running through you to be an aquarium. Another time when we go fishing you stay at home! You hear?"

And with this mathematical suggestion Mr. Spoopemykes hurried himself to his domicile and took a rum sweat.—*Brooklyn Eagle.*

The New York Democratic View.

It was not expected that the Democratic party in New York would fail to turn the Republican disagreement over the place of the belter herlings to their own benefit, and to make all the partisan capital they could out of the two disgraceful raids between the two factions. The Democratic managers of the late Legislature, through their joint caucus committee, have issued an address to the home rules citizens of the State, and to the citizens of New York who are not Democrats. The address sets forth how the discords and quarrels of the Republican majority in the Legislature have weakened legislation and corruption in and out of the Legislature, and that in the enormity of the power which the old Democratic bottle-up of "reform" seems to be the remedy, but that it wishes to see a wholesome reform in the civil service. This is what the present address to the Electors of the State virtually pledges the party to, and it will never have a New York Democrat to talk for effect. People who may remember the glamour of Tammany and anti-Tammany, the splits in Democratic conventions, the raids on Jerry Bailey, and the merciless wars which factions has waged against parties for years, may perhaps smile to think how much weight and this address should test to sweating, but the public gaze does not seem to have been held at Albany. Or when we think of the corruptions of Boss Tweed and his gang, of the Erie Ring, and of abandoned scenes of the Judges of the Court of Common Pleas, it is evident that this Caucus committee has no real the lessons of their political antecedents.

The lesions that hung suspended from the lamp of Plato's lamp seem to be far compared with the Democratic members of the New York Legislature.

—*Chicago Tribune.*

—The law of England now prescribes that every furnace employed by workmen in engines to steam, and every furnace in any mill factory, printing house, dye house, distillery, etc., shall be consumed so as to consume its own smoke. With skillful arrangement of the furnace and proper management of fuel, it is not impracticable to reduce the smoke nuisance. The first condition necessary to its contemplation are found to be such a disposition of the furnace as will insure a supply of atmospheric air sufficient for complete combustion, and also a suitable flooded for the fuel used. In order that the vaporized carbon may be burnt in the combustion chamber, it must be kept hot enough to ignite it. In order that the vaporized carbon may be burnt in the combustion chamber, it must be kept hot enough to ignite it. With careful firing, it is well understood that even an ordinary furnace will produce comparatively little smoke.

—It may interest smokers to know that a New York judge has just decided that a man has a right to punch a smoker in the ribs with the end of his umbrella if he "puffs the smoke of a bad cigar in his face, even if it is in a smoking car." The smoker who must had to pay costs.

—St. Louis bakers are on a strike and are loafing around doughing nothing and making knuckles trouble for their employers.

FARM AND FIRESIDE.

Bull tools are a nuisance. Keep them sharp.

If a shirt bosom, or any other article, has been starched in strong lye, it wears the longer if it is well rinsed, and greatly, but the quality is lost, the great variety of weeds impelling their fruit to the milk-like is worse with hay than with pasture, as the objectionable flavor is disseminated through it when in bulk.

What are we to do to get rid of the weeds? A complete eradication is prolonged impossible, as the germs are in the soil, where they often remain buried, for many years, till some favoring conditions of the season brings them forth, not all being influenced alike, some requiring warm dry weather to start them, others appearing under a lower temperature, but the greater part requiring the heat and moisture combined. Thus weeds will appear whatever the season, and the only way of keeping the farmer by their novel and varying character. It is known that the seeds of many weeds will grow heavy crops of grain, and thus a crop may be injured greatly if the soil is kept up, forming a perfect seed bed against the weeds. Prevention is unquestionably the best remedy.—*Rural Farmer.*

Tree Culture in California.

Eight years ago an emigrant from an eastern State, with a family of seven children, with his family and a capital of $50. He had some knowledge of horticulture, and was a practical gardener. A capitalist, who was the owner of a large and extensively undeveloped land, contracted with this emigrant for planting and tending forty acres of the land in the gum of eucalyptus. The breaking, fencing, planting and tending of the whole was done by the family. At the end of the first year he had 30,000 thrifty trees, and the second year the whole of the shield ground in pasture, which retained its moisture necessary to the spread of coffee twelve months after the trees had been planted. The trees were then thinned out to a distance of twelve feet apart each way, leaving 300 trees to the acre. At the beginning of the third year he utilized the pasture for dairy cows, and found it strong enough to support the animals and enough remained its value for the next season. The second year's growth of trees was from eight to ten feet high, and the third year's growth from twelve to fifteen feet. The land is fairly rich in clay soil. In such case the land should be protected by a crop during the first three years, and then the trees will grow well, and an excellent way to keep the soil moist is to cover the ground.

Dairy farmers have to do, therefore, in having down their grass lands is to engage in the fall or early spring and do the work thoroughly, getting the ground enriched and in good order soon as to the season will allow. Then the growth, which affords considerable enrichment to the soil, will be in an old sod, and seldom unsuitable for disposing of long or tilled compressed manure. Grass will succeed in turning to the best advantage when allowed to remain undisturbed, and is to keep down weedy, and when the grass is cut for hay the roots will be left in the ground, and will help to form a mat of sod, which will be increased to the grass, which should be the case for cow feed, and where any, is done with the mowing machine, should be like June or orchard grass, where the land is kept in rather rich condition. Timothy may be sown with these grasses, but is not essential to get too much of the sun's heat. Land which is to be kept in grass should be rolled, using cultivator and harrow as necessary after that, keeping down the weeds under during the entire season, which destroys them and lets the land admirably for seedings. This is best done in the fall with grass, and sooner in the spring. If the work thoroughout has been carefully and well done a clean and greatly enlarged crop of grass will result; the yield increased from one-third to one-half, and, owing to fertility so created, permanence being dependent upon the situation and nature of the land, direct economy to the sun cutting short the grass paring in one minute whenever the soil is in all situations it there is a large preponderance of sand, they can stand the drouth. It is important to observe this, as weeds and coarse grasses pushed from to dormant germs are greatly more sooner or later, to occupy the vacant place.

Other methods are suppleved, but the fallow and hoed crops, properly managed, are the most ready means of cleansing our land, and the fertility thus created is a decided gain in keeping it so, making the land yield more and increase the profit. Such land will grow heavy crops of grain, and thus a crop may be injured greatly if the soil is kept up, forming a perfect seed bed against the weeds. Prevention is unquestionably the best remedy.—*Rural Farmer.*

Broad Tires for Farm Wagons.

It was formerly the custom in some parts of Massachusetts—and possibly it is still—to small the tires of farm wagons having a certain width of tire. This theory was that the tires pounded rather than scored the road bed, and hence it was good policy to encourage the use of broad-tired wheels by heavy taxes. The same principle is recognized in England, where heavy taxes are laid on narrow tires, because when the broad tires are used the roads are worn more evenly. As the roads become dimpled by the narrow tires, the wheels are thrown from side to side, and the jolting is very severe. It is also said that the narrow tires cut deeper into the road bed than the broad ones, and that the latter are not only easily drawn but actually improve the roads over which they pass. Broad tires are also said to be more economical of power than narrow ones. The friction of the former is said to be less than that of the latter, and the saving in power is considerable. Broad tires are also said to be more economical of power than narrow ones. The friction of the former is said to be less than that of the latter, and the saving in power is considerable.

Exterminating Weeds.

But few fields are exempt from all kinds of weeds, by any nothing of the coarse and interfer grasses that occupy the place of the better herlings. Then not only is the quantity of last feed lessened, and greatly, but the quality is hurt, the great variety of weeds imparting their taint to the milk-like is worse with hay than with pasture, as the objectionable flavor is disseminated through it when in bulk.

What are we to do to get rid of the weeds? A complete eradication is prolonged impossible, as the germs are in the soil, where they often remain buried, for many years, till some favoring conditions of the season brings them forth, not all being influenced alike, some requiring warm dry weather to start them, others appearing under a lower temperature, but the greater part requiring the heat and moisture combined. Thus weeds will appear whatever the season, and the only way of keeping the farmer by their novel and varying character. ☞"MAKE NO MISTAKE!"

Dr. D. W. Bliss, who was in charge of President Garfield, was married one day at Long Branch and Grand Rapids and in 1869 went to Detroit. When the assassin bullet was entered and search of the Third Michigan.

A FAMILY looking over his packets in Central New York in calling upon of the Old Testament a new binding for the Revised Version. It is said that everybody is taken in by him except editors. Look out for the turns.

The Street Commissioner of Montreal wears the common material that out to build a sawmill and manufacture the lumber required for city purposes. He reports that some of the brothers desire such soil in the city in small parcels.

The recent death of the venerable Judge Gifford makes Senator Edmunds, of Montreal, on the bench of the United States Supreme Court. The Democrats may enable this appointment to somebody else, but he can't find a better man than Judge Gifford.

Gen. Ronald C. Dickinson says Gen. Meade left a will of the best gentleman of it as a tax sale and the Attorney had more it as a back yard of his workhouse to throw the shavings and other into. He got through with the rest of the world."

It seemed that the worst aspects of the natural condition of the South of the Aleutian Islands are taken by the are crowded, but the condition is improving than it has been for some years. Still residing with his sister, Mrs. Ross C. Hall, wants, at Spencerville, Ill.

The Syracuse Herald: "Democrats it is becoming that the Democratic Presidents will tend to increase the usefulness of the country, and G. O. Gould's administration promises to be the most honest economical that he will be remembered at 1884, and almost certain to be elected his re-election.

There are five cities in the world having each a population of over 1,000,000 inhabitants—one in Great Britain, United States, Germany, France and Austria. Thus there are four hundred cities having between 100,000 inhabitants—three in Great Britain, three in the United States, one in Russia, and one in Turkey.

There are 100 churches in Boston. Of that number the Congregational Trinitarian are have thirty-one, the Roman Catholics twenty-nine, the Methodist Episcopal twenty-eight, the Baptists and Unitarian Universalist Unitarians each twenty-six, and the Episcopalians twenty-three. There are three Jewish synagogues.

The number of foreigners passing out this country from the old world is enormous. According to the statistics of the different customs districts 451,000 have greatly landed upon our shores during the year ending June 30, 1880, and 457,257 during the year ending June 30, 1881. Each year is far in excess of any previous years.

It seems that the Western Union telegraph company is again to meet with opposition. Dispatches announce that J. H. Keene, J. W. Mackay, and other California millionaires have organized a company with $10,000,000 capital, and propose to build every paying point now reached by the Western Union. Competition is the life of business.

The railroad war on passenger rates on the great trunk lines continues without any abatement. Last Wednesday tickets were selling from Boston to Chicago for $5. The people enjoy it, and the railroaders are getting rich. Now, if the great coal monopolists will only get at war the people of the west would have no cause to rejoice. Can't somebody stir them up?

The Kalamazoo Daily Times says that some twenty years ago, Joseph Johnson bought a farm in Pierrefield, St. Joseph county, running heavily in debt. He now owns nearly 1,000 acres of good land, and is out of debt. Here is an example of what industry, economy and temperate habits, coupled with good health and bravery will do.

General Real Estate Business Transacted

Large quantities of farming lands for sale. Many of the descriptions were located fourteen years ago, and are now in the midst of good improvements, with excellent markets and schools convenient. Prices range from three to nine dollars per acre. Most of these lands are covered with magnificent Maple, Beech, Elm and Basswood. Lands rarely sold, but wanted, and I will correspond with you to the point. For particulars address

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

It was announced on the 25th that James H. Keene was organizing a telegraph company to cover every paying point not touched in the Western Union consolidation, with a capital of $30,000,000.

A W. DIVIS, ex-judge of the 25th area when the new county was seen at the Naval Observatory in that city on the morning of the 26th. Prof. Eastman stated on the 25th that he saw it on the morning of that day, but had only five minutes in which to observe it, on account of the clouds, and, of course, did not see many more. He thought it would be difficult to the naked eye seconds to about ten days. It will not go so far north as Cincinnati. It will be visible early in the evening in the west, and earlier in the morning in the east. It had more the appearance of a star than a comet.

GOVERNOR CULLOM, of Missouri, and the owners and express managers in the Southwest met in St. Louis on the 26th, and finally agreed upon terms for the arrest of the men who robbed the Block Island train at Westport, Mo., on the 7th of January, and $20,000 of the amount to be paid by the other five members of the party.

AN order of the Chinese Embassy was administered at Cheyenne on the 26th on the withdrawal of the students from American schools. He stated that his Government would hereafter send its young men to England, France and Germany, as they went to be of the progressive ideas taught in the United States.

THE State of Arkansas has made a contract for the construction of a branch Northern Pacific road to Duluth, for the education of colored teachers.

A FIVE-STORY house-front between Mess M. Thomas, of Granby, Col., and Miss Curtis, of Topeka, Kan., came off on the 26th at Leadville, Mich. Both were in the cars in twenty-six minutes. Her competitor declined to go and fainted on the eighth mile.

THE Rev. Dr. Hall, pastor of John Street Church, of Manchester, N. H., died a few days ago of a disease contracted in the line of a relief that several days.

THREE Hardin trees took jaw were reported in New York City on the 26th. John Hartigh died of the effects produced by a stone falling on his finger, Peter McMahon from the effects of a cold, and Joseph Keating off the loins of a cow, and Augustus Hoffman, a five-year-old wound received on the Fourth of July.

IT was announced on the 26th that the North Pacific would be open by the 1st of June for passenger travel on August 1. On the 1st of May the Dome of the Grande would be in operation to Gorgonia.

A VIOLENT hurricane swept over the country in the Mississippi Valley on the 26th and 27th. Barns and other buildings were destroyed in the business portion of the town of Chattanooga, N. Y., were destroyed by fire on the morning of the 26th. The loss was estimated at $50,000.

A COMPANY, with $2,000,000 capital, has been organized in New York for the transportation of cattle, to be known as the New York Live Stock Express.

THE Farmers' State Protective Association of Iowa met at Des Moines on the 26th, and determined to defend the bushel were patent owned by them against a New York ring which is trying to set aside its patent question. General Ben F. Butler will appear for the farmers when the injunction case is tried.

BEAR ISLAND, of Sacramento, Cal., though he would be some fine seeing his mother, who was a nervous, excitable person, on he faced a jack-in-the-box with a figure of outrageous hideousness, and upsetting it at her just as she was awakened from sleep. The shock was be too much serious, from which she died.

DAN bone and Millspaugh of Pendleton, Indiana, Monroe county, Va., was sold at auction on the 26th, for $27,000, to James L. Cunningham, of the Lachange Hotel, Lichmond.

Personal and Political.

HENRY ROBERTSON took the oath of office as collector of customs at New York on the 24th.

REV. T. H. TIKKES, of Oundia, writes to the Independent that he has been elected to the Panna Indian, has received Bright Eyes, a daughter of a lord of Lahore.

THE widow of Dr. Rufus Hathaway died on the 26th at Roxbury, Mass., and nearly a couple of hours. She was the mother of eleven children.

JUDGE PEARSON, of Pennsylvania, has published the astonishing fact that the total compensation of 2,000 to members of the Legislature.

EX-SENATOR CONKLING is reported as leaving on the 26th that an alleged injunction in a libel suit was issued against the Panama Railroad, has resulted in the discovery of a lot of bogus bonds.

THE widow of Dr. Rufus Hathaway died on the 26th at Roxbury, Mass., and nearly

WILLARD A. SMITH.
EDITOR AND PROPRIETOR.

Hastings From Bayou-By Gum.

Charlie Hamlin is at home sick, we are informed, well manned.

A brother of Peter Kaye is visiting his uncle and family at Bayou.

An Indian driving home from Boyne last early last Sunday morning went to sleep and his ponies turned down toward the new mill in front of Rogers' P. O. It was quite alarming to see the dashing, prancing, bucking, pushing and other curious performances before he got back on the State road.

Twas a warm day, and two of our Hastingsites got Hangtown mad before he caged in another hoodoo hark. Track, containing rosin, and always ready to ad-vanish, they waited a pooh-bah-ing and pounded fourteen a short business, and the friends and relatives of all such that the national government has made provision for supplying stones to corners in case of emergency, passed by 1879.

A law of congress passed in 1879 authorized the secretary of war to erect headstones over the graves of soldiers who served in the regular or volunteer army during the war for the union, and who have been buried in private villages or city cemeteries. For further particulars address any of our Michigan congressmen."

STILL another comet. Comet "B" is the big one now about to strike in the naked eye. Shame "C" is the one discovered a couple of weeks ago. This is increasing brighter and will probably be plainly seen by all about August 20. The latest discovery is the well known "Buckey" comet. It has a period of 3½ years. It is sometimes seen with the naked eye. The astronomer at the national observatory at Washington was interviewed and said: "I should not wonder if along about the middle or October you should be able to see it. The comet's tail will travel north quite fast, reaching its most northerly point, 45 deg. 56 min. on Sept. 26. Its perihelion passage will be about Nov. 10, and it will be observed in the south about Oct. 11. It is now 154,000,000 miles from the earth. At its perihelion it will be about 22,000,000 miles from the sun. The year 1881 will long be known as the "year of comets."

South Arm Items.

Wave soon to!

Good crops.

Wm. F. Rogers has been commissioner of deeds, but he again have resigned.

Chas. and Irston Mordenson have returned from their Colorado trip.

Apples will be quite plenty in this town this season.

Monroe's saw mill has commenced to run.

John and Jamie Lowell are in town visiting friends.

Miss Carrie Porter has again commenced teaching.

Mrs Stacy Phelps of Big Rapids is in town, the guest of her brother, Andrew Hawks.

J. J. Howard has the contract to get out the timber and dressing off the ground for the new saw mill on Bear Creek.

The gentleman who got the concession to paint striking his face, had the nerve and it ever more around, and rambled that it is our wish to kick "forward a horse without raising the mark."

Hybrid.

It has been reported that Mr. Conkling has said he should retire from politics and devote himself to the practice of law. Mr. Conkling denies ever having said anything of the kind.

The following inscription from the Algiers Journal, will perhaps be good news to many of our people, who have gone to mark the graves of loved soldier dead: "In many of the cemeteries of this country no headstones mark the graves of soldiers. It should be the duty of the friends and relatives of all such that the national government has made provision for supplying stones to corners in case of emergency, passed by 1879.

A law of congress passed in 1879 authorized the secretary of war to erect headstones over the graves of soldiers who served in the regular or volunteer army during the war for the union, and who have been buried in private villages or city cemeteries. For further particulars address any of our Michigan congressmen."

STILL another comet. Comet "B" is the big one now about to strike in the naked eye. Shame "C" is the one discovered a couple of weeks ago. This is increasing brighter and will probably be plainly seen by all about August 20. The latest discovery is the well known "Buckey" comet. It has a period of 3½ years. It is sometimes seen with the naked eye. The astronomer at the national observatory at Washington was interviewed and said: "I should not wonder if along about the middle or October you should be able to see it. LEGAL NOTICES.

SHERIFF'S SALE.

Notice is hereby given that by virtue of a writ of fi. fa. issue out of the Circuit Court for the County of Charlevoix, and to me directed and delivered, I have levied upon and taken all the right, title and interest which Thomas Muirhead had on the 1st day of June, A. D. 1881, at 10 o'clock in the forenoon of that day, or at any time thereafter, in and to the following described real estate, situate in the township of Charlevoix, in the county of Charlevoix and state of Michigan, to-wit: [Here follows description.] Dated this 11th day of June A. D. 1881.

J. MILO EATON, Sheriff.
H. HARDINGHAM, Attorney.

NOTICE OF ATTACHMENT.

STATE OF MICHIGAN, County of Charlevoix, ss. At a session of the Circuit Court for the County of Charlevoix, at the court in Charlevoix, on the 1st day of August, A. D. 1881.

Present, Hon. Alexander Parkinson, Circuit Judge.

In the matter of the estate of Alexander J. McLeod, deceased. On reading and filing the petition of Alexander J. McLeod, praying that administration of said estate may be granted to Charles Hall, or some other suitable person.

It is ordered that the 29th day of August next, at ten o'clock in the forenoon of that day, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all persons interested in said estate, are required to appear at a session of said Court, then to be holden at the office in the village of Charlevoix, in said county, on said day of hearing, and show cause why the prayer of said petitioner should not be granted: And it is further ordered that said petitioner give notice to the persons interested in said estate of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in the Charlevoix Sentinel, a newspaper printed and circulated in said county of Charlevoix, three successive weeks previous to said day of hearing.

A true copy. Attest:
ALEXANDER PARKINSON, Circuit Judge.
HANNAH, LAY & CO., Attorneys for Petitioner.

MORTGAGE SALE.

Default having been made in the conditions of a certain Mortgage executed by the Boyne Hydraulic Company, a corporation organized and existing under the laws of the State of Michigan, and having its principal office and place of business in the village of Charlevoix, in the county of Charlevoix, in the State of Michigan, to Harry W. Seaman, of Grand Rapids, Michigan, dated the first day of November, A. D. 1878, recorded in the office of the Register of Deeds for the county of Charlevoix in the state of Michigan, on June 3rd of November, A. D. 1878, recorded in the office of the Register of Deeds for the county of Charlevoix in the state of Michigan, on June 3rd of November, A. D. 1878, in Liber 1 of Mortgages, on pages 191 and 192, which said Mortgage was duly assigned by the said Harry W. Seaman to Wm. Seaman, of Genesee county, on the 2nd day of June, 1881, which said mortgage is now assigned to the said

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

On the 24 Ambrose Longray vaulted San Francisco from Chihuahua, and reported himself as the sole survivor of a surveying party of fourteen at work south of El Paso, who were attacked by a party of forty-five Apaches, six of whom were killed and nine wounded in the fight. Longray was held for ransom, and taken down to the Gulf of California, whence he escaped to Guaymas.

The Universal Congress of Commercial Commissioners and the Yorkshire Centennial Association have recently agreed upon a programme for the forthcoming celebration, which includes four days, the 19th, 20th, 20th and 21st of next October. The first day the address of welcome will be delivered by Governor Holliday, of Virginia. The second day the commissioners will be laid with Masonic ceremonies by Grand Master Whitbrey, of Massachusetts, and be the orator of the day. Colonel Hope, of Nashall, will be the poet, and Prof. H. Hayne, of South Carolina, will recount the traditions of the Centennial will. On the 19th President Butler field had promised to deliver an address, but since the 20th of the grand military display of United States troops and militia, which will then take place, and on the 21st the naval display. The honorary of all the States are expected to be present, and the invitation of the French Government will be largely accepted there.

STREET & NAY, wholesale dealers in liquor and cigars at Xenia, Ohio, have made an assignment. Assets, $40,000; liabilities, $120,000.

The Executive Committee of the National Soldiers' Reunion met in Cincinnati on the 30 to arrange for the forthcoming Reunion. Dr. C. Butler

Wanted—Some Issues.

Any person or political organization that has several lively issues for sale may find a ready customer by applying to the Democratic party of Wisconsin. The present condition and future prospects of the Business of that State are so unpromising that Congressman Bragg, of the Fifth District, has about made up his mind that the old rotten concern might as well be abandoned at once as an unprofitable investment. He says some new issues can be invented that will make the young Democracy rally round the flag once more with zeal and enthusiasm—really as enthusiastic as they did at the last election. In 1875 the Democracy of Reform struck Wisconsin, and, for the first time in eighteen years, the Democrats elected their State ticket over Washburn, Republican, by a majority of over 12,000. Since then the party has been beaten at every election, and now the Republicans have all the State officers, six out of eight Congressmen, and they carried the State last fall for Garfield by a majority that looked only a few votes of 30,000. Two years ago the fall South, Republican, for Governor, had 30,000 majority over James U. Jenkins, Democrat, a popular and clean-cut gentleman. In 1876 the Democratic and the Milwaukee delegates carried the Democratic party National Convention by 2,000 majority, while Democratic candidates for Congress on the strength of his own personal popularity, aided by the full power of the Republican nominee, pulled through with less than 1,000 majority. Now, therefore, the Democratic party of Wisconsin has a most gloomy record to look upon, that General Edward S. Bragg expresses himself as he did in a recent interview in regard to the dire necessity of securing several brazen political issues. He thinks that some of the old Republican thunder with the Civil-service Reform cry being of course the best way to return the Civil-service by turning the rascals out of office and putting Republicans in their places, and he raise a clamor against corporations and in favor of cheaper transportation by the strength of Congressman Bragg can't show on specimen which he sets them himself. He cannot agree with his own Democratic brethren, particularly in the House of Representatives, that the party is dead, and attributes a great deal of the disaffection to the action of the Democratic majority in the House of Representatives, which killed all efforts in the line of tariff revision.

No, General Bragg, your party in Wisconsin is not in want of issues. It only needs a leader.—*Chicago Journal.*

Politics in Hot Weather.

Think of holding State Conventions—and Democratic Conventions at that—in Mississippi and Virginia, and an election in North Carolina, at this season of the year, when the thermometers are creeping around among the nineties! If any new evidence were needed that the South is hopelessly given over to politics these circumstances would supply the proof. If the people of Richmond, Va., and Jackson, Miss., were to devote themselves exclusively to ham, nine-pins and other delightful devices for keeping cool, they would not be able to hold down their tempers sufficiently to the normal condition. And yet politics is regarded as a tropical luxury, and the people of the South seem to revel in it.

The characteristic rhetoric of Southern politics flowed like lava in the Richmond Convention, judging by the specimens which have been transmitted by telegraph. One old gentleman, in the simple process of nominating a candidate, boiled over in these terms: "It is a meretricious progeny of a renegade Democracy—the prostitute Republican." If any Northern politician at this time of year should work himself up to the fever heat required to throw off sparks like that the newspapers of the next day would be compelled to report a death from prostration. But nobody at Richmond seems to have been especially affected by the superheated conditions which subtly enhance the intensity of political indirect. It may be that Virginia Bourbons intended to chill the atmosphere by some of the cool things to which they gave expression. For instance, indirectly but unmistakably, the old Bourbons talking about "equality of right and rights for all men," and about "elections by the people free from force or fraud." When the Confederate Democracy of Virginia can throw off light, cheerful nonsense like this kind in the dog days the effect certainly ought to be cooling.

The Mississippi Democrats have a capacity for talking which exceeds that of any others. The Virginians did not speaking their conference beyond one day. It was not while it lasted, but there was a manifest disposition to get through. The Bourbons who assembled at Jackson, however, were latent upon drawing out their summer amusement to the longest stretch. Hence the hundred Solon's friends were steadfast and Barksdale's friends aggressive, Featherstone's adherents hopeful, and Calhoun's disinterested. But all factions were apparently agreed upon prolonging the session of the Convention.

It would be possible to understand these latent contests during the heated term if any great danger threatened the Democratic cause in the South. But Democratic success is so assured in that section of the country that there is not the smallest necessity for any demonstration, preparation or campaign. The Democrats might just as well postpone their nominations till the day before election, and then designate whom they propose to count in. But the Southern love of politics is so great and so subtle-spread that no season is too warm or too cold, no condition too hazardous or forbidding, to prevent the indulgence of the constitutional vice. Perhaps the best illustration of the overweening and irrepressible democratic disposition can be found in the circumstance that North Carolina held an election the first week of the year, to put upon the question of Prohibition. Of course, Prohibition was voted down by 60,000 to 50,000 majority. The result might have been foretold by anybody. There have been foretold by anybody. There would be a majority against it in the average Southerner misbehaviorous. There was no need of an election. Had the Democrats met in 1857. But the North Carolinian people must have their little political spree. The Southerners would gladly vote on the banner of Moses or Confederate immortality, or any other relic of the past that might be submitted to them, and they are tearing mere trifles like anything mercury could induce them to forego the opportunity. Full of fire, full of gold, they are putting themselves into the opportunity. Full of fire, full of gold, they are putting themselves into the opportunity. Full of fire, full of gold, they are putting themselves into

Charlevoix Sentinel.

CHARLEVOIX, AUGUST 29, 1881

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

General Grant nearly finished a Garden House about an Hour. Illness N. J. last Friday.

Gen. Grant will attend the Michigan camp fire, which commences at Jackson 6th inst.

President Garfield has lost about 40 lbs in weight since he was shot—about a pound a day.

Nine editors of the country gathering is already beginning to be marketed at Memphis and Charleston.

Many locks have appeared with the new nickel coin inserted instead of a key.

Dispatch of the 24th says small-pox is breaking out in Detroit and Ionia. Many cases, 25, 30, 35, 42 have been found in the city.

Hayes says Garfield's going to pieces is a mistake. Garfield is growing fat and looks like the boy he is at heart.

The Capital in New York says Grant has made a profit of $1,262 of which only $600 were of American purchase.

Capt. J. S. Clark, of Hastings, Barry, State, and has Sanilac, and physicians say it was a phthisic case of Miasmic origin.

The war in Congress between the two sons of Roscoe Conkling, resulted in the latter declining from the New York delegation.

The Republican party actually made a case of fraudulent returns of the Democratic in Kentucky this year, and of course succeeded.

The passport system, the requirement of Passport and Police regulations in Europe, is a relic of the middle ages, and should be abolished.

If Grant visits the English peerage he can count his visiting acquaintance among one or more of the Lords and Ladies of New York and Brooklyn society.

The death of Secretary Brooks of the Senate, leaves that body without a Democratic officer, so that no Senator can draw his salary until next December.

The Chicago Bank clearings were large last week, footing up a total of $25,448,570.81, being about $24,150,000 more than for the corresponding week last year.

Over $400,000 of unpaid accounts and loans accumulated before the last few years without account of loss to the government. The Republican party is to blame.

Among the weather reports of Nov. 1 we observe Montana reports: Several cattle have been counted in town, showing them supplied with fine water for the benefit of the public.

A man in passing the counts to the of another President Hayes with a round of the ballots he kissed during his four years of residence. There numbered 1,283, and he hasn't got the taste out of his mouth yet.

The public debt was decreased $10,000,000 in July 1881 $1,700,000 in July 1880. This increased payment was made from savings in expense of the government. This is a Democratic administration, you know.

A Nebraska Democrat, at a meeting in the South Alliance, when interrogated with "What has the Republican party done for you?" turned on a flush and said, "It has given me and you, you, and all of us—and all are interested in it—which we consider a good deal."

Gen. Garfield's condition is very critical, and a cold-sweat was observed on his face over on a ferry boat from a speech some members of his below Mail, on, but Dickey carriage, three were drowned by the sinking of the boat, and three were the two women and the child.

Hon. W. H. Hayes, late Democratic candidate for President, will soon visit the scene of the massacre of the Custer command, on the occasion of the anniversary of the battle of Yorktown. Admiral David D. Porter will accompany the party, which will participate in the celebration, a relic of the battle.

The Grand Traverse Herald very emphatically remarks: "The Ohio politicians are going to find they can't have the Democratic ticket. They have arranged a full ticket of themselves and have thrown loose from the Republicans. In this way they will help the Democratic party that do it. We have honesty."

As a result of the late election, many of our exchanges are already beginning to prepare to financial troubles, as will what that is here there are 100 counties, and the value of their mortgages is $1,000,000 aside from mortgages. In a Grand Traverse county mortgages have been recorded to the amount of $1,000,000. South and over from the great Southern

Where Garfield Disagreed.

The Lansingburg *Daily Times* has the following:

Gen. Garfield used to be known as a Democrat. He was a Democrat in 1860, when he voted for Douglas. He was a Democrat in 1861, when he went to the front to defend the Union. He was a Democrat in 1862, when he was elected to Congress from the Democratic district of Ohio. He was a Democrat in 1863, when he was re-elected. He was a Democrat in 1864, when he was re-elected. He was a Democrat in 1865, when he was re-elected. He was a Democrat in 1866, when he was re-elected. He was a Democrat in

THE SENTINEL.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

A BLOCK at Central City, Ind., on the 9th, caused by the burning of a railroad, did damage amounting to $50,000. One man was killed. A volume of water five feet high ran through the streets, and at some points the debris was piled up twenty-five feet.

HENRY WEIHL, of New York, counselor Leo Rattosamo, the Russian Nihilist, recently seized at Secretary Blaine's command that his client would not be extradited. The Secretary replied by declining to give his opinion at the time.

THE important failures reported on the 9th were: Alexander Whilldin & Sons, Philadelphia, cotton and wool dealers; Herbert S. French, of Buffalo, dry goods; Hallenbeck, Wells & Co., Hadley & Son, York, the well-known Catholic book-sellers and publishers.

THE dwelling of Ira. William Rosson, in Selinsin, Ill., was burned on the night of the 8th, with nearly all its contents. The doctor was absent. His family were aroused in the same house by fire. After the house burned, the brake out in the doctor's barn near by. Help being at hand, the flames were extinguished, when it was found that the fire was caused by an interval machine operated by clock work. Insurance less the same kind of apparatus was used to destroy the house. A Providence dispatch says Dr. Rosson had been left unable to use for the law against liquor selling, and had been murdered in consequence.

THE mercury on St. Lawrence the 9th rose to 105 in the shade, the highest point reached for forty-five years.

IT was announced on the 10th that the Executive Committee of the Trunk Lines had resolved to restore on the 20th the grain rate of twenty-five cents from Chicago to New York.

THE thirty-fifth annual meeting of the Supreme Council of Templars of Honor and Temperance began at Indianapolis on the 10th, with representatives in attendance from all parts of the Union. Hon. Eugene H. Clapp, of Boston, presided, and reports were heard showing a total of 13,512 members in good standing, a loss of 2,677 in the subordinate temples during the past year.

E. B. WILLIAMS & BROTHERS, a glass commission house in Toledo, Ohio, are charged with issuing fraudulent bills of lading to the amount of $60,000 or more. Their suspension is announced, and both have fled.

IN the street at Rochester, N. Y., on the 9th Little Bourg was won the pacing contest in 2:15, 2:16 and 2:16.

A LOWELL (Mass.) druggist has been sued for $2,000 damages for selling rum to an inexperienced clerk to fill a prescription which killed an infant.

THE night clerk in the St. Nicholas Hotel at Lexington, Ky., recently checked a pilot to leave by the house. The applicant has not removed the tips of several gas-jets and a 100-inch main.

A BUCKEYE (Ill.) man has been fined $50 and costs for giving another man liquor. Peter Hall died a few days ago, in the Cook County (Ill.) Hospital of hydrophobia. He was bitten in the thumb by a dog six months before.

THE Cattle Commission met at Saratoga on the 10th and effected a permanent organization, with Prof. James Law, of Cornell University, chairman, and E. H. Sanders, editor of the Chicago *Live Stock Journal*, Secretary. Methods of preventing the spread of contagious diseases among cattle imported from Canada and other countries were discussed, and it was decided to make a searching investigation at the chief ports of entry to make sure that the Dominion is throughout free from infection.

THE first bale of cotton received in Louisville from Alabama this season was sold on 'Change on the 10th, at $9.40 per pound. The grade was good middling. The first bale from Tennessee was sold in the city at the time, and, though grading somewhat lower than the other, it was sold a quarter cent higher.

THE Parry House, Beach Haven, near Camden, N. J., burned early on the morning of the 11th. The guests escaped in their night-clothes.

THE following failures were announced on the 11th: Jonathan Cottle, a heavy woolen manufacturer of Lawrence, for $125,000; the Pioneer Iron-Works, of Linwood, Pa.; G. W. Marks, a marble-dealer at Hanover, Pa.; L. C. Somerby, of Portsmouth, Ohio, whose liabilities are $20,000, and the Pulp and Silk Company, of Belleville, Ill. with $28,000 of debts.

THE Kentucky Board of Agriculture reported on the 11th that their had been no such shortage in crops in that State since 1881. Not nearly than half an average yield of wheat will be harvested.

IT is said the forthcoming report of the Agricultural Department places the shortage of wheat in this country at 125,000,000 bushels.

THE Confederate Republican State Convention in session at Lynchburg, Va., adjourned on the 11th, after framing a new Readjuster platform. The Straight-outs nominated General William Terry, of Botetourt, Governor, and Judge Willoughby for Attorney-General, but all declined to accept, and the committees appointed will further nominations.

AT Rochester, N. Y., on the 11th Maud S. heather previsions record, making the new one 2:09¼.

THERE a violent thunder-storm in St. Louis on the evening of the 12th, lightning struck the Atlantic Flouring Mills at the corner of Main and Plum streets, and in an instant the whole structure was enveloped in flames. The mills were operated day and night, and it was believed that four of the operatives perished in the building. Several others were badly hurt and bruised, some, it was feared, fatally in escaping. Two blocks of wooden buildings in the neighborhood were also burned, involving a loss in the aggregate of over $200,000.

THE Esclavation Commissioners of New York have commenced suit against the steamship companies to recover $40,000 in question duty, being $5 for each immigrant landed at Castle Garden during June and July. The constitutionality of the law under which the suit is brought is called in question by the steamship owners.

THE wheat crop of Nebraska is pronounced a failure. Barley, oats, rye and flax will prove a fair crop. Owing to the unprecedentedly hot weather and the total absence of rain recently the corn crop will not be near an average.

THE four horse disease which has for some time prevailed in eastern localities in the Northwest has made its appearance at Hamilton, Ohio.

THE Illinois Department of Agriculture asserts that in quality and quantity the wheat crop of the State is the poorest for twenty years.

SAMUEL MILLER, who was recently arrested at Williamsport, Pa., on the charge of having poisoned his father in order to obtain the insurance he had effected on his life was discharged on the 12th.

THE Supreme Court of Nebraska has pronounced constitutional in every particular the Liquor law which compels saloon-keepers to pay licenses of $500 or $1,000 and give $5,000 bonds.

A RACE of outlaws recently attacked a caravan from Sonora on the way to Arizona, killed four of the party, and carried off $9,000 and the pack animals.

TIDINGS to twenty gold mines, located in Clinton, Hamilton and Saratoga Counties, N. Y., have been filed at Albany with the Secretary of State.

THERE was a marked advance in the grain and provision markets of Chicago on the 12th. Wheat advanced from 1 to 1½ cents, No. 2 corn four cents per bushel, and mess pork thirty cents per barrel.

Personal and Political.

A WESTERN dispatch of the 8th says it was a singular fact that no one had ever called upon Governor in jail (where he had been for over five weeks) with a friendly message; that during his wanderings in that section he never met a personal friend who manifested any substantial interest in him; that no letter had been received by him proffering the counsel or assistance. He had never asked to have untimely cut for showed little concern for anything except his meals; had lost no flesh since his confinement, and if anything was in better condition than when he was last in jail.

AT our JAMES D. CURT, of the Massachusetts Supreme Court, committed suicide by shooting himself at Pittsfield, Mass., on the evening of the 9th. He had been in poor health for some time.

THE first official act of the President since the shooting was performed on the 10th. He affixed the signature "James A. Garfield" to a document which extradited a criminal wanted in the Canadian authorities for forgery. He signed his name firmly and sufficiently well consequence from the unusual exertion

THE Virginia Republicans met in State Convention at Lynchburg on the 10th, the Straight-outs meeting in one hall and the Conservatives in another. After organization both bodies appointed committees of conference and took a recess. The conference committees reported a compromise which the Straight-outs would submit to their Conventions and the Conservatives would ratify. The State committees to remain as formed. When the Conventions reassembled the latter body rejected the conditions of compromise, and dismissed the nominees of the former. The straight-outs adjourned to the next morning without selecting candidates.

THE murder of Spotted Tail seems to have been done in cold blood. Crow Dog has been sent to Fort Niobrara to await trial for murder.

HON. D. H. BROWNING died at Quincy, Ill., on the evening of the 10th, at the age of seventy-five. Deceased filled the unexpired term of Stephen A. Douglas in the United States senate, and was secretary of the interior in President Johnson's cabinet.

ONE county in North Carolina gave twenty-one majority for prohibition. Seventy-five others gave a majority against it.

THE National Civil-Service Reform Association met at Newport, R. I., on the 11th, under the Presidency of George W. Curtis, and adopted resolutions approving the Civil-service Reform bill introduced into the United states Senate last session by Mr. Pendleton, of Ohio, and calling on members of Congress and senators to call in making the bill what, favoring competitive examination at various convenient points in the United states for those who might wish to be examined for positions in the Civil service; declaring that the bill introduced in the present session of Representatives last session by Mr. Willis, of Kentucky, provides practical and judicious measures for the remedy of the abuses known as political assessments, and urging uncompromising opposition to advisory removals from office and the interference of members of Congress with the exercise of the appointing power.

ON the 11th President Garfield wrote his first letter since the shooting. It was to his mother, assuring her of his confidence in his recovery. He was beginning to take much interest in public affairs, and in the morning asked that the principal items of interest in the morning papers be read to him. Mrs. Garfield read to him some political letters and some newspaper clippings.

MICHIGAN STATE NEWS.

At Stanchona a few days ago H. J. Belcher, a prominent lumberman, was caught in a log-slide and from the slide, gunning him to the ground. He was badly crushed about the loins and abdomen, and will probably die.

A few nights ago at Muskegon a burglar entered H. B. Smith's grocery and blew open the safe, setting fire to the building and consuming the stock ($2,500; insurance, $2,000).

James Burgess, who eloped from Ecorse-ville with the wife and child of John Wahy two years ago, has been run down at Lynchburg, Va., where he was doing a thriving business in groceries. The lady died last June. Burgess will be brought back to Michigan for trial.

The late John J. Bagley, soon after his first election as treasurer, invested that the Lake Shore & Michigan Southern Railroad Company was not paying as much tax to the State as it should. The matter was explored, and at his suggestion the Legislature at its session in 1857 passed a joint resolution instructing the Attorney-General, Treasurer and Auditor General to cause examination of into claims to be made, and, if necessary, suit, and then, if thought just and expedient, to make a test case and vigorously prosecute it. The other roads were also empowered to employ such able counsel as they should deem necessary to assist in the defense. Under this resolution suit was brought against the Lake Shore Company in the Wayne County Court, and after a long struggle was decided in favor of the State by decision rendered according to the following table, referring to the years named, being the amounts which the Lake Shore Company was found to owe the State, with interest added:

1857	$ 5,000 00
1858	5,000 00
1859	5,000 00
1860	5,000 00
1861	5,000 00
1862	5,000 00
1863	5,000 00
1864	5,000 00
1865	5,000 00
1866	5,000 00
1867	5,000 00
1868	5,000 00
1869	5,000 00
1870	5,000 00
1871	5,000 00
1872	5,000 00
1873	5,000 00
1874	5,000 00
1875	5,000 00
1876	5,000 00
1877	5,000 00
1878	5,000 00
1879	5,000 00
1880	5,000 00
Total	$ 100,000 00

The decision of the lower court was affirmed at the June term of the Supreme Court, and the State on the first day of July last received from the company in the Wayne County Court, and paid into the State treasury the amount against the company for $83,211.21, back taxes which had accrued as follows. For the year 1857, $5,000; for 1858 to 1879, $2,000 each; for 1877, $5,000; for 1878, $5,000; and for 1879, $5,000, and for 1880, $5,000, and for 1881, $5,000, and for 1882, $5,000, and for 1883, $5,000, and for 1884, $5,000, and for 1885, $5,000, and for 1886, $5,000, and for 1887, $5,000, and for 1888, $5,000, and for

MICHIAN STATE NEWS.

At 8:45 p. m. on the night of the 19th a train ran over a man at Newell's Crossing, four miles south of Whitehall. The engineer's statement is that he saw a black object on the track, stopped, went back, and found a shabby-genteel corpse.

A brakeman named Patrick Mellvan was killed by the cars a few miles north of Monroe the other day. The man was drunk at the time.

W. H. Bethel, the American Express agent and telegraph operator at Maumee, is in bed in consequence of a shotgun of $9,999 in his anatomy.

The trial of the Lapeer murderer case, in which is charged that Mrs. Barnard killed Mrs. Carney, by putting oil upon her and setting fire to it, has been transferred to Hudson county, and will be tried in that locality. The case is one which has excited most wonderful interest throughout the State and country.

At Grand Haven on the 15th a colored man named Wm. Johnson, while riding a wheel on the breakwater, was shot and killed by the latter's son, John Alliance, who subsequently himself to the police and was locked up. While the sheriff went to the house to arrest Alliance another shooting took place, and the supposition is he killed his son with the butt of the shotgun after shooting Johnson.

George Andrews, the man arrested charged with being implicated in the Valparaiso, Indiana, bank robbery, is having quite a varied experience. At the last session of the Circuit Court in Cass county he was put on trial, upon upon this case, and culminated in Judge Brooke declaring the prisoner could not be held on the charge of "burglary," as entrance had been effected through a transom over a window, and breaking had been done. The prisoner was discharged, and before leaving the court room was arrested on a charge of grand larceny, for the same offense. Another examination for the prisoner was held, and he was bound over in the sum of $1,000 to appear at the next term of court. Being unable to procure bail, he was taken to the county jail, where he was locked up. Andrews is a married man, and has a family residing in Indiana.

Cassopolis is to have a postal card issued to the Cassopolis Cornet Band, to be used by the members of the band in notifying each other of meetings, etc. Each member will be furnished with a card, and the postage will be paid by the band. The idea is a novel one, and will be watched with interest by other bands throughout the State.

The Marquette *Mining Journal* says: It is safe to say, judging from the way the ore is now going forward, that the output this year will exceed that of last year by 100,000 tons, the increase in the output of the Upper Peninsula mines, over ninety per cent. of the ore credited to the Menominee range, though it contributes only a trifle over one-third of the bulk shipped from the ports of this district.

It seems that the recent rains were not sufficient to totally subdue the fires in the woods, and there have been rumors of fires breaking out again in various quarters. The probabilities seem to be that if the present weather continues all the ground wherein the fires were exist will be burned over.

A horse in Vermontville, Eaton County, being turned loose in a field where some log heaps had been burned, selected a pile of ashes to roll in. Then presently a rain drenched that horse, and the action of the water on the ashes that clung to him made a strong lye which ate hair, hide and flesh, and it was thought the horse would die.

The safe of August Bachman at Cadillac was blown open by burglars on the night of the 14th and robbed of $385.

Berkley's fancy mill, two miles southeast of Chase, in Lake County, was destroyed by fire on the morning of the 15th. Loss, $8,000; no insurance. The blaze originated from a slide pipe. Benjamin Illingsder lost 2,000 cords of lumber.

George Rambeste, sharp, was held to answer in the Saginaw circuit for East Saginaw on the 5th and was discharged.

Several weeks ago Secretary Forsythe notified Grover Voorhis that the Society for the Prevention of Cruelty to Animals would hold him responsible for any more pigeon shoots held at Hazelcrest Park, near Detroit, and it is understood as a matter of fact that the State militia has not been shot since that time.

During the season just closed over two thousand loads of whetstones were shipped from Ann Rabbit-in, Lake County. The stickers received an average price of $2.50 per loaded for them.

While three men were at work on the frame of a new barn at Ionia on the 15th, the scaffold gave way and precipitated them to the ground, a distance of thirty feet. Hardly four was broken in two places, and he was injured internally. The three men, William Chambers and Russell Bowring, were quite badly hurt internally.

SCHOOL LAW.

The following digest of Supreme Court decisions with respect to the schools of the State has been prepared by Secretary of the Attorney-General:

Boards of Education of all school districts is required by the statute, to be made in order to the Township Treasurer for the amount of taxes assessed by the Township Board of Review and Township Board of Review, and a copy for the Township Treasurer, and a copy for the Township Clerk, and the Township Clerk shall certify to the Township Treasurer the amount of taxes assessed by the Township Board of Review

Charlevoix Sentinel.

A Bill introduced into Congress by Mr. Chamberlain, Democrat, to "fix the salaries of judges."

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

MOUNT IDAHO, in Idaho Territory, exhibited decided volcanic tendencies on the 18th, emitting a great volume of fire and smoke to the height of several hundred feet.

THE National Agricultural Bureau reports a heavy decrease in wheat in Iowa and Illinois. A slight decrease in Minnesota, Nebraska and Colorado, and an increase in Wisconsin and Kansas. On the whole the general condition of corn is reported as seventy-seven per cent. of a full crop.

THE burning of his machine shops on the 10th caused the suspension of the Dover works at Reading, Pa., throwing nine hundred men out of employment.

THE Agent at the San Carlos reservation reports great uneasiness among the Indians in his charge, and calls for additional troops.

THE buildings and tents on the campmeeting grounds at Sprague, New York, were burned down to the ice the 12th.

A SCENE of wild confusion was witnessed among the cabin passengers on the steamer Plymouth Rock, which burnt a few days since from Fall River to Providence. Men jostled life-preservers from the hands of women, and the officers of the steamer broke up windows in order to get trampling food from the cabin. The panic was at last suppressed and the further voyage made mostly under water.

THE net product of the United States in 1880 was 8,304,200,000 gallons, in 1870 it was 12,036,105,000.

THE St. Louis Board of Police commissioners have instructed the police to arrest every man known to bet, or suspected of having, five cents on the election.

A SMOOTH bore of silver has been discovered near Fort Gibbon, in the reservation of the Alaska Commercial Company.

MAJOR HOWELL, Clerk of the Baltimore Police Commissioners, ordered a quantity of cloth from a New York firm, and concerned the suspicions that the Commissioners had ordered it. It turned out that Howell sold the cloth as it was received and pocketed the proceeds—some $4,000. He now finds himself in jail.

TUESDAY, the assassin, was discovered in possession of a knife in his cell the morning of the 17th, and one of the jailors was murdered, as it is said, by a prisoner, when a gentle control, during which a pistol was discharged, but no one was hurt. The knife was taken away from the prisoner.

IN a recent circular regarding the arrangements for the Vera Cruz Centennial Commission, Carlos Castro de Corvalho, says it is believed the militia alone can take part in the celebration with regard to Mayor Grace's small staff regiments, together with the Governor's own troops, accompanied by staffs. For the reception and comfort of the latter a building will be erected. Adjutant-General of States and Territories will send off troops proceeding to participate are requested to ask for information concerning the celebration that may in any manner render the occasion worthy the great event it commemorates.

A CONVENTION will assemble shortly at Washington on the 24th inst., called for the Sioux to give their views upon the Sioux agreement now under the Senate consideration.

THE switchmen employed by the Erie Road at Corning, N. Y., struck on the 16th for an advance from $1 to $1.25 per day. About 1,200 freight cars in the yards.

SPECIAL Agent BARTLEY, after a long time of investigation in the Dominion of Canada, found that one-third of all the mail sacks and over-three of all the pouches issued by the Canadian Post-office Department belong to the United States. It is said that the State Department will make a demand on Canada for compensation for the use of the property.

TENO W. CHASE, the Assistant Commissioner of Education attached to the Cincinnati Exposition at Washington, states that the removal of the Chinese youths from Hartford to Washington are not to be sent to their being Americanized, but because the Imperial Government wishes to avail itself of their services.

POSTMASTER-GENERAL JAMES on the 19th issued an order putting the entire force of letter masters to the necessity of effectually canvassing the carriage mail matter. Suspects in this matter had caused considerable loss to the Government.

A MEXICAN train recently sent out from Sonora to purchase supplies at Tombstone was robbed by Apaches of thirty-two mules and two of its men killed. In retaliation, a party of American hunters who went to the border ranches to purchase cattle were surprised by Mexicans, while asleep, and six of the number put to death. The military and police at Lampe Grant and the Mexican military authorities have arranged for united action against the border Indians.

LIEUTENANT LOCKE, in command of the Point Barrow Expedition, has reported to General Hazen that the expedition had reached latitude 69 deg. 19 min. 30 sec., longitude 130 deg. 44 min. 45 sec., on the 20th ult., all in excellent health and condition.

A DISAGREEMENT between whites and blacks of Morrilton, Ark., has led to several battles and a threat to lay the town in ashes.

REV. MR. FAIRLY, a Congregational minister, was drowned at Fairmount, Kansas, on the 19th, while fishing from a carriage.

A DISTRESSING condition of affairs prevailed at Orange, Texas, on the 20th, when Mitchell was dangerously wounded by a party of blacks, of whom two were subsequently shot and a third hanged.

A HARRISBURG young woman giving her name as Mrs. Mary L. Heminger, of Brooklyn, appeared at the White House on the 19th and demanded an opportunity to view the President, for which purpose she had come from Paris. She was sent to the insane asylum, where it was found that she wore the costume of a ballet-dancer under her dress.

A PECULIAR train on the Manitou & Pikes Peak road was thrown from the track by running against a cow on the 19th. Engineer Eldenbrand was killed and Fireman Taylor injured.

AT GALVESTON, TEXAS, a new comet has been discovered in the constellation Pisa Major (" the Dipper"), from nine to ten p. m. by Mr. A. M. Hinsom. It is plainly visible through the telescope.

THE expense of moving to July, 1881, aggregated $6,078,136. In July, 1881, they amounted to $3,223,,06. The trebling seems to wait to be commensurate for the decrease.

THE total value of the domestic breadstuffs exported from the United States during the seven months ended July 31, 1881, was $251,262,,20, against $153,,96,,80 worth exported during the corresponding seven months of 1880, $182,,92,,192.

Personal and Political.

ARCHBISHOP SEGHERS was duly consecrated at San Francisco on the 24th.

THE Georgia Senate has defeated, by a vote of 30 to 19, the Temperance bill repealing the present temperance law.

UP to the 24th the President had lost about eighty pounds since his attempted assassination.

PROFESSOR SNOW, of the Kansas University, and his party, who were engaged in making explorations near Scooris, New Mexico, and who were believed to have been killed by the Apaches, have arrived safely.

ON the 19th a NEW YORK citizen who declined to serve as a juror boldly offered up to the Sheriff a check for $1,000 if he would let him go. Men jostled life-preservers from the hands of women, and the officers of the steamer broke up windows in order to get trampling food from the cabin. The panic was at last suppressed and the further voyage made mostly under water.

The military and police at Lampe Grant and the Mexican military authorities have arranged for united action against the border Indians.

LIEUTENANT LOCKE, in command of the Point Barrow Expedition, has reported to General Hazen that the expedition had reached latitude 69 deg. 19 min. 30 sec., longitude 130 deg. 44 min. 45 sec., on the 20th ult., all in excellent health and condition.

A DISAGREEMENT between whites and blacks of Morrilton, Ark., has led to several battles and a threat to lay the town in ashes.

REV. MR. FAIRLY, a Congregational minister, was drowned at Fairmount, Kansas, on the 19th, while fishing from a carriage.

A DISTRESSING condition of affairs prevailed at Orange, Texas, on the 20th, when Mitchell was dangerously wounded by a party of blacks, of whom two were subsequently shot and a third hanged.

A HARRISBURG young woman giving her name as Mrs. Mary L. Heminger, of Brooklyn, appeared at the White House on the 19th and demanded an opportunity to view the President, for which purpose she had come from Paris. She was sent to the in-

TILMAN GARFIELD, Washington.

I am most anxious to know how the President is getting on, and to express my deep regret that the attempt upon his life was made.
GEORGE, August 17.

The following reply was sent:

EXECUTIVE MANSION, Washington, August 17.

Your Majesty's kind inquiry into the President's condition is received. He continues to improve, and will soon be entirely convalescent. Your Majesty's sympathy is appreciated. Mrs. GARFIELD.

The following reply was sent:

To Mrs. and Mr. GARFIELD, Washington:

Your Majesty's kind inquiry into the President's condition is received. He continues to improve, and will soon be entirely convalescent. Your Majesty's sympathy is appreciated.
VICTORIA, R. I.

The will of MARIE T. Gaudet, of New Orleans, N. Y., bequeaths $200,000 to various educational and charitable institutions.

JOHN C. FREMONT has been elected President of the Atlantic & Great Western Railway Company, in place of WILLIAM K. RANDOLPH, deceased.

THOMAS H. MAGUIRE, the man who first married a young lady of high social standing in Richmond, Va., while his wife was still living, was arrested at Lynn, Mass., a few days ago, on the charge of forgery. He will also be prosecuted on the charge of bigamy. Maguire is described as a most unmitigated scoundrel, and, under assumed names always, is said to have deserted ten women into pretended marriage for the purpose of adding him to an existing schedule.

REAR-COMMODORE MAURICE F. CONWAY, of Kansas, who once shot Senator Pomeroy, has been appointed by the late lessee asylum at Washington, D. C., was released on the 9th.

JOHN A. H. RICHMOND, the North Carolina author, who whom, both of whom were engaged in making explorations near Scooris, New Mexico, and who were believed to have been killed by the Apaches, have arrived safely.

ON the 19th a NEW YORK citizen who declined to serve as a juror boldly offered up to the Sheriff a check for $1,000 if he would let him go. Men jostled life-preservers from the hands of women, and the officers of the steamer broke up windows in order to get trampling food from the cabin. The panic was at last suppressed and the further voyage made mostly under water.

THE net product of the United states in 1880 was 8,304,200,000 gallons, in 1870 it was 12,036,105,000.

THE St. Louis Board of Police commissioners have instructed the police to arrest every man known to bet, or suspected of having, five cents on the election.

A SMOOTH bore of silver has been discovered near Fort Gibbon, in the reservation of the Alaska Commercial Company.

MAJOR HOWELL, Clerk of the Baltimore Police Commissioners, ordered a quantity of cloth from a New York firm, and concerned the suspicions that the Commissioners had ordered it. It turned out that Howell sold the cloth as it was received and pocketed the proceeds—some $4,000. He now finds himself in jail.

TUESDAY, the assassin, was discovered in possession of a knife in his cell the morning of the 17th, and one of the jailorgards murdered, as it is said, by a prisoner, when a gentle control, during which a pistol was discharged, but no one was hurt. The knife was taken away from the prisoner.

IN a recent circular regarding the arrangements for the Vera Cruz Centennial Commission, Carlos Castro de Corvalho, says it is believed the militia alone can take part in the celebration with regard to Mayor Grace's small staff regiments, together with the Governor's own troops, accompanied by staffs. For the reception and comfort of the latter a building will be erected. Adjutant-General of States and Territories will send off troops proceeding to participate are requested to ask for information concerning the celebration that may in any manner render the occasion worthy the great event it commemorates.

A CONVENTION will assemble shortly at Washington on the 24th inst., called for the Sioux to give their views upon the Sioux agreement now under the Senate consideration.

THE switchmen employed by the Erie Road at Corning, N. Y., struck on the 19th for an advance from $1 to $1.25 per day. About 1,200 freight cars in the yards.

SPECIAL Agent BARTLEY, after a long time of investigation in the Dominion of Canada, found that one-third of all the mail sacks and over-three of all the pouches issued by the Canadian Post-office Department belong to the United States. It is said that the State Department will make a demand on Canada for compensation for the use of the property.

TENO W. CHASE, the Assistant Commissioner of Education attached to the Cincinnati Exposition at Washington, states the removal of the Chinese youths from Hartford to Washington are not to be sent to their being Americanized, but because the Imperial Government wishes to avail itself of their services.

POSTMASTER-GENERAL JAMES on the 19th issued an order putting the entire force of letter masters to the necessity of effectually canvassing the carriage mail matter. Suspects in this matter had caused considerable loss to the Government.

A MEXICAN train recently sent out from Sonora to purchase supplies at Tombstone was robbed by Apaches of thirty-two mules and two of its men killed. In retaliation, a party of American hunters who went to the border ranches to purchase cattle were surprised by Mexicans, while asleep, and six of the number put to death. The military and police at Lampe Grant and the Mexican military authorities have arranged for united action against the border Indians.

LIEUTENANT LOCKE, in command of the Point Barrow Expedition, has reported to General Hazen that the expedition had reached latitude 69 deg. 19 min. 30 sec., longitude 130 deg. 44 min. 45 sec., on the 20th ult., all in excellent health and condition.

A DISAGREEMENT between whites and blacks of Morrilton, Ark., has led to several battles and a threat to lay the town in ashes.

REV. MR. FAIRLY, a Congregational minister, was drowned at Fairmount, Kansas, on the 19th, while fishing from a carriage.

A DISTRESSING condition of affairs prevailed at Orange, Texas, on the 20th, when Mitchell was dangerously wounded by a party of blacks, of whom two were subsequently shot and a third hanged.

A HARRISBURG young woman giving her name as Mrs. Mary L. Heminger, of Brooklyn, appeared at the White House on the 19th and demanded an opportunity to view the President, for which purpose she had come from Paris. She was sent to the in-

A Fatal Electric Shock.

A strange and terrible accident occurred last evening at the gas-eating-rooms of the Brush Electric Light Company on Hudson street. About nine o'clock last evening two young men named Grover Leonard Smith and Elmer Bimbell, the company, who, another young man and two girls, stopped into the station and stood looking at the machinery in motion, which was very inquisitive and wanted to experiment. The manager, Mr. H. Hindly, allowed them to try a harmless experiment, which consisted in taking hold of one of the binders attached to the generator, in which the electricity is held until carried away over the wires, and then, taking hold of the hands of his companions, a gentle current of electricity was passed through their bodies, which were allowed to take hold of two of the brushes, like Mr. Chafin grabbed his arm and held on back, telling him it was all a death to touch them. The party shortly left, and Mr. Chafin, telling them to call again, went about his business. About a quarter past ten o'clock Smith suddenly came into the building, crying that Bimbell had fallen dead in the street over the river. Smith's face had a pale bluish tint and his body was carried in. Upon examination it was found that the electric current had passed through the body of Bimbell, striking him in the left side of the breast, and in the neighborhood of the left eight inches in height. It was the opinion of the doctors that he was dead when he left the station, and in the neighborhood of ten feet

THE SENTINEL.

WILLARD A. SMITH, Editor and Proprietor.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

MOSES ISAMU, in Idaho Territory, exhibited decided volcanic tendencies on the 24th, sending up columns of fire and smoke to the height of several hundred feet.

THE National Agricultural Bureau reports a heavy decrease in wheat in Iowa and Illinois, a slight decrease in Missouri, Nebraska and California, and an increase in Wisconsin and Kansas and Ohio. The general condition of corn is reported as seventy-seven per cent. of a full crop.

THE burning of its sawing shops on the 14th caused the suspension of the Ironworks at Reading, Pa., throwing nine hundred men out of employment.

THE Agent at the San Carlos reservation reports great uneasiness among the Indians there, and calls for additional arms.

THE buildings and tents on the campmeeting grounds at Saratoga, New York, were almost swept by fire on the 15th.

A STORM of wild confusion was witnessed among the passengers on the steamer Plymouth Rock, which lately made a trip between Boston and Liverpool, on the 12th. Men jerked life-preservers from the hands of strangers, and the officers of the steamer broke all windows to release the trampling herd from the cabin. The panic was at last suppressed by the steamer being towed into smooth water.

THE tax receipts of the United States in 1881 were 29,360,387 dollars. In 1882 it was 17,989,195 dollars.

THE St. Louis Board of Police Commissioners have instructed the police to arrest every man known to have, or suspected of having, fire-arms in his person.

A SUIT was brought in Chicago on the 15th, against the Chicago, Rock Island & Pacific Railroad Company, by the Lake Shore & Michigan Southern Railroad Company, for the sum of $100,000, for alleged infringement of patents.

THE Agent at the San Carlos reservation reports great uneasiness among the Indians there, and calls for additional arms.

A STORM of wild confusion was witnessed among the passengers on the steamer Plymouth Rock, which lately made a trip between Boston and Liverpool, on the 12th. Men jerked life-preservers from the hands of strangers, and the officers of the steamer broke all windows to release the trampling herd from the cabin. The panic was at last suppressed by the steamer being towed into smooth water.

THE tax receipts of the United States in 1881 were 29,360,387 dollars. In 1882 it was 17,989,195 dollars.

THE St. Louis Board of Police Commissioners have instructed the police to arrest every man known to have, or suspected of having, fire-arms in his person.

A SUIT was brought in Chicago on the 15th, against the Chicago, Rock Island & Pacific Railroad Company, by the Lake Shore & Michigan Southern Railroad Company, for the sum of $100,000, for alleged infringement of patents.

A STRONG train on the Marietta & Cincinnati Road was thrown from the track by running against a cow on the 10th. Engineer Richmond was killed and Fireman Taylor injured.

AT GUYMON, Texas, a new comet has been discovered in the constellation Ursa Major ("the Dipper"), from nine to ten p. m. by Mr. A. M. Hinston. It is plainly visible through the telescope.

THE exports of cotton in 1881, 1882, again, sold 24,776,720. In 1882, 1881, they amounted to 23,027,346. The trebling seem to call for a decrease in the decrease.

THE total value of the domestic breadstuffs exported from the United States during the seven months ended July 31, 1881, was $151,302,328, against $133,240,502 worth exported during the corresponding seven months of last year.

SPECIAL AGENT BUTLER, after a full investigation in the Choctaw Nation, finds that one-third of all the mail sacks and four-fifths of all the pouches issued by the Canadian Post-office Department belong to the United States. It is said that the Government will invoke the command on Canada for compensation for the use of the property.

THAD W. HARRIS, the Assistant Commissioner of Education attached to the Chinese Legation at Washington, died from the removal of the Chinese youths from Hartford's act on account of sex fear of their being kidnapped, but assigned the Imperial Government wishes to avail itself of their services.

POSTMASTER-GENERAL JAMES on the 18th issued a circular calling the attention of postmasters to the necessity of effectually executing the stamps on mail matter. Neglect in the matter had caused considerable loss to the Government.

A MESSAGE from recently sent out from Sonora to purchase supplies at Tombstone was robbed by Apaches now-boy and two of his men killed. In retaliation a party of American herdsmen who went to the border ranches to purchase cattle were surprised by Mexicans, who fought, and six of the murder out to death. The soldiers subsequently joined in the fight. The American authorities have arranged for united action against the hostile Apaches.

LIEUTENANT RAY, in command of the Point Barrow Expedition, has reported to General Hazen that the expedition had reached latitude 83 deg. 35 min. 50 secs., longitude 84 deg. 6 min. 45 sec. on the 26th ult., all in excellent health and condition.

A DISAGREEMENT between the whites and blacks of Morrilton, Ark., has led to several battles and a party feud is now known.

REV. MR. FARRELL, a Congregational minister, was drowned at Falmouth, Mass., on the 10th, while bathing, from a carriage.

A DISTURBED condition of affairs prevailed at Orange, Texas, on the 10th, Sheriff Mitchell was dangerously wounded by a party of bandits, of whom two were subsequently shot and a third hanged.

A BATHROOM young woman giving her name as Mrs. Mary L. Bominger, of Brooklyn, appeared at the White House on the 10th and demanded an opportunity to cure the President, for which purpose she had come from Paris. She was sent to the lunatic asylum, where it was found that she was the customer of a ballet-dancer under her divorce.

A SERIOUS

CHARLEVOIX, AUGUST 19, 1881.

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

AT DEATH'S DOOR

The President Slowly but Surely Dying.

The shadow of death is hovering over our beloved President. During the past week he has steadily failed, until he now seems Low abandoned all hope of his recovery. Feebleness of utmost prostration was their appearance and the landmark into a deep general calamity, which on their would fall a heavy blow. It was fun and 1,000 cases of cholera. His condition at last reported was [illegible] exchanges we received last night, Sunday, however, favorable news was received at the W. U. Telegraph office that his condition was improved, and yesterday (Monday) his condition is still [illegible], the following dispatch:

Washington, 20.

[illegible] improved so as to warrant us in [illegible] Hospital and attendants [illegible] Medical Staff.

Supplementary dispatches also received by the Sentinel yesterday from Elberon is somewhat revived, but we fear that the hope is premature. Still grand that it is [illegible].

Hiram French has purchased a fine span of horses.

Merritt Hess has gone on a visit to Oakland Co.

Jos. Hannay took passage on the City of New York for Escanaba last week.

The only child of Mark Saxonby died Friday 26, and was buried at Beaver Sunday.

The raft, Buffalo Bill, went one day last week with a log on, and precipitated the people who are working at the new dock into the lake. The noise heard in this direction like the blowing of a school of sperm whales was the boys blowing the water out of their ears as they arranged themselves on the dock to fish.

The Gentlewell Co. Teachers Institute held at Charlevoix Aug. 22-26, conducted by Prof. Dan-well of Ithica, assisted by Prof. Gage of Flint, was a pleasant and profitable session to the teachers in attendance. The Profs. went into their work with enthusiasm, and if the institute did the same spiritual the ideas advanced into their minds they cannot help but make their work tell. We are very glad that the teachers of Charlevoix Co. will not let another opportunity like this go by unheeded.

Pure tobacco, 50 cents per lb., at McCabe Bros.

A GENTLEMAN who was well acquainted with Eli Carson, the great miser, says that his estate when he died was appraised at 20,000.

A CLAY pudd'er in New York kept a record of mosquito sucking and smooth tongs at her on a plentiful use of beans, with which he baited his gun.

There is an unfortunate proposition to the human animal to run for the onward end of a moving engine car, even when the car end is close to it.

Dudley descendants of John Alden and Miles Standish, and bearing the very names, are said to be living at Hackney, Mass., a place that was allotted to those two pilgrims.

Hints are given to the effect that Penn intends to hold an international exhibition in 1882, when the centenary of the signing and treaty will be celebrated by all France.

An Irishman wrote this to the wife of a sick brother. "If James don't die, remember him at the 20 shillings he owes me at the place, and if he is, tell him not to give himself any concern about it."

The grape crop on Lake Erie is reported to be short, owing to cold in the winter and a dry summer. But there will be the usual crop of wine. That can't be cut off, unless alcohol, water and drugs fail.

William H. Snow, one of the pioneers of Chicago, died last Thursday evening. He went there in 1837, built the first frame house on the West Side, and opened the first hotel, and was in the first Common Council.

A LIST of switchmen on the Erie railroad at Buffalo and Hornellsville, have demanded seven days and night work where refused, but now men are hired in their places and the only effect is some delay in handling freight trains.

A BIG HEATER in Buffalo was recently armored and held in $1000 bail for assaulting women rags from Canada. He refused was to cover the rags with postal bikes, which custom officers would not have to investigate too closely.

Jackson's best pil is calomel, 65 cents per lb., at McCabe Bros.

Business Manager.

The business of this office will be conducted by Mr. [illegible] who will receive all moneys due the paper and give receipts therefor. Mr. [illegible] will also receive all moneys due the paper and give receipts therefor. Mr. [illegible] will also receive all moneys due the paper and give receipts therefor.

—The Leonard Concert company gave an entertainment at Lewis Hall last evening. The night was stormy, and the attendance consequently small, but those present were highly pleased with the concert. They will get a good house next time they come.

—The Press Association had a very successful convention at Cadillac, ending up with an excursion to Petoskey by rail and the steamer Fenton. The boys all spoke well of the way they were treated by all concerned in their entertainment. Sorry we could not have taken it in.

—H. E. Bradshaw, General State Agent for Chilton & Co., book publishers, Detroit, is stopping for a few days at the Fountain City House. He has a number of books just out. Any desiring an agency should see him at once. He will call at most points on his Bay shore next week.

—The State Board of Equalization have finished their labors, and view report shows Charlevoix county to have 227,245 acres of assessed land, an aggregate value in real and personal estate on $1,633,271.00, to which was added $400, 149.00 by the State Board of Equalization, making an aggregate valuation of real and personal property of $2,049, 968.00.

—A passenger on the propeller Champlain last week reported here that he saw the propeller City of New York in distress at or near Manitowoc, and for a time considerable anxiety was manifested. It happens that, on the night in question, the convent at Manitowoc was destroyed by fire, and the City of New York home in range of the view from the Champlain, and the error was a natural one.

—We made a cruise Thursday and Friday, by propeller Fenton, to Petoskey and Harbor Springs. It is a pleasure to travel on so fine a steamer as the Fenton, with officers always attentive and courteous, a pleasure to sojourn, even briefly, in such pleasant and enterprising towns as our sister burgs, and a pleasure to visit with such jovial fellows as our brethren of the *Record* and *Republican*. The *Independent* was on, and we could only leave our card.

—The reporters are beginning to return to their homes, but hay fever sufferers are numerous at our hotels. They experience almost entire relief from the malady here. The recent warm weather they were all more or less attacked by the complaint, and began to talk about Mackinac, but reports came that they were all sneezing there, so they settled down to their fate. A change of temperature, however, brought relief, and happiness is supreme among them.

—The M. E. parsonage of this village is completed, and will be occupied upon the return of the pastor from Conferences. The residence is a commodious 8, square building, with a stone cellar the whole size, well arranged inside, and well finished in every particular. The premises have been enclosed by a handsome iron fence, and the roadways and grounds are now among the most desirable in the village. The new house is paid for, as may be seldom the case, and the Methodist folks are to be congratulated upon being financially, remarkably well to do.

—Charlevoix Lumber occupied having an extensive time on Wednesday afternoon. An alarm of fire was sound, and soon from the street smoke could be seen issuing from the rear upper windows of Dr. G. W. Crouter's store and residence. It looked as if the building must go, and with it every other building between that and the river, as the wind was blowing fresh from a southerly direction. Many willing hands, with pails and pump, however, got it under control, and saved the building. The fire caught from an oil stove in an upper apartment room, crept up the partition into the loft, and would soon have been beyond control. Dr. and Mrs. Crouter were absent from home at the time.

Notice of Dissolution.

NOTICE is hereby given that the copartnership heretofore existing at Charlevoix, Mich., under the name of HANNAH, LAY & CO., is this day dissolved by mutual consent.

HANNAH, LAY & CO.
JOHN M. ASKEY

Charlevoix, Aug. 1st 1881

A Card.

To the Editor of the Sentinel:

Please allow me through the columns of your valuable paper to express our thanks to the many friends and neighbors who so kindly and promptly assisted in preserving our property from being destroyed by fire, in our absence, on the 31st ultimo.

MARY A. and
G. W. CROUTER.

Sympathetic.

Hon. Geo. C. Harrington, Cashier of the First National Bank of Wateka, Ill., who was recently taken for one of a gang of burglars in this place, last week received the following letter.

[illegible]

Geo. C. Harrington Esq.,

Cashier.

[illegible]

[illegible] I have a cabinet at Charlevoix I want on the same level every [illegible] of these three men you. To be [illegible] to be Super Yours truly

C. VAN VLECK

Mr. Van Vleck is Cashier of the Second National Bank of Ionia. Major Harrington and Postmaster Mushall are already estimating the probable cost of "setting them up to the bars on their return to Wateka.

Circuit Court.

Judge Leach had the regular term of Circuit Court Thursday and Friday, of last week. The following business was transacted:

M. Donnell vs. School Dist. No. 1, Peaine and Wilson; assumpsit; ordered continued.

People vs. H. H. Vannorman; larceny; bond remanded.

Rogers vs. Gregg; ejectment; ordered continued.

Joe. Clark vs. Burke; assumpsit; jury discharged.

Yaukey vs. Meech; replevin; dismissed by stipulation.

Bristol vs. Vaughan; assumpsit; settled.

A. Fox vs. T. D. Smith; assumpsit; to be decided at chambers.

J. A. Bacon vs. Wm. H. Smith; assumpsit; settled.

D. R. McDonald vs. Geo. R. Thompson; demurrer filed by respondent and submitted by court.

Final papers of naturalization were granted to Jos. B. Lowe, Thos. Murray, William Mellor, Jr., Andrew Holmes, Sr., and Ann Scroggie (widow of Jas. Scroggie, deceased.)

Hasings From Hayes—By Gimx.

E. C. Cline and J. N. Simmons, of Logansport county, Ind., are visiting friends in Hayes.

We noticed several Hayesites on their way to Charlevoix during court week, looking after their interests in court.

D. O. Ely and Myron Burgess dug a well and stoned it last week, on the Lake shore school grounds. They found plenty of water at 19 feet.

Somebody burglarized Gimx's milk house last Sunday morning to the extent of a crock of milk. He supposes that they had become tired of lemonade, and wanted something milder. Leave the crock next time and it will be all right.

One of our Hayesites who can manipulate the rigging of the navy easier than he can the ribbon over a span of horses, became the possessor of a ream of horses last week, and in an attempt to harness them to the wagon he got so mixed up that he put the breeching over their ears and found himself with their tails in their hands for the bridle. He finally got one on each side of the jib-boom, but could not get the rudder chains attached to the horns, and when he attempted to hoist the main topsail he came near capsizing, at which juncture one of the neighbors came to his rescue, pulled him over a rail to the ground, and he was rescued.

Go to Carpenter & Bartholomew's for [illegible] You can see just how the carpet will look on the floor of a large room before ordering. A nice assortment of samples to select from.

ALL ABOARD LOST!

Miss Rosa Nettie, of Charlevoix, the adopted of Mackinaw Witters and their own Hardwick Both Look.

A telegram was received here late last night from Mackinaw, that the little miss Nellie, five inches, and lasted for three weeks, expired in a small of the lungs, and all hands were lost.

The crew was owned and sailed by Wm Hennes, of the place, who was accompanied in the trip by Salesmen Hardwick the brother.

Wilson Bros. [illegible] and Mr. Sanborn [illegible] owned cargo.

Another Terrible Indian Massacre.

[illegible] Care, particular names of [illegible] hundred men, massacred by Apaches [illegible] 24 ult.

Rescued Sooner.

At the Methodist church, Wednesday of the week by the Rev. Mr. Hunt, Mr. Bell and Miss Mary Pray [illegible] Mr. Pray, were united in the holy bonds of matrimony. Mr. Bell is one of our young men, and Miss Pray is one of our young ladies. The Sentinel extends congratulations.

The Lumberjacking here on Saturday night was a success, and gave general satisfaction to all. They are lucky in the strength of saying that they can go to Petoskey. Andy Emerson whenever there is heavy team pulling and hard to beat.

B. Bradley on Traverse Bay, was in town also the last week looking up property as to the possibility of the bridge and have open up Hudson on the bridge and have some to the Traverse City market. Also expects to make a business of hauling lime. There is any quantity of lime on shore there of the best quality, and limestone enough to make the country.

PETOSKEY ANN

WILKES BOOTH, Garfield, Hartfield, and the dynamite fiends generally, have put somewhere upon an indictment and Brother Jonathan's head on the subject of political assassination. One of these suggestions was embodied in a resolution offered by David Dudley Field, an American delegate to the recent conference of the International Prison Association, which was unanimously adopted, and which reads as follows:

Resolved, That the punishment of death ought to be abolished in all countries where it still exists, and that the most effectual substitute for it would be imprisonment for life, with hard labor, in such a manner as to make the life of the criminal a burden to him.

Now, if the newspapers broke Dr. Bliss' victorious and without sins, which bears inconvenient with him, and then [illegible] out to denial that any sins [illegible] Such there be none to constantly vexed myself [illegible] Even when he sent a space plaster to relieve the nausea before the President, the tremulous record of his blister plaster. But the New York *Commercial* presents as follows:

Give the Doctor fair play. Bliss is one of the hopeful, cheery kind of surgeons—one of those kind of pills who says, "You must get well, d——n you! Not one of the old croakers who shook a long face and said, 'Well, Dr. Bliss, [illegible] do our utmost, if nothing unforseen occurs you may have a chance to [illegible]' Those are the people who [illegible] and Bliss is one of them. Grocery sort. Three cheers for Bliss!

It is reported that China is about to adopt a military school system modeled after West Point. Whereupon the Celestial Gazette deplores it as a mark of decay in the empire which has sustained all the nations of the old world.

The Detroit *Post* and *Tribune* says that the board of supervisors of Manistee many county audited at its last session a bill of $1200 for services in connection with that county at the session of the legislature. High priced lobbying, that!

It is reported that Alexander H. Stephens is engaged upon a reply to Jeff Davis' recent book. All the [illegible] are [illegible] Stephens' book [illegible] If those engineers [illegible] to Stephens as much as they [illegible] Davis, they [illegible] pretty [illegible] of it.

MONEY TO LOAN on good farm security at lowest rates in Northern Michigan. Apply in person or address, W. S. HYATT Lyon Agent, Manistee, Antrim Co., Mich. (1-22)

A. F. MYERS, Proprietor.

CHARLEVOIX

[illegible] Hotel is a first class house in every respect, and the traveling public will find it a pleasant place to stop in Charlevoix. The fixtures, furniture and [illegible] recently purchased throughout.

Charlevoix Sentinel.

CHARLEVOIX, AUGUST 29, 1881

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

AT DEATH'S DOOR

The President Slowly but Surely Dying

The shadow of death is hovering over our beloved President. During the past week he has steadily failed, until his physicians have abandoned all hopes of his recovery. Tuesday of this morning a sudden change appeared for the worse, and by noon the physicians announced that he could live but a few hours. Sunday, however, sometime was received at the W. U. Telegraph office that his condition was improved, and today (Monday) he could be counted as the following despatch:

WASHINGTON, Aug. 29.

President's symptoms are as favorable as at any previous time since the attack. His pulse is steady and at 96, breathing is natural and temperature 98.4. Nourishment retained. Most perfect rest, quiet and confidence prevail.

Supplementary despatches were received by the SENTINEL yesterday from the same source, but we fear that the hope is groundless. God grant that it may not.

Drainage From Region Up Otsego

S. Miner has purchased a fine span of horses.

Merritt Hess has gone on a visit to Oakland Co.

Jos. Hannon took passage on the City of New York for Bessemer last week.

The sail Buffalo Bill, spent one day last week with a log on, and precipitated the hands who are working at the new dock into the lake. The scene lasted in the direction like the blowing of a school of sperm whales was the boys blowing the water out of their ears as they scrambled themselves on the dock to dry.

The Charlevoix Co. Teachers Institute held at Charlevoix Aug. 22-26, conducted by Prof. Pierrepont of Ithica, assisted by Prof. Gage of Flint, was a pleasant and profitable session to the teachers in attendance. The Profs. went into their work with enthusiasm, and if the teachers carry the same spirit and the ideas advanced into their schools they cannot help but make their work tell. We are sorry that our citizens generally were not present at a but the teachers of Charlevoix Co. will not let another opportunity like this go by unheeded.

Pure tobacco, 50 cents per lb., at McCabe Bros.

A GENTLEMAN who was well acquainted with Kit Carson, the great scout, says that his estate when he died was appraised at $30,000.

A STAR peddler is now in Northport with a council of machine-makers and through boys at his by a plentiful use of tracts with which he backed his case.

THERE is an unwritten proposition in the house around town in the air toward quit of a correspondence even when the rear end is close to hand.

DIRECT descendants of John Alden and Miles Standish, met lately, the story names, are said to be living at Duxbury, Mass., a place that was allotted to those two pilgrims.

HINTS are given to the effect that Paris intends to hold an international exhibition in 1889, when the centenary of the first and terrible year will be celebrated by all Frances.

AN Irishman wrote this to the wife of a sick teacher: "If Jamie isn't dead yet, remand him of the 20 dollars he owes me on the pipe, and if he is tell him not to give himself any concern about it.

THE grape crop on Lake Erie is reported to be short, owing to cold on the winter and a dry summer. But there will be the usual crop of wine. That can't be cut off, unless alcohol, water and drugs fail.

WILLIAM H. STOW, one of the pioneers of Chicago, died last Thursday evening. He went there in 1837, built the first frame house on the West Side, and opened the ninth notch, and was in the first Common Council.

A LOT of switchmen on the Erie rail road at Buffalo and Hornellsville, have demanded more pay and quit work when refused, but now men are hired in their places and the only effect is some delay to loading freight trains.

A RESCRIPT in Buffalo was recently arrested and held in $1000 bail for giving a wedding wage there Canada. He refused wet to cover the rings with paper hence, which custom officers would not rest to re-congeste me closely.

JOHNSON'S best plug tobacco, 25 cents per lb., at McCabe Bros.

Local News.

BREVITIES.

—School commences Monday, Sept. 19.

—There is considerable sickness at Ironton.

—Prof. Buzzell is at Attica, Ind., visiting his brother.

—McGeagh is paying the highest cash price for wheat.

—Two yoke of oxen for sale. Inquire of A. B. Upright.

—Mrs. Wm. Cooper of Charlevoix township, is visiting friends in Canada.

—The Charlevoix sash and door factory has hard work to keep up with its orders.

—Wanted, a girl to do general housework. For particulars apply at this office.

—Misses Rate and Jessie Smith returned to their home in Pinckney Tuesday.

—The Iron Co. have commenced the erection of a large addition to their store.

—Mrs. Robert Miller, of the Bridge Street House, has gone to Canada on a visit.

—The stow Blue Bells had her foremast splintered by lightning off this port Sunday.

—A. E. Dougherty, of Elk Rapids, is spending a few days in town, visiting friends and old friends.

—Miles Harrington and Mr. Marshall, of the Wauseka party, went to Mackinaw yesterday for a day or two.

—The propeller Paxton brought a large quantity of lumber for the Charlevoix sash and door factory Saturday.

—The fifteenth annual meeting of the Grand Traverse Baptist Association is to be held at Charlevoix, September 7th and 8th.

—Carlos H. Smith, paymaster of the Elgin watch works, returned to Elgin Saturday, to pay off the men. He will return this week.

—Capt. George Madison, late master of the stow Supply, returned to this port last week in command of the schooner John L. Green, of Sheboygan, Wis.

—The Traverse City Tribune has suspended publication. A. H. Johnson, the late editor, taking the position of foreman of the Hastings Banner office.

—The jewelry stock of Charles Wendell of this place was taken under a chattel mortgage foreclosure last week. It will be sold by the Sheriff Sept. 10th.

—The brick work on Byron See's new store is completed, and the carpenters are at work on the counter, front, and in fact the building will be an ornament to the town.

—Alex. Monroe, of Monroe's Mill, one day last week, in close hours fishing in the Jordan, caught twelve trout, five of which when dressed, weighed seven and three-quarter pounds.

—Upright, Emrey & Co. have been appointed freight and ticket agents of the Northern Michigan line of steamers. The lawyers of this line will make landings at the dock of the above firm every trip both ways.

—The Cleveland Concert company gave an entertainment at Lewis Hall last evening. The night was stormy, and the attendance consequently small, but those present were highly pleased with the concert. They will get a good house next time they come.

—The Press Association had a very successful convention at Cadillac, ending up with an excursion to Petoskey by rail and the steamer Paxton. The boys all speak well of the way they were treated by all concerned in their entertainment. Sorry we could not have been with us.

—H. R. Blackmore, General State Agent for Clifton & Co., lock publishers, Detroit, is engaged for a few days at the Edmonton City House. He has a number of issues just out. Any desiring an agency should see him at once. He will call at Charlevoix next week.

—The State Board of Equalization have finished their labors, and their report shows Charlevoix county to have $7,220,261 worth of assessed land, an aggregate value in real and personal estate of $1,020,271.00, to which was added $500, 149.00 by the State Board of Equalization, making an aggregate valuation of real and personal property of $2,020, 960.00.

—A passenger on the propeller Champlain last week reported here that he saw the propeller City of New York in flames at or near Manitowoc, and for a time considerable anxiety was manifested. It has been that, on the night in question, the convent at Manitowoc was destroyed by fire, and the City of New York being in range of the view from the Champlain, the error was a natural one.

—We made a cruise Thursday and Friday, by propeller Paxton, to Petoskey and Harbor Springs. It is a pleasure to travel on so fine a steamer as the Paxton, with officers always attentive and courteous, a pleasure, to sojourn, even briefly, in such pleasant and enterprising towns as our sister barge, and a pleasure to visit with such jovial fellows as our brethren of the *Record* and *Republican*. The *Independent* man was out, and we could only leave our card.

—The resorters are beginning to return to their homes, but hay fever sufferers are numerous at our hotels. They experience almost entire relief from the malady here. The recent warm weather they were all more or less disturbed by the complaint, and began to talk about Mackinac, but reports came that they were all sneezing there, so they settled down to their fate. A chance of temperature, however, brought relief, and happiness is supreme among them.

—The M. E. parsonage of this village is completed, and will be occupied upon the return of the pastor from Conference. The residence is a commodious, square building, with a stone cellar the whole size well arranged inside, and well finished in every particular. The premises have been enclosed by a handsome iron fence, and the residence and grounds are now among the most desirable in the village. The new home is paid for, it may be added, and the Methodist folks are to be congratulated upon being financially, remarkably well to do.

—Charlevoix unitedly resigned herself an extensive blaze on Wednesday afternoon. An alarm of fire was raised, and from the street smoke could be seen issuing from the roof upper windows of Dr. G. W. Crouter's store and residence. It looked as if the building must go, and with it every other building between that and the river, as the wind was blowing fresh from a southerly direction. Many willing hands, with pails and pumps, however, got it under control, and saved the building. The fire caught from an ash shoot in an upper unplastered room, right up the partition into the loft, and would soon have been beyond control. Dr. and Mrs. Crouter were absent from home at the time.

Notice of Dissolution.

NOTICE is hereby given that the copartnership heretofore existing between the undersigned under the firm name of LOVELAND & ACKERT is this day dissolved by mutual consent.

LOVELAND & ACKERT.

Charlevoix, Aug 1st 1881.

A Card.

To the Editor of the Sentinel.

Please allow me through the columns of your valuable paper to express our thanks to the many friends and neighbors who so kindly and promptly assisted in preserving our property from being destroyed by fire, in our absence, on the 31st ultimo.

MARY A. and G. W. CROUTER.

Sympathetic.

Hon. Geo. C. Harrington, Cashier of the First National Bank of Wauseka, Ill., who was recently taken for ransom of a gang of burglars, in this place, last week received the following letter:

LOCK, MICH., Aug. 31, 1881.

Mr. Van Vleck a Cashier of the Second National Bank of Ionia. Major Harrington and Postmaster Munhall are already estimating the probable cost of "setting them up to the boys" on their return to Wauseka.

Circuit Court.

Judge Hatch held the regular term of Circuit Court in Charlevoix on Friday of last week. The following business was disposed of:

McDonald et al. vs. School Dist. No. 1, Evelina and Wilson, exemption; ordered continued.

People vs. H. H. Vanderwater, bastardy; ordered continued.

Rogers vs. Gregg, ejectment; ordered continued.

Jno. Clark vs. Dodge; assumpsit; jury dispensed.

Yawkey vs. Meech; replevin; dismissed by stipulation.

Bristol vs. Vaughan; assumpsit; settled.

A. Fox vs. D. D. Smith; assumpsit; to be decided at chambers.

J. A. Bacon vs. Wm. H. Smith; assumpsit; settled.

D. H. McDonald et. Geo. H. Thompson; demurrer filed by respondent and submitted by court.

Final papers of naturalization were granted to Jos. H. Lewis, Thos. Murray, William Mellor, Jr., Andrew Helmer, Sr., and Ann Scroggie (widow of Jas. Scroggie, deceased.)

Hastings From Hayes—By Gibx.

E. C. Chew and J. N. Simerson, of Lawrence county, Ind., are visiting friends in Hayes.

We noticed several Hopkins on their way to Charlevoix during court week, looking after their interests in court.

D. O. Ely and Myron Burgess dug a well and stoned it last week, on the Lake Side school grounds. They found plenty of water at 19 feet.

Somebody burglarized Gibx's milk house last Sunday morning to the extent of a crock of milk. He supposes that they had become fond of lemonade, and wanted something milder. Leave the crock next time and it will be all right.

One of our Hayesites who can manipulate the rigging of the navy easier than he can the ribbons over a span of horses, became the possessor of a span of horses last week, and in an attempt to harness them to the wagon he got so mixed up that he put the breeching over their ears and found himself with nine tails to his heads for the bridle. He finally got one on each side of the jib-boom, but could not get the rudder chains attached to the helm, and when he attempted to brace the main topsail he came near capsizing, which performance of the exhibitors more to his credit, gained him a rib a-tickling and now everything is lovely.

Go to Carpenter & Rathbone's for a good shave. They are now fixed so that expert will look for the door of a large room before ushered. A nice assortment of samples to suit customers.

All Hands Lost!

The Snow Squall, of Charlevoix, Capsized off Manitou Islands and Beaten Back Leak.

A telegram was received here late last night from Muskegon, that the little sloop Nellie, five children, and bound for Charlevoix, capsized on it squall off the point and all hands went down.

The snow was owned and sailed by Wm. Hannah, of the place, who was accompanied on the trip by Solomon Hitchcock his brother.

Wilson Barnett, Jr., Frank Hitchcock and Solomon Hitchcock and one of

Another Terrible Indian Massacre.

The following telegram came to us just prior to the commencal of the Cure, but as it is a matter of so hundred deep interest to our readers we have concluded to insert it, although it is somewhat late:

24 inches.

Newspaper Notes.

Arthur Mitchell, of Traverse City, was killed on Wednesday of the week by a runaway horse. He will be buried at Charlevoix.

B. H. Gould, of Petoskey, has purchased the Antrim Review, and will hereafter publish it.

The Lumberjack here on Saturday night put a fair house, and gave perfect satisfaction to all. They are better than the average of concert troupes that stop at Charlevoix. Judy Fisher was a charmer, and Prof. Lowe's violin solos were excellent.

B. Goodrich, of Petoskey City, was in town one day last week looking up property in the city. He expects to open up business in the lodge and lumber trade for the Traverse City market, also expects to issue a business of his own. There is room enough for all in the lumber business, and there is room enough to work the country.

PHOENIX ASS.

Wilkes Insain, Guiteau, Illustrious,

and the Hyenas heads generally, have been the subject of numerous expressions and Brother Jonathan's bonfire the subject of political assassination. One of these suggestions was embodied in a resolution offered by David Dudley Field, an Assemblyman in the International law conference at Cologne the other day, in favor of an international treaty pronouncing those assassinations and attempted assassination as a means of redressing grievances, should be deemed a overt political offence when the meetings of the states and that the privilege of asylum be denied the perpetrator of such a crime. It is significant that such a proposition should come from the country that has just lost the President, the tremendous wound from a lunatic's pistol. But the New York *Commercial* protests as follows:

Give the Matter Its due. Bliss is one of the hopeful, cheery kind of assurance, one of these kind of pills who says, "Don't mind me! well, don't—you! Nor one of the old crackers who think it best to keep their mouths shut when they have a cold and whine, "Well, Captain compliments do not make it nothing without ocean, you may have a chance to rain." Dimmock was cured years ago with two bottles and bliss is one of those cheery sort. Three cheers for Bliss!

It is reported that Illinois is about to adopt a military school system modeled after West Point. Whereupon the Cincinnati Gazette deplores it as a mark of decay in the empire which has enslaved all the nations of the old world.

The Detroit Post and Tribune says that the board of supervisors of Monroe county auckland, at its last session, a bill of $5000 for services in organizing their county to the last census of the United States. High priced lobbying, that!

It is reported that Alexander H. Stephens is engaged upon a reply to Jeff Davis' book, and that the two are to appear in print together. If these memoirs of a couple of unreconstructed rebels are to be republished in the interests of the South we will be

MONEY TO LOAN on good farm security at lowest rates in Southern Michigan. Loan Agent, Muscelong, Austin Block, Mich. (12-22)

MICHIGAN STATE NEWS.

Two cists of broomdirt, Eaton County, about fifteen years old, were out driving the other day, and as they were crossing the Battle Creek River the bridge fell in, and the horses only backed the buggy off the embankment on the stones below. The horse fell on one of them, Melissa Vess, injuring her so that the child died within half an hour. The others were only slightly injured.

Mr. Governor Jerome had an attack of neuralgia of the heart while on the street of Saginaw City a few days since.

The great bee and cry raised by the students of the Agricultural College, which has led to the resignation of Mr. Fox, the Steward, was toned down by the State Board of Agriculture to the discovery of a shortage of $282.2?, and even that was not the sum of the difficulty, but only the result of a lax system.

Only five women in the United States are on record as bankers or bank officers, and one of these is in Michigan. The cashier of Ironton's only bank is Miss Ella Barr Tinsley, a Mrs. female humbug.

A child of Sarah Marshall, of Farwell, reminds their friends sensible fruit from tapping a cup of tea over upon itself.

At Dearborn on the 23d Mayor Asa H. Mousson was thrown from his carriage down a steep embankment. The horse took fright at the cars, runaway, and completely demolished the conveyance. The Mayor is quite old and heavy, and the fall injured him internally and broke his arm. The effects may prove fatal.

Shortly after noon a shock on the afternoon of the 23d a soldier in Hosmer' planing mill in West Bay City exploded with terrible force. The engine and boiler were completely demolished, planks landing one hundred and fifty feet distant. The body of Lauder Sanderson, contractor and resident of Bay City, was found lying on his back, stark and almost unrecognizable. William Gilbert, who was the engineer, was also literally into pieces, his arms and legs being the fifty feet. Both were fearfully cooked.

Alderman Lamb in the 7th ward, Detroit, was walking near the mill, was taken into the river, but was rescued. Lindell Hotel was also recently smashed about the face and body.

No person shall run any chrome or grape vines with strip, bunch or sugar, intended for human food, to any storage, elevator, cellar or last fit, laid or any other tonnage whatsoever, with any intent or purpose intended for human food, without distinctly marking or labelling the article or package containing the same, with the true and appropriate name of such article, and the person or persons by whom grower, etc., owner that its composition; nor shall any person sell or offer for sale, or order or permit to be sold, any such article or adulterated article at the same time informing the buyer of the fact, and the proportion in which glucose or grape sugar, oleomargarine or either fat has entered into its composition.

Any one violating the provisions of this act may be punished by fine or imprisonment.

DEFINITION OF CRIMINAL PROCEEDINGS.

Act No. 26 provides that within ten days after the proceedings before any Justice of the Peace, in which a jury of the State or a party, or wherein the county may be liable for any costs, it shall be the duty of the Justice before whom such proceedings have been had to make a report of the same to the Prosecuting Attorney of the county.

The report must contain the title of the case, the date of filing the complaint, the offense charged, the name of the witnesses, the date of trial, the verdict or finding, the judgment, etc. The Prosecuting Attorney shall, immediately after receiving his annual report to the Attorney-General, file said reports of Justices with the County Clerk.

The Prosecuting Attorney of the manner in which offense charged, the plea, the names of attorneys, the date of trial, the verdict or finding, the judgment, etc. The Prosecuting Attorney shall, immediately after receiving his annual report to the Attorney-General, file said reports of Justices with the County Clerk.

This act also directs the manner in which the jurors and witnesses shall be paid, and provides a penalty for the refusal or neglect of the Justice to make the report as herein specified.

The Equalized Real and Personal Estate of Michigan.

The following statement shows the population of Michigan for 1880, the number of acres of land assessed in 1881, and the aggregate of real and personal estate as equalized by the State Board of Equalization for 1881:

COUNTIES.	Population.	Acres assessed.	Real estate.	Personal estate.	Total.
Alcona	1,407	66,407.48	$2,500.00	$ 500.00	$ 3,000.00

SCHOOL AND CHURCH.

—The deanery of Westminster has been tendered to Rev. Percy Montagnue Butler, head master of Harrow School, who will doubtless accept.

—The fund left by the late Mrs. Williams, of Norwich, Conn., for the building and endowing of a school for young ladies in New London, is now valued at $140,000 in personal property, and $25,000 in real estate, besides the site, which is worth $10,000.

—"Antioch Unruh" in Middle Tennessee is an exclusively Methodist community, although it is fifteen miles square, there are no other religious organizations within its bounds. There are about seven hundred Methodist church members there.

—Last year there were in the Philadelphia public school 1,388 women teachers and only seventy-seven men. The average annual salary paid in that city is $486.14. It is reported that the most competent teachers are leaving the schools, as salaries are constantly growing smaller.

—The Hebrew Synagogue at Newport, which was built several years ago by Judah Touro, who also gave $10,000 to support a rabbi, is to be reopened soon with imposing ceremonies. Dewy were so scarce that the synagogue was closed soon after its opening, but there are now enough to form a congregation, and the $10,000, which has been managed by the city, has been swelled to $20,000.

—The "Church of Jesus" in Mexico receives about $25,000 a year for its evangelical and missionary work. It sends about $10,000, by which it receives earnest request. This Church says to enlist all the Protestant denominations in the work of evangelizing Mexico. Thus far it has not been very successful in this respect, as several of the denominations have withdrawn from their own, which they prefer to keep up. The missionaries now begin to find that the Mormons are bound to give them trouble. Many German immigrants are in the northern part of Mexico, where they find plenty of proselytes among the ignorant Mexicans. Several many Mormon tracts are scattered among the Mexican people.

—In connection with the Delaware Methodist Episcopal Conference is a voluntary society called "Daughters of the Conference." This is an organization of the sisters whose object is to help along the superannuated preachers and the widows and orphans of deceased members. Miss Frances Willard made a speech before the Conference, which is described as "well expressed, thoughtful and eloquent." No higher compliment than this could have been paid on the speech that is being delivered by one of the brethren. The sisters who compose this organization are doing a very useful and commendable work, and setting an example whose influence might extend beyond the deanery work. It was not long ago that I met my best schoolmaid by a little village where I afterward learned was the runaway son of a Chicago millionaire. The circumstances in his life I believe life are beginning early.

"I sat here at my window the other day—you see I have a good view up and down the street for a good while—and counted no less than half a dozen people as they passed whose histories I knew were peculiar enough to form the interesting plots of as many novels.

"I sat here at my window the other day—you see I have a good view up and down the street for a good while—and counted no less than half a dozen people as they passed whose histories I knew were peculiar enough to form the interesting plots of as many novels.

PUNGENT PARAGRAPHS.

—One of the most aggravating of bores is a stud in a close-fitting shirt bosom. —*Boston Commercial Bulletin.*

If the dog whose day this is will call at this office he can have his property and no questions asked.—*Santa Transcript.*

—"He's a beauty," observed the auto dealer, admiring striking the animal's mane, "and amiable, too; but when he gets mad it's just worth till Vanderbilt's forties' to see him feeling for the hair of the comet with his heels." —*Brooklyn Eagle.*

—A Detroit young man denounces the police because "because they chain his cows." Here, now, is a question for scientists. Can they explain how it is that a bumpy-wary by one person can handle the ears of another person not wearing it? Eh? How's that? Why, well, now, that may be. But how stupid not to see it before.—*Detroit Free Press.*

—Even the little bits of tots get hold of the vernacular quite handily. Little Johnny wasn't very deeply interesting, and when his mother said, "Come, little boy, it's time to go to bed now," he looked up out of the corner of his eye and remarked, in his baby fashion, "Not tonight." Seems as how he was immediately crowned as a hero by his elder brothers.—*New Haven Register.*

—The Presidential bulletins make one think of the sailor whose shipmate was knifed in a row on shore. They went to the hospital next day to see how their wounded friend was getting along. Jim Bolstay went in to ask about him, received a true statement of his case from the surgeon and came out with a solemn face. "Good Lord, mates," said he, "Jack's a dead man. The latin parts of his bowels is all cut to thunder."—*Burlington Hawk-Eye.*

—When Colonel Solon left the office a couple of weeks ago, he took with him the *Herrel's* only diamond-studded, velvet-trimmed umbrella, and we enjoined forgetting it, until three came another rainy day, when word was sent to him that it was needed. Said Jack's a dead his characteristic brevity sent the following note: "It's a rainin' now, and I can't go out doors; wait till the rain is over an' I'll bring it back."—*Old City Herald.*

—Gabe Snodgrass owns a farm near Austin, and Jim Wetsell asked Gabe the other day what his was doing with his farm this year. "I has rented it an' gin it de same doinksing. He gets half a dollar cotton sherry dollar he makes on cotton in farm." But how does you know he gills yer do kerrect amount he what he makes? He kin keep back some and you will neibket know it." "Dar ain't no danger ob dat. Don't yer see de more dollars he brings in for me, de more half dollars he gets. You bet his ain't gwine ter keep back none. He ain't so fool. He wouldn't get no half-dollars unless de dollars he would keep back."—*Texas Siftings.*

Life's Vicissitudes.

A well-known man-about-town, who thinks his mind delight in the study of human nature, and who believes that Hennyer offers a better field for that too rarely practiced art than any other spot on the face of the earth, told a *Tribune* representative a good many entertaining and satisfying stories in a pleasant hour's chat, the other day.

He was seated in a comfortable chair that allowed him to lull back and rest his feet on the window-sill, smoking his cigar and looking out upon a leisurely waiting the smoke as it went up in little rings and was then caught by the gentle wind and sent scurrying out of the window and blown away into nothingness.

"Did you ever think much of the vicissitudes of life?" he asked, suddenly, knocking the white ashes from the end of his cigar, and looking so earnestly into his companion's face as to really startle him a little, for he reported that he was interested me exceedingly, not so much because of the intrinsic value of the remarks the writer and suggested some good ideas without knowing it. He was telling of two men who met each mentally in the cars. One said to the other, "Why, I not me you somewhere before?" And then the fellow seem to went on to tell him that he probably had met somewhere or other two or three years ago. I was Secretary of a Young Ladies Christian Association in Mexico. I commanded a ship for a while, then worked in a restaurant, kept a hotel, was a typesetter, and for a certain time traveled with Barnum as a cannibal."

"Life is full of vicissitudes, remarked Mr. Blank, after a moment's silence of many experiences responded, thoughtfully. "She am, very full, indeed.

"I think of that little sym every now and then," continued the gentleman, laughing quietly to himself, "as I look around me in Hennyer and see poor devils whose fortunes have stopped as remarkable as those of the chap in the story. The man I mean read in a New York papers of noblemen's sons serving in the big restaurants like Delmonico's and the like, and he wondered. Well I know that such things often occur, as they can make a big impression on every short time. Talking about waiters, it was only a few days ago that I was at a dinner party, and was just ish one—washing dishes and making himself generally useful. He gets half a dollar a week and his position under the head waiter, who is the main track, smoking twenty-two hours out of every one. The dishwasher and I got to talking over old times.

"Do you ever get homesick?" I asked. "Sometimes," he said, "but I don't like to go back to my old home. I was a waiter in a big restaurant there, and I was getting $40 a month and my board. I was married, and had a little home of my own. But I got into a fight with a man who was trying to get my wife to go with him, and I had to leave town. I was discharged from my place, and I couldn't get another. So I came here, and I'm getting $4 a week. As though it were not hundred once a year."

Just then a fine young man came tripping up.

With golden hair, and more than handsome And said,

"Good morning, sir, I hope you're well."

He'd always join a wish or two about,
And pass the time of day to all and sundry,
Or else remark on the weather, or propound,
Some question of the day, and then go on
With our own particular errand, but one thing
Would answer every question, and that was
How was the weather? Always the same question,
How was the weather? Always the same answer,
How was the weather? Always the same answer,
Was the weather? Always the same answer,
Was the weather? Always the same answer,

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

JUDGE LOWNDES, the First Controller of the Treasury, has rendered a decision to which he maintains that if a contract with the Government is sold by the contracting party, the contract itself is assumed, and that any person or party selling such a contract runs the risk of obtaining no pay. The opinion is based on the ground that the original contractor in such an event does not perform the service, and the purchaser of the contract is the existing law.

TWO city were burned to death in a flat-house fire at Philadelphia on the 24th.

A. LEVEEN, a dealer of New York, recently sold his wife for one dollar.

TRANSYLVANIA UNIVERSITY, Lexington, Ky., after existing for forty-three years, has commenced to take nonsectarian days, has commenced to take nonsectarian men. When he began his administration he was able to save his bell, but of late his walked across the room and seated himself in a rocking-chair. His reason for the cause his stomach would not retain food.

AT Hartford, Conn., on the 24th the passing house Little Brown Jug loosened the pastern sinews of Ruth, hunting by 2:17¼, and second Sleepy Tom's record of 2:12¼, and also accomplished the three fastest heats ever trotted in public—2:13¼, 2:12¼, 2:12.

REPORTS of the drought and consequent scarcity of water the Mayor of Richmond, Va., on the 25th caused him to issue a proclamation, and the officers of the Richmond & Allegheny had their guns behind the second time. When they were once more opened, warrants were issued out for the arrest of the city authorities, who were responsible.

AT Evansville, Ind., on the 24th five destroyed nine steamboats, establishments, including a loss of $250,000. At Harrisburg, Texas, the shops of the Galveston, Harrisburg & San Antonio Railroad were burned on the 24th. Shipyard, Beaumont, Texas, was also nearly entirely destroyed by fire on the same day; loss, $60,000.

FOUR saloon-keepers connected with the City Council of Jersey City were arrested on the 24th for violation of the High License law. The council had refused to issue any licenses for the renewal of licenses, and as those dealer had received the $1,000 fee.

A FOUR-YEAR-OLD child of Samuel Mc-Sankle, while exercising on the Hartford track, and was compelled to postpone her trial against time.

AN EXCURSION of New York City boats on a race to meet the Queen, to be presented to the best-drilled battalion participating in the celebration at Yorktown.

A NEGRO found a find of silver about two miles from Deadwood was followed by fifty sights near by the session of West Virginia. City, the citizens of a Recorder, the settlement of 1,000 persons, and the number of the sessions and two farm banks. On the fourth day a daily newspaper appeared.

THREE persons were killed and several injured near Ismet at Andover, N. H., scattered the standing several opposition, has married Miss Belle Thurston, the daughter of a poor shoemaker. The father has threatened to disinherit his son.

A. MARET of fire-works at St. Louis, named Walker, recently committed suicide by blowing himself up with a mine bomb in which a slow fuse was attached.

THE extensive packing-house of J. C. Hately, at the Union Stock-Yards, near Chicago, with a large amount of provisions, was destroyed by fire on the night of the 26th. The loss was estimated at $750,000.

THE failure of Jackman & Williams, clothiers, of Cincinnati, was announced on the 26th. The suspension was due to the losses of the senior partner in stock speculation. Jackman had fled to Europe.

Personal and Political.

MAYOR GRACE, of New York, on the 23d removed the Police Commissioners of that city from office, after a trial in which they were found guilty of losing to keep the peace of the city.

IN his dispatch to Minister Lowell, at London, on the night of the 23d, Secretary Blaine says the President "is weak, exhausted and emaciated, and walking 10 minutes on the night when assisted was from 200 to 300 pounds. His failure to gain strength is due to the one feature which gives special uneasiness and apprehension."

A WASHINGTON evening paper of the 23d says that at the instance of General Sherman, further action had been made against Jefferson Davis, now a resident of Beauvoir, Mississippi, for the recovery of $500,000.

IT was reported on the 24th that heavy rains in England had flooded and done great damage to the crops.

IT is reported that Astatic cholera is daily carrying away from one hundred to three hundred natives of Russia.

A TABLE dispatch of the 23d announces that intelligence had been recently received in Africa that the celebrated Afrikan explorer, Henry M. Stanley, was dying at his station on the Congo River.

IT was reported on the 24th that heavy rains in England had flooded and done great damage to the crops.

IT is reported that Astatic cholera is daily carrying away from one hundred to three hundred natives of Russia.

THE Mississippi Greenback and Independent Republican State Convention were held at Jackson on the 24th and 25th. About fifteen of the delegates were colored men. A state ticket was nominated, and a platform adopted of 50,000.

IT was reported in army circles in the Territory on the 23d that Nemmir, the Canadian weather prophet, had been offered a position under the head of the Signal Service.

THE Massachusetts Greenback State Convention was held at Worcester on the 25th, the following ticket was nominated: For Governor Israel W. Andrews; Lieutenant-Governor, Frederick Robinson; Treasurer, George Foster Sweetsey; A. B. Rowell; Auditing; William T. Wilbur; Attorney-General, H. G. Allen. The platform adopted republican and opposition to the use of red reputations and signatures to the notes of national banks, particularly. National Banks, railroads, etc., and generally condemned the present administration.

THE Democratic State Convention at Illinois on the 24th the New York Greenbackers reaffirmed the resolutions adopted at the Syracuse National convention in 1886. They also resolved that all money paid to railroad companies for transporting persons or property in excess of what is required to pay the legitimate expenses of operating such roads and a fair return on their actual cost is in violation of the fundamental law of public rights, and should be refused by the people, and should immediately be prohibited by legislative enactments that prohibit corporations from be prohibited by law from charging more for transporting property than the legitimate expenses of operating such roads and a fair return on their actual cost.

Foreign.

HANNIGAN, one of the suspected persons arrested in Ireland under the provisions of the Coercion act, was released on the 24th, because of his ill-health.

IT was alleged on the 24th that the Russian government is embezzling agents in the Irish Land courts in Ireland.

THE hotel of the servant who made an assault from Montpellier, France, on the 24th was found on the 24th fatigually smuggled near Lord Beaconsfield's house.

A TABLE dispatch of the 23d announces that intelligence had been recently received in Africa that the celebrated Afrikan explorer, Henry M. Stanley, was dying at his station on the Congo River.

IT was reported on the 24th that heavy rains in England had flooded and done great damage to the crops.

IT is reported that Astatic cholera is daily carrying away from one hundred to three hundred natives of Russia.

THE Coercion Act was renewed in Ireland on the 24th and 25th. About fifteen of the delegates were colored men. A state ticket was nominated, and a platform adopted of 50,000.

A MAN WITH MANY WIVES.

Arrest of a Professional Bigamist and Swindler—An Account of the Villainous Exploits of a Most Remarkable Scoundrel Several Women Married and Deserted—His Financial Swindling Transactions.

For more than a year last, at tolerably regular intervals, there have appeared in the daily papers dispatches from various cities between Boston and Savannah, and as far west as Missouri or Kansas, descriptions of the achievements of a professional bigamist and a swindler, who operated under the names of Martin, Adams, Adams and other fictitious appellations. His methods and the adventures have been much the same all the way through, and the descriptions of the operations have varied but little. The individual was arrested yesterday at Lima, Mass., through the efforts of Pinkerton's detectives, and is now in jail awaiting extradition to Virginia, where he is charged with forgery, bigamy and obtaining money under false pretenses. The man, whose name is Martin, who is in charge of the New York office, and has directed the detective movements against the prisoner, was the man who is widely known as Martin is a most remarkable character. He is a man of about 40 years of age, above five feet nine inches in height and slender in build. He is a well-formed, is covered with a growth of white hair, and rather fills it, at the same time, and he wears a moustache and long side whiskers. His complexion is florid, his eyes are blue and his features are fine, but he despises his mind cheeks. He wears a Prince Albert frock coat, a high silk hat, and a black or blue-black cutaway, and has a jaunty, almost military air. He is a man of fine address, and is a fluent talker, and has undoubted nerve and courage. He is said to have already been traced to his transitory possessions, and to have left a trail of ruin behind him. He is a man of fine address, and is a fluent talker, and has undoubted nerve and courage. He is said to have already been traced to his transitory possessions, and to have left a trail of ruin behind him.

The last he married (Cora) Chesebrough was contained an advertisement which is apparent that one Thomas A. Martin was in need of a governess, he being a widower, for his eight-year-old daughter. Among those who replied to the advertisement was a Miss Tuttle, of Richmond, Va., a young lady of refinement and moderate means, then living with her mother. Miss Tuttle went to answer the advertisement, she received a reply from Martin, dated at Council Bluffs, Iowa, in which he stated that he was a widower, with but a single child, a daughter, and he desired to secure the services of a governess. Miss Tuttle wrote to the parties he went to the post-office window of his Richmond office, and would like to see her, but he would be absent on business for a few days. Meanwhile, Martin had got a few days' leave from Richmond to visit his wife and child, but with his wife at the Windsor Hotel in this city, and with his son at Albion. In the latter place he was known by the name of Adams, giving her terms, to which he responded, saying the terms were satisfactory, and that she could bring her mother with her. Miss Tuttle and her mother arrived in this city, and the former

James Robbins.—A Short Autobiography.

Mr. James Robbins, who died recently at his residence, near Richmond, left the following brief memoir, written by himself a few years ago:

January 2, 1777.—Thirty-day fifty years ago, in my thirteenth year, I left the home of a noble mother (my father died in 1781), to perform a journey of seventy miles on foot, through deep and drifting snows, to begin my career of life, and from that day to this my fortunes have been pushed sturdily and alone, without the aid of a penny from any one, living or dead.

In my twenty-first year I was appointed Cashier of the Branch Bank of Morgantown, Va., at a salary of $300 per annum. I resigned this position in my twenty-fourth year, owing to my removal to New Orleans, where I resided twenty-one years, leaving during this period only six visits to Europe and 30 days to the Island of Cuba. I was principal in establishing, from 1826 to 1837, eight banking and commercial firms and agencies—six in New Orleans, Philadelphia, New York, Glasgow, London and Liverpool, England, four of which were in existence in 1857. Under the flag of Texas, Republic of Louisiana, I established the "Bank of James Robbins" (resigned in 1836), with a paid up capital of $250,000, of which I was sole proprietor, except $50,000. This bank did not suspend in 1837, and now exists as the Merchants' Bank of New Orleans.

In 1842 I was elected President of the New Orleans, Jackson & Great Northern Railway Company, with a paid up capital of $3,000,000, which was sold to a new company in January, 1860, with a paid up capital of $1,000,000; I was selected as its first President, which office I surrendered in the spring of 1862.

In 1871 I retired from business with diminished fortune; and in 1876 changed my residence to "Hampden Place," near Chartreuse, where I now reside having purchased it in 1845 as a home for my mother, whom God had left fifty years ago, endowed with her example, her courage and lessons to guide me, as she bore through the mists of our uncertain existence and fluctuating fortunes.

My sacrifices and losses since 1837 (thirty years), including exactions under the president of the "Commercial Laws" of Louisiana, exceed $1,000,000.

My signature is not outstanding for a penny; the remnant of fortune left is equal to my wants, present and prospective, in the way of tranquility, and my daily companions hundreds of authors who instruct, which are the most important institutions more precious than riches, either heeded or coveted.

Vegetable Animals.

What is an animal, and what a vegetable? Most persons are in the habit of thinking them entirely different, but who can draw the line of distinction between them? Carver, the celebrated naturalist, thought that motion, the power of moving about at will, was a faculty which animals had and which vegetables had not; yet the sponge and corals of the ocean are composed of innumerable animals which cannot change their places any more than cabbages can.

There are animals that have not mouths, or stomachs, or bowels, or stomachs, yet move more, they eat and thus digest. There are in ponds plants so small that a teaspoon would hold hundreds of them, which move almost with the rapidity of lightning. But microscopes are not powerful enough to show us these organs of locomotion, but they undoubtedly have them.

Animals feet. So do plants, and it may be that their sensibility is owing to their having a nervous system. Look at the mimosa pudica, or sensitive plant. Touch its leaves and they will immediately close; at night they close of their own accord. The just says:

"Weak with the sins we share the chaste mimosa droops,
From each rude touch withdraws her tender leaves and faints;
Or, as night comes, the parties will grow fondly closer,
Alarmed, she trembles at the morning shocks
Nor does she ever fully awake but by tender forms.
The whispered murmurs of the gathering shades."

The mimosa exudes a poisonous gum and has also an immense charms the rural maid.

Animals sleep. So do plants. Many plants sleep at night, and there are some closely in another, they all sleep. But that animal is dull, like the owl or the animal kingdom. The plant commonly known as the sensitive mimosa pudica puts forth its yellow flowers at nightfall only to wither in the morning.

Animals eat and drink. Plants eat and drink, too, and some are accordingly fond of animal food. The "sundew," a little plant that grows in low, wet places, and some are covered with a hairy fringe. At the end of each hair is a drop apparently of water, but really of extremely sticky secretion. An insect comes along and alights on the leaf, it sinks in the moisture, and the shining drop his doom is sealed. His struggles only sunken a closer

In marshy places in North Carolina grows the Venus' fly-trap. Every leaf has a row of spikes so arranged that when the lobes of the leaf are closed these spikes interlock, so that nothing can pass them. If a fly alights on the leaf he gets a pressing invitation to depart, which he is always compelled to accept. The strangest thing about the plant is that its leaves will close at once on a piece of wood, or a button, or anything else that is not food.

The sundew, or pitcher-plants, of India, also catch and digest insects. The leaves are shaped like pitchers. The rim of each pitcher is smeared with something which looks and tastes like honey, and which attracts insects into the pitcher. Then the surface becomes so smooth as the smoothest glass. The insect slides down this inclined plane to the bottom of the pitcher and the plague is an end which kills it. These pitchers are in reality stomachs, and they digest a fly or a bit of beef or mutton exactly as a human stomach digests its food.

The green grass in stagnant water a plant having minute translucent bladders attached to its leaves. Each of these bladders is full of water and has a little trap-door which can be opened or shut. When any animalcule arrives, which are so abundant in stagnant water, the trap-door is opened hospitably and lets them in. As soon as they get in it shuts with a bang. They are prisoners for life. Fortunately, life in that cell does not last long. In the bladder is an acrid fluid, which, at least, if not poison, and vegetables have not the too sense of that, soon kills the animal. Darwin saw the tendril of a climbing plant voluntarily withdraw from a hole in a wall in which it had chosen it and remained fixed in it for thirty-six hours, when a fly came that the tendril and leaf of the sundew will move a little distance upward after a fly—and catch him, too.

Perhaps some wise person will ask if animals can be propagated by slips, as plants can, and smile while he asks. Certainly; that's the easiest thing in the world. Cut off a polypus from a sponge in ponds, can be cut into twenty pieces and each piece will become a perfect hydra. If the body be cut in two, lengthwise, the parts will grow into two sponges, and, if the two parts be kept separate, each will become a hydra. The same is true of jelly-fishes.

Prof. Huxley says: "The difference between an animal and a plant is one of degree rather than of kind, and the problem whether, in a given case, an organism is an animal or a plant may be essentially insoluble."

So to turn the other side, I shall call such things as the sundew, Venus' fly-trap, and so forth, vegetable animals.

—Interior Journal, in Christian Union.

How Rats Steal Honey.

When the clerks in a certain Rochester drug store are not operating with the mortar and pestle, or compounding a fresh draught or mixing cooling parts of Turkey rhubarb and hydrocyanic acid for children suffering, or spreading shoemaker's wax on porous plasters or engaged in any of the multifarious modes of making themselves useful known to apprentice apothecaries; in a word, when they have all the hour and a friend to entertain, they resort to a plan decidedly novel and not without interest to lovers of anecdotes about animals. What the boys do is to take the honey jar from the shelf, take the stopper from its mouth and place it near a rat hole from which one of the rodents emerges quickly when the store is quiet. It discovers the presence of the honey in a short time through the nuisance of its nose, and then puts in practice a plan it has found to work well for reaching the sweet contents of the jar. The expedient is simply to insert its tail in the jar, and if the fluid be deep enough to reach the honey, then withdraw it and suck the linked sweetness at its leisure. The clerks are ready to swear this story is true, and they see now carefully observing, for the benefit of science, the effect on the human family of rat-tained honey in which rats' tails have been soaked.—*Rochester (N. Y.) Union.*

While a catfish produces 3,686,760 eggs, a mackerel lays only 451,860, but if a mackerel would devote less of its energy to the process of becoming salty, perhaps it would then be able to bring forth as many eggs as the more productive codfish.

Weather Indications.

"See," said Mrs. Spoopendyke as she laid the paper down, "I see that we are to have rising followed by falling barometer, with northeast to southwest winds, and higher or lower temperature, with clear or partly cloudy weather, and light rain. How do I like my system to tell so accurately about the weather? Do you understand it?"

"Certainly," replied Mr. Spoopendyke, "they do it by observation. They have a man out West observing, and a man down East who observes, and follows observing around in different parts of the country. They put all their observations together, and we know just as much about it as they do."

"I suppose that's what makes the wind so different every morning. When one man's temperature is rising, somebody's falling, and when one is cloudy in another, they all are, so that I should think when one hits it right the other ought to be awful mad."

"What would they get mad about?" demanded Mr. Spoopendyke. "You don't imagine that they all get together and fight it out, do you? They take the observations from different points and compare it, and they proved it out among themselves, too, and some are accordingly fond of animal food. The "sundew," a little plant that grows in low, wet places, and some are covered with a hairy fringe. At the end of each hair is a drop apparently of water, but really of extremely sticky secretion. An insect comes along and alights on the leaf, it sinks in the moisture, and the shining drop his doom is sealed. His struggles only sunken a closer

"With corkscrews," thundered Mr. Spoopendyke. "Sometimes they haul it up with a stump machine; then they drop a carpenter's shop on it. When it gets very low they blow it up with cotton. Once in Dakota it got so high they had to dig a hole and ruin it down with a quicksilver. Got it now? Begin to see through it? What you need is a box of pills and a compendium on an almanac!" And Mr. Spoopendyke jumped out of the house like a comical shot and banged the door after him.

"I never quite understood it before," soliloquized Mrs. Spoopendyke, contemplating as to whether she would put the plum on the side or back part of her hat. "But now that he's explained it to me, I wonder they don't observe by steam. It must be awful hard on the poor man." And, having decided about the plums, Mrs. Spoopendyke put her mouth with pins and crawled under the bed in search of her thimble.—*Brooklyn Bogle.*

—An old man with a shovel as destitute of hair as a watermelon, entered on Austin Avenue drug store and told the clerk he wanted a bottle of hair restorer. "What kind of hair restorer do you prefer?" "I reckon I'll have to take a bottle of red hair restorer. That was the color it used to be when I was a boy." *—Texas Siftings.*

MISCELLANEOUS.

—Rev. Samuel Dearbrow, of Upper East Tennessee, has married 2,125 couples since 1842, receiving therefor about $2,000 in fees. The lowest fee he took in was five cents in coppers.

—At Osneree, Canada, they have a curious plant grown from a seed supposed to have been turned up with the earth taken from a well at the depth of fifty feet. It resembles a century plant, and is nearly seven feet in height.

—Always look Blackface, aged 103 years, the oldest squaw on the Tuscarora reservation, near Buffalo, N. Y., has just received from the Government her pension of eight dollars per month on account of her husband's services in the war of 1812.

—A policeman saw a woman digging in her garden at Paris, Ky., before daylight. She was not noted for industrious habits, and therefore his curiosity was excited. He watched her until she brought out a fan containing $20,000, the proceeds of a recent bank robbery.

—An old and excellent engineer on the Central Pacific got a new fireman the other day, who after throwing the big pine blocks for an hour or so, got very tired of such work, and thought he'd run a locomotive. He looked to be the engineer sitting in the comfortable seat and said: "Here, you throw chunks for a while, and I will look out for cows."

—The will of the late David K. Carroll, a millionaire manufacturer, who died in Baltimore a few days ago, has been admitted to probate in the Baltimore County Court, in one of the most extraordinary testamentary documents that it was ever the lot of a surrogate to spect it a remarkable document. After bequeathing all his property, estimated at considerably more than $1,000,000, to his large family, chosen equally, he places the sum of $100,000 in the hands of the executors to defend the will in case of litigation.

—Australia has added to its other natural monstrous a fish on legs. A recent expedition has dredged up one of them and, placed upon the decks, the creature raised itself on its four legs—and walked! Yet in all means and purposes the thing was a fish, with fins and tail and gills. Another wonder of the same expedition was the eels. The voyagers stopped on a small island which was covered with eels. The creatures were yellow, chestnut and tortoise-shell.

—Conductors on the New York Central Railroad are bitterly complaining of a "spoon-engine, and the worst agreement, they allege, out of considerations of economy in money and time. The Utica *Herald-Dispatch* describes the system by saying that a plan is under consideration whereby the train employes' meals are to be condensed into the form of cartridges and fired into the open mouths of hungry men. Each employe's meal is to be condensed into the form of cartridges and fired into the open mouths of hungry men. Each employe's meal is to be condensed into the form of cartridges and fired into the open mouths of hungry men. Each employe's meal is to be condensed into the form of cartridges and fired into the open mouths of hungry men.

—Well, my dear, you needn't get angry about it," said Mrs. Spoopendyke, soothingly. "I only thought there might be some way they could make some arrangements about it. I think storm centers are horrid, and the observers in Manitoba must be very busy time. If he has to observe much in the winter he must be pretty frozen."

"How any human being know what you are thinking about?" raved Mr. Spoopendyke. "Do you suppose he goes around with a spyglass looking behind your head? Think he crawls around all night with a lantern hunting up storm centers? Got so idea that he runs around under the bed with a mirror, like a married woman I know of, and when he catches a center pulls him out by the leg and observes him? He don't do any sort of observing. He just sits and spend the evening with him, and gets them drunk and finds out what they're up to. Unfortunate I never did want is to whirl round twice and squat nights to be a weather vane."

"I didn't know that they did it," quoth Mrs. Spoopendyke meekly, "but I am now. I did Prohibitionists had been elected he couldn't have done that, and she should have been in a

"Why don't you understand it? I'll learn the indications every morning. How does the barometer rise and fall?"

"What would they get mad about?" demanded Mr. Spoopendyke. "You don't imagine that they all get together and fight it out, do you? They take the observations from different points and compare it, and they proved it out among themselves, too, and some are accordingly fond of animal food. The "sundew," a little plant that grows in low, wet places, and some are covered with a hairy fringe. At the end of each hair is a drop apparently of water, but really of extremely sticky secretion. An insect comes along and alights on the leaf, it sinks in the moisture, and the shining drop his doom is sealed. His struggles only sunken a closer

"Why don't you get to dwith it? Do you think a barometer is a political clasp?"

"No. But if the Democrats had been elected they would have to study it all around, wouldn't they? And the South would have got the best share. That's the way the Republicans—"

"Blast the Republicans! They've got no more to do with it than you have. You have got an idea that they throw the barometers and observers into one end of a spoon-engine, and the weather comes out of the other. They don't. They just observe, and the weather makes itself. It is the only self-supporting thing about the Government. And those signal men only watch it and tell what it's going to be."

"I suppose when these observers all get together and talk it over, that's called a storm-center, isn't it?"

"That's it!" shouted Mr. Spoopendyke. "You've got the weather now. Just as soon as your name painted on the handle and the spring broken by an umbrella. They don't talk it over; they don't all tell how they feel; it's fixed up in Washington. They agree on it there, and then they telegraph it all around everywhere. It is generally made in Manitoba and sent down here."

"How will it be?" asked Mrs. Spoopendyke, deeply interested. "Because if it isn't too big I should think they might stop it."

"Wife!" It's just a fool wife! Just a feet. Just about as wide as your head! Understand it? Yes, I'm just sleeping our combined barometer and observer both fell? Well, it doesn't. It hires a horse!" howled Mr. Spoopendyke, "and it's all I can do to stop it: Think it jaws the observations and indications are only an upper berth bed? Well, it don't. It hires a horse!" howled Mr. Spoopendyke, "and it's all I can do to stop it: to build a fence around it. There was some talk about burning the last one, but the wood was wet."

"Well, my dear, you needn't get angry about it," said Mrs. Spoopendyke, soothingly. "I only thought there might be some way they could make some arrangements about it. I think storm centers are horrid, and the observers in Manitoba must be very busy time. If he has to observe much in the winter he must be pretty frozen."

"How any human being know what you are thinking about?" raved Mr. Spoopendyke. "Do you suppose he goes around with a spyglass looking behind your head? Think he crawls around all night with a lantern hunting up storm centers? Got so idea that he runs around under the bed with a mirror, like a married woman I know of, and when he catches a center pulls him out by the leg and observes him? He don't do any sort of observing. He just sits and spend the evening with him, and gets them drunk and finds out what they're up to. Unfortunate I never did want is to whirl round twice and squat nights to be a weather vane."

"I didn't know that they did it," quoth Mrs. Spoopendyke meekly, "but I am now. If the Prohibitionists had been elected he couldn't have done that, and she should have been in a

An Honest Ballot and a Fair Count.

The Democratic bulldozers, Ku-Klux Klans, Red Shirts and White Leaguers of the South have continued the business of intimidating the black man until they have literally "run it into the ground." During the last fight at the head of Grant's Administration the Republican party in the South rapidly disappeared until six or eight reconstructed States that cast their Electoral votes for Grant in 1872, and sent a delegation to the peculiar branch of Congress composed of a hundred Republicans, turned over to Democrats again like a dog to his vomit. The South never has had an honest "count" for the Bourbon party except in the identical process resorted to by the white man to secure relief from the rule of the negro.

There was only one way to do it, and that they pursued. It was to suppress entirely the vote of the colored man. This was done by violence, ballot-box-stuffing, murder, cowardice, intimidation, and by all other means and methods that are usually grouped together under the general head of that which is known to the world as "bulldozing." The white Democrats of the South that they were opposed to them, and that they would control it in defiance of the wishes of the negro majority were colored. Hence, when Mr. Hayes was inaugurated the progress was very soon ceased and the energies of trade been adequately organized, the business in the commercial peculiarities of the Southern people," is safe, "think as the we, and have no affection for the Democracy nor other partisan faith that is not clearly subservient to our material development." Because a Republican Congress expressed unrest with emphasis for our rights, we have not and never will forget it. We are disposed in fee confidence in his disposition to prove an active factor in our growth. Southern men are weary of the bloody record of their political predecessors, and then somebody suggested that a respectable grave near by the dispute can be opened. This was done, and Brown conceded that the coffin was the one that had murdered his child. The stone has been removed.

—The village of Patchogue is the largest settlement on Long Island, and its original site was on a tract of land which was conveyed by the Indians to the first settlers resulting that a deed was made on the 17th of July, 1758, "the thirty-second year of the reign of Sovereign George the Second, by the grace of God, of Great Britain, France and Ireland, King, defender of the faith." The deed recites that Humphrey Avery, in 1756, obtained permission from the Governor, Council and General Assembly of the colony to dispose of the land which passed by the payment of his debts. The drawing was under the direction of two experienced surveyors, who, after completing the survey, put down a pipe in the ground and drew a map of the land. The deed was signed by Thomas Jones, Esq., and Mr. Joseph Sayre, and was duly witnessed and attested. This map seems impossible to be found, and it is feared that the thermometer is generally 103 degrees."

—A little son of Abraham May, of Miller Township, Blair County, Pa., was bitten by a copperhead snake a few days since. After biting, the reptile kept fastening and unfastening its fangs in the boy's legs, and it was only torn from his leg by the brave little brother of the boy, who, seizing it with his hands, released the sufferer and killed the snake. The boy's leg was greatly swollen, though the free flow of blood from the wound perhaps washed away much of the virus of the copperhead. The mountain remedies were employed, and at last accounts the lad was in a fair way of recovery.

—Horace Greeley's grave at Glasgow, Mo., received for nine years the most careful attentions, flowers being frequently planted on it, and the sod always kept in perfect order. Mr. Brown and Mrs. Elbert, each unknown to the other, were doing this work of love. Each had lost an infant, and supposed this was its grave. Both erected a handsome stone lately, and then a controversy arose. Mr. Elbert insisting that he must be taken down. The church authorities held several meetings of investigation, and finally decided that Greeley was the one buried there. The stone was then removed.

The Perpetual Candidate.

Men who decide the unquestionable ambition of Mr. Samuel J. Tilden obliquitation like no one who has the Presidential bee in his bonnet," as if once men did not have ambitions for place which are equally long-lived. Hardly any man was ever made a party ruler who had not been ambitious, having implanted in his breast an ambition which not only survives defeat, but which remains with him as long as he lives. Men who have been dismissed from office usually cherish the secret hope that they may some day be restored to power. Even the most miserable instances of ex-office holders long forever after their dismissal are imbued with feelings of the sincerest hatred toward their successors, although the men who have made their places entirely innocent of anything like an intrigue to secure the office to whom appointment has been made. We have all noticed in this moment an unofficial man who has descended from the high estate of being a cabinet minister to that of a simple Congressman, turned against his successor in office with a bitterness which is not only visible through the secret of his political opinions, but which finds vent in the most violent denunciation of the Administration which has succeeded his own. Men who have been dismissed from the ranks of Republicans, turned over to Democrats again like a dog to his vomit. The South never has had an honest "count" for the Bourbon party except in the identical process resorted to by the white man to secure relief from the rule of the negro.

There was only one way to do it, and that they pursued. It was to suppress entirely the vote of the colored man. MISCELLANEOUS.

Dr. J. Marshall's Catarrh Snuff

This Snuff is superior to anything yet known for removing the Catarrh, Cold in the head, and the Headache. It opens and purges out all stubborn Gums, strengthens the glands, and gives a healthy action to the parts affected. It should be used by everyone troubled with Catarrh, to effect the first cure, and prevent consumption.

Dr. J. Marshall

H. GORDLEY, PROPRIETOR.

Beware of Chas. Brown's Counterfeit.

All those wishing to purchase GENUINE Dr. J. Marshall's Aromatic Catarrh and Fragrance Snuff should purchase that of which Dr. Gordley is the proprietor, and no other, and thereby personally the full value of their money. Dr. Gordley is a Member of the Methodist Church, and I believe that he does not advertise my preparations by Dr. J. Marshall, and that his agency cannot be genuine. Dr. Gordley is a gentleman of the highest standing in this community.

Middlebury, Vt., Jan. 14, 1881. Judge Isaac Swift.

DR. JACKS

SANTONINE LOZENGES

Are a safe and effectual Remedy for Worms. All persons troubled with Worms should use them.

THE SENTINEL.

WILLARD A. SMITH, Editor and Proprietor.

CHARLEVOIX, . . . MICHIGAN

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

SECRETARY MANNING has decided that the Treasury cannot redeem mutilated coins of the United States, but warn silver pieces will be purchased as bullion at the value of the mine. Public officers are not expected to receive any coins so mutilated as to be unfit for circulation.

ATLANTIC steamers which arrived at New York on the 31st ult. brought $2,300,000 worth of gold bullion from Europe. The *Post Boy* cousin says that $6,000,000 worth of gold bullion was quietly shipped at Baltimore for New York on the 31st. The Sunbeam, bound for New York on the 31st, brings $350,000 in specie.

HE was exhumed on the 30th ult. that over 100 lives were lost in the vicinity of Savannah, Ga., during the recent terrible storm. It was in the Bonaventure cemetery on the 30th ult., filling three men and seriously injuring two others.

By the breaking of a ladder at a Philadelphia fire the other morning five firemen were fatally hurt.

By the explosion of a machine used in heating castings at the Whitmore screw manufactory, at New Haven, on the 30th ult., a small building was blown down and a dozen men were fatally burned and seven others injured.

W. F. DAILY WORK, the wheat king, says the yield in Dakota will average more than eighteen bushels per acre. He and his brother will have 30,000 acres in wheat.

The loss cloud hovering over the cattle-growing districts of New York and nearly every other state will be harvested.

AT Halifax the other evening Francis L. Fraser, J. Fitzhugh, and his wife died and then fatally shot himself.

GEORGE A. YORK, who was caught in the August wheat corner, and who managed a 300,000 bushel deal to the extent of 200,000, all of which the manipulators of the deal proposed to scoop in commissioned until in the meantime sold it at a handsome profit to recover his margins under the provisions of the State law in regard to "options, deals" and "futures." The court hereof a temporary injunction restraining the payment of the margins. Subsequently two other suits were begun by other parties to recover $9,000 and $9,000, respectively, which also have been settled and confessed.

THE village of Sterryville, Ohio, was destroyed by fire on the 30th ult., with a loss of about $80,000.

THE public-debt statement issued on the 1st makes the following exhibit: Total interest-bearing debt, $1,242,230,250, $2,950,-$2,950,-$2,950,-$

EDITOR AND PROPRIETOR.

Sayings From Baron--By Gunn.

Peace at last.

Tuesday was busy finishing. We have had time to time three terms, and but two members to husband or wheel per acre.

Found—A hand worse, which the owner can have by calling on A. W. Gunn, at Bonanza paying property and paying for this notice.

Marion Hite returned from the Traverse County Oddfellows' picnic, accompanied by his mother, who will remain for the winter.

P. D. S. Gibson, of Howell, was up Monday and Tuesday last on a visit to old friends.

There will be an examination of teachers and Sabbath Schools in the Court House Friday, the 23d inst.

Mr. Hosmer sold off 70 pounds of wool and 6 spreading of apples 90 bbl. one day last week.

The assessment roll of Bayne, completed, is $2,577, about $200 more than last year.

A land lecture on school matters and school property duties to the inexperienced trustees would have been a good thing. Some mistakes are made by the trustees of the school meetings, which should always be avoided.

The Manners of the Iroquois.

The order of Sachems and a council is supposed to the Iroquois who lived on the shores of the east end of Lake St. Louis. It was a council of 225 sachems, each of whom was elected by the feeling of his people in a council house in a village of the Iroquois. P. E. Hubert's fine pic[ture] of the Iroquois, for the purpose of [illegible] and the sachems were found in lumps, showing that some of Indian life have added to a museum there. The village sachems, the chieftainess and but 25 grouped the city of Sachems. Those not in the council, or even the members of South Carolina, and these peculiarly dark. Robes of bear's meat and in exhibition as well as adults, have been found. Over the huge grave-[illegible] grown up a place of nearly a foot's depth, where the march of improvement [illegible] down and very long ago. Tomahawks, several of some of the Knife, three of [illegible] being preserved by our finger [illegible] nearly every skull was [illegible] in as fine sale as if done by [illegible] Sachems.—St. Louis Republican.

Advance.

The [illegible] of [illegible] this week with a [illegible] and the [illegible] are being well [illegible] for the [illegible].

Mr. James Gourlie, a responsible and [illegible] business citizen of Wilmington, [illegible] has the News, who does it with [illegible] will continue to occupy the old [illegible].

Some Truth. Harvey sold out A. E. Hunt has traded his large and [illegible] ally well [illegible] year to Albert Sloan, of [illegible] town. After intends keeping the property till the people can comprehend it and appreciate. Mr. Smith is energetic [illegible] some, and upon a little encouragement as a settlement, may [illegible] in the last [illegible] ty to Grand Rapids.

Dr. Russell Dorr opened the Lake View Frontier recorder with a full load of [illegible]. He intends manufacturing lumber [illegible] of about the last assessment [illegible] in connection with [illegible].

Among H. Cook don't [illegible] as we re[illegible]. He is working a [illegible] for Thomas Judd on Charles Cull's [illegible], Grove, Nearly [illegible] Monday in [illegible] is [illegible] [illegible] [illegible]

MICHIGAN STATE NEWS.

The new law relative to furnishing subpœnas for deposition at the University and the school for industrial science was worked on well the three sets about one hundred cadavers in the new house growing yet.

Ike W. Hours, aged twenty-five, and resident at Charlotte, shot himself three times in the head while in the woods on the morning of the 5th. He died at one o'clock. He was the son of L. Hours, formerly Superintendent of Public Property at Lansing, now of Detroit. He was a young man of good habits and enviable social standing, and had lived in Charlotte three years, occupying a position in Dr. Frank Mortier's drug store.

Mrs. Peter J. Johnson, of Charlotte, who cut her throat with a butcher-knife on the 26, made another unsuccessful attempt at suicide on the 4th. A bottle of chloral was left within her reach, and she swallowed the whole contents. Shewas promptly pumped out and soon got over it.

The body of ex-Alderman Schulte, of Detroit, who disappeared from home on the 23, was found floating in the river at the foot of Twenty-third street on the morning of the 5th. He was identified by Frank Mortier, Mayor in the City council several years ago, but resigned shortly after and removed to Flint, where he remained but a short time, and then returned to Detroit. Mr. Schulte had left home under the influence of liquor, and had been addicted to drink. He was forty years of age.

Some of the Shiloh people at Hookgore are making a vigorous fight against building the new City Hall in that village, and have petitioned the Council and the Mayor to stop further work on the building.

A bad deal took place in Wisconsin Centre the other day at a depth of 120 feet.

The Michigan College of Medicine will graduate a class of 100 in the Opera House city of Detroit, on the plan of the public exhibitions of New York.

Two men named Smith and Brown were along the line of the ragiaw, Tuscola & Huron Railroad, between Saginaw and Schlossenger, last week, when the road-bed will be ready for tracklaying about the 20th of September. By the wonderful law of Michigan the grading through the swamps and marshes ground.

A man named Elliott, living near Fairwell, was killed the other night on Gerrard's bridge, over the Grand River. He was employed in repairing the track, and was standing on the track, when the 10:30 train run over him, cutting him almost in two.

Police Judge Harris of Grand Rapids was arraigned in the "B, the instance of Miss Hattie Hubbard, for an alleged breach of promise. The parties were held in bonds and Harris was required to give bail in the sum of $20,000. The Judge insists that he is the victim of blackmailers.

James W. Bendell, a life prisoner in the Detroit House of Correction, died of consumption on the 5th.

Dr. George Foster, an Alderman of Detroit, is dead.

Colonel Amos Soper, of Flinton, a survivor of the war of 1812, died at dinner on the 5th. He attended a new hotel on Tuesday previous.

The Ionia Stove Works, located at the south of the Ionia House, near Detroit, valued at $45,000, and employing seventy men, were swept away in fire on the 5th. The will be speedily rebuilt.

The city of Detroit has a balance of $291, 000 in the treasury.

A strike by the men employed by the Cleveland Mine was inaugurated on the morning of the 5th in which three companies participated, excepting those employed in the several engine-houses and machine-shops. About one hundred and fifty men are out. The rest, three hundred, abandoned their work, and in consideration of the other being in the city and tried to induce the men at the Lake Superior mines to join them and suspended in intimidating some. About fifty or sixty joined them, and these, with the foregoing men, visited the New Lake mine and compelled the men there to quit work.

At A. W. Wright & Co.'s salt block, Saginaw City, on the 5th, Fred Quackenbush a man at work in the engine was fatally overcome by the intense heat and fell into the boiling brine. He made a desperate effort to get out, but was caught between one of the steampipes and the side of the grating. Men, hearing the fall, came quickly to his relief, but was probably over fifteen minutes before he was extricated, when he was unconscious. The men's arms and legs were burned to be badly scalded. The right side of his flesh was burned and formed on the steam-pipe, and his back was somewhat injured. From the time the doctor reached him, ten hours and a half elapsed before he showed the slightest sign from the effects of the extreme heat. He never consulted consciousness, and died about one hour and a half after the accident.

Early on the morning of the 4th the plant of the paraffine house of the Lake Superior Powder Company, two miles northeast of Marquette, was blown up. There were fifty-seven men in the building at the time, all of whom besides were torn into fragments the average size of which were not larger than a man's hand. The building, which was a frame structure sixty-six feet and one-story high, was blown into splinters and scattered over an area of twenty-four acres. The shock of the explosion was felt a distance of eight miles, and buildings in Marquette were severely shaken. Of the several bodies part of one trunk only and about two pails full of remains were found. Fallowing is a list of the killed: John Reichelt, Joseph Reichelt, Jacob Smith, John Smith, Lewis Colley, Peter Lagalon, Alexander Sabuski, John Anus. No plausible theory of the cause of the explosion has been advanced, and as the men do not live who can tell it, the matter will never be known.

At Muskegon on the 7th John Ball, fifteen years old, while trying to put a bolt on a pulley at Truesdell's mill, with a file in his hand, met with a terrible death. The arm of a spoke struck the pole driving the spike and cut into the boy's breast, killing him instantly.

Quite a remarkable case of suicide occasionally occurred a few miles from Ithaca, Gratiot County. A man named Martin B. Walker lived on a small farm there. He was formerly a prosperous stock-raiser in California, but without years ago came east, and five years ago settled on the place of his last residence. Drink and gambling were his besetting sins. Finally he had pretty much all the little property remaining. Last June he went into a field, stripped himself of his clothes, set fire to a brush heap, placed a gun to his head and snapped it three times without discovering it, intending to kill himself and to allow his body to fall on the burning pile. On the day in question he carried the singular attempt to a successful issue either. He was found with the top of his head completely blown off, his body partly burned on a blazing heap of brush, which he kindled. He left letters announcing his determination, and express the cardinal lawlessness as to himself and warning children to avoid whisky.

Bears are reported numerous in the woods north of the saginaw.

In a recent attempt to arrest two burglars at Dowagiac, Sheriff Herriot was shot in the mouth, and his assistant was struck in the temple with a stone, which Twenty armed men were called for to aid in capturing the robbers.

The following are the Detroit wheat qualifications. No. 1 White, 31,000 bu.; No. 2 White, 21,4201 bu.; No. 2 Red, 4,1 bu.; 25,4[illegible]

Laws of General Interest.

The following was one of the laws passed by the last Legislature:

INSURANCE OF CHATTEL MORTGAGES.

Act No. 117, "to provide for the discharge of chattel mortgages," etc., declares that it any mortgagee or his personal representative neglect or refuse for the space of ten days after the conditions of the chattel mortgage, whether taken or assigned, have been performed, after the same be entirely due and payable, after a tender of the whole amount so due and payable, and a tender of the said charges of such mortgage, personal representative of the mortgagee, upon the space of seven days after being requested so to do in writing by the person interested, shall forfeit the sum of one dollar for each day he shall neglect or refuse to discharge the same, or to deliver up such chattel mortgage to the mortgagor after performance or tender, or to execute a discharge or release of the same, he shall be liable to the mortgagor in the sum of $20 damages, and for all actual damages occasioned thereby, and shall be liable to the person who shall perform the conditions of such mortgage, or make such tender, to be recovered from the mortgagee, in an action on the case, or be awarded by a court of equity upon a bill filed in presence of the mortgagor or release of such mortgagee, with double costs, in the discretion of the court.

Michigan M. E. Conference.

The Michigan M. E. Conference lately in session at Jackson was largely attended, and of course interesting. The following appointments were made by the Presiding Bishop:

Detroit District—H. F. Adams, P. E. Masonic, Isaac Crary; Fourth, Samuel Wilcox; Mariner, Thomas Cleland; Jamieson, J. Berry; Fort and Mexican, W. S. Henderson; Jefferson Avenue, Wm. Brown; Trinity, Wm. Bell; Mount Hilary, J. J. Hartley; Moore Street, Wm. Hicks; Ebenezer, Wm. Hicks; Ebenezer, Wm. Hicks; Ebenezer

MISCELLANEOUS.

This Snuff is superior to anything yet known for removing the Catarrh, Cold in the head, and the Headache. It opens and purges out all diseased, irritating matter glands, and gives a healthy action to reports affected. It should be kept in a cool, well-ventilated, Room previous to which the fac-simile signature of the inventor.

Dr. J. Marshall

H. C. GODSLEY, PROPRIETOR

Beware of "Dr. Brown's Counterfeit."

All those wishing to purchase the GENUINE Dr. J. Marshall's CATARRH SNUFF, or Dr. Hazeltine Snuff should purchase that of which H. C. Godsley is the proprietor, as I have sold out my interest in the Snuff and by no other manufacturer personally the Dr. J. Marshall.

I Certify, that the above article was tested in my presence by Dr. J. Marshall, and that his signature thereto is genuine.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

THE Commissioners of Indian Affairs at Washington received a dispatch on the 6th from Hilliard, of the San Carlos Agency, Arizona, that the Apache massacre was not nearly as bad as at first reported. Captain Brady and his men were with General Carr, he says, was not killed. General Mc-Dowell had telegraphed the Administration that Captain Brady and seven men were killed, and that Lieutenant Gordon was wounded in the attack on the fort. A dispatch received in Chicago on the same day by General Sheridan from General Pope, Santa Fe, N. M., was to the effect that lieutenant Carr and his command were all right. It however, confirmed the report of the loss of Captain Brady and ten men.

THE session commenced on the morning of the 7th was to the effect that the situation in the Apache country was regarded in Washington as very encouraging. At last accounts General Carr and his command were hotted up in Fort Apache, and Lieutenant Gardner against heavy odds, and the improvements were being formarded with all possible dispatch.

DURING the month of August 33,802 immigrants landed in New York, making the arrivals since January 1, 338,478.

A TERRIFIC deluge of rain poured down on Detroit and the surrounding country on the morning of the 8th. Two men and boys were drowned.

ADVICES from Utah, the heat was intense on the 7th. At four p. m. the thermometer marked 102. It was even hotter at the White House.

IN an attempt to operate on ill well, near Bradford, Pa., on the 7th, four men were blown by gas, and one of them, Jerome Donnelly killed, one fatally injured and two seriously hurt. The report was heard for seven miles. One of the victims was hurled three hundred feet, and his head and limbs were torn from the trunk. There was enough gas to fill from the exploding glycerine were not injured.

THE White River Utes are said to have finally consented to move upon the reservation recently selected for them in Utah.

A WASHINGTON dispatch of the 8th states that, owing to the numbers of recruits received by the army in the enlistment strength: the standard for artillery and infantry had been raised to 100 pounds, and 5 inches, weight 120 to 130 pounds; for cavalry, five feet four to five feet ten, with not to exceed 165 pounds. Recruiting for officers were being ordered to Arizona.

IT was believed on the 8th that the number of lives lost in Michigan in the recent forest fires was fully 500. A public meeting in Detroit subscribed $2,000 in money, and cars, and car-load of supplies was immediately started for the scene of the greatest destitution.

THE village of Lonesoming, Mil., was nearly destroyed by fire on the 7th. Forty-three stores and buildings were burned. Many families were rendered homeless, and the greatest excitement prevailed. A number of drunken insensitive on fire to the houses when they were aroused by the conflagration. Several persons were killed in their efforts to save their personal effects from the flames. The loss was about $500,000.

A GENERAL Washington special says that, although the returns had not all been tabulated, the officials of the General Land-office stated that the sales of public lands during the fiscal year 1881 exceeded the sales during any other year in the history of the Government. It was estimated that, owing to the continued extraordinary immigration, the transactions of the current fiscal year will equal, if not exceed, those of last year.

A TWENTY-MILE race took place on the fair-ground at Minneapolis on the 8th between Emma Sanford, of Minnesota, and Belle Cook, of California, the latter winning in 37 1-2 minutes. The disappointed Minnesota Divon dropped dead on the fifteenth mile.

UP to the close of business on the 9th there had been received for payment at the Treasury Department in Washington $6,-285,000 in five-per-cent. coupon bonds under the recent call, and $18,781,200 in registered five-per-cent. bonds under the same call.

THE New York Silk Manufacturing Company, whose factory is at Marion, N. J., has suspended payment, with liabilities of $250,000.

UNDER the direction of the United States Marshal, three stills and fifty barrels of illicit whisky were discovered at Fort Smith, Ark., on the 8th, each containing six gals.

THE name of a strong half-breed in Arizona informed the military authorities on the 9th that the hostile Indians numbered nine hundred. One party was watering the country between Fort Apache and the reservation, and that was the largest party. At Tonto Creek, and a third was marching through Pleasant Valley.

THE recent death of her husband made a maniac of Mrs. Benton Hammond, of Keansburg, Pa. Some neighbors saw her home on fire, and found her preparing to kill her four children with a hatchet and carving-knife. One of the victims was dying three hundred feet, and his head and limbs were torn from the trunk. There was enough to fill four from the exploding glycerine were not injured.

JOHN KIMBALL, a sweetmaker of Jamaica, L. I., killed his wife the other morning, then set fire to the tenement, and then hanged himself.

THE Chicago & Alton Railroad authorities do not believe that the passenger business is anything to do with the sweet timetable robbery.

NEAR Williamsburg, Va., on the 8th, Robert Williams and wife had a quarrel and Mrs. Williams applied for a warrant for her husband's arrest. When the constable arrived to execute the warrant, it was found that Williams and his wife had murdered and then decapitated him.

A PASSENGER train was wrecked on the night of the 8th on the Shelbyville branch of the Short Line Railroad, near Louisville, Ky., by running down an embankment. About a dozen persons were killed, and several seriously wounded. No one on board escaped injury.

Personal and Political.

MRS. MARGARET KANE recently died in Brooklyn, N. Y., at the advanced age of 105 years.

BISHOP SIMPSON, of the United States, delivered the opening sermon in the Ecumenical Council in London on the 7th.

GENERAL LEW WALLACE, the new United States Minister to Turkey, on the 7th presented his credentials to the Sultan, the ceremonies observable with President Garfield.

IN the Thomas trial in Chicago on the 7th Rev. Dr. Parkhurst presented sensational charges, setting forth that Dr. Thomas taught doctrines contrary to the Articles of Religion of the Methodist Church, contrary to the established standard of doctrines of said Church, and contrary to the belief of the Church. The charges were also accompanied by specifications in detail. Dr. Thomas replied to the charges and specifications, alleging misstatements, and that the charges were made for insufficient reasons. He pleaded not guilty to all the charges.

IT is said that Thomas A. Marvin, the much-married man who has so many aliases, and who was recently jailed at Richmond, Va., is none other than T. A. Merrill, who spent three years in the Auburn (N. Y.) Penitentiary for forgery committed on the National Bank of Lockport, N. Y. So far, no less than fifteen wives have turned up to testify against Marvin on the charge of bigamy.

ARCHBISHOP HENNI, of the Catholic Archdiocese of Milwaukee, died on the 7th after a protracted illness.

THE New York Democratic State Committee met in that city on the 8th, and decided to hold a State Convention at Saratoga, October 11.

THE Democratic Republican Convention, held at Harrisburg on the 8th, indorsed the administration of Governor Hoyt, and declared in favor of a tariff which will discriminate in favor of American industries, labor and products. The ticket which are rapidly passing Asiatics the controlling power in business, as it already controls the mining industry, and adds thought," expressed hearty accord with the Administration, and called for the defeat of Democratic candidates.

ADMIRAL PORTER, U. S. N., died on the 8

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

TO THE FARMERS OF MICHIGAN.

A Cry For Help

DETROIT, Sept. 19th, 1881.

Your reference to the area of the wheat-related regions of the State must be read to the Farmers of our State at once, without delay, to their utmost attention, their earnest attention of each and for the Fire Sufferers. A few days only will be required to send the home and lyng denials, and every their comfort food for the coming year. Don't wait for your neighbor, but let each one bring his offerings to Hall at the railroad station, and ship it on by first train to the Fire Relief Committee, Detroit, who will distribute it among the distressed farmers. All railroads leading to Detroit, M. C. R. R., A. N., Grand Trunk Lake Shore, Wabash, Canada Southern, will all, G. H. & M. have agreed to carry all contributions free of charge. Let every person put aside hands this various and will contribute himself a committee of one to push this noble charity to prompt completion. A committee who will receive from every agricultural community or of which is good condition, which are about to turn up the next wheat. Time is pressing. Act quickly.

A. C. Bellaire
J. W. Evans,
C. H. Warren,
Sub-Committee.

A extra fine line of boots and shoes by Upright, Emrey & Co.

South Arm.

J. C. Glass' sales of refrigerators are good.

Work on the saw mill is progressing finely.

Ephraim Wing is steadily recovering his health.

The busy hum of the threshing machine is heard in the land.

Skinner & Rappadeo's new meat market is doing a good business.

Jas. Dixon has been in town surveying out lots for John Nicholls.

John Sheppard has commenced to build a frame house on his farm.

Work on S. G. Lorraine's new store is to be rushed right forward.

C. W. Allen's new building is nearing completion. He talks of putting in a stock of goods.

Lombard's concert troupe gave an entertainment at Cole's Hall, and was well patronized. They showed all they advertised.

Thomas Morrison has gone to Ann Arbor to have an operation performed on one of his eyes. It is quite probable he will be obliged to have it taken out.

The new hotel at Bells Planing Mill is nearing completion. When finished it will be one of the finest houses in Charlevoix county, and an ornament to the locality.

Parties wishing to have a good time and put it to their advantage to call upon Phil. H. Lanway, South Arm, who will pass you from $100 to $5000. Time, five and ten years. Rate of interest small. Inquire application.

A number of our town people are dealing with the fakirs and sharpers. The Republican force is improving. Mr. Sanders is very low with [illegible]. Dr. Bennett is administering to her wants, and hopes are now entertained of her recovery.

Phil. H. Lanway, who has charge of a month term of school in the Todd district, has a few returns home. He wishes to tender his kindest remarks to the officers and patrons of said district, for their impartial courtesies extended toward him while in their midst. Quite.

CAPT. WAY has sold twenty-seven new chimes in the last few weeks.

Upright, Emrey & Co. now have the finest stock of clothing in Charlevoix county. Call and examine.

Marine Matters.

PRESIDENT JAMES A. GARFIELD.

President Arthur.

Gone from Us.

It is now time to the early part of August Postmaster Garfield made a will leaving all his property to his widow. The real estate that he owned is valued at only $1,500. This includes his dwelling house and a private residence in Washington.

The President spoke during the early part of his journey a number of times each day, but the present month to avoid several appointments have arisen other things. He has requested those seeking interviews to call at the office to keep away from the [illegible].

[illegible] Garfield [illegible] Mentor [illegible] [illegible] [illegible]

MEMORY.

This little picture from the pen of our late beloved Dwight, was written before his decease in Connecticut some twenty years ago. At that time poetry in the columns of a religious college was the "unpaid" labors of the editorial fair, but the writers are all but a prize more or less original, usually.

The boisterous night, the storm took brightly down,
Like the North, decked in the snow,
Sunlight glances at the window, seen in my own,
While I strive the theme to find, and what to say
And how well to express my every thought.

And found not nearly through her twilight morning
What now a tranquil note her spirit sings,
Her sweet melodies I am to unfold
The shadows shadow, and my memory dwells.

It has its sudden shocking, low and clear,
Its hushed and still, its sorrowful repose,
And yet its solemn, its depressing tone
Is thrilling to the heart, and we are moved
In Summer's sun those Upon the organ note,
Indeed in the ordinary light of natural things,
For there is a fullness of feeling in
I join its gentle sympathies with those
Who, in the darkness of the night, or their
Of their departed home, and yet in that land,
Where the sun is shining in the heavens,
The glad ways seeing the Deep not in
Of night's long sorrow, and found no
Of
As sad [illegible]
Breathed their sad wilson its tuneless hills
Where the [illegible] and all was hushed
In Summer's sun those Upon the organ note,
With clouds of various hues. Some dark and
Of
Surrounded with sorrow cast [illegible]
Upon the south [illegible]
Upon the flowers, roads are sunny days,
Not at the [illegible]
Upon the [illegible] and [illegible]
Upon the [illegible] and [illegible]
I [illegible]

Interesting News Compilation.

Domestic.

GOLD to the amount of $1,963,000 was received from Europe at New York on the 13th.

In consequence of the labor-riots in New Orleans, the Governor, on the 13th, placed the city under martial law, and ordered out two brigades of militia.

The Secretary of the Treasury has issued a circular regarding the attending physicians and the body authorities S.D.C. exhibited before there.

THE fate of the night of the 14th thumped. Prof. King's balloon to that extent that on the gas escaped, and the proposed trip to the sea coast was abandoned.

HANGING, N. Y., Jobs Hathorn stock sale in Wall street on the 15th at 3.

HARRY MORTAT, NC, charged with felony, while trying to shoot a bear, fell from a tree close to Portland in Iowa, sprang overboard and was drowned.

IN the monthly statement made on the 16th the Agricultural Bureau says the reports show a heavy decline in the condition of the cotton crop since the previous report, owing to the prolonged drought which prevailed in all sections of the cotton belt. The condition as reported is 72, a decrease of 10 per cent. during August, and is compared with the returns of the same date last year, 18 per cent. less. The general average condition of corn is 85, against 96 in July, being 17 per cent. lower than the month previous, and 21 per cent. lower than one year at the same date. From Missouri and Kansas some serious complaints of ravages by chinch bug, which were added to the prevailing drought. The Arkansas returns give a very serious decline in the prospect for the crop, being some 20 per cent. less than for the previous month. The average for the whole country was only 85, against 90 in August, and 94 for the same date last year. The reports of low condition are in almost every section of the country was drought.

THE Baltimore and Pennsylvania roads were selling 10 tickets from Chicago to Philadelphia, Baltimore and Washington on the 16th.

WHILE the races were in progress on the fair-grounds at Kansas City on the 16th the main hall was found to be in flames, and all of the exhibits were consumed in ashes. The loss is estimated at $80,000.

A LARGE number of the prominent citizens of Detroit have united in an appeal to the people of this country for aid for the sufferers by the recent forest fires in Michigan. The necessity of the case is strongly urged.

THE labor troubles in New Orleans ended on the 16th, both parties electing to some extent, and the operations of business again was withdrawn.

FORTUNE of Iowa, along the route of the Iron Island Road, were annoyed for two inches of snow on the 16th. The snowfall resulted into Nebraska.

A FEW days ago a colored woman named Campbell, residing near Hazelton, Ind., decapitated two of her children with a pine knife. After the murderess's lament had been held over a verdict of guilty, and the child's parents burned the murderess at the stake.

THIEVES recently forced the door of a room in the National Hotel at Washington, occupied by ex-Minister CROMBERRY, and took therefrom a gold watch, containing diamonds and jewelry valued at $6,000.

A BOILER explosion near Uniontown, Pa., on the 16th, and James McDonough was fatally scalded and four other persons were injured. The cause was the use of sulphur water during the drought.

A NEW lay over the Grey Little Western reached Gloucester, Mass., having made the round trip from Gloucester to London and back.

ON the night of the 15th a fire at Oswego, N. Y., burned twenty tenements and a large quantity of lumber, inflicting a loss estimated at $600,000.

THE Arkansas exported from the United States during the month of August were valued at $25,580,000, against $30,000,000 exported during the corresponding month of last year. The total value of the breadstuff exports for the eight months ended August 31 was $165,000,000, or $47,000,000 less than the value of the exports for the corresponding eight months of the preceding year. The number of bushels of wheat exported during August of this year was 10,000,000, against 21,000,000 bushels exported in August, 1880.

MRS. H. RAY, of Omaha, recently made $1,000 at the Nebraska State Fair by riding ten miles in seven minutes and thirty-four seconds. She used four horses, and made six changes.

AN appeal for aid for the sufferers by the recent forest fires in Michigan has been issued by Governor JEROME, as follows:

To the People of the United States:

Portions of the counties in the State, lying in the valley of the Saginaw, Au and Lake Huron, have been devastated by forest fires. A drought unprecedented in the severity of its character has prevailed for many weeks, and forests, fences, buildings, crops and fruit have been consumed. The destruction of property is very great, and many families have been rendered homeless and destitute. In some townships the loss is total. It is known that many lives have been lost, and it is feared that the number will be greatly increased. Many individuals have been burned to death in attempting to escape from the flames. The destruction of property is still going on, and unless relief is speedily afforded, many more families will be rendered destitute. I therefore respectfully call upon the people of the United States to contribute of their means to relieve the distress of the sufferers. Contributions may be sent to the Governor of the State, or to the Mayor of the city of Detroit, who will receive and distribute the same.

THE King and Queen of Italy formally opened the Geographical Congress at Venice on the 14th. M. de Lesseps delivered the inaugural address.

A RUSH (Ind.) dispatch of the 15th says that, on the preceding evening, Rev. Campbell, a tenant of St. Peter's Cathedral, in that city, was found in his room, dead. The publicity aspect Catholicism and embraced Methodism.

THE National Land League Convention is met in Dublin on the 15th and organized by electing Parnell as President.

PRINCE JEROME NAPOLEON has surrendered to his wife's wish. He shakes at Enghien and has gone, and departed for Constantinople.

THREE HUNDRED Russian nobles have organic changes under the name of the "Sacred Legion," and will establish a secret society in opposition to Nihilism.

THE representatives of Baron Stenbock, who were buried in the United States government to attend the Yorktown Centennial, were accepted with great courtesy and attention.

SIX officers of the German army were broken.

THE anniversary of Mentana independence was observed by the opening of public works throughout the Republic.

THE Government of Finland has consented to continue for three months the commercial treaty with England.

A REPORT prevailed in London on the 16th that Consul-General Waddington, of France, and other military commissioners to reorganize the Egyptian army.

THE Metrical Geological Conference, in session in London, has adopted resolutions recommending the adoption of the meter as a unit of measurement for all scientific purposes, and condemning any resort to war.

The President.

A PITTSBURG (Pa.) dispatch of the 13th reports Dr. Agnew as saying that he did not regard the President's case as by any means hopeless. He could not say positively that the President never had an abscess in the lung. It was usually a circumscribed inflammation resulting in the formation of abscesses. The President's pulse was 100, temperature, 98.6; respiration, 21. At noon the pulse was 104, temperature, 98.4; respiration, 21. At the evening dressing the pulse was 104, temperature, 99.6; respiration, 22. The surgical dressing was changed. Dr. Agnew said he considered that the President's condition exceeded a sensible increase of safety.

LATER NEWS.

ON the 15th the President was decidedly worse than on the preceding day. About eleven o'clock in the morning he was attacked by a chill, which lasted half an hour, and it was followed by a high pulse and heat, profuse perspiration and nausea. The pulse ranged from 120 to 130, temperature and respiration also rose greatly. In the afternoon he rallied somewhat, and the pulse fell. The temperature fell, however, below the normal point, and artificial means were resorted to before either material warmth. The patient's stomach became unable to assimilate nourishment in much. Then all hoped to escape and were willing to believe that the worst was over. The people did much preparation; they often packed their clothes for going home at the end of the week. They showed pictures about their farms; then revolved to fight. Boxes of fruit, bouquets and baskets of flowers were sent in. The sick man was to be carried to the cars, and he would not be left behind. Then, at 10 o'clock, he was taken with a fainting fit, and after an hour he had to be almost lifted from the bed. He was given brandy and milk, and carried his wife out on her bed, laid and put in a pail of fifteen drops the bed. Then he

BREVITIES.

The Grange at Ellsworth will meet this Thursday.

Miss Nettie Nowland is home on a two days visit.

Mrs. Barrington left for Chicago on Monday morning.

Mrs. Capt. W. C. Loomis, of Detroit, is visiting friends here

President Arthur.

General Chester A. Arthur was born in Franklin County, Vermont, October 5, 1830. He is descended on both sides of his family from Revolutionary heroes. His father was the Rev. Dr. Arthur, an Irish Presbyterian clergyman, who emigrated to this country from the county Antrim, Ireland, in his eighteenth year, and died October 27, 1875, in Newtonville, near Albany. Arthur soon in many respects a remarkable man. He acquired excellent learning not only in his native, but also in the domains of authorship. His wonderful talents were regarded by his world-over as one of the embellishes of English erudite literature. From both in boyhood he was a member of the Calvary Baptist Church

PRESIDENT CHESTER A. ARTHUR.

of New York City. He excelled his pupils of his own age in the classics, in mathematics, history, rhetoric and logic. Graduating at Union, Schenectady, Hamilton, Wm. Penn and New-London, he chose the profession of the law, and studied and graduated in the law of the celebrated Judge Dudley Field, of New York, and was admitted to the bar in 1854, with the rank of Major.

Shortly after he entered at Dalton College, and was graduated in the class of 1856. He then began the practice of his profession in this country, during two years in Yorkshire, and then returned to this city

President Arthur.

General Chester A. Arthur was born in Franklin County, Vermont, October 5, 1830. He is the eldest son of a family of two sons and five daughters. His father was the Rev. William Arthur, an Irish Presbyterian clergyman, who emigrated to this country from the county Armagh, Ireland, in his eighteenth year, and died suddenly, in 1875, in Newtonville, near Albany, his Arthur ancestry was for many generations a remarkable man. He preached without a stated charge, and supported himself and family, and never knew a day of idleness. He was a powerful and eloquent preacher, and never lacked a call. He was a thorough student of Hebrew, Greek and Latin, and was a profound theologian. From 1851 to 1857 he was pastor of the Dutch Reformed Church in West Troy, now Watervliet, and there Chester A. Arthur spent his youth and received his early education. He graduated at Union College, in Schenectady, in 1848, and then began to teach a district school in the country among the Green Mountains, where he remained for eight months. He then returned to Union College, and was graduated in 1848. After graduation he entered the law office of Erastus D. Culver, of Albany, as a student of law. He remained in the office of Mr. Culver for two years, and then went to the city of New York, where he entered the law office of Hon. Elliott Culver, brother of Erastus D. Culver, and was admitted to the bar in 1854. He began the practice of his profession in New York, where he has since resided. He married Miss Ellen Lewis Herndon, daughter of Captain William Herndon, of the United States Navy, who was lost at sea in the ill-fated steamer Central America, which foundered in a storm off the coast of South Carolina, September 12, 1857. Mrs. Arthur died January 12, 1880. Two children were born of this marriage, a son, William Lewis Herndon Arthur, who is now twenty-one years of age, and a daughter, Ellen Herndon Arthur, who is now nineteen years of age. Mrs. Arthur was a lady of rare personal beauty and graces of character, and her death was a severe affliction to her husband and children. Mr. Arthur's father-in-law was a gallant officer of the United States Navy, and was in command of the Norfolk Navy Yard at the time of the secession of Virginia. He was a native of Fredericksburg, Virginia, and was descended from the Washington family on his mother's side. He was a lineal descendant of Colonel William Washington, a distinguished officer of the Revolutionary War, who was a brother of General George Washington. Mrs. Arthur was a granddaughter of Colonel William Washington, and was born at the family homestead, Walnut Grove Plantation, on the James River, in Virginia. Mrs. Arthur was a lady of rare intellectual culture, and was a fine French scholar. She was a devout member of the Episcopal Church, and was a constant attendant upon the services of old St. Ann's Church, in Eleventh street, near Broadway, in New York City, where Dr. Morgan Dix officiates as rector. Mr. Arthur is a member of the same church, and his pew is next to that occupied by Mrs. Hamilton Fish, wife of ex-Secretary Fish. Mr. Arthur became Commissioner of Customs in New York in 1871, and was appointed by President Grant. He was confirmed by the Senate, and held the office for four years, when his term expired, consolidation being effected by act of Congress. He was then appointed Collector of the District of New York, which office he held for five

The Mourning for President Garfield

In the midst of mourning, the people are filled with profound amazement at the sublimity of the scene of grief enacted for the space of the late American Continent. The world has never witnessed anything like it. From the Penobscot to the Rio Grande from the prairies of Illinois to the coasts of Alaska there is heard but one voice, and that one voice of sorrow. The diversity of opinion that existed, and still exist, that has recently found expression between two political parties, in the death of a martyred President, for whom all Americans bow in humility, as the visible representative of the sovereign majesty of America. No land in the whole world has ever seen assembled at the same moment such words of praise to the best ruler of the land and the blessings of nations for his death most eulogistic of the virtues of a citizen, solemnity, solemn consecrated announcement of lofty purpose, of manhood, although a chief magistrate whose strength and support gentle dignity, and deep personal sympathy a bond as unanimous as it is universal. The upward struggle of the human race has never presented a spectacle more sublime in its dignity, peace and happiness, aspired lofted in the history of mankind. In the sacredness of mutilated corpses with the character of the nation's ideal. To the providence of the people, from the humblest of the north and old nations.

Has it not in America since beginning to be universal and profound? It has been from the land of liberty's sovereign the world. The globe is of encircling," says the Paris journal, the Debats. "Telegraphic dispatches one of all those parts of the globe which are allotted by the zone. Buckingham, from Tierra del the dominions of Canada, Australia of India, the citizens of republics, officers and commercial exchanges, the vice president of monarchy and commander in the supreme organs of public authority, testify to any heart of warmth and a selfless step in supreme sorrow, combine of a common race which no geological boundaries or separation of political arrangements can sunder. From the old English homestead of this late settler and land in the United the descendants of their country join in common the evidence that the greatest of the most remarkable characters since of sympathy ever witnessed in Europe. The bells of parish churches in England are tolled. A mourning flag floats over Manchester cathedral. The municipal bodies of Leeds, Liverpool, Hartlepool and other places, offer addresses of condolence. The great metropolitan journals drape their columns in mourning. The London stock exchange closes its doors. The Queen orders that the court go into mourning for President Garfield for a week from the 23d inst.

Says *The Liverpool Post*: The news has not in vain created where distributed and buried all distinctions. Verily, the proofs which come to us from every part of this land on the American people have by all discussions may from every corner of the earth where the genial Anglican family, or that of a common race revealed by a common sorrow, at the death but of the late President, are proofs that Garfield has not died in vain. His career as the effective person who personified the sovereignty of America was lost. But if in the grandeur of his character revealed in the lowest hours of his martyrdom does not have enough and thus which forces concur together in the unity of a common creed and a common obedience of a lumey the grandest and most majestic the world has produced, no history will be more than compensated for the greatness and loneliness of all others upon all the heights of that race.

The spectacle is a wonderful one. It arrests the inquiry why it is just the death of Garfield upon whom comes our great events combined with great names to shed lustre, as was the case with Washington and Lincoln, has brought together all men of the Anglo-Saxon lineage to have their discontent in the sentiments of a common sorrow. There is perception at least this: In the character of the man, and in the incidents of the struggle through which this character was developed, probably no better type of the resolute, self-reliant manhood which has ever been the most dominative characteristic of the American race has ever appeared. The race, from its first emergence in history, has been a race of individuals, overcoming the obstacles to existence by the force and practice of self-help. "Of all men, the Englishman stands forenost on the earth, says Emerson. And of all men, the Englishman has proven himself most capable of maintaining his standing by force — forecast in his nature. On whatever part of mankind he has placed his foot, he has kept it there. Whatever have been the obstacles in his way, he has overcome them. In the forests for existence, whatever the conditions, he has shown himself the master of them. He has not only conquered the material world with arms, but has filled the intellectual world with arms, laws will always assert not only his God-given but was due in vain, but that he had subjected a nature from the road to peace and distinction.

The Black Hills Times says: Crook has appointed with his consent, A. J. Plowman, business United States Commissioner. Mr. Plowman can be preliminary examinations in mortgage but, assuming how of the number of Spotted Tail, Defeat put several examination and disposition for the other side against the action of the General Grey. Crazy Dog has been at the Gilbert ass back to his people so we had expected to see. He carries an arrow point in his left hand that is several has a Pennsylvania connection. Crazy Dog was has been looking as if dealt out by nature as such an extent that it is wonderful and almost useless.

The present year will undoubtedly show as large an increase in the extension of the railroad system of the country as was over made. So far, 3,046 miles have been built, as against 2,000 miles for the latest [illegible] year.

Since the first of January last, over $40,000,000 gold has been received in this country from Europe, through the port of New York. This is more than twice as much was received in the corresponding period last year.

IF "MAKE NO MISTAKE!"

The New York Times, in speaking of President Arthur, makes mention of the fact that he is a member of the Masonic fraternity, and that he has been elected to the highest office in the gift of the people, anyway. And they made the three pieces of silver, the price of him that was valued, which the children of Israel did value, and gave them for the potter's field, as the land appointed was. These words are not found in Jeremiah, but in Zechariah, xi. 13. There is evidently an error in the old MSS., a mistake of some scribe. It seems a little remarkable that the revisers of the New Testament should not have corrected the inaccuracy of making the correction, but they have not. The error would have been very easy under the old discovered methods of Tacitus, and also as common copy, writers, and a correction in copies was the best would seem to be demanded. But whether of the first members anyway over, once mind, will make a new edition soon, and leave the error uncorrected.

It used to be a common thing for an old Quaker minority to be interviewed for news, but now-a-days interviews are so common in reference about their practices, as it was almost newest person in Chicago can get a prejudice who "the Rev. Dr. Talmage, of Chicago, is on his way to the prairies, and has decided to locate there." Now, it will be some time before Dr. Talmage will have time to locate anywhere, and when he does, it will be in some other direction than the prairies. Dr. Talmage is going to Europe to lecture, and will be absent from this country nearly three years. He intends to locate in Brooklyn after his return.

River Rappahannock, of the Rappahannock basin has arrived in New York. Upon learning of Garfield's death he expressed the most profound regret, and declared that he accepted no declarations or participation in social entertainment during his stay in this country, which will not exceed about ten or three weeks.

John Brown's the lucky recipient of Queen Victoria has had a house built for him by his masters at Balmoral. It has a [illegible] in the center of a lawn, the expense with a drive leading to it from one of the avenues.

After considerable expectation, he man who wants to go to Kansas here can find it is cheaper to go by way of Europe, Asia, and San Francisco. It takes more time but not so much money as the Kansas pedlers of Missouri demand.

Benton Stevenson, of Fenton, [illegible] running the [illegible] Brown's Carpet store, and [illegible] and Lace Curtains [illegible] purposes.

CHARLEVOIX, : : MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

The late President had an insurance of $25,000 on his life in the Equitable Assurance Company of New York, and further amounts were placed elsewhere.

Secretary Chase, a prominent and wealthy citizen of Hannibal, N. J., dropped dead on reading the news of the President's death.

The assassin Guiteau, when informed of the death of the President, said: "I am glad that his suffering is over; I am very sorry that I caused him so much suffering, because it was entirely outside of my intentions. I was directed by Deity to remove him, and I merely came to do it without inflicting pain."

INDICTMENTS for murder, larceny and assault were found against Marvin and Wells, who have been in jail at Richmond, Va.

THE Mountain Rolling Mill, the only rolling mill in Georgia, was destroyed by fire on the afternoon of the 21st. Loss, $150,000.

FOUR comets were visible on the 21st, the last one being observed at Harvard College on the morning of the 22d, and breathed his last.

THE tobacconists of Savannah, Ga., attack for the tariff on cheap cigars, and refused to permit laborers from other places who had come there to work to do so.

ARTHUR STERN, of Chicago, recently confessed to Police Captain O'Donnell that he had murdered with a handy pistol on the prairie, on the 23d his partner not implicated in the affair. The remains of the corpse to the officers. The remains of the corpse to the officers. The remains of the murdered, built a little earthwork of Lincoln the ground, built a little earthwork of Lincoln date, with a bullet-hole in the left temple. Stern states that they agreed to die together, but after seeing her blood he had not the nerve to kill himself.

A LARGE procession marched through the streets of Dogtown on the evening of the 19th with an effigy of Guiteau, which was hanged on a gibbet and then burned. A similar demonstration was made in Chicago.

A PETITION recently entered the house of Elbert Fossett, a banker of Tuscola, Ill., which contained the names of those who had successfully embezzled, but the order of the thing awoke Mrs. Fossett, who rushed to the parlor for a revolver and inflicted a mortal wound on the fellow as he escaped through the window.

GOVERNOR Jerome has issued a second appeal to the people of the United States for help for the sufferers from the burnt district, which he says he has visited the burnt district and traversed a large portion thereof, during the past week. The knowledge this obtained had satisfied him that the relief already given was hundreds of times more needed in the first few days thereof, and that the further extension of the fires has increased the number of the sufferers dependent upon the generosity of the public was not less than 50,000. He continues: "It is clear that the necessity for continued assistance to enable the sufferers to go through the coming winter and become self-sustaining is in no other district. The well-known generosity of the American people has never been invoked in a more meritorious cause."

BUSINESS was suspended in Chattanooga on the 22d at noon, all the city bells were tolled, and several thousands of people who were the blue and several thousands of those who wore the gray marched in line, and were marched in solemn procession through the streets to a hall where requisite services for the dead President were held. An immense flagstaff was erected on the top of a hill near the city. The Veterans formed around it. As the exercises of soldiers reached the hill the band played "Hail, Columbia," which was loudly cheered by the Union veterans. A flag draped in mourning was hoisted to the top of the staff and a Confederate flag draped in mourning was raised beside it. Major Lee, of the flag was being raised the band played "The Star Spangled Banner," and the crowd cheered enthusiastically. The band then played "Auld Lang Syne," "Dixie," and all present uncovered and bowed their heads.

A GREAT deal is yet prevalent on the Chicago Board of Trade on the 23d, the price being forced up to sixty-one cents, the highest point reached during the last six years.

THE French flagship Magicienne, the pioneer of the fleet detailed to take part in the Yorktown Centennial, arrived in New York on the 23d.

BOTH houses of the Georgia Legislature adopted a resolution on the 24th empowering the Governor to call out the militia to quell the Savannah riots. On the last day 1,000 men mustered into the service, and all had at least three times to be free to children and nurses. Savings bank accounts are to be opened for Sunday-school children.

A HUSBAND named Cheney, of Chesterville, Muskigon, on the night of the 25th, killing two men and wounding two million feet of timber.

THE wooden bridge of the Delaware River Railroad, 600 feet long and 80 feet above the water, was destroyed by fire on the 25th. Loss, $50,000; no insurance. The loss is $50,000, and its replacement will occupy six weeks.

Personal and Political.

PRESIDENT ARTHUR'S arrival at Long Branch on the 20th, accompanied by Secretaries Hunt and Blaine, was the occasion of hearing was unexceptionable, and he exhibited evidences of extreme sorrow at the Nation's loss. He attended services accompanying the funeral train to Washington, and expressed his deep sympathy for Mrs. Garfield. He subsequently called upon the latter, and then returned to spend train to New York.

THE trustees of Lake View Cemetery, Cleveland, have tendered Mrs. Garfield the choice of grounds for the burial place of the President. On her behalf Mr. J. Stanley Brown has accepted the offer.

DISTRICT ATTORNEY CORKHILL says the trial of Guiteau will take place in Washington, that there will be no difficulty in the matter, and we believe there will be no attempt at lynching.

A SUBSCRIPTION for the benefit of Sergeant Mason, who recently shot at the assassin Guiteau, has been started in Decatur, Ill., by Attorney-General Brewster.

THE Synod of Illinois, Presbyterian, convened at Long Branch on the 20th the following reply to the dispatch sent the night before by the Oddfellows of Decatur, Ill.: "We have addressed to all the members of the Oddfellows:

"I have your message announcing the death of Chester A. Arthur. Deeply do we sympathize with you in the bereavement of which you speak. Our prayers have been offered to Almighty God for the President, and for the family of the President, and for the family of the President, and for the family of

Charlevoix Sentinel.

CHARLEVOIX, OCTOBER 1, 1881.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

President Arthur proposes to make a visit, unofficial of course, to Yorktown. Mr. Garfield would have been glad to have lived

The Senator who is most likely to be chosen president pro tem of the senate at the coming special session is Bayard, of Delaware.

Fears are entertained that Mrs. Garfield will not withstand the terrible shock which has bereft her in the death of her beloved husband.

The order directing the court-martial of Sergeant Mason for shooting at Fort Sill has been promulgated by the president by General Hancock.

So far everything moves smoothly at Washington, and Dan Lamont has proven himself worthy of the trust reposed in him. But James A. Garfield is missed by Lamont.

It is said that the treatment of Guiteau in jail, the denying him the right to communicating with the friends and counsel he may have, the knowledge of which will give abundant ground for a continuance of his trial for preparation, and that the assassin will probably not be tried before until December. Counsel made in the District of Columbia cannot be appointed from the court in which they are tried but no change of venue can be given.

Texas was a touch at Independence on the occasion of the President's funeral, and in Mrs. Garfield. There are churches in all of them. One in Texas costs seven hundred dollars. Another in Washington a church is a cost in the Potomac Delta, and a marble in a grocery can church of small capital but they were associated with the late President in the confidence and spiritual affairs of the First Baptist Church that is splendid. They seem not to be the pall bearers of the President but the pall bearers of Brother Garfield.

Advices from Washington say everything to be learnt upon Irish authority, as to that Secretary Blaine has practically abdicated, and to retire from the cabinet with a short time. The reasons given are that "the association of the State Department and the position of its duties are now painful to him," because of the unpleasantness with the late President. There is no claim to know of Secretary Blaine's intention, say by express President Arthur to construct a new Cabinet, and really there ought to do so. Secretary Blaine has put a stop to the further consideration of the fine residence he was building, and the area and building materials are for sale, which looks as if he did not intend to abide in Washington in the future.

For fine groceries go to E. Sowden's store.

If you have a cold or cough or sore throat buy a bottle of Hill's Peerless Cough Syrup. Use it all if not satisfied return the empty bottle and I will refund your money. I also sell the Peerless Worm Specific on the same terms. Don't forget pay. DR. G. W. CROTTER.

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

THE STEEL AND COPPER PLANT, Pennsylvania, the principal subsisting establishment of the Society of Friends, was totally destroyed by fire on the 28th, involving a loss of $200,000. It was amply insured and will be rebuilt.

JOHN DAVIS, a substantial man who was bitten by a rabid dog some months ago in Chicago, was seized with hydrophobia of the most malignant type, and died in great agony on the 29th.

FIVE frame barns, shattered in Chicago on the 28th by lake storm to Buffalo at the rate of 12 miles per hour.

A PERSIAN goat from the Isle of Hope in Skidaway Island, off the Georgian coast, sprang a leak on the 28th, went to the bottom with 2,000 pounds rice, and almost immediately sunk. Of the crew of nine, only two survive perished.

PRESIDENT ARTHUR has ordered the removal of Postmaster Slade, of Deadwood, for confessed complicity with Star-route contractors and defrauding the government.

AT the regular quarterly meeting of the Western Union Telegraph Company, held on the 29th it was unanimously decided to advance the cash rate on mails to $5.75, subscription on the annual rate to $100, and to pay a dividend of 1½ per cent. This is in advance of 25 cents.

A DISPATCH to the telegram of the 25th says the legal authorities of Monmouth county had addressed the Attorney-General of the State and the Department of Justice of the United States upon the properriety of filing counter-bills before the Grand Jury of Monmouth county against counsel for the murder of President Garfield. It was held that the waiver of a demurrer by the Attorney-General does not deprive the Grand Jury of its power to find a counter-bill.

A GREAT sensation was caused in Washington on the 29th by unofficial further assassination. Two men were arrested while planning for and progressing President Arthur's murder, and on the person of one, Guiteau, confessed that the planning was only the vaporing of intoxicated moments and declared that there was no the slightest approbation of trouble.

THE DEATH, one of the gang who participated in the ridiculous outbreak that threatened Alliance (Ohio), was convicted of the offense on the 29th, and sentenced to twenty-five years imprisonment.

IT was stated on the 29th that the new disease, known as "gallicrene," among horses was confined to Cincinnati and vicinity in the south and Chicago. The disease began within a running at the ears, and its most serious symptom is a swelling of the tissue, then and careful treatment for a week or two shall generally bring the animal out of danger.

A PHILADELPHIA telegram of a recent date says still unsolved medicine are in the lesson from the United States Mint. No one side will be the sanction of capital, and on the other of Lincoln.

CAPTAIN HENRY MCCORMICK, of the steamer Caddo Belle, which plies between Columbus, Ga., and Mobile, Ala., counts on the other day by the pounding of his stateroom door. Awakened by the noise of the boat, he became aware of the presence of a burglar engaged in his nocturnal occupation.

AT a reunion of Missouri ex-Confederate soldiers at Moberly a few evenings ago resolutions were adopted expressing regret at the death of President Garfield, accepting as due to the acts of war as decided on the field of battle, and "deprecating the crime of the seeds of assassination in the land."

ORDERS: COMMITTEE, United States Attorney for the District of Columbia, has ordered a commission on the 29th ult. from Attorney-General Stockton, of New Jersey, in which the latter states he action will be taken in Guiteau's case by the authorities of that State.

A BOSTON (Mass.) dispatch of the 29th ult. announces the loss of the fishing schooner Gay Cunningham, with all on board. The crew numbered fourteen men and boys.

THE members of the New Orleans Board of Health have asked the Grand Jury to investigate charges of improper influences in sending paupers.

THE perpetrators of the Arkansas train-robbery have been lodged in jail at Hope, and have been fully identified. One was captured near Sulphur Rock, Texas, and the other two in the Indian Nations.

FRANK WOOD, a double-leading team-kidnaped and pugilistic wrestler, united a mine on the Fleetwood Bank on the 29th ult. in the unprecedented time of 7 2-5 seconds.

THE Treasury Department states that there are still outstanding over $21,585,000 in bonds on which interest has ceased, some of which should have been offered for redemption fifteen years ago.

IT HAS BEEN the value of the exports from the United States exceeded the value of the imports by $8,501,126. In the latter year ended August 31 the excess of exports was $167,000,000, a difference of $158 million during the year exceeded the expenses by $78,000,000.

DURING the three months ended September 25, last, there were 2,380 business failures in this country, with aggregate liabilities of $61,360,000. During the corresponding months last year there were 2,426 failures, with $43,000,000 of liabilities.

JOHN MADDOCK, of Newtown, Pa., went to see his wife, who was sleeping with her mother, Mrs. Reed, at Philadelphia, on the evening of the 30th ult. Maginnis avoided his wife for the interview. Him of the death of their child recently, and then shot her in the breast. Mrs. Reed followed Maginnis, who ran away after he shot his wife. He turned on his pursuer and fired two shots, killing her instantly. He was arrested after a desperate struggle.

AT Reidsville, N. C., on the 30th ult. Miss Jewett rode twenty miles in 45 minutes and 9 seconds—the best time on record.

PERRY THOMAS, of St. Clairsville, Ohio, recently attempted a balloon voyage from Wheeling, but the wind drove him ashore at a tree top and fell fifty feet to the ground, dying in a few minutes.

THE Ohio Central Coal Company has engaged 600 experienced Prussian miners to work in its coal mines.

THE Post-Office Department, finding the bonds given by Postmasters generally insufficient to protect the Government, recently ordered the execution of deposits at one hundred leading offices, to take effect October 1.

UP to the close of business on the 30th ult. 37,243,000 of five per cent. coupon bonds under the 1881 call, and $8,676,250 of five per cent. registered bonds under the 1881 call had been presented at the Treasury Department for payment.

THE total amount of United States currency outstanding on the 30th ult. was $882,-530,485. The outstanding National Bank notes aggregated $0,-759,295.

A VOTE of northern in the Cottonwood Valley in kansas, thirty miles long by four miles wide, was defeated by a system on the evening of the 29th ult. Twelve persons were known to have lost their lives, and several more reported missing.

On the 30th ult., in the face of a stiff gale, Lieut. Howell, in a small sailing canoe, made the Lonsdale to Block Island in 2:42.

FORTY-TWO National banks with an aggregate capital of $9,000,000 have been organized during the last six months.

A BLAZE on the 30th ult. destroyed most of the buildings in the towns of Hallinson and Stanton, Neb. In the former place two persons lost their lives, and in the latter twenty persons were more or less injured.

THE Treasury Department states that there are still outstanding over $21,585,000 in bonds on which interest has ceased, some of which should have been offered for redemption fifteen years ago.

DURING August the value of the exports from the United States exceeded the value of the imports by $8,501,126. In the latter year ended August 31 the excess of exports was $167,000,000, a difference of $158 million during the year exceeded the expenses by $78,000,000.

LATER NEWS.

S. H. BURTON, of Cincinnati, was cutting coupons from $12,000 in four-per-cents, bonds in a safety deposit vault in that city on the 1st, when three shrill female manias managed to secure two valuables and escape.

THE publication-statement issued on the 1st makes the following exhibit: Total debt outstanding interest of 1842,576; 42,935,-342,472. Cash in Treasury, $2,2,0,0,0,-1861, less amount in Treasury, $1,-285,-000,000. Decrease during September, $5,-685,641. Decrease since June 30, 1881, $41,-785,788.

WARRANTS were served at Washington on the 1st upon Hardy, Turner and Forsch, for their alleged complicity in the star-route frauds.

IN inspection of the abdominal viscera after the first incision came almost to the surface above the line of the umbilicus. At the lower angle of the wound the gall-bladder appeared in the form of a tense, pear-shaped tumor. The superior omentum covered the intestines and was drawn upward by the traction on the gall-bladder. The liver was not exposed. The intestines were of a healthy color, both on the surface and in section. The gall-bladder was tense and flabby, but contained no abnormal accumulation of bile. There were no adhesions between the liver and transverse colon as proved by forced attempts to separate them with the finger. The liver was of normal size and appearance, and its surface was smooth and free from nodules. The gall-bladder was then opened and explored with the finger. It was found to be empty, and its walls were not thickened. The cystic duct was dilated to the size of a lead pencil, and contained a small, round, movable calculus, which was easily pushed into the gall-bladder. The wound was then closed with silver sutures, and the usual dressing applied.

THE AUTOPSY.

Statement by the Surgeons of the Results of the Post-Mortem Examination of the Body of President Garfield.

PHILADELPHIA, October 1.

The October issue of the *American Journal of Medical Sciences* contains the following official report of the autopsy of President Garfield, prepared by the surgeons in charge:

The following is the Post-Mortem Examination of the body of President J. A. Garfield, made by Drs. D. W. Bliss, Frank H. Hamilton, Robert Reyburn, Edward Kershaw, Frank Baker, Edward Spitzka, Fordyce Barker, Joseph K. Barnes, U. S. A. Surgeon-General, and J. K. Barnes, U. S. Medical Director, assisted by Drs. Frank H. Hamilton, Jr., and Robert Reyburn, Jr., of New York, and Drs. Agnew and Gross, of Philadelphia.

Before commencing the examination some discussion was held by those present as to the question whether the ball, which was found to be lying in front of the spine, should be removed, or whether it should be left undisturbed. It was finally decided that the ball should not be disturbed, as it was evident that the wound had been thoroughly explored during life, and that the ball was lying in front of the spine, and was not in contact with any of the large blood-vessels. It was also decided that the ball should not be removed, as it had been done to wash it out during life. More especially as the wound (which had naturally been the case, but which had been increased by the surgeons during life) had commenced to granulate, and it was thought that the ball would become encysted, and therefore not probably cause death.

The autopsy was commenced by Dr. Bliss, assisted by Drs. Hamilton, Reyburn, Kershaw, Baker, Spitzka, Barker, Barnes, Gross and Agnew, at 9 A. M., September 20, 1881, in the presence of the family physician, Dr. Boynton, and the following members of the Cabinet: Messrs. Windom, Lincoln, Kirkwood, Hunt, Brewster and Blaine.

The external appearances of the body were first noted, and were as follows: Body that of a well-developed, well-nourished male, about five feet eight inches in height, and apparently about the age of fifty years. Rigor mortis well marked. Lividity of the posterior portions of the body well marked. Hair brown, slightly mixed with gray, and somewhat thin on the vertex. Eyes brown, and equal in size. Pupils contracted and equal. Nose, mouth and ears normal. Hands well formed, and nails of medium length. Feet well formed, and nails of medium length. Skin of a light brown color, and presenting numerous pigmented nevi. Over the sacrum there was a bed-sore, measuring about two inches in diameter, and involving the skin and subcutaneous tissue. Over the left trochanter major there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right trochanter major there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left heel there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right heel there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left malleolus there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right malleolus there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left elbow there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right elbow there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left shoulder there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right shoulder there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left hip there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right hip there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left knee there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right knee there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left ankle there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right ankle there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the left wrist there was a bed-sore, measuring about one inch in diameter, and involving the skin and subcutaneous tissue. Over the right wrist

Charlevoix Sentinel.

CHARLEVOIX, OCTOBER 1ST, 1881

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Vanner prophesies a Normalcy that will be remarkable for its beauty.

Weston has gone to work as a hostler for the Church of England temperance society.

Garfield's favorite hymn, "How Firm a Foundation," was sung at his own household in the way of Pre-Mosaical Hymn.

Palmer Gee Pullman is credited with the intention of getting a line of ocean steamers afloat between New York and Liverpool.

Jenny June reports the society thrill was done up and put away last fall, that Mr. Arthur will soon marry Mrs. Marshall O. Roberts of New York.

"Hit 'em off in fine grass" was the first salutation ex-President Hayes received at Cleveland, and it was a policeman who thus bade him welcome to the Forest city.

August Belmont and Fernelee members of his family spent the summer at the United States hotel at Saratoga, paying $1,000 a week for board. They received $20 a day for cards.

Fred. Douglass visited President Garfield in Jersey, while he was going to take a step forward, and said amongst ministers are only to colored missionaries, but to white ones as well.

The railroad conductors in Iowa have presented little Katy Shelly with a watch, the fob of which bears an engraving of the scene of her crossing the bridge, at the risk of her life, to stop the train.

The Illinois Free Press speaks of Mr. Tibbles as a failed man. If this was to be editorially explained, it would be said that Mr. Tibbles is like aggregate Dimocracy, which failed because it won't wash.

Ex-Governor Evans, of Colorado, having spent some years in a long trip, has nothing to do now, but to sit down and rake in money. Hence, he has built up three blind suits of $100,000 each, against the Denver Tribune.

Hartford reports eggs in that market at from 20 to 25 cents. Now eggs sell for 25c but eggs which age has mellowed and ripened so that they are brought out with cobwebs on the shells, are worth much more, of course.

Only 11 of Baltimore's defenders of 812 are left. The last one standard, and who was buried Friday, was Wm. C. Keyser, who boasted that he had lived under the administration of every President of the United States.

Mutilated coin goes hard in New York. The government takes it only as weight, and $100 united a room; sells $50. The brokers pay something more, but a coin with a hole in it is getting to be one of the most friendless things in the country.

Peter Henion is a much abused citizen of Newburg, N. Y. On being called up Friday, for sentence for a recent burglary, he asked the court to be merciful, as he had just got out of a 20 years' term in Auburn for a crime he had never committed.

London Truth says the Americans finding that the boxes in which American apples were sent in such large quantities to England were afterwards of little use, now pack the apples in rubbish, which fuel is made with. The Bemis puller is big enough to let this nip down without trouble.

Dr. Bliss has been suffering from a painful pus abscess on his right cheek, but an operation has relieved him somewhat. It will be remembered that during one of the illnesses of the President's wounds Dr. Bliss cut his finger—a wound that in newly-essee is frequently painful and often fatal.

Mr. Evarts says there is no loop hole in the law of the District of Columbia through which Guiteau can escape. Now if there are no loop holes in the law, a loop hole pendant under a cross-tree might be available to let him out of this world of sin. Don't give up the loop-holes; some of them may be useful yet.

The appearance of the comet on the night of the President's death has been largely commented upon. But there is nothing new under the sun. Shakespeare noted the popular superstition of his time in the lines: When beggars die there are no comets seen; the heavens themselves blaze forth the death of princes.

Gen. Lowry, the Democratic candidate for governor of Mississippi, is said to be a blonde, and as such, capable of blushing like a girl. It may have been that the modest blush spread over his fine face when, in a recent speech, he proclaimed that the Democrats of Mississippi were in favor of a free vote and a fair count. It may have been.

☞"MAKE NO MISTAKE!"

Bob Lincoln has been nominated on the next Republican ticket—but by Vice Presidents.

The state fair held at Jackson proved a success. The show of stock is said to be the finest ever made in Michigan.

The railroad ticket war has struck the west. Tickets can now be obtained to New York for $4 and to Boston for $6.

Mrs. Garfield received a tender and sympathetic letter from Queen Victoria, immediately after she received the news of the death of the President.

The largest boat on the great lakes is being built at Cleveland, Ohio. It is to be 550 feet 6 inches long, 56 feet 6 inches in beam, and 31 feet 6 inches in depth of hold, and to have a capacity of 6,000 tons.

The Nashville American states that Garfield's sufferings will depict love's dream what nothing else has done, subdue more the profound sympathy of the heroes of the south. It speaks of this calamity as "a reign of terror to every heart of the race, and adds as a fact highly creditable to the man who could inspire southern feminine instincts, long dead to the heat of any national chord, or for the north any sympathetic chord, with such a feeling."

Sergeant Mason's shot failed to hit the assassin Guiteau, and he still lives, to be dealt with by our laws or lawlessness. It is said that he (Guiteau) has recently expressed his confidence that the American people will give him a fair trial. Thank of it. Such a thief as he deserves he would not be likely to appreciate very much. The government is methodical and sure, and will have most actual terrors in it hoped, for the nefarious, potent culprit, Guiteau, than the sheer, swift vengeance of an over zealous mother of an excited populace can possibly conceive. It is to be hoped, however, that such a villain should be permitted to enjoy the light from even a window. He spent darkness, stale meat, and a daily flogging, with a heavy sandbag with steel knob, and about a dozen log rattle-snakes for company, punishment should be his portion during the remainder of his unusually. Ed.

President Arthur has summoned the Senate to convene Oct. 10, and that body will meet under most peculiar circumstances. Not only is there no vice-president to take the chair, and no president of the Senate pro tem., but there is no secretary to call the body to order, and that duty will have to be performed by the chief clerk. The late Senate, with Davis voting with the Democrats, and Malone with the Republicans, was a tie, and the committees were made up by the casting vote of the vice president. Since that time Conkling and Platt of New York resigned, nine Senators have been chosen in their places, whom it is thought will not be admitted until a president of the Senate is chosen. Senator Edmunds is dead. This leaves the Democrats 35 votes, and the Republicans 33. The probability is that the Democrats will select a president of the Senate from their own ranks, although a matter of right and justice should prevent any temporable man from doing anything that might reverse the verdict of the people in the exercise of their highest prerogative. Before the new Senators from New York and Rhode Island are admitted the Democrats will have a majority, and the officer elected president of the senate pro tem. in a certain contingency be called to act as president, and a Republican President having been chosen by the people of the several states last year, any person liable to be called upon to act in his place before his successor is regularly elected, ought to belong to that party. When the Republican members are admitted the Democrats will have no preponderance of strength, but will only stand on an equality with the Republicans. The Chicago Tribune and New York Times have faith to believe that Senator David Davis of Illinois will act with the latter, and give them the majority, if by so doing he can stave off the existing organization on to committees and the equity of power. Time is the arbiter. Provided Senator Davis is the selection of Judge Davis for president of the Senate.

FARMING LAND!

500,000 ACRES

—OF—

Michigan Lands

—FOR SALE BY THE—

G. R. & I. R. R. Company

50,000 Acres in Charlevoix County.

These lands are mixed with hard and maple, and are first class, and are accessible to local markets.

WATER AND RAIL,

We have a price for the whole, and also for health, and sell on 20 year time, or to the great fruit belt, and on 10 years time to actual settlers.

Our land grants a rebate of one-half of the freight on orders of 20 acres.

The land of Michigan is which these lands are located

NOT A WILDERNESS, BY ANY MEANS.

Population in 1870, 1,184,059 and 1,637,000 now, and is rapidly filling up with settlers from almost every State in the Union.

Over 200,000 acres of the lands of this grant have already been sold.

CHARLEVOIX MICH. OCTOBER 17 1881

WILLARD A. SMITH
EDITOR AND PROPRIETOR

South Arm Letter.

It continues to rain.

Chas. Williams has sold his house and lot to James Sloan.

Wm. A. Sloan has gone to Holly for a few weeks, to visit friends and to recruit his health.

Miss Jennie Bosman has also gone to Holly on a visit.

A new doctor by the name of Rumsey from Lansing, has been in town for a few days. He pronounces most every one he meets sick, gives them a dose of some kind of stuff and takes his "X" and goes on his way rejoicing. Most of the people pronounce them a humbug. Are they right?

Two of South Arm's promising youths, succeeded "once on the old question," and nearly met at a hop, we hear. One of them having two sticks which become stiff, and ventured out on the roof of the building, and which he ran to the other fellow, thinking it would be a good chance to have the thing all to himself, poked the ladder down and as it didn't seem to suit some how who were with, he would have been precipitated to the ground, and no doubtedly have been killed.

Mrs. Alice Ghent has rented the store in this village, where she will attend college for one year. She will be sorely missed by those who had her for a teacher.

The Monroe and Gans line agency is again, and it will be some time before it can be repaired.

Mrs. E. A. H. Co. has gone to Detroit, Ft. to visit friends.

F. M. Stevenson sends greetings from this place to Chicago and St. Louis.

W. H. Jacques raised seventy pounds this fall weighing 2 pounds and seven ounces each. Ouch.

PROGRAMME

Grand Traverse District Conference Of the M. E. Church.

To be held at Charlevoix, Tuesday Wednesday Thursday, October 18, 19, 20, 1881.

TUESDAY EVENING.

THE SENTINEL.
WILLARD A. SMITH, Editor and Proprietor.
CHARLEVOIX, : : MICHIGAN

NEWS SUMMARY.

Important Intelligence from All Parts.

Domestic.

THE thermometer marked thirty-five degrees in New York on the morning of the 5th.

THE French delegation invited to participate in the Yorktown centennial ceremonies reached New York on the 5th.

THE Treasury Department has doubled the amount of silver coins now coined from the price of the bullion they contain, and that they shall be paid for at the public at the rate prevailing for silver on the day they are presented.

THE International Cotton Exposition at Atlanta, Ga., was formally opened on the 5th, in the presence of seven thousand people.

COLONEL BERNARD overlooked a band of Christadora Indians in the vicinity of the South Pass in the Dragoon Mountains on the evening of the 4th. A fight ensued, and the Indians retreated across the mountains under cover of the darkness. One Indian was known to have been killed, and an Indian girl about eight years old, richly dressed, and supposed to be the chief's daughter, was made prisoner. Three soldiers (colored) were wounded.

FIRES and more or less disastrous conflagrations in various localities in New England on the morning of the 6th.

HENNAN the month of August, 1881, \$5,-850,948 worth of petroleum and petroleum products were exported from the country. Against \$8,886,360 worth exported during August, 1880. The value of the same class of goods exported during the first eight months of the year was \$70,182,250, against \$71,376,000 exported during the corresponding period of 1880.

A TERRIFIC storm of snow has prevailed in Platte County, Missouri, which is described by some as sleet, small-pox, and by others as the crystal that is to usher in the world's end before death, and instances are given of their bodies failing to please while being prepared for burial.

A FEW days ago an Erie oil train of fifty cars caught fire at Cuddy's siding, near what was River, near Port Jervis, N. Y. Fifteen cars in the rear were cut loose and drawn back across the bridge, where the tanks exploded and burned out, sealing over the telegraph wires.

IT is announced that Dr. Bliss will publish soon in a medical journal a full review of the case of the late President. He admits that his diagnosis was wrong, but contends that in view of the facts the making of surgery could offer nothing more for the comfort or recovery of the illustrious patient.

THE announcement was made on the 5th that Dr. Bliss, at the request of Mrs. Garfield, had consented to withhold from the public the statement of the autopsy which he had previously made, and as she is convinced that the President's wound was mortal, and that does not change by the controversy about the treatment subsequent.

MISS KATE KANE, a lady-lawyer of Milwaukee, has instituted a suit to recover $10,000 damages against the keeper of the jail in that city, because he has refused her the privilege of consulting with prisoners.

A MISSION of the Mormon Church near Grayson, Ky., caved in on the 5th, killing two converted laborers and injuring five others.

PERASEO, N. Y., was visited by a disastrous fire on the 6th, which destroyed the entire business portion of the town. The loss is over $250,000.

At the session of the National Farmers' Alliance in session on the farm of John D. James, of Kansas, was chosen President, and Mark Anderson, of Wisconsin, Vice-President.

THE thermometer in the suburbs of Washington on the morning of the 7th stood three degrees above zero, and ice was formed in many localities. The sudden change of temperature was unprecedented in Washington.

A LETTER was received by the United States Treasurer on the 6th from the President of a bank in South Carolina stating that the people of that State would not take silver certificates at current money, and asking if he could pay them out in checks of the United States disbursing officers. The Treasurer replies that the standard dollar, which is a full legal tender, could be offered, and the people who preferred the certificates could take their interest, saying that, in his experience, he found the certificates usually preferred to the dollar.

IN the 9th district of Georgia's canal of hostilities corresponded at San Carlos, and were taken to Fort Huachuca by Major Morrow. The latter was said in their correspondence with Geronimo to have promised the great Apache chief Mexican territory for his people if he would surrender. The soldiers (colored) were wounded.

FIRMIT and more than usual appearances in various localities in New England on the morning of the 6th.

CHARLEVOIX, OCTOBER 16, 1880

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

The Greenback paper at Kalamazoo called the *Mail*, has suspended publication

Mark Twain has written another book called "Prince and Pauper" and is to be published in London.

The ground was covered with snow in St. Lawrence county, Northern New York, Monday morning, Oct. 11th.

The Grand Jury on the 1st inst. returned an indictment against Guiteau for the murder of Garfield.

Kentucky has a whisky distillery in nearly every county. It is the home of Bourbon Whisky and a notable tobacco state.

Up to date the vote of New York has been counted as $\frac{1}{2}$ of 1% each for the other candidates, leaving Hancock and Garfield only 1 vote.

Of the 5 men the choice of the Electoral Commission at Senator Morgan had four, and a Garfield elector was found in Garfield was the 5th.

Still another Anarchist—in the English sense, Kenna D. Evans, now the Chicago Socialistic paper, and Tucker, Nineteen hours ago.

Mr Bayard the new President of the Senate is 53 years old from a family of Delaware and a descendant of the old fashioned aristocracy.

One of the Arkansas Democratic editors recently exchanged editorial with a Republican editor and Shot Him Dead. He has always been a hard case.

An exchange wants to know what it doesn't look right for Senator Morgan of the Senate, to pay a $5 fine and costs and send Cannon Ass't, Samuel, to the prison for 90.

Mr. Senator Cameron made very little good if any impression on the Democratic majority in the Senate Committee to whom his resolutions were referred, and they reported unanimously against them.

The recent sales and investments of the Atlantic Express Co. added over $5 to South Carolina. The Express Co. in Virginia and the Express Co. in the United States were increased by one hot Wednesday night.

One hundred families on the south shore of the Gulf of St. Lawrence, in Canada, are reported in a starving condition, recent leads from there having traveled over an area of hundreds of miles and swept off everything.

The Governors of the several States have been asked to commence subscriptions for the Garfield monumental fund, which now amounts to nearly $6000. Any person subscribing $1 or one cent will receive a handsomely engraved certificate.

At the next meeting of the Woman Suffrage Association Susan B. Anthony, it is stated, will offer a memorial, to be presented to Congress, for a change of the name of Pullman cars. She wants them to be called Pullman cars. Five dollars on specious and thin ones.

Some benevolent and intelligent lady in Bay City or vicinity sent to the sufferers in Red Ace a quilt the other day, the inside of which was filled with good clothing. On the op was sewed on some man at Where a pencil memorandum from 6 to 12 years of age. The quilt when opened was at once met out a goodly with eight children, ranging from 6 months to twelve years of age. This family had lost their all and taken refuge in the stable where the mother of these children was staying for her sick ne last she could in the really where the cattle had stood before she live. This crib was set down in the midst of the family and the process of unpacking commenced. At each fresh article of children's wear came out, the donor would have felicitated could she have had the chance of sight and seen the tears come down for joy. In the confusion could be heard the heartfelt "God Bless" of the mother for the unknown ever of these good things. We are not the sender of these things sixty sweeter, for the eight little c them d cannot of her.

Nearly 200 of the most prominent citizens of Washington signed a call for a public meeting to take measures for erecting a "Garfield Memorial Hospital" to be established in Washington and on the spot where the late President was stricken down. The result of the meeting is not fully known up to date, but the project is to establish a national and international hospital to be erected upon the site of the Baltimore and Potomac depot which is on a government reservation and is soon to be vacated by the railroad company. The crowned heads of Europe are to be invited to subscribe, and the United States Treasurer is to be the treasurer of the fund.

"MAKE NO MISTAKE!"

Nearly seventeen and a half millions of dollars reduction of the public debt in September is not a bad showing.

Another of the old Mormon leaders is dead. Orson Pratt, long noted as one of the late Brigham Young's earliest and most influential privates, died a few days since in Salt Lake City.

There is something touching in the fact that while the Democratic Statesmen, feeds the entire civilized world condemning him publicly and privately, his Secretary stands by him and feels no excuse for him in her belief in his honesty and innocent kiss.

Mrs Christiancy has recently been on the witness stand in her defence suit and if her statements are true the ex-judge, ex Senator, and ex Minister to Peru was a valiant man when in conflict with his wife. If she speaks the truth on two occasions he achieved a decided victory by knocking her down.

Rev. Dr. Thomas, of Chicago is a no genuine beauty. So says the Methodist Conference which tried him. The committee of 15, acting as a jury, returned a verdict of guilty Tuesday the 5th inst., which was confirmed by the Conference and thereupon the reverend gentleman was formally honored from their midst.

It is stated on good authority that Dr Boynton, at the request of Mrs Garfield, has consented to withhold from the public the statement of the autopsy which he has prepared. Mrs. Garfield says she is convinced that the President's wound was mortal, and the does not desire to have the controversy about his case continued. No good could come of such a course.

Dr. Thomas charges of prejudice and slander, preferred against Rev. Mr. Burkhurst, in the Rock River Conference lately, were referred to a special committee, which, after a brief deliberation, submitted a report fully exonerating Mr Burkhurst. That is no more than might have been expected. Mr. Burkhurst is one of the "unlisted," while Dr. Thomas is nothing but a heretic.

The United States Senate convened on the 10th, and the Democrats elected Senator Bayard President pro tem. of the Senate—which they were enabled to do by virtue of the New York and Rhode Island vacancies. The new Senators from these States were subsequently sworn in, and the Republicans promptly ousted Bayard and elected David Davis in his place. Should another Guiteau kill Arthur, Davis would be President of the United States.

A pleasant little story is told by a cousin of President Garfield about his school life. There was a spelling match in the little log school house, in which James, who was thirteen years old, took part. The teacher told her scholars that they whispers she would mark their words. The bad standing match in James became confused, and to help him James told him how to spell his word. The teacher saw this and said, "James you lose the rule. You must go home." James picked up his cap and left. In a few minutes he returned and took his place in the class. "Why, how is this, James? I told you to go home," said his teacher. "I know it, and I went home," said James.

Hon. Schuyler Colfax, after hearing in silence the brutal attacks of the New York Sun, repented himself of some during eight years less at last addressed a letter to the editor of that paper, replying in particular to its various allegations regarding Mr. Colfax's connection with the Credit Mobilier. In closing, the ex-Vice President says: "You speak of my valuing God to witness' and I am glad I can do so now, as in 1872, with a clear conscience and an honest heart. At that judgment bar, where we shall both appear, I can call God to witness that I never had a share of the Credit Mobilier, nor a dollar of its dividends, and that I never saw or even heard of the check for $1200 to S. C. or bearer, till the Credit Mobilier investigation four years after its date. Nor do I fear the sore set [illegible] of my Creator as to my truthfulness and integrity in this matter, about which I have been so hilarity and so persistently assailed by you month after month, and year after year for the past eight years."

Electrical Curiosities at the Paris Exhibition.

Ever since M. Gramme introduced his beautiful machine for generating the electric current his principle has been subjected to a host of minor inventions. Shortly after ward a new valine of the machine was found. A well remembered, in fact, forming from a municipal absence from England. I had occasion to write to the Professor (Clerk Maxwell, and incidentally asked him what was the greatest discovery of his years. The second coat, in his opinion, the greatest discovery was "that a Gramme machine could be reversed"—i.e., that when a current was passed through the machine it might be used to drive machinery. The belief of the Professor was shared by many others, and hundreds of pamphlets have since been engaged in applying this new idea to the electrical transmission of power by means of the small dynamo machine, sets it in rotation, and by a chain connection this motion is geared to the axles of the wheels. The velocity of rotation is reduced to one-third by the gearing. The chain carries motions are all on one side in the case of both axles. There is also a simple arrangement supplied for taking the current directly from the rails, but it must be very exact, or the machine could be utilized on a tramway, and at present it is doubtful if the speed advance of the car is very handsome, and shows few external signs of the power which may be generated within it. Such a car might be fitted with the secondary batteries of M. Faure, which might be placed under the seats. The car would be then self-contained, and there would be no necessity for having either the central wire or the connection through the rails. Such a scheme is almost car was actually constructed and tried in Paris some months ago, but serious difficulties were then encountered, which, however, I have reason to believe will soon be overcome, and then we shall have an opportunity of seeing a car running on a tramway self-carrying its own electrical source of power.

In the electric brake of M. Achard, applied to railway carriages, there are upon the axle of each pair of wheels two rings of iron, about eight inches in diameter and two inches wide. Besides this there is a second and independent axle with two rings, one foot in diameter, facing the rings on the wheel axle. These rings, however, are the two extremities of a powerful electro-magnet, which can be excited by a coil of wire, the ends of which can be connected with the engine-driver's post in the locomotive by means of two pairs of strong copper strings. So long as there is no current passing the independent axle continues a fixed position, and the brake is kept away from the wheels by strong metal springs. So soon, however, as the current is allowed to pass the rings act as the two ends of the independent axle are converted into opposite poles, which attract the revolving rings on the axle of the wheel, from which they are separated by only one-eighth of an inch. The so-called residual force of the rings produces a rough friction on the poles of the electro-magnet. The independent axle revolves and winds up a chain which is connected by levers with the brake, so that in a short time a power of full force is applied. A simple form of variable resistance is supplied in the locomotive, so that the engine-driver has merely to turn a wheel more or less to increase or diminish the power of the brake.

A most interesting application of electricity to motive power is seen in the plowing machines of the late M. Menier, exhibited by M. Felix, which do the work of almost eighteen horses. In these are employed a pair of the large form of Gramme machine, which is the first made for them, but which have since become the usual form for Gramme motors. The ring armature has four poles, opposite which are the poles of the fixed magnets, each fed by two arms, giving somewhat the appearance of a square with four sides prolonged each way, and inclosing a circle. All the eight arms are connected by an octagonal framework of a very solid form, forming part of the field magnets. This is undoubtedly the most compact form of Gramme machine which has been made. This machine is at one end of the electrical locomotive, at the other end is the gear for directing the motion and the gear for driving the motion forward in the field to be plowed, or for stopping it and putting in action the machinery for winding up the large coil of wire rope, which coil is in the middle of the engine. The wheels are, of course, wide, like those of a traction engine, so as to be able to pass over plowed land. The engine is so strong as to bring stationed at each end of the field, with a triple-barrel reversable pump between them. The electric contact is made, the Gramme machine revolves rapidly, and winds up the wire, and so draws the plow-share along. When the plow has reached the end of a furrow the engine attendant has a step in gearing the Gramme machine to the proper position, and the plow is lifted so as to bring three other shares into action, and the engine at the other end of the field pulls it in the reverse way.—*London Civil Engineer and Public Works Review.*

He Wanted a Notice.

"Are you the editor?" said a man, who was evidently laboring under a disordered mind, as he took a seat in our office.

We acknowledged that at present we were of and instructed the public in that connection, and to prove our assertion showed him our business desk on our counter, our pencil behind our ear, our inkstand, and other paraphernalia never that pertains to the world.

"Well, I want you to surprise me with a flattering personal notice in your paper. I'm going to run for county treasurer on the Eight Ward ticket. I want something neat in the way of a send-off."

"Our columns are always open to advance the best interests of the public, but we feel bound to say that we are surprise us with a pecuniary compensation sufficient for publication, but merely as a pledge of good faith."

"I'll pay. A man can't expect to be surprised without paying for it in advance. What have you got?"

We can accommodate you with almost any kind of personal notice from a cheap and short-lived biography to an enlightened carol contents, and at prices varying according to the size of the stone or our columns and venerity in meeting notice opinion as only competitors. Now, what would you like this? It is a neat little pen-light, office gossip, and will cost you only $2.50."

"Never mind, I'll run it myself. I'll have it printed before being sent to the office. He is subject to fits, and has had several attacks since he was born. He has a peculiar, drawling, monotonous voice, and is far from being level headed, and when not feeling well sometimes makes mistakes, although very rarely.—*Syracuse (N. Y.) Herald.*

—When a man told his wife that he all had just traded for a new spring wagon, she replied: "You dunno, you! why did you get a spring wagon in the fall of

SCHOOL AND CHURCH.

—Nearly twenty thousand of the public-school children of St. Louis have entered upon the study of German.

—The Methodist college has been established at Fort Worth, Texas, under the auspices of the Texas Western Conference.

—There are 216 professors at the University of Berlin, Germany, and during the past year their lectures were attended by 5,027 persons.

—The Louisiana State University at Baton Rouge is offering special technical instruction to young men preparing for the life of a planter or plantation mechanic.

—"There are Christian families," says the examining committee of the Boston Public Library, in its last annual report, "in which the Old Testament is a forbidden book to the young."

—The Educational Department of England is nearly engaged in officially examining the industrial schools on the Continent, and will prepare and publish an exhaustive report upon the results of the investigation.

—The school system of the Chickasaw Nation is unequaled by that of any other of the Five Nations. There are four principal academies in the Nation besides that of the orphanage, the highest on which alone amounts to $7,000 per annum.

—The Government of Liberia has given two hundred acres of land for the foundation of a seminary for colored youth. Mrs. Margaretta Scott has gone to Liberia to begin the work. She carries with her $2,000 for a commencement and a charter from the State of Maryland, and an annual endowment of $500.

—The French Government has organized a commission to collect specimens of beauty in the young. Its President proposes to enroll several hundreds of girls, and to have their photographs taken by the best photographers. The heads of the leading colleges will beautiful young girls, who will supply the models of the boys with repetitions and helpful gravures of the best masters. The collection is also to embrace the best figures in all the furniture.

—The five Canadian churches are to be combined overleaf. Within arrears of little more than half a square mile, Montreal has a cathedral and Roman Catholic, with a seat for 4,000 persons. The resident population with the city proper is 107,000, and the attendance at all the churches including an English Cathedral, is 12,000. Plans are proposed to retain only twelve of these churches, and to sell the three on the ground now occupied by them. It is expected at least 21,000 sites will be realized, a part of the money to be expended in the erection of fifty other churches in the more remote parts of the town and its suburbs.

PUNGENT PARAGRAPHS.

For Young Readers.

WILLIE'S MOTTOES.

Once in my sleep—and blood days,
A mother said to Willie,
Who gave her leg the rarest gossip
She asked him: Dearie and Tom,
Heaven set choose some at play,
And I'll be happy to see you,
His eyes, dark to be, and every day
Before we'll see dearie.

He was so quiet, fair and still,
So very, very good,
That God, I know, must love the child,
And choose his comin soon.

Here lose the truth and follow it,
Our mother often said,
And always do the right,
And we shall be happy.

And very dearie to the night,
Our mother used to say,
These are the mottoes we must live by,
And then we'll see dearie.

And this is why she'll see him so
Ill wait, so very long,
And thinks how sad I am without him.

Years after I felt that all I asked from
But I have seen it was
Because I did not follow
The mother—Heaven and Willie.

—*Gentleman Boys.*

WHAT BETTY DID.

Little Betty Grey trudged along the streets of Rockville with a basket on her arm. The basket was full of sweetness for sale. The clock was just striking six. "I'm glad it's six o'clock," said Betty, "for then I can go home to supper."

The Governor of Liberia has given two hundred acres of land for the foundation of a seminary for colored youth. Mrs. Margaretta Scott has gone to Liberia to begin the work. She carries with her $2,000 for a commencement and a charter from the State of Maryland, and an annual endowment of $500.

The French Government has organized a commission to collect specimens of beauty in the young. Its President proposes to enroll several hundreds of girls, and to have their photographs taken by the best photographers. The heads of the leading colleges will beautiful young girls, who will supply the models of the boys with repetitions and helpful gravures of the best masters. The collection is also to embrace the best figures in all the furniture.

Although but twelve years of age, Betty was doing her life-work, for she was admired the solid support of an invalid mother and little sister, who for mother had been a great sufferer from heart-disease for many years, and there was no one to help them but Betty. She was the housekeeper, for you must know that Betty's mother and her children lived in a few rooms in one corner of a large building, which was simply given to them by the owner, because he knew that Betty's mother had formerly been in better circumstances, and was trying to help herself.

Now, you will wonder, my young friends, how a seven-year-old child ever got into trouble. Well, the fact is that Betty could go for the dear ones she was supporting, and on her way she had conversed an idea that was worth, if not more, at least more than all the money she had earned on the sidewalk. And the baby girl felt very much ashamed of herself when she got to this part of her story.

Last week Joseph Jones dwelt on reckless path for some time, and then he began to do something for himself. He had long lists of names. How he did wish that the time would come for him to go to the spelling-school! Would his sister's praises ever equal those that she lavished upon Jim? Jim was a natural speller, he declared, but he was determined to learn that art, and he studied and studied, and prepared. Week before last the time for the spelling-school arrived. Joseph was there, and he was there. He had the satisfaction of hearing his name called first, and he knew that he was to be the last one standing. Finally the mistress said: "Joseph Jones, spell *Constantinople*." Joseph spelled it correctly, and then the mistress said: "Jim Jones, spell *Constantinople*." Jim spelled it correctly, and then

TERMS OF COURT
Four each year.

MORTGAGE SALE

Default having been made in the conditions of a mortgage executed by Wm. Bennett and Mary Bennett, his wife, of Charlevoix, Charlevoix county, Michigan, to Wm. Bennett, of Charlevoix, Charlevoix county, Michigan, dated the 1st day of March, A. D. 1880, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 1st day of March, A. D. 1880, in liber 10 of mortgages, on page 10, on which mortgage there is claimed to be due at the date of this notice the sum of Two Hundred and Fifty-seven Dollars and Fifty-seven Cents, and no suit or proceeding having been instituted to recover the same or any part thereof; Notice is hereby given that by virtue of the power of sale contained in said mortgage, and the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in said mortgage, viz: The south half of the north-west quarter of section number twenty-five, in township number thirty-four north of range number seven west, containing eighty acres of land, more or less, according to the United States survey thereof, at public auction, to the highest bidder, at the front door of the Court House in the village of Charlevoix, in said county of Charlevoix, on the 15th day of October, A. D. 1881, at 10 o'clock in the forenoon of that day, subject to redemption as provided by law.
Dated, Charlevoix, Mich., July 15th, 1881.
WILLARD A. SMITH,
Attorney for Mortgagee.

ANOTHER FIRE HORROR.

PHILADELPHIA, October 15.

A fire broke out at Lauderbaugh's mill this morning, and before it was discovered by the inmates it had spread to the second floor, and spread through the building with amazing rapidity. About forty-six hands, twenty of whom were girls, were at work on this floor, and the majority were engaged in the spinning and weaving department on the upper floors. The wooden stairways at either end of the building were combustible. The bridge connecting the building with another mill was the only means of egress from the second floor, and this was soon enveloped in flames. A panic ensued among the men and women employed in the building. They rushed in the direction of the bridge, but were driven back by the crowd below to save them. It was impossible to get down. The flames spread with fearful rapidity, and in fact seemed to be almost simultaneous with the discovery of the fire. The majority of the unfortunates were compelled to remain in the building, and perished in the flames. Those who were employed on the lower floors escaped with but little difficulty. The scene was one of the most heartrending character. Many of the unfortunates were burned to death before the eyes of their friends, who were powerless to render them assistance. The building was entirely consumed, and the walls fell in, burying the remains of the victims in the ruins. The loss is estimated at $100,000. The building was owned by Mr. Lauderbaugh, and was occupied by him and Messrs. Hall & Keighley. The latter gentlemen had a large amount of valuable machinery in the building, which was entirely destroyed. The loss will fall heavily upon the operatives, as many of them had their entire wardrobes in the building, which was entirely consumed. The building was insured for $40,000.

A Speech by Mahone in New York.

Senator Mahone recently addressed the Union League Club in New York upon the issues involved in the Virginia election. After being introduced, he said:

I may have brought to conform to you the whole extent of the issues which are presented in the campaign now in progress in Virginia. Those issues are not confined to the limits of the State. They are national in their character, and the people of Virginia feel and appreciate the importance of the struggle in which they are engaged, not only for the maintenance of the principles which underlie the foundation of the State, but for the preservation of the Union. We are living in the midst of a political revolution, which has for its object the subjugation of the people of the South to the political control of the North. Without any effort under its present leadership to conceal its purpose, the Republican party has openly declared its intention to control the South by the force of the bayonet. The country is aware of the fact that the Democratic party of the South has been overthrown in every State by the use of the military power of the United States. The people of Virginia have resisted this encroachment upon their liberties, and have successfully maintained their rights in the State of Virginia. We are now in the midst of a struggle which is to determine whether the people of Virginia shall be permitted to govern themselves, or whether they shall be governed by the bayonet. This is the issue in the election of the State ticket, and it is the issue in the election of members of the legislature, on which will depend the election of a United States Senator. We have been charged with the commission of fraud in the election of 1879, and with the use of violence and intimidation. We have been charged with the commission of fraud in the election of 1880, and with the use of violence and intimidation. We have been charged with the commission of fraud in the election of 1881, and with the use of violence and intimidation. We have been charged with the commission of fraud in the election of

Personal and Political.

THE NEW YORK Democratic State Convention met at Albany on the 18th. Its first act was the unanimous refusal to admit either the Tammany or Irving Hall delegations. Frederic Bancroft was elected temporary chairman. Both factions appealed to the committee on credentials. Mr. Bancroft was elected permanent chairman over Mr. Hill's candidate, Mr. Sheehan, by a vote of 207 to 201. Mr. Bancroft, in taking the chair, said he would not be a party to any bolt. He would not be a party to any attempt to disrupt the party. He would not be a party to any attempt to disrupt the party. He would not be a party to any attempt to disrupt the party

Editorial correspondence.

I left at the Northern depot last Tuesday morning, and reached Detroit at 2 P. M. I spent the time in the parlor car, and enjoyed the ride very much. The country is looking finely, and presented a charming scene to those who love to look upon the beauties and prospects of the Natural Garden.

I arrived in Detroit in time to take dinner at the Russell House, and then went to the Opera House, where I met a number of the members of the Legislature, and a few others from the Peninsula. I had a very pleasant time, and enjoyed the entertainment very much.

I left Detroit on the night train, and reached Washington City on the morning of the 27th. I found the weather very pleasant, and the streets and avenues of the city were thronged with people. The hotels were all crowded, and I had to go to a private boarding house to get accommodations. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Washington City on the night train, and reached Baltimore on the morning of the 28th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Baltimore on the night train, and reached Philadelphia on the morning of the 29th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Philadelphia on the night train, and reached New York on the morning of the 30th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left New York on the night train, and reached Boston on the morning of the 31st. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Boston on the night train, and reached Portland on the morning of the 1st. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Portland on the night train, and reached Bangor on the morning of the 2nd. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Bangor on the night train, and reached Augusta on the morning of the 3rd. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Augusta on the night train, and reached Concord on the morning of the 4th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Concord on the night train, and reached Manchester on the morning of the 5th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Manchester on the night train, and reached Nashua on the morning of the 6th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Nashua on the night train, and reached Lowell on the morning of the 7th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Lowell on the night train, and reached Lawrence on the morning of the 8th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Lawrence on the night train, and reached Haverhill on the morning of the 9th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Haverhill on the night train, and reached Newburyport on the morning of the 10th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Newburyport on the night train, and reached Salem on the morning of the 11th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Salem on the night train, and reached Lynn on the morning of the 12th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Lynn on the night train, and reached Boston on the morning of the 13th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Boston on the night train, and reached Providence on the morning of the 14th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Providence on the night train, and reached Newport on the morning of the 15th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Newport on the night train, and reached New Haven on the morning of the 16th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left New Haven on the night train, and reached Hartford on the morning of the 17th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Hartford on the night train, and reached Springfield on the morning of the 18th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Springfield on the night train, and reached Worcester on the morning of the 19th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Worcester on the night train, and reached Boston on the morning of the 20th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Boston on the night train, and reached Providence on the morning of the 21st. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Providence on the night train, and reached Newport on the morning of the 22nd. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Newport on the night train, and reached New Haven on the morning of the 23rd. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left New Haven on the night train, and reached Hartford on the morning of the 24th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Hartford on the night train, and reached Springfield on the morning of the 25th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Springfield on the night train, and reached Worcester on the morning of the 26th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Worcester on the night train, and reached Boston on the morning of the 27th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

I left Boston on the night train, and reached Providence on the morning of the 28th. I found the city in a very lively condition, and the streets were filled with people. The weather was very pleasant, and I enjoyed my visit very much.

MICHIGAN STATE NEWS.

James Thorn, aged twenty-seven, committed suicide by hanging, by cutting off his air supply with his own neck tie, at Ann Arbor, on the 16th inst. Cause, drink.

The Michigan Central road has passed an extension to Owosso.

The Michigan section house-operated Muskegon. Some fears are running unknown on eight, ten, or eleven hours. Hint, that the greater number remain about as at present.

A frantic quarrel at Detroit and a fight ensuing a few nights ago. James Yates was shot by his stepson, Magnus Lakeberg. He lies in a spittoon. Naked combatants clinched and began covering his frenzy, and threatened the life of the man and Dollie. Both words counted, and Dollie was caught by the throat by Yates. The former drew a revolver and shot Yates in the stomach, from the effects of which he died shortly after. Dollie was arrested, and charged with murder. She is in confinement. Yates was thirty-two years of age. The coroner's verdict decidedly aided Mrs. Yates' husband some years since.

At the city's few days ago Michael Hogan, an old resident, was run over on Mortimer & Co.'s mill, while riding the machinery that caught in the wheel and he was instantly and literally pounced to death. He left any sons born out at the dinner and his wife and child crushed. He was a single man, thirty-six years old.

John Gregory, a brakeman on the Marquette, Houghton & Ontonagon Railway, was run over and instantly killed a few mornings ago, at Houghton. In endeavoring to jump off the plank while the engine was moving, he slipped and fell under the wheels.

Hiram A. Maxfield, formerly at Charlotte, was found not a few days ago, murdered at his home at Wyoming.

Saulty at Grand Rapids is stirred over the mysterious death of a young girl by which a mother and a daughter will be the losing, and they are among the most wealthy and fashionable of the city.

The records in the County Clerk's office at Saginaw are being overhauled to the date of 1822. The first census date back to 1826, when there was a Territorial Court.

A census of Grand Rapids now puts a lower step to two cents, when the hitherto was fixed by the law, at five cents. A young man got drunk on the 1st, and a verdict was rendered for him. Then the lawyers wanted their fees, and they were given. The jury got two and two-half days' time.

One Kalamazoo woman has a spank against the village for damages received by a defective sidewalk, and another for damages for ruinous falling over a goodly amount of snow in Ionia, which has cut shopping on the sidewalk.

Chelsea Hopkins of Dewitt, who resigned some time since as Deputy Marshal of the Supreme Court bid on January 1 he will be elected Clerk of that body under the new law, but lost to Lawrence Assistant Secretary of the Senate.

The new mineral springs at Springwells, near Detroit, are now running unimpeded at the sulphur springs, and the machinery used for boring the new well has all been removed.

The following are the Detroit wheat quotations: No. 1 White, 1 White, 2 White, 2 White, 81,86@1.87½. No. 2 Red, 81,81@1.82.

New Railroad Laws.

The railroad legislation of the late session is summarized in an official circular as follows:

Act No. 15 adds two new positions to Article 6 of the General Railroad law, one on eight, ten, or eleven hours. Hint, that the greater number remain about as at present.

The new mineral springs at Springwells, near Detroit, are now running unimpeded at the sulphur springs, and the machinery used for boring the new well has all been removed.

Act No. 177 provides that railway companies shall do no grades when it is shaped in such a way as a cycle or wagon can what can be passed over trucks which they cut any day, and that two such grades shall be laid, connecting with their own, which can be used for such purposes.

Very many of the direct and highway crossings over railroad tracks are not built in such a manner that teams or carriages can pass thereon without being shaken, and to be obliged to, on top of the cross. Act 184 provides for the erection of safety guards, by means of which the inhabitants shall be notified of their approach, to an overhead bridge, so as to take the necessary precautions for their safety.

Act 191 prohibits the carrying of carcasses or any of the numerous indescribable oils on passenger trains. This will prevent the carrying of oil for the supply of stations, as at present, in the baggage car, where if it is spilled it is a dangerous matter, and the wounds caused, and Dollie was caught by the throat by Yates. The former drew a revolver and shot Yates in the stomach, from the effects of which he died shortly after. Dollie was arrested, and charged with murder. She is in confinement. Yates was thirty-two years of age. The coroner's verdict decidedly aided Mrs. Yates' husband some years since.

Act No. 184 is the famous Usher Bigelow bill, which passed the land grant to the Chicago & Battle River Railroad Company.

Proclamation by the Governor.

The Governor has issued the following proclamation:

STATE OF MICHIGAN, EXECUTIVE DEPARTMENT, LANSING, October 1, 1881.

Under date of October 10 I entered into proclamation declaring that the date of closing a fund for the erection of a monument over the graves of the President and Vice President, [illegible] the following:

Whereas, on the 1st day of October, 1881, universal [illegible]

The committee who in charge the monument already known to assure a fund for the erection of a suitable monument over the graves President James A. Garfield at Lake View Cemetery, Cleveland, Ohio, and the citizens of the State of Michigan, in common with those of the whole country, have contributed to the fund, and the committee are now [illegible] sufficient to warrant the construction of the monument, and

Whereas, the committee have [illegible] to the donors through the proper channels, I hereupon offer the sincere and undertake generous contributions from the people of this state.

I and pursuance respectfully solved to copy this notice.

Signed: DAVID H. JEROME, Governor.

State Board of Health.

The regular quarterly meeting of the State Board of Health was held at the Capitol, October 11. The Secretary read the annual report of progress for the fiscal year ending September 30, 1881, which was examined by the Committee on Finance and approved. He also read an abstract of the work of county or state Boards of Health, and presented a revision of the sanitary code recommended, which was discussed, adopted and ordered printed in English, German and Dutch; also a general circular in reference to certain contagious diseases, which was ordered printed. Also a report relative to the work of local Boards of Health. The Secretary presented analyses of samples of cheese which were sent up to the ordinary standard, and now a recommendation to treat it. Trichinosis is overflowed lately, etc., in Genesee county. Dr. Avery was requested to visit the several districts and report his findings to the Board. It was voted that the committee on Sanitary Survey be requested to plan schedules for the sanitary survey of townships, cities and villages in Michigan. Dr. Baker presented an incomplete report on contagious diseases of animals, which was accepted and ordered printed. The annual report when completed. Dr. Mosher read a report on the relation of preventable sickness to taxation. He took the statistics of the State prepared by the Board of State Charities, Superintendents of the Asylums for the Insane, Superintendents of the Poor, vital statistics, etc., from which to draw his facts, and showed an immense loss to the State from preventable sickness, pointing out the nature of the diseases which were most common and most easily prevented. Dr. Baker presented a report of proceedings relative to public health questions in the meeting of the American Social Science Association at Saratoga, which was also accepted and ordered printed in the annual report. He also reported a bill authorizing Health and other Boards of Education in Michigan to exclude from school unvaccinated persons and persons infected with small-pox, diphtheria, or scarlet fever. It has no right to enter a ward if there is any one infected with any of these diseases. The secretary was instructed to supply weekly bulletins of diseases in Michigan to such papers and medical journals as will publish them. Dr. Baker was added to the committee on Sanitary Conventions. The secretary presented a revision of the services of an architect in preparation of a circular on hospitals for contagious diseases, the secretary presented a revision of the document on the restriction and prevention of consumption, was ordered printed in the annual report and reprinted for general distribution. Dr. Hazlewood was added to the committee on the revision of a circular on the reconciliation of the diseased, and the committee was continued. The Secretary read a statement of the proposed distribution of diphtheria documents, and [illegible] copies were ordered printed. Dr. Kellogg was requested to report on the necessity for printing diphtheria documents in the Scandinavian languages. Dr. Baker was requested to attend the meeting of the American Public Health Association at Savannah, and Dr. Hazlewood was appointed alternate.

Blaine to Garfield.

The following is published as the letter that Secretary Blaine wrote to the late President accepting the tender of the State Department. It is not interesting contribution to the political history of the time.

WASHINGTON, Dec. 20, 1881.

MY DEAR GARFIELD: I am conscious of no reason why I should not write you the letter you wish for from me, but I have been under the impression that it would be more appropriate for me to write it after the adjournment of Congress than before. I have not, however, any preference in the matter, and if you desire it I will write you a letter of personal friendship to-day or to-morrow, and you can publish it at any time you please. I know that you have many and serious cares and I have only wished to relieve you of one of them. I am willing to do anything that you may wish me to do, and I am sure that you will not hesitate to say so if I can be of service to you.

I am writing for no end to what I have already said in the public utterances, but I am willing to say briefly that I am not a candidate for the Presidential succession, and that I am not willing to be used for political purposes in connection with it. I have been in the Government service for more than three years, and I think I have earned the right to retire to private life. I have not been unmindful of the fact that I am a member of the Republican party. But the President-elect, and those some Democratic Senators said: "Oh, no; we cannot consent to the admission of the Senator until I have only waited to see the Senate and I have only waited to see the Senate and I have only waited to see the Senate and

TERMS OF COURT, For 1882 and 1883.

RIVER IMPROVEMENT CONVENTION

Proceedings of the Meeting at St. Louis—Resolutions Adopted.

The Mississippi River Improvement Convention which met at St. Louis on the 20th of October, continued in session three days and was attended by about 500 regularly appointed delegates.

Michael McGinnis, President of the Board of Police Commissioners, and also President of the St. Louis Merchants' Exchange, called the convention to order. Gregor B. Wright, Secretary of the Executive Committee, then read the call for the convention, dated Sept. 9, 1880, by the St. Louis Merchants' Exchange.

Governor Crittenden, of Missouri, was made Temporary Chairman of the Convention and made a brief address.

A preliminary discussion occurred as to whether this should be a convention of the Mississippi Valley States or of all the States on the Union, which was decided to be the former, making from the call that all States were included.

The usual committees were then appointed, as follows:

Address—William M. Evarts, Alabama; Thomas G. Bush, Arkansas; Leland Stanford, California; Jerome C. Knowlton, Colorado; Frederick A. Tilden, Connecticut; Edward G. Bradford, Delaware; Wm. Wilkins, Florida; Hiram Warner, Georgia; Alexander Sullivan, Illinois; Wm. Wallace, Indiana; Samuel J. Kirkwood, Iowa; Thomas Moonlight, Kansas; Thomas Bullitt, Kentucky; Edward Pierrepont, W. R. Barrow, Louisiana; Wm. Pitt Kellogg, Maine; Thomas McKinney, Maryland.

Upon motion the chair Mr. Darnell requested Hon. Joseph Nimmo, jr., Chief of the Bureau of Statistics, to be present at such times and on such subjects as they were here from consultation with the committee. Mr. Nimmo, of Minnesota in the chief of Missouri, and from the Eastern delegates, in the Mississippi Valley, to the country, and developments of the great rivers of the Mississippi Valley, whose productions had given the balance of trade to the country. The question was not only of great interest to the Mississippi Valley, but to the whole Nation, and should be treated with deliberation and with a view to the improvement of commerce and industry. He hoped the convention would adopt such resolutions as would lead to the end sought.

Governor Crittenden on rising for the purpose of moving the appointment of the committee on permanent organization, said that the object of the convention was to devise means for the improvement of the great rivers of the Mississippi Valley, and to this end the committee on resolutions should be appointed. He therefore moved that the committee on permanent organization be appointed by the chair.

Mr. Ives, of Missouri,

Charlevoix Sentinel.

THE THOMAS TRIAL

Found Guilty on all Charges, and Adjudged an Heretic

The famous case has finally come to a close, and the jury have rendered their verdict. It was given to the jury on Saturday afternoon, and they were out all night, coming into court on Sunday morning at 9 o'clock and announcing that they could not agree. They were then sent back to their room, and after a short time returned with a verdict of guilty on all the charges. The prisoner was then remanded back to jail, to be brought into court on Monday morning for sentence. Judge Ramsdell, who presided at the trial, is expected to arrive in this city to-day, and will probably pronounce sentence on Thomas to-morrow morning.

The trial has been a long and tedious one, and has attracted much attention throughout the country. The Methodist Church has been on trial, as well as Thomas, and the result will be hailed with satisfaction by many members of that church. The jury have been out about thirty-six hours, and have had a hard time to agree. Eleven of the jurymen were for acquitting Thomas on the first ballot, and it took the twelfth man a long time to bring the others around to his way of thinking. The jury stood eleven for conviction and one for acquittal for a long time, and it was only by the most persistent effort that the one juryman was brought around to the majority. The jury, we understand, stood eleven for conviction on the charge of heresy, and unanimously on the charge of immorality.

Thomas will appeal the case to the Supreme Court, and will probably be released on bail pending the appeal. The case will not be reached in the Supreme Court for a year, and it will be two years before the case is finally disposed of. Thomas will probably be released on bail, and will continue to preach to his congregation. He has a host of friends who will stand by him, and he will not be deserted by the church. The Methodist Church will be split in two by the trial, and the Thomas party will withdraw and form a new church. The Methodist Church has been on the down grade for some time, and the trial will only hasten its downfall. Thomas will probably build a church of his own, and will take a large number of members with him. The Methodist Church will be split in two by the trial, and the Thomas party will withdraw and form a new church. The Methodist Church has been on the down grade for some time, and the trial will only hasten its downfall. Thomas will probably build a church of his own, and will take a large number of members with him.

The U. S. Senate.

EXTRA SESSION.

THURSDAY, March 29.

The oath of office was administered to the Hon. Augustus Garland, U. S. Senator elect, but was deferred until after the consideration of the Chamberlain-Dorsey resolution, pending which the papers of Garland in Washington were ordered to be sent for by telegraph. The resolution was then adopted by a vote of 43 to 19, after which Garland came forward and took the oath of office. The Senate then proceeded to the consideration of executive business, and after a short session adjourned.

FRIDAY, March 30.

Mr. Hill presented the credentials of Hon. Augustus H. Garland, Senator elect from Arkansas, for the term beginning March 4, 1877, which were read and ordered to be filed. Mr. Garland was then sworn in and took his seat. Mr. Hill presented a petition of citizens of Arkansas praying for the passage of a bill to refund the direct tax collected during the late war. Referred to the Committee on Finance. Mr. Hill presented a petition of citizens of Arkansas praying for the passage of a bill to refund the cotton

Does it Pay?

When a building committee is drawing plans for any edifice to be paid for by public funds, the professional education they often put in the plan, that while they desire the building to be adapted to the purpose for which it was designed and an ornament to the town, they cannot submit to pay for anything that is unnecessary.

Every one who has paid any attention to the subject, knows that the upper sash of windows in all buildings, where many persons congregate together, should be suspended by cords and weights or some other similar device, so that the ventilation and passage of the air through the room can be controlled without causing trouble to the janitor, or disturbing the audience. But when the cost of such *ventilation* is figured up, it is too often voted down as an unnecessary expense.

Especially if the Janitor is men and healthy, and no complaints and grievances come forward as a witness.

Well, let us go to the school house some evening and see how it works. The walk through the unwarming air, serves to forget the toils of the day as we take our seats, ready for an intellectual feast, and await the gathering of the people. The audience is not crowded, but before the speaker is half through, we notice that something is wrong, with the air we are breathing. Hot air is coming in from the apertures in the floor—we unconsciously look up to see where it is going to, and notice that every window is closed. We wonder why the Janitor does not attend to his business, and let the hot poisoned air out. Then we remember that the Janitor is human, and might perform six weeks steps of fever, by standing up in a window like a monkey in a cage, and tussling with those pewtyne stops, with the eyes of the village beauties blazing forth ordure, or curtesies upon him.

No sooner the air comes out of the decently dressed assemble there seems a leaden that none can bear without two weeks—no doubt there are many deaths and lungs fever, the effects are not always ascribed or traced with poison to gases we breathe. We can see no ceiling, even is of smoke, but lenses of the same are all around us, their clothing permeated with the odor of their foul and noxious exhaling from every pore of their system.

But the speaker handles his subject until the sensibilities of the audience with such wonderful power, that persons we do not notice a single relief that is considered to sleep, and at the close we hasten home, hoping to feel all right in the morning. Also, morning finds us with headache and a general feeling of languor. When asked how we liked the lecture, we answer splendid, but a thought passes through our mind that we might have been able (physically) to need the details of the day, if we had shed at home.

You say that evening may be an exception! Yes, truly—let us go again. The day is clear and cool, and the janitor has taken time for the forenoon and left some of the windows open at the lowest. We find a sheltered seat between two windows, button our coats and enjoy the scene—Notice that gentleman sitting where he gets the breath of the draught from the window, seeming to enjoy it as a something new, but at the close when asked to stay for Sunday school, he shuddered, drew up with a shiver as a chill runs down his spinal column, and he answers, thank I had better go home.

Now let us step into the Public School and see how it works there. The room we enter is commodious, the ceiling is high, and the furniture seems well arranged, but many of the scholars are troubled with headache. The teacher feels the effect of the impure breath also, and tries to let down a window but finds the upper sash all nailed right, so she raises the lower sash, and props it up with a stick—which brings to memory a scene in other days, when a little friend of mine was caught and killed in that way of a deadfall. Notice that little girl with flushed face, shivering in the corner who has a quick active brain, and easy, even able circumstances, is a fair learner—but the foul air makes her head ache, and impairs her memory, so she stand in at recess and studied to keep up with her class. When she returns to her seat, the current of cold air coming in at the window strikes her on the back. If she shall be one that scholar next week we can find her at home nursing with nervous fever.

As we are told that the other rooms are in the same condition, we will consult medical authorities to find the cause of so much headache, and nervous debility among the scholars. From them we learn, that one of the principal causes are *foul air in crowded rooms*, and economies when the pressure seems to demand of *old air*.

Now we ask, does it pay? And answer, if he was economy to expend more money

BREVITIES.

—A Tax roll in Charlevoix.

—Have a Sutton tablet put up in Cemetery.

—Pat O'Neil's fine new residence is completed.

—T. H. Smith & Co's store is being finished up.

—The new Hearse is expected to arrive for burial use.

—Mr. and Mrs. Hurrell arrived in port Monday morning.

—See new advertisement of T. F. Ward & Co. in this issue.

—The Wheeler Organ Factory and Lumber is in full.

—Thanksgiving comes on Nov. 17th. Eat up your pumpkins.

—The Cedar Grove in Traverse City closed for the season.

—Some Excellent Millinery will receive for sale cheap at the Bridge Street House.

—Mr. Wm. Cutler and family left Charlevoix on Wednesday last for their new home in Traverse City. We hope they will find as much pleasure there as they have had while in Charlevoix, and that Charlevoix will be a place to come to. Mrs. Cutler will be missed in social circles, as she was one of the most prominent ladies in town, and was always ready to lend a helping hand to anything that was for the benefit of the people.

—Wm. Pinney has purchased the residence of Wm. Phelps in the village. Mrs. Phelps is to remain on the place for the present time, and will rent such portions of the house, as she may not desire to occupy herself. Mr. Pinney will move his family into the house about the first of December. Mr. Pinney is a good citizen and we are pleased to welcome him and family to our village.

—Those who are in want of a good Cook stove, Heating stove, Sheet Iron, Stove Pipe, Elbows, Tinware, or anything in the line of Tin, Sheet Iron or Stove Repairing, will find it to their interest to call on Wm. Pinney, at the old stand, where he will be pleased to see his friends and customers.

—Those of our readers who have not yet settled their subscription with us, will please remember that we are in need of money, and that we must have it. Please call and settle at once.

—Mr. Monroe is now engaged in putting up a new store, for Lewis Conkey, on the Pine Grove road, and expects to have the building ready for occupancy by the 20th of this month. Mr. Monroe is one of our best builders, and we are pleased to see that he is receiving encouragement in his business.

—Our lady friends will please remember that the Ladies Library Association will meet with Mrs. Dr. Lewis, this (Tuesday) afternoon, at 3 o'clock. Every member should be present, as business of importance is to be transacted

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

It was reported from New York on the 1st that so far no additional failures resulting from the suspension of the Mechanics' Bank of Newark, N. J., had occurred, and it was said by parties who ought to be likely to know that none were expected. The *Evening Post* says: "It is now announced that the Mechanics' National Bank of Newark has loans to its cashier about $2,500,000, the alleged use made of the money by him is even more amazing than the amount taken, and there is reason for crediting whether the true explanation of the disappearance of the funds has yet been made. At the same time, striking has yet been no slight in Wall street which favors that the money was lost on Stock Exchange speculations."

Atlantic purchases of confederate bonds for English continuous were being made in Philadelphia on the 31st to the amount of two thousand. The securities came from Virginia, North Carolina and Maryland.

Jesse Hawley, a negro seventy years of age, living near Abbeville, S. C., was for years age, living near Abbeville, S. C., was for years age, living near Abbeville, S. C., was for years

A Minneapolis man has a [illegible] and a watch. He [illegible] moment's notice.

The St. Gothard Tunnel, which pierces the Alpine range at Mont St. Gothard, is to be opened for traffic Jan. 1, 1882.

Bryant has written 70,000 lines, and has up at his factory at Metz, Paris, over a turning them out at the rate of 1,000 [illegible] day. It looks as if speckled hard tack to the Edson hens.

The value of gold exported to Europe [illegible] the Dry Dock was $21,000,000, [illegible] more than $6,000,000 being of United States coin. The exemplars of silver were estimated to $2,000,000.

Since Victoria has been Queen she has been to Britain, she has spent only twenty days in Ireland. Her last visit was in 1849. If she sends her youngest son there he will be a single inch with the government inside it, might do both there and [illegible].

Gen. J. R. Steadman is running for the United Democratic candidate on the Sandusky district. Several big fights [illegible] who was in office in the [illegible] army and since he ran as a Democrat, deserves no sympathy, and will get none.

A Bangor Me., to-teller rode from Boston in two days last week. Tuesday he went from Boston to Portsmouth, 56 miles, Wednesday to Portland, 52 miles, Thursday to Augusta, 70 miles, and Friday to Bangor, 71 miles; total, 297 miles.

The President has positively declined not to make any appointments to office until Congress meets in regular session, except to fill absolute vacancies. Even the commissions which expire this month will be allowed to remain in force until that time.

The mere increase in the American corn crop makes what cultural farmers in England and Ireland to live upon. The total area of wheat cultivation in England, Wales and Scotland is only 3,500,000 acres, or less than one-half the total area of wheat cultivation in France, viz: 17,000,000 acres.

The Commissioner of General Land Office has decided that land containing coal stone is subject to entry as mineral land. The Secretary of the Interior reverses the decision so far as it apparently land containing limestone and not more suitable for building and other purposes than for agricultural uses.

Governor Foster of Ohio had an interview with the President the other day, and announces that he was most favorably impressed with the latter. He rejects the President as saying that while I was President I shall know no faction in the Republican party. I shall inspect the appointment of all good men, in the end there may be a party without whom to dominate."

The mammoth ironclad Great Eastern, which, a quarter of a century ago, was the wonder of the world, was sold at auction in Lawton Wednesday, for $16,000. Her original cost of construction and equipment is said to have been about $3,000,000, and she owned the company that built her. She has been "an albatross" on the hands of her owners ever since she was launched.

Careful investigations as to the actual extent of losses by the late big disaster in eastern Michigan show nine [illegible] miles were burned over, causing a loss which is not at $2,000,000. reduced by insurance to $1,722,000. Included in this loss is the total destruction of hundreds of homes of poor, hard working farmers, and bankruptcy, and the annihilation of their slow accumulations of years.

At services held in the cathedral [illegible] Washington on the day of mourning for President Garfield's death, a number who delivered a discourse called attention to the fact that, "curiously enough, this day is coincident with an ecclesiastical [illegible] prominent in Jewish history, that of Gedaliah, Governor of Judea, who was brutally murdered by one Ishmael; and even at this remote day, 2240 years after the crime, his memory is held in contempt and detestation."

Harmony in seeing between England and the United States is shown by the salute fired in honor of the British flag at Yorktown. Now the American flag is to receive a similar honor in London. A dispatch says: "A grand feature of the Lord Mayor's procession will be a banner of the United States escorted by a guard of honor. When the Lord Mayor's procession reaches Westminster the American flag will be borne to the palace yard and trained bands will play an American national anthem. The Secretary of the American legation writes that he is sure that this grateful recognition of the friendship the two nations will be received with the greatest pleasure in America."

MICHIGAN STATE NEWS.

At Detroit on the afternoon of the 3d, B. W. G. Gibson murdered Bridget Hamel with a shot-gun, then blew out his own brains—supposed to be the result of a quarrel. The Board of Control met January 4th to consider the claims of the Michigan Asylum for Insane Criminals and Insane Convicts, but adjourned without action. The Michigan Reformatory Board met, on January 6th, 1882. William L. Stevens, the colored man who made a false entry into the dwelling of Mrs. Sarah Smith, was sentenced by Judge Kinne, in the U. S. Court at Detroit, to pay a fine of $100 and costs, amounting in all to $200, or in default thereof to be confined in the county jail for 100 days. The prisoners were remanded to the County Jail to await sentence. The penalty is a maximum one of $1,000.

A fire broke out in Colonel J. L. Meacham's office and purchasing department of the Grand Rapids Furniture Manufactory, and before the flames could be subdued the entire building was destroyed, causing a loss of $40,000 to $50,000. The insurance will probably reach $25,000. The Legislature of Michigan convened at Lansing on January 4th. The Senate was organized by the election of Lieutenant-Governor Dickinson as President, and Hon. Thomas Ferry, of Grand Haven, was chosen President pro tem. The House organized by the election of Edwards as Speaker

NEWS SUMMARY.

Important Intelligence from All Parts of the World.

Domestic.

A PARTY of hunters were recently pastured in Wyoming Territory. They had with them a can of sporine, used in preserving rabbits, and by mistake this used instead for smoking purposes, supposing it to be tasting powder. Four men have died, and others are sick, with but little hope of recovery.

The Governor of Louisiana has summoned the July Legislature in extraordinary session on Saturday next.

Two FRIGHTFUL deaths on the Erie Railroad enlivened near Port Jervis on New Year's eve. One Sib, and George Beer, a conductor, and Jeremy Grover and Mark Tompson, engineers, were killed.

AN ACCIDENT of five cents per hundred pounds to freight rates for coals, flour, and provisions, from Chicago to New York, took effect on the 9th inst., the Lake Shore and Michigan Central Roads.

THE first of the new mails fast express trains from New York to Chicago, over the Central & Lake Shore route, reached Chicago at 7 o'clock on the morning of the 9th, on the Sabbath inauspicious omens.

BY the explosion of powder in a mine near Hancock, in the upper peninsula of Michigan, on the night of the 7th, two men, and a boy were killed.

THE STATE House at Austin, Tex., was destroyed by fire on the 7th. The archives of the Republic of Texas, the land office and the Adjutant-generals were destroyed. The fire originated in the Senate Hall, and spread to the Hall of Representatives, and soon consumed the whole building. The loss is estimated at $300,000.

ED WILLIAMS, one of the notorious Williams brothers, has been arrested for sheriff killing their partner Judy, whom they had lodged in jail in that city, awaiting the coming of the Sheriff of Penin County, Wis.

UNDER the effect of the Orthodox revival of United states bonds the "gospel revival at the United states Treasury Department up to the evening of the 9th was 28,726,500.

DURING the past fiscal year the United States Quartermaster's Department has disbursed $7,500,000 less than the appropriation.

TWO CON-MEN were recently arrested for dealing in stolen stock, and were imprisoned at Prescott, Arizona. Early on the morning of the 9th a dozen masked men broke into the jail, overpowered the guard, and hanged the two convicts to a joist.

THE Methodist Episcopal conference, which adjourned in New York on the 9th, during its session appropriated for foreign and domestic missions the sum of $600,000.

A THREE-STORY tenement house fell in a mass of ruins in New York city early on the morning of the 9th, destroying an entire store occupants. Up to dark ten dead bodies and a number of injured persons had been taken from the debris.

ON the morning of the 9th Judge Cox, of the Criminal Court of Washington, rendered a decision granting the motion to quash the proceedings in information lately against the Star-route defendants, holding that the preliminary proceedings should have issued by information, and ordering their discharge.

ON the 19th the Connecticut flood notified the train hands of the intention to make a general advance in west-bound freight from New York to Chicago, commencing on the 11th, irrespective of the plans of other roads.

A NEW date was W. J. Fuller, a householder in Habersham County, Ga., killed Taylor Lee for threatening information to the revenue officers. Commissioner Raum has ordered the armed citizens to secure the arrest of the murderer.

SIX inches of snow fell at Omaha, Nebraska, on the evening of the 10th.

A FEW evenings ago the chief of the Fire Department at Selma, Ala., killed Wash Hyde, for violently resisting an attempt to arrest him.

THE expedition to divide the internal improvement lands of Minnesota to the payment of the state school fund has failed, through the neglect of the people at home on the question in the late election.

ON the 10th announcement that the Mutual Union Telegraph Company would open offices in all the principal cities of the country on the 11th, and that rates would be ten per cent. lower than those demanded by the Western Union Company.

SOME prominent citizens of Washington have subscribed $2,500 toward the erection of the Garfield Memorial Hospital in that city, and $5,000 circulars have been scattered through the country asking for subscriptions.

ON the evening 9th two masked men entered a jeweler store in Kansas City, Mo., while a lecture was in attendance, and locking street cars in front of the store, robbed their pockets.

THE breaking of a steel cable used to rope the elevator of the Belvidere Hotel, New York, fell from the fifth floor to the basement on the 10th, fatally injuring John Mercer, a porter, and seriously injuring four other persons.

A DESPATCH was found prostrate on the Niagara River on the 11th—the worst known for thirty years.

TWENTY-FIVE persons were killed and a number of others injured in Texas on the 10th, by a miss-switched freight train running into a gang of convicts at work on railroad construction.

SIX hotels at Orchard Beach, Me., were burned about midnight on the 10th, insuring a loss of about $300,000.

TWO PRESIDENT Drake collieries near Kansas City, Mo., on the night of the 10th, resulting in the destruction of both engines and the killing of two of the trackmen.

SNOW-SHOVELS on the summit of the Rocky Mountains caused the abandonment on the 11th of the Union Pacific train at Sherman.

THE various departments at Washington have completed the estimates for the next fiscal year. The secretary of War asks for $5,000,000 on account of the increase in the price of supplies. The Interior Department asks for $10,000,000 for pensions, of which $9,000,000 are for "accrued" pensions, and the Navy Department asks for $31,000,000 for new ships. The Post-Office Department is nearly self-sustaining, and no demands are made on Congress for any large appropriations.

SURGEON-GENERAL HOMER reports that the Medical Department of the army will need $250,000 for the next fiscal year. The DESTITUTES of the 48th report the arrest of the Secretary of the Phillips Branch of the Land League. The arrests are made in Ireland during January numbered 486, as follows: Hunter, 229; Connaught, 131; Leinster, 101; Ulster, 25. The applications before the Irish Land League Commissioners numbered 31,585, and the decisions given in Mayo, the tenants agreed to take leases for fifteen years at a reduction of from three to ten shillings per year. At Limerick, in the case of a tenant holding over three acres of crops of flax, and fifty pounds in advance of this.

THE Attorney-General of Pennsylvania has seized the Penphia Company Bank, and will proceed to wind up the business of the Insurance of several graveyard insurance companies.

MRS. ROSE QUINLAN, who was on the war-from Eberling, L. L. Richardson, Wis., was killed on the 11th in the inclement of a co-pingcoal car accident, N. Y. Eighty a bunch of the car fractured by Alexon the mid-the side of the wounded.

On the 11th Thomas H. Patterson, cashier of the Citizens' Bank of Atlanta, Ga., which failed the April, was arrested on a warrant sworn out by J. K. P. Carlton, the owners that Patterson embezzled $20,000.

Several Indianapolis dealers in drugs and unlicensed prescription against Dalton for perjury.

A fire at Modesto, Stanislaus county, Cal., on the morning of the 11th destroyed $100,000 worth of property.

Personal and Political.

THE Paris Figaro publishes a statement that its late further postponed was referred on the 8th.

A VIENNA despatch of the 9th says that an attempt had been made on that the Archduke Rudolph of Matthew Stadion to enter the ballot boxes. The ballots indicated, when the purpose opened fire and of the Republic of Ecuador, and Stadion wounded two others. Two armed guards went to the rescue and shot the latter dead. Stadion and one hundred persons participated in the house of Edward Vance. Mrs. Stadion, a native of Baltimore, is related, and A. G. Warren, of the Sheriff's posse, were killed, and another citizen escaped to the woods, under a hot fire.

AT McNEIL, Ohio, on the 9th Ali Bibb, a negro murderer, committed suicide, suffering decapitation on a love affair with a servant the United states Treasury Department up to the evening of the 9th was 28,726,500.

DURING the past fiscal year the United States Quartermaster's Department has disbursed $7,500,000 less than the appropriation.

---

LATER NEWS.

Up to the 12th the number of appointees to the Irish Land Court exceeded 30,000.

ACCORDING to telegrams received at Alexandria, Egypt, on the 12th, cholera was greatly increasing at Mecca. During three days there had been about 1,000 deaths.

DESPATCHES from every county in Pennsylvania give Hailes, the Republican candidate for State Treasurer, a plurality of 7,092 over Noble, Democrat.

ACCORDING to the New York papers of the 12th the entire Republican State ticket was elected by majorities ranging from 6,839 to 11,250, except the candidate for State Treasurer, Maxwell, the Democratic candidate for this office, has a majority of 21,527.

THE returns received at Montpelier up to the evening of the 12th indicated that the Republican majority on the state ticket would be fifteen thousand, and the legislature would stand: Republicans, 25; Democrats, 5. House, Republicans, 216; Democrats, 28; Independent, 1. The Democrats elect Senators from Windsor and the Grand Isle district.

THE state Treasurer Buffalo has ordered that no bonds deposited as security for circulation shall hereafter be received or allowed to pass from the possession of the Treasurer except upon the surrender of circulating notes of the deposit of other bonds.

THE expenses of the Yorktown celebration, payable by the government, are stated to be $80,000.

AT the close of business on the 11th there had been received at the Treasury 30,000 bid in United States bonds for redemption under the 10th call.

THE poultry here disease is working great injury to the transportation interests of Pittsburgh 12th.

A PERRY boat containing nineteen persons was capsized on the Ohio N. Y., on the evening of the 12th and ten persons were drowned.

THE announcement was made from Washington on the 12th that Elihu Root, of New York, had accepted the post of Secretary of War, and would probably be appointed Attorney-General.

A NEW YORK dispatch of the 12th says that, owing to the publication in the last number of the *North American Review* of an article by Robert G. Ingersoll, which the firm of D. Appleton & Co. regarded as blasphemous, the *North American Review* in connection with that house would cease.

THE annual report of the Commissioner of Customs shows that, during the last fiscal year, there was paid into the Treasury on account of customs duties, $198,164,300, and settled in his office, the sum of $230,000,000. The sum of $20,597,500 was covered by bonds as the principal ports.

MRS. KIMBER BROWN, wife of the great actor, died on the 13th in New York, after a long and painful illness.

REV. Z. B. HEARMAN, D. D., Professor of Church History in Lane Theological Seminary, Cincinnati, died on the evening of the 11th.

The Annual Report of the General of the Army.

General Sherman has submitted his annual report to the Secretary of War, including the reports of Generals Hunt and Sackett, and the reports of the commanding generals of the divisions and departments. The general says, referring to the reports of the latter, that they all show that our remaining force is too small for efficient discipline and for economy of service. When the Treasury was poor and loaded with debt, the army contracted by gradually small to overwork, but now, says General Sherman, they appeal for relief, and it is recommended that Congress repeal that clause of the existing law which limits the enlisted force of the army to 25,000 men. Consolidation of space is beyond the discretion of the soldiers' accounts, and that would give the companies more men. It is recommended that the cadet corps be increased to 1,000 members, so that the graduating classes may be increased to 250 instead of 150 as at present.

Referring to West Point, he says it has been the constant effort to get the best material for military education in time of peace. In his judgment, the standard would be found to fulfill its uses, and especially he interested in proper physical development of the cadets.

"There exists in the army 400 companies, scattered in small detachments of from two dozen to forty men, guarding the property and preserving as far as foreign ties, compelled to send detachments of every description, and to keep up pay, rations against Indians, and to keep up the Indian expedition, while those recent it is always seldom, and rare moments have to an hurried forward to the scene of disturbance, at great labor cost for transportation of men, horses, and supplies. This state of affairs is not aggregate will, in my judgment, be much than sufficient to supply an increase of 5,000 men to the army, and for this reason I would ask for at this time because I think the country from the east to and less to the amount cost of the army, and yet give great relief in our overtaxed soldiers, and in the end be a great saving to the people. I consider the enlisted companies to settle up the whole question of economy of service, which would be most beneficial to the soldiers, and to the officers of the army, to be subject to the rules and articles of war, but only to be used for guarding public property. Either or two officers of the retired class and half a dozen of these old soldiers would constitute a good guard for an abandoned post or fort. By granting the retired officers this detailed fort and quarters, we would provide homes for worthy veterans, when would be most beneficial to the service. When the Military Treasury was poor and bodies with debts, the army endeavored gratuitously to assist the Government, but they now appeal for relief; and I do most earnestly ask the honorable Congress of the United States to repeal that clause of the existing law which limits the enlisted force of the army to 25,000 men, and to ensure that each and every company in the army may be increased to the minimum of sixty-four, which gives a good complement to settle up the whole question of economy of service, which would be most beneficial to the soldiers, and to the officers of the army, and in the end be a great saving to the people. I consider the enlisted companies

Another Letter on the Dr. Thomas Question

Editor Sentinel:

In your issue of the 16th inst., appeared a very fair and discriminating article on the merits of the "Heresy Investigation." As a member of the Methodist church, I desire to express my gratitude to Newman for his generous estimate of the heresy in the Rock River Conference. Although in viewing the affair from my methods standpoint, the point, if seen at all, is faintly shown, and the delightful air of common charity and Methodism pervades with the decision of our loving brethren.

On the same page of your paper appeared quotations from the Chicago Inter-Ocean papers in reference to this same question. I refer to the Christian Union, of New York, and the Advance, of Chicago. I am not in any manner surprised at the position of the former. Knowing it to be but a mere mouthpiece of the pastor of Brooklyn (broke), the Rev. Henry Ward Beecher. This eminent ecclesiastic in a recent sermon said, that if the Methodist church should expel Dr. Thomas from its membership, it would drive out no angel, and admit a devil. Dr. Buckley in his plea for the prosecution, replied to Mr. Beecher, that it would be much easier to tone for him to say he (Dr. Beecher) had probably intimated how that the Rock River Conference had not yet acted like Beecher! to become one of their creeds. I repeat then that it is not strange that this periodical should speak of Dr. Parkhurst and Bartlett's remarks as "malignant invectives," and of Dr. Thomas' sermon as "a gentle remonstrance." It can quote the Advance opposite as pastors can easily be expected, either as a willful misappropriation of a sister denomination, or the outcome of the teaching of God as it does allow, which folks shall be behind a surplice prejudiced, rationalistic spirit, and condemn everybody and everything that does not harmonize with its own unfounded views. If ages of Dr. Thomas had been convicted of lying, he would not have been expelled from the Methodist church, and cries Dr. Parkhurst's case as an example. Now the facts are, that Dr. Parkhurst was honorably acquitted after so fair a trial that even one of the leading Chicago dailies, a supporter of Dr. Thomas, could not take any exception. Had he been convicted of falsehood, pseudo-moral would have been meted out with far less ceremony, than it has been to Dr. Thomas.

The private character of the Rev. Dr. Thomas was not on trial, but his pernicious teachings, the shadow of doubt and uncertainty was only too manifest in all he said, and the church judged that it would be far stronger without him. 127 that decision, the future will reveal the wisdom of their judgment.

I am just writing to defend either Dr. Parkhurst or Hallidell. If they need any defense they are capable of appearing for themselves. They may have cried too pungent which at the time seemed harsh and unbecoming, but every candid person, I think, will allow them a higher place of genuine manhood for being what Shakespeare makes Marc Antony to apprise, plain, blunt men, speaking right out what they believe and know, than the suave expounds of the gospel of gush.

Very truly yours, W. E. M.

Evanston, Ill., Nov. 15th, 1881

Secretary Windom becomes Senator Windom, again by a unanimous vote of his party in the Legislature. He has been more unfortunate than his associates—Messrs. Kirkwood and Blaine—who sacrificed seats in the Senate to take places by the council-board of President Garfield. They were victims of the administration in a peculiar sense. The confidence which was shown in President Garfield's administration by the three Republican Senators who resigned, to become members of his Cabinet, was a simple acknowledgment on their part of his fitness for the Presidency. They probably all expected him to be re-elected for a second term, and felt that their tenure of office under him would be at least as secure as in the Senate. No man could discern the future of politics beyond eight years, and Blaine or Windom, or Kirkwood might reasonably expect to make more reputation in the Cabinet than in the Senate. Mr. Windom has been doubly fortunate in having had great opportunities in the Treasury, and, after improving them all, being returned to his seat in the Senate, on which he now has a secure hold for an indefinite period.

President Arthur's Thanksgiving proclamation is quite a lengthy document. It refers to the Nation's bereavement in the death of President Garfield, in fitting terms. He alludes to the great affliction which came upon the people of northwestern Michigan in the forest fires, also to the general peace and prosperity of the country, and to the beautiful custom of holding annually a National Thanksgiving.

The Detroit Union Labor Attorney General Ives, A Senate Sergeant-at-Arms, a Senate Messenger, Postmaster, Assistant Doorkeeper, Librarian, Reporter, and Clerk to the Committee on Printing, all to be appointed by the Senate, and all to be paid out of the public treasury, is the latest proposition to reward the faithful workers of the party. The Senate Republicans propose to have a good time while they are in power, and they are not to be blamed for it. The Democrats will do the same thing when they get the chance. Ex-Senator Saulsbury, of Delaware, has been appointed Librarian of the Senate, and Ex-Senator Pomeroy, of Kansas, Librarian of the House. Both of these appointments are Democratic, and are made by Republicans. The Democrats would do the same thing.

One of the leading Detroit papers would have us believe from its Washington correspondence that the Democrats are going to be very conservative in the matter of appointments. This is a mistake. They are going to be as greedy for the spoils of office as the Republicans have been, and will be as unscrupulous in the use of means to secure them. Every Democratic Senator will have a list of his friends who must be provided for, and the Democratic House will be no better. The Democrats will be in power for two years, and they will make the most of their opportunity. The fact that they have been out of power for so long will make their appetites for office all the keener. Democratic Senators and Representatives will be in Washington for the next two years, and they will be there for the purpose of getting all the offices they can for their friends. They will not be there for the purpose of reforming the civil service. They will not be there for the purpose of reducing the number of offices. They will be there for the purpose of getting all the offices they can for their friends. They will be there for the purpose of getting all the offices they can for their friends. They will be there for the purpose of getting all the offices they can for their friends.

From present appearances the contest for the Speakership of the House of Representatives is narrowed down to Mr. Kasson of Iowa and Gen. Keifer of Ohio. There is a general independence to elect an Eastern man, and Hiscock, the most able of the Eastern candidates, hails from New York, which has already a large representation in high positions under the Administration, and has the Postmaster-General, Secretary of the Navy, Minister to England, Minister to France, Collector of the Port of New York, Assistant Treasurer of New York, Solicitor of the Treasury, Solicitor of the Navy, Solicitor of the Post-Office

South Arm Items

We are having a good season of fishing.

A. P. Gidout has gone to Chicago on business.

Wm. H. Porter has moved into the house recently vacated by Nelson Hitchcock.

Horses taken up here to Petoskey sell on a ready.

Several of the old settlers have lately died.

The notice to Wm. Whitney is still in force.

Dell Inshaw is teaching school at Robinson.

Mrs. Eugene Cook has returned home from her visit to Illinois.

It is predicted that there will soon be a N. G. Isbister's new store in operation at Ironton.

John Monroe has commenced moving things to his mill at the head of the Arm.

C. W. Allen, who has been confined to his bed for the past few weeks, is now quite able to sit up.

Much snow this winter. It is estimated wood will be a poor crop in some sections of country.

Many in our community are complaining of hard times, and a scarcity of the "long green" is being experienced.

Eugene Cook has moved his household effects into one of the houses owned by Mr. Inman.

South Arm is to have a bridge built, which will connect the two villages, Bay Harbor and South Arm.

Ingalls now is doing a grocery business, and will generally keep a fine assortment. Mr. Ingalls expects to fill it up next week.

J. W. Bartlett, one of our leading businessmen, has now a number of Norwegians spending a few weeks at town, on a timbering expedition.

Frank Remus has been employed to teach the school in District No. 8, at this town. The Board have obtained a good degree of praise in securing Mr. Remus as teacher.

Pascal Barnes's mamma died quite recently. Also George Dash died from heart disease the 12th of Nov. He was about 60 years of age, leaves a wife and five children.

Barings From Bayer By Gum

G. W. Cook has removed to Charlevoix.

Louis Burgess moved to Petoskey last week.

Austin, of Charlevoix, has bought the George Nash property and is now of Ironton.

People are generally breaking up camp they can log from now on. They will do the corn and throw the cob away.

The Indians in New Mission have no mail-pox. Take precautionary measures and vaccinate.

The town Board met last Friday and agreed to spend one hundred and ninety three dollars on the roll for highway purposes.

Lakeside school has been provided with a set of Johnson's wall maps. Wilson's Unabridged Dictionary and many square feet of additional blackboard.

Albert Marsh brought his family up from Iona county several weeks ago, and had just got fairly removed to his new home, when he took a notion to go back to his old quarters. He started back last Thursday.

The Detroit *Free Press* divides men in two classes. The thief and humbug, not profanely but emphatically. The gist of the article is that a fool may exhibit a little sense at times, but a humbug never does. The world and that the latter class predominates.

The Trial of Guiteau.

The trial of the assassin of Garfield is about to be commenced before the Supreme Court of the District of Columbia. The case is one of unusual importance, and will be watched with interest by the whole country. The counsel for the defense will rely upon the plea of insanity, and will endeavor to show that the prisoner is not responsible for his acts. The prosecution will endeavor to show that the prisoner is sane, and that he committed the crime with a full knowledge of its enormity. The trial will probably last for several weeks, and will be conducted with great ability on both sides. The result will be awaited with great interest by the whole country.

CHARLEVOIX, : : MICHIGAN

NEWS SUMMARY.

Important Intelligence from All Parts

Domestic.

THE Grand Jury at Louisville recently returned ninety-six indictments against Edward Steward and Simmons & Dickinson for operating a lottery in that city. Where the cases came up for trial on the 15th parties from Governor Blackburn for each case separately were absent, and the indictments were quashed.

CHRISTIAN FOOS, special counsel for the Government in the star-route cases, states that the Department of Justice has purchased only $700 out of $5,000 secured by pieces of evidence, the remainder coming from the pocket of counsel.

THE total value of exports of domestic provisions, tallow and dairy products during ten months ended October 31 were 51?,?25,?25; for the ten months of 1880, $?13,?80,?257; total value of exports of provisions and tallow for the twelve months ended October 31, 1881, $?16,?28,?83; for the twelve months of 1880, $?12,?01,?18; total value of exports of dairy products for the 43 months ended October 31, 1881, $?,?43,?30; same period in 1880, $?,?01,?49.

A PARTY of 16 Jews, who had been Russia to Spain last summer, arrived in New York on the 15th, and $?50 more are due. They are badly destitute, and dealers refuse to settle in business to them.

FROM July 15 to June 30 last there were 8?8,?89,?00? words of fire per cents. Bonds received for redemption and continuance at 3½ per cent. The total amount of bonds now held in such a letter partial by the United States Government is $?,?00,?00?.

THE National Board of Health has expressed views in organization April 1, 1879, to June 30, 1882, a total of $?50,?00.

AN additional $50,000 has been found in Detroit, Brigadier-General Hancock's commissariat, and he is to be again indicted by the Grand Jury.

THERE was a severe earthquake shock at San Jose, Cal., on the 16th.

A STRIKE has been ordered by Judge Lawrence, of the Treasury, to the effect that that money paid by manufacturers for internal-revenue stamps which are destroyed or supposed to be, but were not, cutable, must be refunded in time.

LIEU. HENRY BERRY, of the Arctic relief ship Rogers, in his report to the Secretary of the Navy, says he found a whaler in Behring Straits with a crew of the 33d degree, North latitude, having wintered there. He found the northern ice at such a distance that it would not be possible to pass its edge. Lieutenant Berry says it was his intention to proceed to the coast of Siberia in search of a whaler reported to have left a harbor to winter in, and from which to send out sledge parties.

RETIRING officers at Carnelton, W. Va., have driven out miners employed in their stead, and threaten to do so to others if from going to work. Gen. Jackson on the 17th called out the militia. Serious trouble is threatened.

DURING the year ending June 30, 1881, the gross earnings of the Central Pacific railroad were $?5,?6?,?28?; the operating expenses, $?,?00,?00?; net earnings, $?,?81,?80?. The gross earnings of the Southern Pacific were $?,?98,?81?; operating expenses, $?,?00,?00?; net earnings, $?,?00,?00?. The gross earnings of the Northern Pacific were $?,?00,?00?; the operating expenses, $?,?00,?00?.

SECRETARY WINDOM has been a circular instructing tenant inspectors to see that every requirement of equipment is complied with in the case of steamers and vessels, in order to insure the greatest safety of passengers, and to see that all rules and regulations of the Board of Supervising Inspectors be strictly observed.

DIRECTOR HAZEN, of the Warner Observatory, discovered on the night of the 15th a faint comet in the constellation Cassiopeia.

THE Holden-Wilie match for the feather-weight championship of America came off in Boston on the 16th. The original meeting between the two men was to have taken place in Chicago on the 15th, but the authorities of that city refused to allow the fight to take place within its limits. Boston was then called and selected as to the circus to succeed. The meeting and Holden's defeat by the referee's decision were duly set forth in the Boston papers, and the match was declared off until the meeting of the 16th.

Foreign.

TOTTEN was in existence on the United States, from Bristol for Glasgow on the 16th, which carried away portions of the deck, killed nine persons and severely wounded several others. It is thought that the explosion was caused by fireworks placed on board by malicious miscreants.

ON the 19th the Pope sat in council with the federal Cardinals and Cardinal-in-Ordinary Cardinals, to consider the Irish question. They decided that the action of Congress in re-opening and considering the question was a violation of the Concordat between the Holy See and the United States, and that the duty of Congress is to explain and reconsider its action in the matter, and to pass such new legislation as may be necessary to put the Concordat into force.

DURING the week ended on the 12th the treasury of the Irish Land League received from the United States about $25,000.

DISPATCHES received from Alexandria, Egypt on the 16th report the cholera as increasing at Mecca and spreading to other Arabian cities.

A FIRE occurred in Cape Town, South Africa, on the 16th, causing a loss of $?50,?00.

THREE shocks of earthquake were felt at Arzon, Austria, on the night of the 15th. Shocks were felt at Naples, Calabria and Messina early on the morning of the 16th.

IT is announced that the Marquis of Lorne will return to Canada in about five weeks, with the Princess Louise, and will reside in the Vice-regally early next year.

THE census of Mazzanillo, in Mexico, was utterly wiped out of existence by a tornado on the 20th of October. The shipping in the harbor, with a stable exception, was also destroyed.

IN Ballina, County Mayo, the sub-commission of the Land Court sat for the purpose of hearing preliminary of rents, averaging fifty per cent.

THE complete annihilation of the village of Ems, in the Canton of Glarus, Switzerland, is reported. Many persons were killed and wounded. The shrunk of the past summer and winter. The shrunk of the past summer and winter. The shrunk of the past summer and winter.

THE Land Court should make Ireland an object lesson in the science of government. Its experience to the utmost, the service performed, without regard to the interest at which it is rendered, may be willing to carry them.

A DISPATCH from Cairo says that the Egyptian Government has refused to allow the American consular service to be carried on by the Americans, and has appointed Americans consular agents to be employed in the service of the Government. The Egyptian Government has refused to allow the American consular service to be carried on by the Americans, and has appointed Americans consular agents to be employed in the service of the Government.

JOHN BRIGHT, the veteran English statesman, was seventy years old on the 16th. Addresses were delivered and letters and telegrams of congratulation received from municipal bodies and a holiday in Rochdale, Lancashire, its birthplace.

WALLENSTEIN, a Kentucky horse, won the Shropshire handicap in the Shrewsbury, Eng., races on the 17th.

THE seizure of the German Reichstag was opened on the 19th with a speech from the throne.

A DUBLIN dispatch of the 17th says the land bill was cut off at noon by the action of the Government, and he is to be again indicted by the Grand Jury.

THE Industrial Leagues Tariff Committee convened in Chicago on the 15th and organized by the choice of Congressman McKinley, of Ohio, as Chairman, and Edward P. Isaacson, A. W. Barker and E. H. Talbot as Secretaries. Governor Dalton's delivered an address.

BUSINESS entered the house of Jesse Baldwin, at Cleveland, Ohio, on the morning of the 15th, blew open his safe and carried away nineteen $?0,?00 and $?0,?00 in gold and silver.

SOLICITOR-GENERAL PHILLIPS has been appointed Acting Attorney-General until regular appointment is made.

THE examination of Cashier Baldwin before the United States Commissioner at Newark, N. J., has developed the fact that Baldwin lost the bulk of the bank's money in stock speculations.

MR. SAMUEL W. WOOD, the newly-appointed British Minister to the United States, presented his credentials as Presidential Archive on the 18th. He was introduced by Secretary Blaine. The usual compliments were passed.

ON the representations that the citizens of Shenandoah, Va., had combined to prevent the re-allocation postmaster from assuming a place for an office, the Postoffice Department has deprived the town of mail facilities.

THE Industrial League of America, in session in Philadelphia, passed resolutions on the 18th favoring the encouragement of export duties so as to protect home industries, the reduction of internal revenue, and the promotion of American shipbuilding and shipowning interests.

THE annual report of the Merchants' National Bank of Newark, N. J., have been assessed 110 per cent. in Comptroller Knox.

THE Secretary of War, Hon. Howard Melville Gould's stockholders, is a constituent, and through the advice of counsel about $?,?00,?00 and then went to Europe during the war.

CLINTON H. NORTHAM, of Hartford, who fled recently, left he will to several Executive patriotic and establishments and charities, the sum of $?15,?00.

MR. JOHN MERRIMON, President of the Mississippi State Agricultural Society, and one of the most prominent agriculturists in the United States, died at his home near Baltimore, Md., on the 19th.

JAMES L. RICHARDS, since 1861 clerk in the Treasury Department, died during the summer of the Grant Indian I. O. O. F. at the Federal Hall, on the 19th.

THE summer residence of ex-Governor Curtin, at Bellefonte, near Philadelphia, was burned on the 19th.

Trial of Guiteau, the Assassin.

On the 19th, John Guiteau came at ten o'clock, followed by Guiteau handcuffed between two officers. The prisoner looked around the court-room, and, seeing his friend seated behind counsel, he nodded to him. Guiteau then took a seat and looked around upon the audience. Counsel for the defense announced that they were ready to proceed with the trial. Mr. Scoville then read the affidavit of Guiteau, in which he stated that he had been for imprisonment between the hours of 9 and 10 o'clock on the morning of the 19th. Before witnesses were called Mr. Scoville requested that Guiteau be allowed to sit with counsel. This was granted. Mr. Scoville then read the affidavit of Guiteau, in which he stated that he had been for imprisonment between the hours of 9 and 10 o'clock on the morning of the 19th. Before witnesses were called Mr. Scoville requested that Guiteau be allowed to sit with counsel. This was granted.

THE Industrial League of America, in session in Philadelphia, passed resolutions on the 18th favoring the encouragement of export duties so as to protect home industries, the reduction of internal revenue, and the promotion of American shipbuilding and shipowning interests.

THE annual report of the Merchants' National Bank of Newark, N. J., have been assessed 110 per cent. in Comptroller Knox.

THE Secretary of War, Hon. Howard Melville Gould's stockholders, is a constituent, and through the advice of counsel about $?,?00,?00 and then went to Europe during the war.

CLINTON H. NORTHAM, of Hartford, who fled recently, left he will to several Executive patriotic and establishments and charities, the sum of $?15,?00.

MR. JOHN MERRIMON, President of the Mississippi State Agricultural Society, and one of the most prominent agriculturists in the United States, died at his home near Baltimore, Md., on the 19th.

THE summer residence of ex-Governor Curtin, at Bellefonte, near Philadelphia, was burned on the 19th.

Trial of Guiteau, the Assassin.

On the 19th, John Guiteau came at ten o'clock, followed by Guiteau handcuffed between two officers. The prisoner looked around the court-room, and, seeing his friend seated behind counsel, he nodded to him. Guiteau then took a seat and looked around upon the audience. Counsel for the defense announced that they were ready to proceed with the trial. Mr. Scoville then read the affidavit of Guiteau, in which he stated that he had been for imprisonment between the hours of 9 and 10 o'clock on the morning of the 19th. Before witnesses were called Mr. Scoville requested that Guiteau be allowed to sit with counsel. This was granted. Mr. Scoville then read the affidavit of Guiteau, in which he stated that he had been for imprisonment between the hours of 9 and 10 o'clock on the morning of the 19th. Before witnesses were called Mr. Scoville requested that Guiteau be allowed to sit with counsel. This was granted.

The Platform of the Industrial League of America.

At the late session of the Industrial Leagues of America in Chicago the following resolutions were adopted and declared to be the platform of the Association:

Resolved, That the acts of the framers of the Constitution and the members of Congress in its first session plainly show that they established a protective policy, which has been the most policy of our Government, and when departed from such departure has always brought business stagnation and ill to the country. That it is the duty of Congress in its regular and extraordinary sessions to enact such legislation as will restore every branch of our industry, health, and business to its former prosperity, and subjecting no new industries among us.

Resolved, That a wise protective system necessary to the prosperity of the people, and should be adopted by the Government, and that our citizens and producers necessary from foreign competition by the imposition of such duties upon imported articles as may be necessary to protect our manufactures may be, a tariff for revenue only, and that skilled laborers and producers may have the largest employment and the highest wages.

Resolved, That we deeply condemn the recommendations of the late Commissioner of Internal Revenue for the entire abolition of internal taxation, and the reduction of the tariff on the 20th of October. The shipping in the harbor, with a stable exception, was also destroyed.

In Ballina, County Mayo, the sub-commission of the Land Court sat for the purpose of hearing preliminary of rents, averaging fifty per cent.

THE complete annihilation of the village of Ems, in the Canton of Glarus, Switzerland, is reported. Many persons were killed and wounded. The shrunk of the past summer and winter. The shrunk of the past summer and winter. The shrunk of the past summer and winter

EDITOR AND PROPRIETOR.

Guiteau's Insanity Point.

As the likelihood that Guiteau's Counsel will accomplish that the criminal wretch is playing the part of insanity for effect upon the jury becomes more pronounced he puts forward his own opinion of his condition. His conclusions, however, are interrupted by acts of the prisoner which impulsively disclose that the whole scheme of insanity and rapid talk of which he is playing [illegible] case may be, was his insanity would be evidence and competent, our part of the government would not be liable to impose him, more than another. [illegible] to his own mind as insane, [illegible] when he [illegible] he would not pay [illegible] lately refused the assistance of counsel with his characteristic and solved the [illegible] of science, which happened [illegible] months ago [illegible] communion with the murder.

If Guiteau is so insane that he is not responsible for his acts how is he [illegible] capable of conducting [illegible] case as well? If not is [illegible] entitled to counsel? When attacked by the counsel for the prosecution [illegible] and [illegible] with renewed him [illegible] and [illegible] not stopped, [illegible] has been [illegible] is it likely that the jury would [illegible] and not others other [illegible] [illegible] insolence and [illegible] [illegible] Has the threat of [illegible] had [illegible] effect upon him [illegible] the court [illegible] took the occasion to [illegible] that [illegible] it could not be done [illegible] common law [illegible] a proceeding, would [illegible] the [illegible] and if he was [illegible] would accept him [illegible] and [illegible] hurt in [illegible] This [illegible] and [illegible] the mind of an insane man.

On Saturday during the progress of the trial, Mr. Scoville has counsel announced that the killing was unlawful, whereupon Guiteau instantly exclaimed: "No the killing, your Honor, or about the shooting." Was drawing the distinction the declaration of an insane man? Was it not rather the declaration of a sharp man, relying upon the plea of insanity as one of the surest lines of defense which was in danger of being cut altogether by such a fatal admission?

Returning to his noisy and heckling performances, the miserable wretch himself, in one of his thoughtless lapses, betrays his purpose. Officer Eidelin, who has had charge of him to and from the jail, says in his statement that on Thursday last, while taking him to the court-room, he warned him against repeating those performances in court, as they were calculated to advise people against him. He encouraged promised to behave himself, but violated his promise. At the recess Officer Eidelin said to him: "What did you promise us about making a noise? You are getting the people all down on you." Guiteau promptly replied: "Don't think any one will take. I'm influencing the public mind in my behalf. There's not a man in the court-rooms that heard me to-day but will believe that I am insane. What do you have expected—namely that he was pleading insanity on the legal purpose of effect upon the jury—and suspected [illegible] there was nothing in his [illegible] of his morality, or in the atrocity which he committed, or in the unpleasing [illegible] to that shrewd insanity, he at last confesses to a heedless moment to the officer will [illegible] through daily [illegible] and [illegible] upon his [illegible] he became friendly and even confidential. If insanity is to be made the plea in defense, as Mr. Scoville has stated then the officer should be summoned by the prosecution to confute the plea with the prisoner's own declaration that he is feigning insanity to influence the public mind.

In an interview between a representative of the New York *Evening Post* and Dr. Allen McLane Hamilton, consulting physician to all the city insane asylums and to the State Insane Asylum at Poughkeepsie, the latter, after a very thorough analysis of Guiteau's case, said:

To sum up Guiteau's case, I should say that he was not insane, upon the following grounds: That while of an insane temperament, probably hereditary, he is intelligent enough to know the difference between right and wrong, the consequences of his act, and had sufficient mental capacity to control himself. I have read some of his political and religious speeches, and find full evidence of this in them, although at the same time it must be borne in mind that an intelligent speech is no proof of the author's sanity, because I often hear as brilliant talk inside madhouses as I do outside of them. Guiteau was not sane the day he wrote those addresses and insane the day he shot the President. He did not shoot in a fit of homicidal rage such as we see in some dangerous lunatics, nor under the influence of an all absorbing delirium. His manner since his arrest shows no signs of insanity, but points unerringly to the conclusion that he

The Wondrous Praiseallsas of the Insts in Modern Dress Fabrics.

Imitations of nature in surprising multiplicity are constantly to be met with as stuff in view at almost every shop window, either through design or imitation in by yet more interesting suggestion. The result is altogether curious and frequently charming. For items of form, color and texture appearing in the natural world thitherunto the presentation of fashion, in an important degree, and as never previously conceived in any fabric for dress, article or luxurious apparel now, early and late. In as even as dress vast silence natural relationship to all that has coming from now blend in art and authenticity, and with the relentless farness of nature expressed in a multitude of fresh and bewildering ways. The new popular lees resolve woven fabrics in an extensive application of novel complex schemes of fancy production. Examples of imitative fabrications, take that, for example, of plain colored, even surfaced Scheme plaid in imitation of the material covering of the Northern Aurora animal, sometimes, whereof hood developed in the market, yet has not been so. Most popular the designer's gaze in the fabric. The surface, it is found, may be thrown into ridges, like the folds of caterpillars and other creeping things, sweet with colors, or it may be dressed with many crests or cells covered in all by a glistening frost, as the shortage of Alps may be given, or for dressing a single design by one or more of the tints from pale rose to the tullest depths of red.

Apparently a rule for the weaver, as it is with nature, is that of charm in-volved with charm, so that from dark tricks with warp and wood result unmatched textile effects, as in the plaid, although not always beautiful, are an engaging manner.

Allied to this ripples of dress material dwelled by newer hands are darkening sandwiched relatively to increasing luster, and with tonal luminance spread broadcast without limit. The recent boring weight to so great a degree has illustrations in satins richly embossed with floral figures, some forming curved masses, alternating with open networks against the shining under surface, the latter being, as it were, of gathered and mingling sprays of mesh. The fabric may be, perhaps, the appearance of greenish gray moonor lichens in one, or that of wood-ash skin woven intricately with charming forms and repeatedly varied shades, or this again may be more gorgeous in color, and contrast as with ground of gold satin overspread with elaborately patterned embossment in copper-colored plush, the metallic lines being of the satin of various; leaning figures may be strewn over a surface of turquoise blue, and cream-colored grapes is figured with shaded magnolias most rare and delicate showing the merest purple touch, darkening to the full intensity of the natural hue, only in white. The ceiling is the lack of old wood and other old natural substances deserving la mosaic places, marked with grayish spots and mosses which more than anything else suggest age. Again, single colored fabrics, florally brocaded, some unlike textures to represent various parts of a flow-er's calix surface or vine or of grape-color is covered with large plush flowers, having their centers or perhaps other portions formed of gradually twisted filament in into a rare effect, giving a floss ingredient which the design. Textures of smooth silk may be brocaded with flowers in twill satellites with those of embroidery effect. In this latter style both silver and gold silk are frequently employed, either exactly or in combination, with simple varieties of silk; a colored silk fabric is covered with silver flowers, another of green color bears a profusion of golden sunflowers; a red brocade satin is brocaded with feathers in bronzed gold, and a rose lined silk is striped with brownish feathers clustered and glazed with gold and resting their outlines within the silk, on stripe, so that these rose spaces are defined by wavy lines. A flashing effect is produced in the mirora barcelet brocade, as it is named, and which, in its vivid suggestions measures fairly the result carefully in representation from nature. The material may have sometime a midnight ground overlaid with flaming flowers, young leaves folding outer-ward, and curving loads of gold thrown striking boldly out, or the ground may perhaps be blue, with great flowers in silver gray, folded one over another, and shaded and lightened cloudlike, with royal gold also centerings at their hearts.

The brush has wrought the rosy garlands softly on white moire antique, and this is regal effect forever when brocaded which alone would dare its trial. The bright lute needle, carrying as it might into the wonderful complex rhythm of nature, has flown unbrimply over webs of satin, leaving lighting chains of gold with a half-secreted trace of blue, dashed agreeably in moderation confusion, with large and small leaves formed of iridescent beads and cast with the middle. Fronts and trains of dresses are wrought thickly in the fashion-itself in pearls and crystal, yet these embroideries are cast more frequently on silken net in flounce or tablier. The heavier, however, is floral design with pearls in various sizes and colors and with green and gold sometimes combined may, perhaps, be seen over the blue satin front with proper colored flowers in the style being of Oriental effect. Another rich tablier is loaded with amber, crystals, pearls, cashmere and gold in tune. A flounce may be wrought with crystals and pearls in Oriental design of diamond clasps and starry flowers, with deep points at the lower edge surrounded by pearl-shaped pearls, beneath which fall a fringe formed of strings of pearls and crystals. Sometimes flounce-tie decorations may be in jet on black lace, either following a Spanish design of lace or a pattern applied in a unique manner. Sometimes the costumes have great curiousness of material forms; a salmon-colored satin may be draped with soft silken Spanish lace in front, to which hang small cocoons at intervals wound with gold silk, the over-drapery of cardinal-red silk at the back like a great pair of wings down upon the skirt. A green costume fit for a Second Empress around the lower part of the skirt three rows of deep chenille fringes like necoss, thick and soft in their satin bed, wholly concealing all beneath.

The Next New State.

The Democrats in Congress will make one of their habitual stupid partizan blunders if they oppose the admission of Dakota as a State. Dakota's claim to admission into the Union is just as valid as was that of Colorado, Oregon, Nebraska or Minnesota when those commonwealths were invested with self-governing functions, and a great deal more valid than was that of Nevada. If it is resisted by the Democrats, the real reason of their opposition will be the belief that the two Senators from the new State will be Republicans. They may talk about "rotten boroughs" as much as they like, but everybody knows that they would be eager to admit any Territory with had the population that Dakota has now if they could be assured that it would send Democrats to represent it in Congress.

There ought to be no question of party politics involved in the admission of a new State. The example of the admission of States by the reception of it is now number is a most important matter to be decided from the low point of view of party interests. If there is any domain of statesmanship which lies above the field of partisan contests and party prejudices, it is that which relates to the admission of each great interest and lasting consequence as the endowment of a body of new men and equal rights in the common brotherhood of the United States of the Union. Yet the Democratic Senators, at the first intimation of an intention on the part of the inhabitants of Dakota to prefer their application for admission as a State, are threatening to make the question a party issue and create a deadlock. A proposal to vote upon it in the Democratic caucus in advance of any formal action in the Senate, with a view to committing the Democratic party to a policy of hostility to the admission of Dakota as a State. Such a proposal is a sufficiently strong one. At her last census she had 135,177 votes, while Delaware cast only 16,318, a number a hundred years of State existence and a half of the population of the inhabitants of Rhode Island (seventy years, and only 21,360. Dakota is not a pocket, like Delaware, or a squatter from its diminutive size of for their growth, or a collection of precarious and shifting persons, like the Territory of Nevada. She can justly be compared with such great agricultural States as Iowa, Minnesota and Nebraska. There is nothing to check her further growth or to prevent her from taking her proper place in the Union. Her development during the past decade from a barren wilderness to the present mass of savages in a state and prosperous civilized community, with cities and towns, railroads and newspapers, vast areas of well-tilled farms, and over two thousand miles of railroads, has furnished an admirable example of the energy and power of the American race. A domain which the most powerful monarch in the Old World would be proud to acquire has been conferred from nature in a peaceful invasion of farmers and mechanics.

In June, 1880, the census-takers found 134,402 people in Dakota. The immigration of the summer and fall of 1880 and of the whole of 1881 has unquestionably brought the population up to at least 175,000. The increase is much too large, however, for a single year to be the result of the ramp of the States of Massachusetts, Connecticut, New York, New Jersey, Pennsylvania and other populous States. The question which will be brought before Congress next winter will be how large the southern half of the Territory, to perpetuate the southwestern section, and retain it from a State, leaving the remainder with a Territorial government. If the smaller area organization is decided upon, the new State will have no acreage greater than that of Iowa, and its population at the end of next year 1,000,000. Before she can exercise any power in National legislation her population will be equal in numbers to the average constituency of a member of the House of Representatives from the other States, and by the time she has an opportunity to throw the weight of her Electoral vote into the scale of a Presidential election it is safe to predict that her voters will number about one-seventh of the whole number of those entitled to cast ballots. There can be no question as to the loyalty of such a community as vigorous, intelligent, expansive and prosperous as those for the privilege of admission as a State. The Democrats in Congress unite in an attempt to keep Dakota out of the Union, the Republicans will be equally united in an effort to open the doors of the Union and let her in.—*N. Y. Tribune.*

Something New in Steam Navigation.

Yesterday a friend of mine from Indiana took me to see a wonderful skiff or steamboat on the Harlem river, and I consented to get on it and take a ride which I did. It is called the buoyant propeller, and consists of a steamboat fifteen or twenty feet long, propelled on glides of air. As you drive near you see some large yellowish globes, made of sheet-iron, revolving on an axle like any other wheel. There are little flanges protruding from the globes, which are also globe-shaped. As each globe on the deck causes these two axles revolve, the front axle having only one globe wheel on it and the rear axle having two. As they revolve any looker-age into the water is discharged at the stern. Consequently they can never tip. The inventor, a Mr. Freer, formerly an engineer on Saturday, means to build a ship this winter for ocean service on this plan somewhere on the Hudson River, which will be 265 feet long and have state-room accommodations for 250 people. The present ship moves on globes only six feet in diameter but an iron an arc being protected at every point there will be no slippage. I suppose the idea of this machine is taken from the spheres on which we live that go through the air quickly.—"Gath," in the *Cincinnati Enquirer.*

—A Kentucky paper says: "We pay nothing for the air we breathe, but we are taxed for the water we drink." The assessment realized from this source in Kentucky must be upwards of two dollars.—*Detroit Free Press.*

—The practice of lead-tooling still exists in Borneo, though it is evidently dying out in the region over which the Dutch have practical control. On this occasion: No comb is allowed to flow the locks of a young man, and he dresses to any Malay maid till he has been able to bring down three of his fellows or twenty feet long, propelled on glides of air. As you drive near you see some large yellowish globes, made of sheet-iron, revolving on an axle like any other wheel. There are little flanges protruding from the globes, which are also globe-shaped. As each globe on the deck causes these two axles revolve, the front axle having only one globe wheel on it and the rear axle having two. As they revolve any looker-age into the water is discharged at the stern. Consequently they can never tip. The inventor, a Mr. Freer, formerly an engineer on Saturday, means to build a ship this winter for ocean service on this plan somewhere on the Hudson River, which will be 265 feet long and have state-room accommodations for 250 people. The present ship moves on globes only six feet in diameter but an iron an arc being protected at every point there will be no slippage. I suppose the idea of this machine is taken from the spheres on which we live that go through the air quickly.—"Gath," in the *Cincinnati Enquirer.*

—In Brighton, Eng., lately, a sailor-ing organ was heard in a church. The sexton learned how to start but not how to stop it. The music went on until the first hymn. It stopped then, but just as the clergyman began the words "let us pray," the organ started and started a fresh tune. The audience joined in with a will, and some hearty singing followed. The unhappy sexton grew red in the face trying to find out how to stop it. At the end of the fifth verse of the second tune the minister got up again and said, "Let us pray," when "clack" went the machine, and off it started on another tune. So four of the strongest men in the congregation carried the thing out into the churchyard, where it continued to click and to play away for the rest of the day, going to its fortieth tune and the end of its rope toward evening.

The Democratic Party as a Scare-Crow.

A large number of plous people believe that the Almighty is able to bring good out of evil, and that He often makes the wrath of man to praise Him. It is certainly true that things which are continually and one maintains even mouthies were invested with self-governing functions, and a great deal more valid than was that of Nevada. If it is resisted by the Democrats, the real reason of their opposition will be the belief that the two Senators from the new State will be Republicans. They may talk about "rotten boroughs" as much as they like, but everybody knows that they would be eager to admit any Territory with had the population that Dakota has now if they could be assured that it would send Democrats to represent it in Congress.

There ought to be no question of party politics involved in the admission of a new State. The example of the admission of States by the reception of it is now number is a most important matter to be decided from the low point of view of party interests. If there is any domain of statesmanship which lies above the field of partisan contests and party prejudices, it is that which relates to the admission of each great interest and lasting consequence as the endowment of a body of new men and equal rights in the common brotherhood of the United States of the Union. Yet the Democratic Senators, at the first intimation of an intention on the part of the inhabitants of Dakota to prefer their application for admission as a State, are threatening to make the question a party issue and create a deadlock. A proposal to vote upon it in the Democratic caucus in advance of any formal action in the Senate, with a view to committing the Democratic party to a policy of hostility to the admission of Dakota as a State. Such a proposal is a sufficiently strong one. At her last census she had 135,177 votes, while Delaware cast only 16,318, a number a hundred years of State existence and a half of the population of the inhabitants of Rhode Island (seventy years, and only 21,360. SCHOOL AND CHURCH.

—In Minnesota there are ninety-four Episcopal churches, with eighty-three clergymen, 5,961 communicants and $247,477 worth of church property. The contributions last year amounted to $87,386.

—Owing to critical health the Rev. Judson Kumler, Secretary of the Foreign Board of Missions, has been granted a six months' leave of absence and a thousand dollars with which to pay the expenses on a trip to Europe.

—The California Methodists have begun to raise a million memorial fund of $10,000 in memory of the late Bishop Haven, who died in Oregon, but per-fectage the library, cash-box, etc., of the University of the Pacific.

—The Seventh-Day Baptists have ten native families connected with their mission in Shanghai, China. The newspaper has now three times assumed its present size, two native bible readers, and a Bible woman. Two day schools are also flourishing.

—President Isselyn Jarvis, with gratification of the success of the new system of self-government at Amherst. The faculty agree that they have never known so much faithful and conscientious work, with such healthy results, has been done in this college.

—"The English Wesleyans cherish as a valuable relic the pulpit Bible which was used by John Wesley in his open-air services. It is a quarto volume, and which is now bound down to such wretchedness of condition that it can be carried and used by him during his year of office.

—Rev. Dr. Sheldon Jackson, D.D., of Presbyterian Church, has been appointed by the Board of Home Missions, has just completed his third year of service. Since last report he has organized 17 churches, and has now nineteen, stationed three new missionaries, built two houses for the missionary buildings and traveled 5,000 miles.

—Professor Lawrence, educational Bishop Penick, of Alaska, says that four out of seven white children in the territory have been born since the Russians left. The Russian priests have left a good name behind them. Bishop Penick has established a mission at Sitka, and has now a church, a school and a hospital. He has also established a mission at Sitka, and has now a church, a school and a hospital. He has also established a mission at Sitka, and has now a church, a school and a hospital. He has also

Charlevoix Sentinel.

CHARLEVOIX, NOVEMBER 19, 1880.

WILLARD A. SMITH,
EDITOR AND PROPRIETOR.

Now that the need and excitement attending the election of President, Congress, etc., is a matter of past history, it is a fitting time, and proper that we should express our esteem for our fellow countrymen and sympathizers on the Republican side and the Dominion of Canada, should it be necessary. If no other good result comes from the undertaking off of one late President, at least it seems to have been the means of bringing a veritable deluge of the Hebrew persuasion, governing the financial destinies of the world. Where we have had one or two families of Jewish descent, we now number at least three hundred, and the increase is almost beyond computation, at the present rate. The love of a mother is proverbial, and those who once proved her devotion to their cause and took upon themselves the sacred care of aboriginees must have undoubtedly could not be done otherwise. The cost of that incident to all such, Emma Lazarus Queen, the sympathetic poet of the Hebrew subjects, mingled with the universal sympathies in America. Such an example of loving kindness, and true christianity has done more to bind in indissoluble bonds of friendship the two great nations of the world, than all the diplomatic missions prepared at the Vatican, or Constantinople can ever do, in the interests of the lowliest and homeless Jewess, a part of certain American affairs.

There seems to be a doubt that the Republicans will organize the next House of Representatives, electing the Speaker, and all the subordinate officers. Should the Republican candidates be successful Gen. Arms in John Bascom, of Columbus as one time Librarian of the Senate, Edward M. Johnson of New York, Edward McPherson of Pennsylvania, and ex Congressman Barnes of South Carolina, are mentioned here for the chief Clerkship.

Shortly after the failure of Marquett's National Bank of Newark, N. J., it was assessed 100 per cent. Gen. Gary and Comptroller of the Currency Knox, to meet the bank's indebtedness.

Rusk fell in the former Republican district of Wisconsin. At the election he received 123 votes for Hon. Reed Bentley, and Julian for Governor, and 1 for W. D. Democratic nominee.

A St. Petersburg paper informs the Russian world that President Arthur was an Irishman who was driven out of Ireland for his anarchic doctrines and seditious doings.

A Philadelphia firm is building a sixty tenth ocean steamship, which is to be named the *James A. Garfield*.

The thermometer in Northern Minnesota marked 8 degrees below zero last Tuesday morning.

Dr. Hamilton, of New York, has been summoned as a witness in the Star trial.

Mrs. Garfield received no less than 1,000 Michigan fire sufferers.

Grand Rapids tells "Gus almost 600 telephones.

Leadville now has a population of 20,000.

Strayed!

Sidewalk Notice

[illegible] Charlevoix, Nov. 15, 1880.

[illegible] Monday, the 15th day of November, A. D. 1880, at 10 o'clock a. m., at the office of the undersigned, in the village of Charlevoix, in said county, for the purpose of receiving proposals for the construction of sidewalks in said village, as directed by the Common Council of said village, and that said proposals will be opened and considered by said Council at their meeting to be held at the office of the undersigned, on the 15th day of November, A. D. 1880, at 7 o'clock p. m. of said day. Plans and specifications of said walks may be seen at the office of the undersigned. HENRY COOPER, Jr., Clerk.

Nov. 17, 1880.

NOTICE is hereby given that the undersigned has been appointed by the Probate Court for the County of Charlevoix, Executrix of the last will and testament of Joseph Thompson, late of the township of Hayes, in said county, deceased. All persons having claims against the said deceased are required to present the same to the undersigned, at the office of Hannah, Lay & Co., in the village of Charlevoix, in said county, for examination and allowance, within six months from the date hereof. Dated this 15th day of November, A. D. 1880. MARY THOMPSON, Executrix.

SHERIFF'S SALE.

[illegible] Charlevoix, ss. By virtue of a writ of fieri facias, issued out of the circuit court for the County of Charlevoix, to [illegible] Hannah, Lay & Co., plaintiffs, against the goods and chattels of Hiram Thompson, in said county, to me directed and delivered, I have taken all the right, title and interest of the said defendant in and to the following described goods and chattels, and will expose the same for sale at public auction or vendue, to the highest bidder, at the front door of the store of Hannah, Lay & Co., in the village of Charlevoix, in said county, on the 15th day of December, A. D. 1880, at 10 o'clock in the forenoon of that day, subject to redemption on the first Tuesday in January next, as provided in the statute in such case made and provided. Dated this 6th day of November, A. D. 1880. EDWARD COOPER, Sheriff. MILO GATES, Attorney.

THE GREAT APPETIZER TONIC, AND COUGH CURE FOR COUGHS, COLDS, CONSUMPTION, BRONCHITIS, ASTHMA, And All Diseases of the THROAT, CHEST AND LUNGS.

The BALSAM of TOLU has always been one of the most important ingredients entering into the Red Cross Cough Syrup, and for many years has been considered one of the above diseases, but has never been so advantageously compounded as in Lawrence & Martin's TOLU, ROCK & RYE. The Balsamic properties of Tolu combined with the Tonic properties of Rock & Rye, make a medicine unsurpassed for the cure of all diseases of the throat, chest and lungs. It is a pleasant appetizer and tonic, and acts directly on the blood, purifying and building up the system after the cough has been relieved.

GREEN B. RAUM, Commissioner of Internal Revenue, Washington, D. C., Jan. 26th, 1880, says: "TOLU, ROCK and RYE is recognized as a Medicinal preparation under the U. S. Revenue laws, and is entitled to be sold by DRUGGISTS, GROCERS, and other persons, without special tax." no license.

CAUTION! Don't be deceived by dealers who try to palm off Rock and Rye, etc., when it is the only MEDICATED article of the kind. The genuine has their name on the Proprietary Stamp on each bottle.

Put up in Quart Size Bottles. Price $1.00.

BREVITIES.

—R. B. Osborne is [illegible] a store and put on his counter.

—Dean Hardison is planning to put up a [illegible] store.

—Mrs. H. B. Robinson, of Ironton, and [illegible] of Boyne Falls.

—Dr. Lamb is getting up a Grand Masquerade Ball for New Years.

—Dr. Pinney has sold his interest in the Charlevoix City House this week.

—Geo. Miller, son of Benjamin Miller, is the new Post Master at St. Jacques.

—Mrs. Walter Mowery, after a long illness, died at Jordan Wednesday last.

—Hon. Charles H. Wright, of Harbor Springs, recently took a fine deer last week.

—N. Smith now sells the best Royal Grade and will guarantee it to suit you.

—Mr. H. Bartlett's subject never fails for coming with the Commercial Woman's band.

—Joseph B. Hyma has nearly completed a house on his farm, south of the village.

—Mr. A. B. Hayes received a letter from Mr. Hannah, Lay & Co., of Traverse City, stating that he has purchased the Clara Belle, paying for her the sum of $4,000. Friday evening a meeting was held in the interest of the new owners, and in the presence of Capt. Hayes it was decided to run the Clara Belle between Traverse City and Charlevoix. The Capt. will be retained in the employ of the new owners, and in the present arrangements he will be in command. The Clara Belle is a fine boat and will be kept in good condition. The owners will run up the summer make an excursion rate on her, and put her in shape to her own taste. It is not a matter of question as to who will command the boat, but a powerful undesired [illegible] and manipulate the engines.

The Clara Belle and Gazelle will undoubtedly afford to the people of Charlevoix and Antrim Pine Lake regular facilities for passage and transportation of freight, which will soon be opened, and are congratulations are now current on this fortunate event.

Hymns From Hayes—By Gun.

Last one Saturday evening at the residence of Asher Norman by the Rev. P. W. Gates, Miss Phoebe to Mr. Miss Jennie Norman. No cards.

Hayes is now at a railway at least, B. H. Bartlett having extended a tramway line his mill to the woods.

Mr. Jones, of Glen Mere Pavilion Annex, Charlevoix, to Hayes by excursion. They can't chew it in Detroit.

Tom Sherry has moved into his new house, and had a house warming last Friday night.

The ladies are spending the Sabbath in knitting, fishing and performing manual labor that can be avoided is to be condemned. We are informed that a deer, during the [illegible] of an hour, a few Sabbath's ago, in a white man who was [illegible] hunting, but as the Indian said an observer of God's holy day, the animal hence had to wait until the next day when the Indian helped him capture the deer, which suffice one in favor of civilization.

Mark Smiley said his 40 acre farm, on Sec. 11, for $600, or a party from outside. There is one man in Hayes must wash his face, or a worse than a conglomeration of sandwich, sausage cheese, sour kraut and smoke.—Plow!

The German circus at Washington, is a disgrace to the American people.

We do not know whether the Town Board of Hayes have a monthly session or not.

A Card.

CHARLEVOIX, Nov. 20, 1881.

I wish to thank the citizens of Charlevoix for their endeavors to save my cottage from destruction by fire last Monday, and in the name of J. Howard Friend, of Dayton, Ohio, thank them for preserving his cottage (the Morse cottage) from the fate that nine met with. Their acts will be remembered by both of us.

Yours Respectfully,
G. E. BARBERS.

Congress rise in regular session yesterday.

This witness his or will this other day when he thought Guiteau was not deranged his very badly arranged.

Congressman Kelley, of this, has been nominated by the Republicans for Speaker of the House of Representatives.

Jesse Baldwin, an eccentric old farmer living near Youngstown, Ohio, recently went to Washington, presented $50,000 in Government bonds, and demanded and received gold coin for them. He took it home, and a few nights ago burglars visited his house and robbed him of the whole amount.

The Humptious Boy.

It seems to be pretty well agreed upon by those lu critics that the boy as a household institution is not an object of unalloyed delight, although he is to be classed as a necessary evil. Of course that applies to everybody's boy but our boy. Our boy is not the ordinary boy at all, but a boon boon, an unmixed good, the sunny ray, the mango nonsuch —although the neighbors may declare him to be St. George and the Dragon too, since nothing to his path is left alive.

It is in bad manner inevitably to be active, leaping, laughing, living, the grass bows and humbles and leaves full play, the healthy lungs full cry. A boy is any sort of a boy must be noisy and must make an atmosphere of commotion about himself and his boots, his toys, his guns or his want of all those and like things. If he satisfied and relaxed under his breath we should think something was the matter with him, and expect him early to his nurse, and so, if our nerves are in tolerable health and nobody is really ill in the house, we suffer quite all he racket, and stir, and would not have one sound, one echo the less of his calling and pounding and shouting, and bouncing and slamming and if other folks object to his wrongs and rights ourselves that his affairs are none of other folks' business, and look forward to the time when they will regret their inability to perceive the greatness of the man that was fobbed in the boy to await its timely development.

But this is merely the common lot in North America, and Jane in Maine or Jane would say—this is only our boy and your boy. There is something about this one differing from the normal and generic boy. He is not the cold-pressed boy, the bud boy or, worse than all, the others for daily use and comfort. He is not the humptious boy. Two of his things in a family, short of a menagerie, scrolls and hassocks, the humptious boy is the most remarkable.

The humptious boy is always several years older than the family bible register mentions, and he is always older than he shares upon you every day by means of his sublime performance. While your own other boy, devoted youth, he consents to himself already a man, and as far as he can acts up to the assumption, his tongue is to every dialogue, his opinion is profferred upon every topic, his advice is forced upon you, whether the affair be mammoths or trifling. He receives your gentle rebuke before you can do it yourself; he takes the burden of their cisterns meant to entomb the cankery with the air of Dr. Kitchener; he is gallant to the housewords, who banner him because he is so delightful; he affects the air of society, makes calls on amused ladies, has engravers' cards if he can get them, smokes a fine about his lines; his correspondence increases voluminous, and he is overrun with occupations and engagements. He apologizes for appearing to neglect you he offers to do you services with his superior facilities; he pretends to the confidence of people that he knows you respect; he commences their peculiarities, too, he opens the morning paper and peruses it, whether his elders wait for it or not, and assumes where to live the level of the sea. They are the upper, middle and lower, and are from ten to fifteen miles apart, in their order. The upper or great grandmamma to the most senior. Here are located the great sources, conspicuous among which are the Giant, Giantess, Bee Hive, Castle, Grand Corner, Saw Mill, Elbow and Cuts, and last, by no means least, Old Faithful. These are all appropriately named. For instance, the Giant and Giantess are so called because of the immense size of their craters and the force of their action; the Bee Hive and Castle because of the peculiar formation of their cones, the Saw Mill and that from the roaring noise they make when in a state of activity; and Old Faithful, because she discharges her chambers of steam and water at regular intervals of sixty-four minutes. The tourist can rely as absolutely on Old Faithful giving an exhibition every hour and four minutes as he can upon the rise of the sun at the time specified in the almanac. Our party has been camped here ten days, and in each time Old Faithful has been as regular as a Connecticut clock. The exactitude of her activity have not varied in the memory of the oldest habitue of the park. Other geysers are variable in the time of their action. In fact all of the others seem to be subject to changes. The Bee Hive is becoming more active every season. She now gives an occasional throw up to three times every twenty-four hours, with no pronouncement on account of the weather. The Giant and Giantess and Castle can not always be counted on, but there are all worth watching for when they make a magnificent display when in action. The least averages an exhibition about every six days and the greatest about every eleven days. The Bee Hive is reported with a throw up to-day, so who knows but my mind to pitch his tent for two weeks and watch through the day and weary vigils of the night, but in the end he will be fully compensated for his perseverance in the Land Beyond.

As the tourist has rolled up in his mind the final hour of night in this romantic region, he may feel the earth tremble, hear the rushing of water and the hissing of steam, and, if his way back out of his tent, he may see near at hand the column of steam and water that may be, limned in shadow outline against the starlit sky, a column of beauty in the day time and at all circumstances and from 100 to 150 feet in height, possessed by those qualities of elasticity and saying among farmers that crows cannot count more than three, but this horse has the ability to count sixty-five. His routine of labor is to carry sixty-five loads of coal from the pit to the spot where the clay is mixed or ground, and then to go for a load of only three, and now, without anything being said or done to indicate the fact to him, when he has deposited his sixty-fifth load he turns away from the clay pit and goes to the place for a load of the three. This is not his only peculiarity, for when he goes to the pit he backs the cart up himself to the right place and will take only what he conceives to be his proper load. If more is put on the backs and kicks and rattles the cart about until the load is reduced to what he considers a proper quantity. Having such intellectual capacity, it is not surprising to learn that he will not be driven. As soon as the lines are tossed let be becomes fractious and unmanageable, but a gentle explanation of what is required of him has the desired effect. It is unnecessary to add that such an intelligent horse will do no more work after the whistle for dinner or supper sounds. All his companions in the yard have wit enough for that, and if there are on the way to the pit for a load when the whistle blows they all turn about and make for the stable without any orders, pointer The tourist can rely as absolutely on Old Faithful giving an exhibition every hour and four minutes as he can upon the rise of the sun at the time specified in the almanac. Our party has been camped here ten days, and in each time Old Faithful has been as regular as a Connecticut clock. The exactitude of her activity have not varied in the memory of the oldest habitue of the park. Other geysers are variable in the time of their action. In fact all of the others seem to be subject to changes. The Bee Hive is becoming more active every season. All his companions in the yard have wit enough for that, and if there are on the way to the pit for a load when the whistle blows they all turn about and make for the stable without any orders, pointer

A Tough Horse Story.

A certain horse in Sayreville for twenty years has been a customer in a brickyard, and the habit of going home at noon instead of during day after day for eight months in the year has established him in things which seem to indicate the possession of mental faculties similar to some of those possessed by the human race. It is an old saying among farmers that crows cannot count more than three, but this horse has the ability to count sixty-five. His routine of labor is to carry sixty-five loads of coal from the pit to the spot where the clay is mixed or ground, and then to go for a load of only three, and now, without anything being said or done to indicate the fact to him, when he has deposited his sixty-fifth load he turns away from the clay pit and goes to the place for a load of the three. This is not his only peculiarity, for when he goes to the pit he backs the cart up himself to the right place and will take only what he conceives to be his proper load. If more is put on the backs and kicks and rattles the cart about until the load is reduced to what he considers a proper quantity. Having such intellectual capacity, it is not surprising to learn that he will not be driven. As soon as the lines are tossed let be becomes fractious and unmanageable, but a gentle explanation of what is required of him has the desired effect. It is unnecessary to add that such an intelligent horse will do no more work after the whistle for dinner or supper sounds. All his companions in the yard have wit enough for that, and if there are on the way to the pit for a load when the whistle blows they all turn about and make for the stable without any orders, pointer

The Great Geysers of the Yellowstone.

There are three geyser basins located in the valley of the Fire Hole River, at an average elevation of 7,000 feet above the level of the sea. They are the upper, middle and lower, and are from ten to fifteen miles apart, in their order. The upper or great geyser basin, to the most senior. Here are located the great sources, conspicuous among which are the Giant, Giantess, Bee Hive, Castle, Grand Corner, Saw Mill, Elbow and Cuts, and last, by no means least, Old Faithful. These are all appropriately named. For instance, the Giant and Giantess are so called because of the immense size of their craters and the force of their action; the Bee Hive and Castle because of the peculiar formation of their cones, the Saw Mill and that from the roaring noise they make when in a state of activity; and Old Faithful, because she discharges her chambers of steam and water at regular intervals of sixty-four minutes. The tourist can rely as absolutely

The Effect of Malone's Victory.

The Richmond organ of the Virginia Bourbons boasts that the result of the late election in that State was a victory, not of the men who would settle the debt on the plan of readjustment or any other plan, but of the Republican Party and the negroes. It declares that the negroes care nothing for the debt question, and would vote against any settlement that would in their opinion "lead to a renewal of the white men of Virginia." There were, it says, "more important issues" than readjustment involved in this election, the object of the Richmond journal is to appeal to the dying prejudices even in the hope of reuniting the white men of the State on the color line, and its admissions are significant. The majority of the Readjuster Republicans for the Malone movement was certainly based on a conviction that there were issues involved in the contest that were richer and more important than the debt question, but, for the present, at least, it is sympathy with the Readjusters or with any party that has raised any such issue or presented the subject. They are perfectly willing that the victory should be credited to the principles of their party against which the Bourbons have always contended and have been successful in the mortgages in the face of the fact that they do not believe in the principles which have been the life of the Republican party. The Bourbons have always been dominant, and in this way have succeeded in perpetuating the antagonism of races, and what is needed is to wipe it out. But fortunately the law relating to white men as well as blacks. It represses freedom of opinion and of suffrages with the liberty of citizens to act according to their own convictions. It is impossible to stop progress and the development of material interests. South Carolina and other Southern States are trying to induce immigration to their borders, which would tend to counteract the effects of a large proportion of enfranchised negroes in their population, but immense repulsion to emigrants of the best character. It is a blight upon every State that forces it, and the people are beginning to see it. They will not be long deterred by the bugbear of "negro domination" from throwing off the galling reality of Bourbon domination.—*N. Y. Times*

A railway only eighteen inches wide is on exhibition at the United States Mint, which is not intended to be a freight, nor even a passenger railway, or, indeed, a railway at all in the ordinary sense of the word. It is a railway for ants, and is an almost perpendicular arrangement, of 1,000 feet. Two men who can blow strong enough nerves to walk part, but, but the attentively cruelty of "cousin Jack," as the local style is. The fundamentals of James Zern in attempting the passage when the ground was a sheet of ice and, thereupon, he imagined. He slipped, fell and was drifted on down on the frozen ground more than a quarter of a mile below.

The Southern Press on the Virginia Election.

The comments of the Southern newspapers on the Malone victory in Virginia are various and instructive. Some of the more supercilious or less thoughtful organs, such as the Memphis *Appeal* and New Orleans *Picayune* and *Times*, gloomily aver that the election was to be carried legitimate outside of its relations to the debt question. The *Appeal* says that the triumph of the coalition "will make any war upon State or National credit not only repugnant, but popular," that the Republican party has become the open advocate of repudiation, and so given the lie to all those persons abroad and at home who have always contended that it would be ruinous to the public credit. The *Picayune* says that the success of repudiation will be a calamity to the whole country, and that it will be curious to see what defense the Republicans will make for their action. The *Times* says that the victory of the Readjusters is a victory for repudiation

Judge and Culprit.

It is not usual to Judge Cox before whom thieves are being tried to say that he is making the punishment the country need exceeding the larceny as much as necessary. Persons who have observed the recent course of this Judge it was not unexpected. The only point leaving was before Him. And he was soon prepared. He went with their lawyers who unanimously deemed the most prompt such by the attorneys for the prisoners and at accounts followed the court with round after round of applause when they were ordered for all cases. It seems disgusting exhibition for counsel to go of which was a judge either to work at his service to preserve the dignity of his court in enforcing decorum within it. In the Gotham case, Judge Cox laughs by threatening to remove him from the trial. The person on trial is charged to be the thief and at present is posing out to the court the illegality of such proceedings. Judge Cox may have been influenced by this, or by anything else casting doubt upon his right to prosecute his threat, but though the outrageous behavior of that case has been continued, the judge has not proceeded to execute his purpose.

In making this remark and in failing to proceed upon it Judge Cox has brought himself into contempt.

His next move was quite as foolish. He declared he would have Guiteau gagged unless he promised silence. His power to do this is undoubted. But the wisdom of the move is questionable. Vile as he is, Guiteau has a right to consult with his counsel during the progress of the trial, or to have any by very important his first move is to kill other points and to exercise this right, and to deprive him of it would not be looked on with favor throughout the country.

But it may be asserted if he is deprived of the power of consultation, or in his own defense, gagging is made necessary by his own misbehavior. All this may be admitted and yet the direction to gagging Guiteau would not be removed.

Suppose he is gagged and the spectators and jury looking upon him without sympathy, writing letters down to trial for his life, with his hands manacled behind his back, without which gagging is useless, and a painful gag down across his jaws depriving him of distinct utterance, but not of the power of bellowing?

Certainly not. Such a spectacle would move a heart of adamant. And the first impression it would make upon a jury is this: This man must be insane or he would not be necessary to torture him. Then by resorting to this extraordinary step Judge Cox will do much to prepare the country for a verdict of acquittal on the ground of insanity.

The court has a more powerful weapon at hand than either of these threats. Let it say to the jury a grammar cannot make evidence for himself to their prejudice.—Let him say to them this prisoners have pretended insanity in the presence of jurors for the purpose of influencing, and that they must regard nothing on the case but the evidence given them from the mouths of sworn witnesses. This will do more to put an end to Guiteau's masquerading than all the threats Judge Cox can make.

But this is not all of Judge Cox's objectionable work. He believes the prisoner insane. At least so it is reported. Yet nothing short of this can account for the manner in which he parades Guiteau in unwholesome evidence in his own behalf. And he has gone further in opposition to an unexpected effort to evidence by his pretended lawyer witnesses to testify as to their opinion of the prisoner's insanity. He permitted an inexpert witness, who held a conversation with the prisoner in jail, to testify as to his opinion of his responsibility on the day he killed the President. And he has gone so far as to put another inexpert witness to testify as to his opinion of whether the prisoner's condition was such as to render him "irresponsible for the commission of a crime."

Certainly all or all, making the action and rulings of the Judge, with the contemptuous comfort of the prisoner, the country has never witnessed so humiliating a spectacle in a court of justice.—*Detroit Post and Tribune.*

The Virginia Readjusters will repeal the state poll tax. That will add 30,000 to the Republican vote next year.

In his forthcoming annual report the Postmaster General will recommend faster mail service between the Atlantic and Pacific coasts.

The veteran New York editor and politician, Thurlow Weed, celebrated his 81th birthday on the 15th. The hearty congratulations of his friends poured in upon him, and the rooms of his residence in New York were heavy with the perfume of flowers which had been sent him.

Patrick McGovern of New York the Fenian, fugitive of soaring a bright red grave veil. Wonder he's hung before we see one in Big Rapids?

Gen. Cass, who headed the Republican State ticket in New York at the recent election and had some votes than any other candidate, is an Irishman and a Catholic.

It is announced that J. Howard Wells, Jay Gould's blackmailer, is a commissioner who defrauded the Government of about $2,000,000, and then went to Europe during the war.

Thurlow Weed has voted at sixty annual elections. Hesaw he has cast more votes than any other living man in New York city, yet there are reporters there who will not believe him.

The P. O. Department has issued an order that from and after the 1st of February, 1882, postal cards spoiled in the hands of private parties shall not be redeemed by Postmasters.

Baltimore has a new city ordinance making it unlawful for any person to sell, give away or dispose in any manner of what is known as the "five cent cigar pool" within the limits of the city.

Venner in his weather prophecies, says of December: "Thus I believe will be one of the Decembers that will cause no query of the oldest inhabitants as to when or there ever was such a December before."

Paper bags to the number of 1,000,000,000 are used yearly in the United States. The combined capacity of eight of the principal factories per day is 3,000,000. They are sold for a small fraction over the cost of the paper.

A prominent citizen of Atlanta says that if the question was submitted to the people of Georgia whether they would have another cotton mill or a Democratic Governor, they would vote for the cotton mill. We don't believe him, however.

"Father, did you ever love another woman besides mother?" "No, my boy, what possessed you to ask such a question?" "Because I saw in the old family Bible where you married Amos Bowen in 1856, and that isn't mother, for her name was Sally Smith."

ADJOURNED.

Mrs. Barnard, of the Murder of Sarah Curtis, is Adjudged "Not Guilty."

The trial of Mrs. Barnard charged jointly with Mrs. Curtis, with murder in the first degree near the latter's residence in Bear Creek township, on the night of Dec. 31st, 1883, by poisoning her husband, Mr. Curtis, who died on the following day, was brought to a close on Thursday evening last, by the jury rendering a verdict of "Not Guilty." All the parties accused are well known here. We entered a synopsis of the report from the Detroit Free and Tribune.

When the prosecution first closed its case, we felt sorry for the defendant, as the testimony was not strong enough to convict, but when the defense closed its case, we changed our opinion entirely, and felt confident that the jury would bring in a verdict of "Not Guilty." Judge Jayne's charge to the jury was very fair, and left the matter entirely in the hands of the jury. The jurymen retired to their room at 5 o'clock, and after remaining there for about two hours, they came into court and announced that they could not agree, and were discharged. The record of the case, however, will be made up and submitted to the Supreme Court, and a decision obtained from that source.

Sheriff Sawyer and Deputy Sheriff Curtis, of Antrim county, arrived here on Monday morning, and took charge of Mrs. Barnard, and started with her for Grand Traverse county, where she will be confined in the county jail at Traverse City, pending the decision of the Supreme Court. Mrs. Barnard's many friends in this county will be pleased to learn that she was discharged from custody, and will be glad to welcome her back to her home in Antrim county.

Mrs. Barnard, while in this county, was the guest of Mrs. Sheriff Sawyer, and by her kind and courteous manner, won the friendship of all with whom she came in contact. Mrs. Sawyer and family will be pleased to welcome her to their home whenever she may feel disposed to visit them.

Mrs. Barnard, while in this county, was the guest of Mrs. Sheriff Sawyer, and by her kind and courteous manner, won the friendship of all with whom she came in contact. Mrs. Sawyer and family will be pleased to welcome her to their home whenever she may feel disposed to visit them.

BREVITIES.

—Summer on the ground.

—Capt. Jimmy Aldrich is on sick list.

—Schools are still closed in K. Beaths township on account of diphtheria.

—Just think of it! Pensaukee wants a town water and lumber.

—The Petoskey water works are expected to run water this week.

—Kalkaska county has not a licensed saloon or bar within its boundaries.

—A daughter of R. C. Watson, of Ironton, is dangerously ill with diphtheria.

—Rev. Mr. Davis is subject next Sabbath evening will be "Our Influence."

—Capt. Smith has abandoned the idea of making another trip with the Sea Gem.

—Dr. Lewis has been employed town physician of the Township of Hayes and Marion.

—The Township Treasurers have the assessment rolls, and tax payers begin to put on long faces.

—The assessors are now out for the Grand Traverse Bay which is to come off on the 27th of the month.

—The Cross Village and Beaver Island mail carrier, Harry Slade, has sold out his interest and gone.

—Contracts are let for the Mackinaw extension of the G. R. & I. and the road will be completed next June.

—I bought a Meat Ax, one purchased the last at Boyne Falls and will receive it that place early next fall.

—James S. Morris, the newly appointed census enumerator for this county, was in town on the 11th inst. He will commence work on the 1st of June.

—The people of Traverse City are to be congratulated because of the fact that they have secured Professor Cook to fill the position of Superintendent of Schools for our city.

—Professor Cook left for the south on the 11th inst. He will spend the winter in Florida, and will return to Traverse City in the spring.

—Byron W. Wilson has just added to the possessions of a steam yacht, and has christened it the Gem. It will hereafter be known as the Sea Gem.

—The Herald says the Hannah, Lay & Co. mill will produce and sell as much flour this winter as the mill at Boyne Falls did last year. Where is the market for it?

—Will H. Green, of Boyne Falls, is now in the employ of the Hannah, Lay & Co. mill at Traverse City, and will have charge of the flouring department of that mill.

—The Traverse City Herald, in speaking on the probability of a three cent fund tax this year, says that the assessment will be one of the heaviest ever made in that county. With the small crops and Michigan Central land grants, the tax will fall heavy on many farmers.

—Lawrence Hall is a lost boy at Bellaire. He ran away from his home on Antrim Mountain, Monday, Wilson Hall's birthday, and was captured by Constable Hall. He was taken back to his home on Antrim Mountain, and will not soon forget the trip. He is a bright little fellow, and we hope he will become a good citizen and a credit to his parents.—Bellaire Leader.

—Mr. Alexander Stevens has a small boy named Willie, who runs Mr. Stevenson's threshing machine. He has already commenced operations—operations on a small scale, and which will not attract much attention. The boy is a hustler, and we hope he will meet with success in his undertaking.—Petoskey Republican.

—The Petoskey Manufacturing Company have commenced the work of getting out logs for their mill, which will be run next season. They have a number of men in the woods now, and will undoubtedly have a large amount of logs cut before the snow leaves in the spring.—Petoskey Republican.

—Mr. Wm. Mann received a letter from his brother, who has settled in Dakota, stating that he had been elected Justice of the Peace, and had been appointed Notary Public. He also stated that he had been offered the position of Deputy Sheriff, but had declined it.—Petoskey Republican.

—Mr. Wm. Mann received a letter from his brother, who has settled in Dakota, stating that he had been elected Justice of the Peace, and had been appointed Notary Public. He also stated that he had been offered the position of Deputy Sheriff, but had declined it.—Petoskey Republican.

—The Petoskey Republican says that Mr. and Mrs. Carlton will move into the vacant house at Bellaire, N. Y.

—The contractors of the new steamer for the Manistee Mill Company have commenced work on the vessel and will have a staff of 25 men employed during the winter. They expect to launch the vessel about the middle of March next.

—Capt. Hiram Bowman, who has been in the employ of the Inland Lumber Co. for the past two years, has severed that connection and will hereafter be found at the helm of the steamer Sea Gem, which he has purchased of Byron W. Wilson.

—Byron W. Wilson has just added to the possessions of a steam yacht, and has christened it the Gem. It will hereafter be known as the Sea Gem.

—The Boyne City Herald says that the Michigan Central land grants will cause the sale of many farms next season. Many farmers who have been unable to meet their payments will be compelled to sell out, and many will be induced to buy on account of the low prices.

—Mr. Alexander Stevens has a small boy named Willie, who runs Mr. Stevenson's threshing machine. He has already commenced operations—operations on a small scale, and which will not attract much attention. The boy is a hustler, and we hope he will meet with success in his undertaking.—Petoskey Republican.

—The Petoskey Manufacturing Company have commenced the work of getting out logs for their mill, which will be run next season. They have a number of men in the woods now, and will undoubtedly have a large amount of logs cut before the snow leaves in the spring.—Petoskey Republican.

—Mr. Wm. Mann received a letter from his brother, who has settled in Dakota, stating that he had been elected Justice of the Peace, and had been appointed Notary Public. He also stated that he had been offered the position of Deputy Sheriff, but had declined it.—Petoskey Republican.

The French President at Home.

It is to the remarked of M. Grevy that he is an eminently correct President; he gives his master of the ceremonies far less trouble than M Thiers. The latter delighted to have a military guard, and to be received by a roll of drum wherever he went. He put on the cross of the Legion of Honor as soon as its cause ceased, though in no one's case more deserving than his own. He was only a grand officer of the army before, he required that announcers, on introduction, should name him the three customary bows, as to a sovereign, and he expected that all the honors paid to himself should be rendered to his wife likewise. But then M. Thiers, when he was giving audiences in the mornings, kept rushing out of his study every quarter of an hour to say who were waiting to see him in the anteroom. He shook hands with some, scolded others, made severe war for way between per nditor who might be present, giving him precedence over dukes or archbishops, and talking with this or that gentleman in that shrill falsetto of his about the views which he desired the other to promulgate. When he gave dinners, again, M. Thiers could not be prevailed upon to sit without his gown on, thinking that the customary series of courses, with many intervals between, was a cut off of a joint, with some vegetables and a few spoonfuls of jam, which when he dined alone was his fare, which he did in ten minutes, no other friend silent the room or retire with him the next one to take a nap. If he lingered longer than usual, the table-cloth was to start under the mistaken impression which made his guests uncomfortable, and all this was very grievous to the master of the ceremonies. Marshal MeMahon and servant on appearing in public during the time of Governor Generalship of Algiers, and minister the empress of the Tuileries, was obliged by the etiquette or the Elysee was included on that of the Elysee during the Imperial. The servants wore the McMahon liveries of gray, scarlet and silver, with aiglets and pouches. There was always an aide-de-camp in full uniform and an officer of the colonial guard in attend at the Marshal's antechoom; and the Duchesse herself was constantly attended by one of two ladies-in-waiting, when the President and Duchesse went to the races they and their suite occupied two, sometimes three, carriages, with four horses, which were preceded and followed by outriders, and when they traveled they used the saloon carriages which had been built for the Emperor.

President Grevy neither keeps so much state as the Marshal nor transgresses the minor law of etiquette so cavalierly as M. Thiers. Before coming to Elysee he has inhabited apartments in the Palace of Versailles, by virtue of his position as President of the Chamber of Deputies, but his style of living was of the simplest, and his attire was that of a country gentleman. He never wore a high hat or gloves. He had a "property" hat, which was kept under his desk in the Assembly ready to hand, in case it became necessary to "cover himself," and thereby to express a resolution sitting abruptly, but in the streets he wore a wide-awake. He was very fond of strolling about the boulevards for hours at a time, looking into the shop windows; and he was passionately fond of billiards, nor did he care when he played with. One of his favorite opponents at this game was M. Pinel de Cassagnac, with whom he has not an idea in common. One of the rules of the Place and he never exchanged political views while making carom shots, agricultural and music are the topics on which M. Grevy converses with most pleasure, but he is a wide man, who talks no more than is necessary to make the time pass, and he never lets conversation run into argument. When he became President M. Grevy had a grant in his wide-awake hat in boulevard strolls, and to moderate his ardor for billiards. His most frequent companion at this game has been of late M. Wilson, who is going to be his son-in-law. M. Grevy, as President, also had to don the broad ribbon of the Legion of Honor, but he did not do this until after much hesitation.

M. Grevy's salary is £20,000, and he probably lives within it. Marshal MacMahon, on the contrary, spent a great deal more than his salary. Besides keeping up a large establishment of servants and many horses and carriages, he entertained a good deal. He used to give at least a couple of dinners a week, whereas M. Grevy scarcely gives one a month. M. Grevy has as many servants as the Elysee requires, but not one over. They live in black, like the hotel waiters. The President's coachman wears black, without any livery, and the carriages he drives are small, plain broughams, black, and with dark blue wheels, and no coat of arms. The table is the say drawn by a couple of bays. When the President has to attend a great equestrian pageant, as when he distributed new flags to the army last year, he has a harness with four horses, but he has no outriders. His cook, too, is no great artist, receiving the salary of a Prefect, like the famous M. Trompette, who lords it over M. Gambetta's cuisine at the Palais Bourbon. All the housekeeping arrangements at the Elysee are under the control of Mdlle. Grevy, and will remain so" after her marriage, for she and her husband are going to reside in the Presidential palace.—*St. James Gazette.*

About Money Orders.

"Had you come a little earlier you might have witnessed an incident, or rather a coincidence, which could not but convince the most skeptical that we are living in a progressive age. The remark was made to a reporter of the *American* by Mr. A. J. Dougherty, the veteran pay-clerk in the money-order department of the Baltimore postoffice the other day, as the reporter stopped at his desk to ask if there was "anything new." The reporter remarked to ask for a further explanation. "Well," continued Mr. Dougherty, "I was in the act of cashing two money-orders, presented respectively by a tinman, who had received his from the eastern section of Penuia, and a son of Erin, who had received his from Bedford. At the same moment my attention was called to the fact that a Chinaman was at the receiving desk, immediately opposite, applying for a money order which he intended sending to San Francisco. Here was money being sent and received to and from extreme sections by natives of different countries at one and the same moment. Now, was't that a little singular?" The reporter admitted that it was, and then asked, "Do you ever have any trouble or complaints about money orders?"

"Very few and even these are generally on account of the ignorance of the uninstructed parties regarding the functions of the order. As an instance, a German came in here one day, and, approaching me very angrily, said that this was a fine way of doing business. He had gotten a money-order some five days previously, made out in favor of his wife, who was in Philadelphia, and who desired to come home. His money was to pay her fare. She had, however, never received it, and consequently to borrow from her friends enough to come home with. I thought this rather strange, and, entering our dockets, he suddenly plunged his hand into a capacious pocket, saying, that he could prove his assertion by showing his receipt, and to, and behold, he drew forth a receipt for the order. Of course I knew where the trouble was, and when I explained to him that he should have sent the order to his wife, he seemed dazed at first, then his face broke into a broad grin, and, with the remark, I always thought I was a fool, now I know it, went away satisfied that he was one. I could tell you half a dozen such incidents."

According to recent statements," said the reporter, "there appears to be a large amount of money on deposit in the Sub-treasury at New York."

"Before you go any further," said Mr. Dougherty, "I want to say that there is some misunderstanding regarding that money. The amount that is on deposit in New York alone. In this, however, I think they are mistaken, as many more millions are held in money orders from all over the country, and some of the orders date back to the time of the organization of the money order department, now about seventeen years. The new York Sub-Treasurer says as well as the domestic exchange, and all surplus is sent to the Treasurer at New York, who in turn deposits the moneys in the Sub-treasury at that city. The money orders which become invalid, one year after date are sent to the department at Washington, where they are placed on file. In the meantime, should the payee present himself at the office after that time we make application on his behalf to the department at Washington, which then authorizes us to make the payment."

"You say that you send all surplus funds to New York, how do you manage when you run short?"

"That is something we never allow to occur, and in fact from the systematic manner in which everything is arranged such a thing can not occur. The money-order system is nothing more nor less than an immense banking concern, in which there is no capital invested and none necessary. I have already told you that New York is the exchange. The smaller offices send their surplus to the nearest main office, whence in turn the entire amount is forwarded to New York. At the same time every office, large and small, has an account with the Postmaster at New York, and is credited with a certain amount, which it can draw when necessary. When this amount is exhausted a renewal of the account is necessary. Now our limit is $10,000, and I draw for $2,000 at a time as I need it. When this amount is exhausted I make application for another $2,000, and in this way we are always kept supplied. During the great panic in 1873, when the banks were not considered safe, we transmitted an immense sum of money, in the shape of money-orders, and I paid out at this office $125,000. This is what is termed a payless office; in other words we pay out about five times as much as we receive. During the last year we cashed 30,918 orders, amounting to $1,853,767 45, and we issued 28,249 orders for $978,116.10. As the business is continually increasing, these amounts will be swelled considerably by the close of the present year."

"Have you many invalid orders on hand at present?"

"Only a few, and these will be sent to Washington in a day or two. I have about $1,500 worth, however, that are unclaimed—that is to say, they have been lying here for many years. There is a lot, all belonging to one man, and here is another, belonging to a single individual. They are merchants, well known here, but do not seem to be in a hurry to get their money. One of these I allowed a couple of orders to remain longer than one year, and thinking that his money was lost, he gave his orders—one for fifty dollars and another for one hundred—to a friend, who came particularly to make use of them. The lady came here and asked whether these orders were all right. Upon being informed that they were, she thought that an excellent joke on her husband. I made application for her, and in two days she had her money."—*Baltimore American.*

Reconciled Before the Ink Was Dry.

A very unusual scene was witnessed in the Shelbyville, Ind., court room the other day, as the result of a divorce, the plaintiff being a Mr. Sandufer, was on trial. The defendant made no defense, save for the custody of a child. The divorce was granted. Almost immediately Sandufer and the woman rose from their seats and withdrew to a corner of the court room, where they engaged in earnest conversation. Very soon the officials and spectators noticed the couple were visibly moved by what had happened, for tears rolled down their cheeks. Soon the pair embraced, then kissed each other, then repented it over and over, clinging to one another with all the tenacity of youthful lovers. Men tittered, women cried, and the Judge grew indignant. Rising from his seat he ordered Sandufer and the woman capable of such demonstrations as the one just made could live together, and taking up his pen, he drew it across the docket, erasing the decree, then making them man and wife once more. They left the room in a happy state of mindman, who had received his from the eastern section of Penuia, and a son of Erin, who had received his from Bedford. At the same moment my attention was called to the fact that a Chinaman was at the receiving desk, immediately opposite, applying for a money order which he intended sending to San Francisco. Here was money being sent and received to and from extreme sec-

The Schoolmaster.

The curiosity that I have to show you touchy, children, is perhaps the most wonderful in the collection. He beats all.

The schoolmaster it is said, trains the young idea how to shoot. He is not himself given to shooting, however. He takes more delight in the rod than the gun.

The schoolmaster is not a military man, but his youngest assistant is. The name of this assistant is Corporal Punishment. It is to be hoped that the corporal will soon be promoted to private life.

The schoolmaster is sometimes called a tutor, and occasionally he is called an ass. On the whole, an astuter man is seldom found.

The schoolmaster thoroughly understands the rule of three, but always locates upon the rule of one. So you see his understanding is out of all proportion to his rule.

Although the schoolmaster is a ruler of boys, he has his own ruler. He is no stick himself, his ruler always is.

The schoolmaster is a very ingenious person. He is fond of asking questions. His is a question-able calling.

The schoolmaster can be found in all classes. He is also given to classifying knowledge. I sometimes think I would be in his classify could.

The schoolmaster is good at figures. He would cut a pretty figure if he were not. He is the figure-head of the school, or should be, but sometimes a boy gets ahead of him.

He is also good at spelling. He can stand a long spell in a good situation without bleeching.

He is always correcting the errors of his pupils, and consequently has lots of time to correct his own.

The schoolmaster is not a man of war, but he often employs a monitor. He would be all at sea without his monitor. He gets the monitor to see in his place.

O alas mischeivlay, children, or the sea of the motion shall overwhelm you.

The schoolmaster teaches the A B C, but he cannot make a boy see.

Every sort of allegy is taught by the schoolmaster, but tautology is no better coming from him than from anybody else.

In a school of young rascals the schoolmaster is always the principal.

Some schoolmasters are actuated entirely by the love of love. They mean business. Some entirely by hate to hate to grow them up.

The schoolmaster loves to have called even his school; but habit has so possessed him that he even calls the rules of scholars, but also scholars his callers.

I used to wonder at the schoolmaster's range of salary, but my school days are well never return.—*Boston Transcript.*

A Poetical Proclamation.

Governor Long, of Massachusetts, issued the following poetical unique Thanksgiving proclamation:

"Whereas, It is a common and ancient custom to set apart after the harvest a day of public thanksgiving and prayer; and whereas, The Legislature, I, John D. Long, Governor, by and with the advice of the Governor Council, appoint therefor Thursday, the twenty-fourth day of November next.

"Duty Thee, O God, do we give thanks! Thou restest in the valley of watercut it. Thou blessest the springing thereof. Thou crownest the year with thy goodness. The pastures are clothed with flocks; the valleys also are covered over with corn; they shout for joy, they also sing."

"Blessed is he that considereth the poor."

"Come unto me all ye that labor and are heavy laden, and I will give you rest."

"In gather of the fruits and flowers,
When corn is ripe for sickle hours,
We bless the Lord for this and more
We thank the work of Thine!

"Apart from Thee we plant in vain
The seed that hopes to grow;
Thy rains and Thy later rain
May sun and dew we sow.

"Our toil is sweet with thankfulness,
Our hearts are light and merry;
The blessing of Thy harvest home
Is on the spreading prairie.

"And still with reverend hand we call
The gifts such wise renewed;
The seed is always beautiful—
The beautiful is good."

The Biter Bitten.

Getting up a "corner" in pork, wheat or corn is not a modern device. Years ago, when the city of Milwaukee was but a territorial town, with only one thousand five hundred inhabitants, a speculator thought that he could make a large amount of money if he could get and hold control of the salt there was in town. So he bought every barrel he could find and stored it. Having, as he thought, a corner, he put the price up to ten dollars per barrel. Unfortunately for the speculator's profits, another citizen heard of the speculator's purpose, and saw therein a chance to make an honest penny. He despatched a schooner to Chicago for a load of salt. The winds were propitious, and the schooner with her load was soon at the good citizen's dock.

Onmorning a farmer came into town for a barrel of salt. Going to the speculator's he was asked the dollars a barrel. "Salt has risen," was the only reply vouchsafed to the farmer's request. He, however, would not pay that price, and soon discovered that there was a schooner-load of salt for sale at the dock at twenty shillings a barrel. Having purchased a barrel he returned to the speculator and telling him of his purchase, demanded that he take it back.

"You must have stolen the salt," said the speculator, "for there ain't any salt in Milwaukee for less than $10."

"O, there ain't! O no! Let me tell you there's a schooner load of it at Swett's dock."

"Then I'm ruined!" exclaimed the speculator, as he rushed out to verify the statement—and he deserved to so.—*Youth's Companion.*

Some cannons raised at the Swiss colony in Grundy county, Tennessee, are finely developed and of superior quality. Silk culture is beginning to receive considerable attention at the colony, and is becoming a very important and successful industry.

For Young Readers.

MEETING OF THE BIRDS.

The hunter said had called them all.
The birds arrived, the large, the small;
The cock, the cuckoo, the chicken, Robin,
In grand assembly, but didn't sob.

The robin, friend of mankind, came
Not up to mark: a few remarks
Were made on many things, and so,
Bob Bobbin and gold Peter to address.

The goldfinch, in a speech of power,
Then thought it much too soon for flight;
But blamed Joseph for these cages,
And wrote thought this was very wise.

The blackbirds said they'd stay with us;
The swallows said they'd leave us;
The bluebirds and the martins
Thus time the summons they refused most.

The owl this question put: "Am I
To stay or not?" and then he cried,
All but the sparrows were to go,
Then chose a vote decided "No."

"Ah, farewell!" then the owl "added,"
"Ah, farewell!" then the sparrow said,
"Ah, farewell!" then the swallow said,
"Ah, farewell!" then the martin said,
"Ah, farewell!" then the robin said,
"Ah, farewell!" then the bluebird said,
"Ah, farewell!" then the cuckoo said,
"Ah, farewell!" then the chicken said,
"Ah, farewell!" then the goldfinch said,
"Ah, farewell!" then the blackbird said,
"Ah, farewell!" then the sparrow said,
"Ah, farewell!" then the cock said,
"Ah, farewell!" then the hen said,
"Ah, farewell!" then the turkey said,
"Ah, farewell!" then the goose said,
"Ah, farewell!" then the duck said,
"Ah, farewell!" then the gander said,
"Ah, farewell!" then the peacock said,
"Ah, farewell!" then the peahen said,
"Ah, farewell!" then the guinea said,
"Ah, farewell!" then the guinea hen said,
"Ah, farewell!" then the pigeon said,
"Ah, farewell!" then the dove said,
"Ah, farewell!" then the parrot said,
"Ah, farewell!" then the parrot said,
"Ah, farewell!" then the canary said,
"Ah, farewell!" then the linnet said,
"Ah, farewell!" then the lark said,
"Ah, farewell!" then the nightingale said,
"Ah, farewell!" then the mocking-bird said,
"Ah, farewell!" then the eagle said,
"Ah, farewell!" then the hawk said,
"Ah, farewell!" then the vulture said,
"Ah, farewell!" then the crow said,
"Ah, farewell!" then the raven said,
"Ah, farewell!" then the magpie said,
"Ah, farewell!" then the jay

Guiteau's Fatal Assumption

Guiteau has exploded the theory of his counsel that he was "insane" when he killed the President. He has shown that he knew what he was doing, for fighting for a higher position than he ever occupied in his life. He has shown that he knew that he was committing a crime against the laws of God and man, for he has attempted to conceal his guilt. He has shown that he knew that he was committing a crime against the laws of his country, for he has attempted to escape the penalty of his crime. He has shown that he knew that the punishment for murder is death, for he has attempted to escape it. He has shown that he knew that he was killing a man, for he has attempted to conceal the evidence of his guilt. He has shown that he knew that he was killing the President of the United States, for he has attempted to escape from the scene of his crime. He has shown that he knew that he was killing the President of the United States, for he has attempted to escape from the scene of his crime. He has shown that he knew that he was killing the President of the United States, for he has attempted to escape from the scene of his crime.

EDITOR AND PROPRIETOR.

From the Chicago Tribune.

Guiteau's Fatal Admiration.

Guiteau has explained the history of his brother-in-law, Mr. Scoville, that he is not looking forward to the escape of Guiteau. The assassin has, throughout the trial, evinced no weakening of confidence. He shows the average of nerve, pluck and coolness, which especially has been distinguished by all lines of crime we have ever had among us, and upon which those conversant with the criminal mind estimate of Guiteau's mental condition rest by those who know his case that he will not let his counsel save his neck for him. Guiteau's long and not wholly unsuccessful contest of wit with the most skilful cross-examining lawyer in the public show ring in the country is not entirely without foundation. He has shown that he is a remarkably bright man, and he has shown also that he is a man of tremendous nerve. Death on the gallows has no terrors for the prisoner. His conviction is also here. He knows that his counsel can do nothing for him—that the salvation of his life depends solely upon his own effort, and yet he never speaks down to the ignoble necessity of escape.

It is plain that Guiteau did not look for success in life and has been accustomed to vagabond for years. Scoville's statement that he was unable on the 20th of May to get in his pockets enough to cover an unpaid board bill is not to be doubted. What has caused his downfall? His ungovernable temper and his great want of moral principle. Guiteau has the temper of a fiend, and this temper will not permit him to hide the fact that he is without the restraining voice of a conscience. A man with a sense of manhood and virtue would, the first shrink from living in a house devoted to his very sight offends, and the country had cried him, because he is a villain, pursued to consult his villainy.

Judge Porter is an acute lawyer, a true citizen and student of character. His pen would be set silently in order and long to assist, studying him as a naturalist examines the leaves of a plant. In this examination he found out Guiteau's burning ambition, passion, rage. But he did not unnecessarily provoke Guiteau into a paroxysm. He indulged his vanity, led him, into the domain of self and passion, exhibited his bright intellect to the jury as he could have shown them a picture, merely pointing out its excellencies by means of questions. Guiteau did the rest with his sharp retorts, his quick ejaculations. But suddenly, as without reflection, the great lawyer hurled at Guiteau, as it were the words "murder" and "kill," and the dark background of the picture was disclosed as if by the glare of an electric light. The villain winced, for "murder" under the law, is death to the assassin. And the assassin knows the law, knows to what crime the death penalty attaches, and knows that he has committed the crime.

These awful words—"kill," "murder"—startle Guiteau, and he instantly realizes that beneath the latently gloved hand of Judge Porter the claws begin to appear. Judge Porter wants the witness' life, for if there has been a murder, there is imminent danger of a hanging. Guiteau has a theory that he "removed" President Garfield by "inspiration of the deity, and that therefore the Deity, not he, is responsible. But Judge Porter plainly has a very different theory, indicated by the use of the word "murder." It is this difference of opinion that Guiteau cannot endure from anybody under any circumstances—it cuts his blood tossing, and he retorts fiercely: "You seem to delight in the use of the words 'kill' and 'murder.' There's no use in your wrangling in this way. The more outward fact how I removed the President has nothing whatever to do with the case." Judge Porter did not smile with satisfaction, but he knew then that he could compel the assassin to speak the truth, because he had roused him to passion and fury.

Guiteau thought from certain questions that Judge Porter wanted to prove in law that his motive for killing the President was his failure to receive the Paris Consulate, and of course he denied that it was any such thing. But, lying under the influence of passion, he testified clearly to a motive. "I would not have taken the Paris Consulate after the 1st of June," exclaimed the assassin "if I had been appointed to it and the President and Secretary Blaine had both prescribed on on their knees to take it. I had at that time resolved to remove the President for the good of the American people." So much has been said of Guiteau's motive for assassinating the President being revenge on account of his failure to receive an appointment that he forgot, in the heat of passion, that what the jury requires to know in order to convict him of murder is not that his motive was revenge for failure to receive the Paris Consulship, but that he had a well-defined motive; that he was of sufficiently sane mind to entertain a motive. And in this one sentence Guiteau furnished the evidence, and all the evidence necessary, to establish his sanity. I-

John H. Gough's New Book

"SUNLIGHT AND SHADOW."

Five years ago Gough's famous book, "John B. Gough was engaged in writing a new book, the appointment has been watched for with intense interest. It has recently been published, and the successful author affords a striking instance of the success that is sure to be awarded to a really good work. Although only just published, over twenty six thousand is already printed, and the sale alone is worthy of notice, for a book which sells like this must be one of extraordinary interest.

John B. Gough, the author of "Sunlight and Shadow" is also well known to readers in this county here. Thousands are familiar with the history of his life, his early poverty, the death of the dear mother to which he demanded while a victim to drink, his wretched condition and terrible sufferings, his superhuman struggles against intemperance, his reform, his release, his engaging of the pledge and the final victory, his work with Jesse and his extensive travels and protracted labors in this country and abroad. Thirty-five years ago Mr. Gough first published his autobiography. He had been two years and from it, as an unprejudiced observer, it was very interesting upon the career which has since made him so famous. In 1870 a new edition of their work, with additional considerations was given to the public. It contained a history of the early life, with some incidents of his career as a public speaker. It-

NEWS SUMMARY.

Important Intelligence from All Parts.

Taint of Guiteau, the Assassin.

Guiteau was taken quietly to the asylum here on the night of the 23d in the most secluded manner possible, the unusual fact engendering a rumor that the murderer had escaped. He could hardly become accustomed to his new quarters, which are a small cell, with a window, a bed, bolted floor, etc. The night was no different from the day, as there was no darkness. The lights were kept burning all night. Guiteau's meals were brought to him from the hospital. He was allowed to walk in the corridors, but was not permitted to converse with any one. He was also denied the privilege of reading newspapers. He was visited by Dr. Godding, his spiritual adviser, and by his counsel, Messrs. Scoville and Reed. He could not be induced to converse about the shooting of President Garfield. He said he was willing to die, and that he was prepared for death. He was not allowed to receive letters, but was permitted to write them. He said he would write a book, and that he would make a great deal of money out of it. He was very much depressed in spirits, and was constantly weeping. He said he was a lawyer, and that he was not insane. He was visited by his brother, Dr. Guiteau, of Chicago, and by his sister, Mrs. Wilcox, of Oneida, N. Y. He was also visited by Mrs. Scoville, wife of his counsel, and by Mrs. Reed, wife of his counsel. He was not allowed to receive any presents. He was not allowed to have any knives, forks, or anything with which he could commit suicide. He was not allowed to have any newspapers. He was not allowed to have any pencils. He was not allowed to have any pens. He was not allowed to have any ink. He was not allowed to have any paper. He was not allowed to have any envelopes. He was not allowed to have any stamps. He was not allowed to have any books. He was not allowed to have any magazines. He was not allowed to have any pictures. He was not allowed to have any photographs. He was not allowed to have any drawings. He was not allowed to have any paintings. He was not allowed to have any statuary. He was not allowed to have any music. He was not allowed to have any musical instruments. He was not allowed to have any tobacco. He was not allowed to have any liquor. He was not allowed to have any wine. Foreign.

BOSTON, one of the last persons attended another Guiteau session in the police court, was found guilty of disorderly conduct and assaulting an officer while he was intoxicated. He was fined $10 and costs, amounting in all to $20.

MARIO, editor of a Roman newspaper, has been sentenced to a year in the penitentiary and a fine of 1,000 francs for writing articles against the Pope. The publishers, Gardenzi, and Mme. Cairoli, were each fined 500 francs.

THE elections on the 16th resulted in Lord Penrhyn, whose tenantry were Unionists, and Assheton Pownall, Conservative, being returned unopposed. Both were elected on the 17th. Eight vacant seats remain undecided.

A FURTHER dispatch of the 23d says that over 1,000 refugees of the county of Roscommon had arrived in Liverpool. Among them were a dozen new families of the land leaguers who had been evicted and shipped to Liverpool, but subscriptions to the Land League funds were given no increase.

THE Standard and Land Journals on the 24th say as early as back as there were but two or three cases of cholera in Europe, and that the epidemic existed in Asia and Africa. Now it has appeared in Spain, France, Italy, Germany, Austria, Russia, Hungary, Turkey, Egypt, Algeria, Tripoli, Tunis, Malta, Sicily, Sardinia, Corsica, Greece, Switzerland, Belgium, Holland, Denmark, Sweden, Norway, Portugal, Great Britain and Ireland. Of these countries Spain, Italy, Russia, Austria, Hungary, Turkey, Egypt, Algeria, Tripoli, Tunis, Malta, Sicily, Sardinia, Corsica, Greece, Switzerland, Belgium, Holland, Denmark, Sweden, Norway, Portugal, Great Britain and Ireland, and Germany have been the most severely afflicted. The epidemic has appeared in Asia, Africa, Europe, America, Australia, and the islands of the sea. It has appeared in the cities, towns, villages, and hamlets of the world. It has appeared in the north, south, east, and west of the world. It has appeared in the old world and the new world. It has appeared in the ancient world and the modern world. The United States Mint.

WASHINGTON, November 22.

The annual report of the Director of the Mint, which will be laid before Congress when it meets in December, contains the following interesting statistics in regard to the production of precious metals in the United States and in the world, and other matters connected with the coinage of gold and silver, and the operations of the mints and assay offices during the fiscal year ended June 30, 1881, compared with the previous year:

The

THE SENTINEL.

CHARLEVOIX, : : MICHIGAN

NEWS SUMMARY.

Important Intelligence from All Parts.

Trial of Guiteau, the Assassin.

Guiteau was taken to Court in the forenoon of the 14th of November, and the jury and counsel in the case were present. He was in his usual seat, and was engaged in writing. He was told to stand up, and Judge Cox read the indictment. Guiteau was asked if he had counsel, and replied that he had. He was asked if he was ready for trial, and replied that he was not. He was asked when he would be ready, and replied that he would be ready in about ten days. He was told that the Court would assign him counsel, and he replied that he did not want counsel assigned him. He was told that he must have counsel, and he replied that he would not have counsel assigned him. He was told that he must have counsel, and he replied that he would not have counsel assigned him. He was told that he must have counsel, and he replied that he would not have

Strayed.

Strange as it may seem, Ohio has never had a speaker of the Lower House of Congress till now.

Gen. Mahone says Virginia raises too many statesmen and too little grain. Virginia is not alone in this respect.

It was bad for Guiteau when Scoville put him on the stand. No crazy man ever made so sharp a witness as he did.

Mark Twain's new book, "The Prince and Pauper," has been published in Germany in advance of the American issue.

Dr. Holland's poem, "Bitter Sweet," had the largest sale of any poem ever published in this country—250,000 copies.

Supreme Court of the United States decides that a Sheriff who sells a retail's mandate is not liable, personally, for damages.

The total debt of our Government, less cash in the Treasury, on the 1st of December, was $1,378,286,410 on reduction of $62,310,473 since June 30, 1881.

Mrs. Barnard, recently acquitted in the trial for murder, at Charlotte, has just been "banned" from the Baptist Church at Greenville by her intolerant brethren and sisters.

The Guiteau trial progresses. No new developments have been brought out, but the evidence during the week all goes to prove the prisoner's sanity, and point unmistakably to a conviction.

Connection was made last Thursday between the Texas Pacific and the Southern Pacific Railroads, near El Paso, Texas, which gives the Mississippi Valley a third all-rail connection with the Pacific coast region.

Cotton Kansas is not to be given over under physicians' certificates. A correspondent says one patient, whose sole complaint was a boil on the arm, had prescribed for him in 11 days, ten pints of "spiritus frumenti," and 20 bottles of beer.

John Kelly, "boss" of Tammany, which is the "boss" of the New York Democracy, says he has no notion of retiring from politics. John ought to know, and probably does, quite as well as his anti-Tammany brethren, what he intends to do.

Within four weeks, six more different banks—one in Newark, N. J., one in Boston, Mass., one in the Dominion of Canada, and one in Kansas—have so failed as to prove that their cashiers and managers were lending the bank money dishonestly. The aggregate of these defalcations approaches six million dollars.

The Crazy Fits of Elephants.

"Of all the mad elephant's, Hannibal, I think, was the worst," said the late Gunner, the veteran showman at Barnell's. "Most elephants recover from a spell in within a few days, but Hannibal—well, he would keep on a tantrum for weeks and months at a time. The longest spell he ever had began early one morning by Jumbo treading on Hannibal's trunk, which was hanging limply over a pole. While traveling with Raymond and Waring's managerie from Pawtucket to Fall River, the broke away from his keeper and ran the highway thirteen miles, smashing everything he could. Talk about elephants being large! Hannibal looked as big as a locomotive that morning. The keeper attempted to quiet him, but he only made matters worse. The first vehicle the mad elephant met was a heavily laden hearse with mutes. He smashed the coach, killed the horse, broke the driver's arm and scattered the corpse of mutton along the highway. Two vegetable wagons were next in line, and these were killed, the drivers escaping unhurt. When the boy of his path was made. Hannibal was found beneath a tree on the road side completely exhausted, and for the time being quiet. Look chains were secured, and for many weeks afterwards he was kept under the strictest surveillance. To approach him during this period was dangerous, as he would rush madly at you in Burlington, Vt., I found a number of women and children getting into what he was swinging on cars in evident amusement. Then I knew the spell was broken, and I did not fear to be safe and tractable the balance of that season.

"Hannibal was the most vicious elephant that ever trampled with a show. In 1875, while we were at Connellsville, Ohio, a keeper was killed by the pool of water. He drank the water pleasantly and then, suddenly seizing his head struck the man with his trunk. The poor fellow was also crushed to death. At Williamsburgh, N. Y., in 1876, he took a fit and pounded the keeper into a cornmeal, when he got excited in tossing the hundreds, and was subdued in his darkness. Up to 1881 Hannibal was ruined for his unchangeable good nature. In those days old "Pat Desmond used to say he couldn't get "50" bad enough to draw the stake to attack. He was constantly on show him this day." Pat was and the stake and handed out candy to fourth of a pound. Hannibal would make a peaceable know at the same hour next morn. Meantime she kept constantly busy by a generous big dish of often business, which is not only lucrative and valuable, but is a flattering index of the estimate set upon her talent and legal knowledge by those who have marked the proficiency which she displayed as a graduate of Boston University.—*Rockaway Herald.*

—The New York *Commercial Advertiser* informs a correspondent that preaching pay better than humorous writing. Perhaps it does; but humorous writing is not so unhealthy as preaching. Anyhow, the humorous writer is not compelled to take an annual vacation of three months, or a European tour, for the benefit of his health.—*Norristown Herald.*

SCHOOL AND CHURCH.

—A new museum is to be built for the University of Michigan at a cost of $20,000.

—Bishop Perry will be either in charge of a "history of the American episcopal church," with Bishop Williams, Potter and Stevens for associate editors.

—The English congregational jubilee fund has gathered, amounting to $350,000, much of which was pledged at the jubilee meeting in Manchester. Dr. Harvey is candidate and general agent of the fund.

—Harvard College has the largest freshman class in its history, numbering 295. Amherst has 97, Williams 85, Yale 264, Brown, on Index 48. Dartmouth is, which including specials is much the smallest class for many years.

—In three religions of China are Confucianism, Bed Heism and Hoodism. A missionary reasons that "though mutually conflictive and repugnant, these three systems live together in perfect harmony. The people believe in them all and they belong to them all."

—A movement was had among some of the most influential young people in favor of abolishing the old custom of confirming children, and substituting the presentation of the children of the school, and substituting the practice of bringing persons into these children, as one desired to the less favored children of poor and distant parochial schools.

—Superintendent Cole, of Albany, N. Y., suggests that the Board of Education provide twenty-five copies of some good parent's magazine for the use of the young classes in the lower grades of the public schools. The Albany teachers have begun systematically to furnish the pupils of the school reading suited to the age and mental progress of their pupils.

—The work of reviving the standard translation of the Bible has been going on in Germany for some time. The revisers, who are mostly University professors, had their annual meeting early in April, at various towns of Thuringia. About ten years ago they completed the revision of the New Testament, and they are now occupied with the Old Testament.

—Bishop Smith, of Kentucky, presiding Bishop of the Protestant Episcopal Church in the United States is now the oldest Bishop of the American episcopal churches. He was consecrated fortynine years ago (October 31, 1832). Bishop Hopkins, McIlvaine and Doane were consecrated on the same day in 1832. Bishop Hugel, New York City, Bishop Smith is the only remaining Bishop who was consecrated by Bishop White, and who is the only one on the list of American Bishops who has exceeded Bishop White in the number of years of his episcopate.

PUNNET PARAGRAPHS.

—In Nantucket there are sixteen women to one man." Happy mantes.—*Boston Transcript.*

The youth who "sows wild oats" is apt to get in manner lessfarm.—*Somerset Herald.*

—A sawyer may, at certain Would not receive great pay, that's a poor; When suspended he must, While he is at it be a good days!

—Toledo sets the world an example of domestic economy. A son hangs himself with the same rope his father used, and it is again carefully laid away in the barn, having been the remembrance of others who may get tired of life.

—A South End man recently switched a very fine bouquet on a yellow curtain and set it up in an artist's studio, and three-fourths of the critics who called pronounced it a most authentic and delightful piece of color work, in fact a gift if there ever was one. It was a bargain for $500. Money goes to the innocent genius.—*Boston Post.*

—Have some more of the pie, urged Mrs. Snaleum to her boarders, who absolutely refused. Again she urged them, adding: "If you don't eat it I'll have to throw it away. I won't warding the fruit contracted to market. It has purchased to this date over 40,000 barrels of No. 1 graft apples. Of these 5,000 barrels are sent to New York for storage in "coolers," where the fruit is guaranteed to be constantly kept at a temperature of forty degrees, which prevents decay and admits of sales late in the season, when the markets are cleared out of choice fruit. The remainder of the extensive purchase will be sent to Boston for storage and sale. The leading members of the syndicate have both been spending their time in Vermont, giving their personal attention to the packing and shipping of the fruit, and they express themselves as satisfied with the superior quality of their purchases. They say in all their experience they have never seen or purchased a finer lot of apples, and express their surprise at the uniform beauty and fair fruit on the trees.—*Ferguson (Vt.) Cor. Boston Herald.*

—The latest use devised for paper is its manufacture into flour sacks. It is claimed that they are soft and pliable, and for warmth excel blankets made of any other material. The uses to which paper can be put are truly wonderful. But if it almost anything can be made from a lace handkerchief to a human habitation. The most expensive suits are sometimes made. They are cut fabulous.—*Ad. City Herald.*

—A little girl was recently enquiring of her mother as to the meaning of the word "bigamy." "Why, child," was the reply, "it means a man who has more than one wife." "Then," said the little girl, "Brigham Young must be a bigamy."

"JUST HIS LUCK."

Just like his luck." half the boy said, when Charlie Foster was the Sabbath school.

They had made the same remark when Foster won the medal in the Principal of the school in the Sunday-tendance for the year. It would have filled those same old monosyllables—they will keep on saying "silent like boy on Sunday for some time. The boy cousin who is mostly Heavenly grandfather, had once accidentally sprung and a dozen, in various nooks of the big fountain. About ten years ago another pattern of the same old remark was launched, and they are now scraped together upon their fond recollections of the old fountain.

Bishop Smith, of Kentucky, presiding Bishop of the Protestant Episcopal Church in the United States, is now the oldest Bishop of the American episcopal churches. He was consecrated forty-nine years ago (October 31, 1832). Bishop Hopkins, McIlvaine and Doane were consecrated on the same day in 1832. Bishop Hugel, New York City, Bishop Smith is the only remaining Bishop who was consecrated by Bishop White, and who is the only one on the list of American Bishops who has exceeded Bishop White in the number of years of his episcopate.

The Penalty of Civilization.

An Indian girl, who, before she went to Hampton College, thought her father's log hut a palatial mansion compared with the surrounding wigwams, and kept up the illusion, looking forward with pleasure to the grand reception her father would give on her return, bursts into tears as she walked into the cabin built and realized how completely her education had isolated her from all that had been so romantic in her former surroundings. On the other hand when her sister saw her polonaise, her jaunty hat and her high heeled French shoes she cried her eyes out because she couldn't be civilized, too. When the daughter began to "clean up" and "set things to rights" in the old hut her father began to think seriously about sending her back fast. He couldn't stand any such nonsense as that.

For Young Readers.

THE BOY WHO KISSED HIS MOTHER.

The scene is in the dormitory.
As I went along the entry,
A woman with her child was there,
And when—but I'll not tell you where—
Must see them kissing at parting.

I heard a mother behind me,
And the sound of a sweet smack,
And I thought I'd like to kiss mine,
And I wished I'd a mother to kiss.
In the time of the hour of recitation
The boys had to hear me
Whilst I'd kiss my mother at noon.

I turned my face one of the gentlemen,
A boy for his mother to kiss,
I took the chance presented,
And I kissed him on the cheek.
A look of surprise passed over
His face as he went on his way.
When I met him at noon
He said, "I'll not kiss mother today."

Then two was no distinction,
And I kissed all the boys I met,
Without regard to color,
And the two was sound as mother
As I kissed my mother at noon.

"JUST HIS LUCK."

Just like his luck." half the boy said, when Charlie Foster was the Sabbath school.

They had made the same remark when Foster won the medal in the Principal of the school in the Sunday-tendance for the year. It would have filled those same old monosyllables—they will keep on saying "silent like boy on Sunday for some time. The boy cousin who is mostly Heavenly grandfather, had once accidentally sprung and a dozen, in various nooks of the big fountain. About ten years ago another pattern of the same old remark was launched, and they are now scraped together upon their fond recollections of the old fountain.

When the daughter began to "clean up" and "set things to rights" in the old hut her father began to think seriously about sending her back fast. He couldn't stand any such nonsense as that.

A National Reader and Writer Gone at 91.

Some gentlemen who spoken him belonging to the postal order of immunity also said: "The day is done and gone, the sinful lessons and sands." We do not propose to dispute his wanton views of this matter, but present herewith the experience of a Philadelphia journalist, Mr. Samuel H. Linkington, 1710 Arch street, who, after all of these medicinal rambles in rare orders by, beginning his sensible letter positively, lowing:

"I am 91 and a thousandth, and have been troubled very little with bodily pains. Last Tuesday morning I experienced a very annoying stiffness of the neck, which grew worse as the day wore on. Toward evening I felt very severe, and I could scarcely turn my head to any direction. Anyone knows at this time of the year the influence of a cold, and I felt sure that I had taken one. Wednesday morning I was worse, and I concluded to send for a physician. I have not had a physician in my house for many years. Two years ago, at my request, he called to see my wife, but I refused to let him see me professionally, and I have not since had occasion to call one. I have not even taken medicine for a cold, but have relied on my own judgment. I have not had a day's illness since my wife died, and I am now in my ninety-second year. My wife died in 1878, after we had been married forty-eight years. Upon this occasion I concluded to call a physician, and he came. He left me some medicine, which I refused to take, and I continued to suffer. Thursday morning I was worse than ever, and I was in bed. I had a severe pain in the back of my head, and I could not turn my head without moving my entire body. I was in a terrible condition. I had no appetite, and could not sleep. I was in bed all day Thursday, and Thursday night I was worse than ever.

EDITOR AND PROPRIETOR.

Fanaticism.

In the case before Guiteau, it was evidently the intention of the counsel for the defense to show that the prisoner was not responsible for his acts, and not responsible. It was an act of fanaticism, the outcome of a perverted mind in which the sentence was original. Neither their words nor actions seemed pertinent to the matter in the points they made. Each of them set up as philosophers, but displayed more than passing ability to show that their light was the actual illumination of the world.

We have written on the question of fanaticism and a word more will suffice. Fanaticism is the outcome of a perverted mind, and is not confined to any one class or nation. Its origin is as various as the human family, and we doubt if any two persons have the same statement of its cause. Fanaticism is the result of any other phase of mental disease. Good theologians, good statesmen, good scientists and good citizens, as a rule, are well balanced in their minds.

Fanaticism was first in existence in the beginning of the world, and it will be with us to the end. Those who imagine that they are contributing to our benefit by their fanaticism, or who imagine that they are doing God service by their fanaticism, are to be pitied. Attempting to reason with a fanatic is useless. He is not to be convinced, for he is not in a condition to receive argument. Every such act as the murder of Garfield is the result of fanaticism. Every such act as the murder of Lincoln is the result of fanaticism. Every such act as the murder of Julius Cæsar is the result of fanaticism. He simply obeyed the voice within him, which told him there was work to do. That was fanaticism, enthusiasm and personal assurance of the voice of God.

The fanaticism of men who are known or familiarly known as "Mormon missionaries" are of a peculiar and intense character of religious fervor. The Prophet holds that the theory of a Divine Providence will eventually overcome in the conversion of folks of sense to a well and extravagant notion.

The word "fanatic" finds its appearance in the English language about 1641, but it is not true to state that the fanaticism is wholly modern. There have always been fanatics in religion, and the ultimate leading to the human race could have no end and to result. The followers of Mahomet in their first years, themselves ten years of flight, built themselves with knives and slaved the name of "Hosanna" on the points of their sword and cut themselves on Mount Carmel, three thousand years ago. The Hindu devotee measures by his yardage upon the earth and during a prayer, through his pilgrimage to the sacred shrine of Benares, to find pardon for his sins, dies, as he did in part ages. The records of barbarism and civilization alike show that fanaticism belongs to the one rather than to any particular nation, and that is synonymous to our enlightenment we shall be rid of it.

What a ghastly record fanaticism does! It has drenched the world with blood—The Inquisition with its horrors; Decius' edict of the Jews from Spain; their treatment by the church of Rome; the burning of heretics—100,000 in the York; orlando on the tree of Charles V.; and Philip II; the burning of the Scots in England; the burning, drowning and hanging of witches all over Christendom—these are workings of fanaticism.

Fanaticism, ignorance and superstition go hand in hand. The Germans had it before the Roman empire, and it crops up yearly in them. The Jews had the same, and their descendants have it. Greeks and Romans had their idiosyncrasies, and how well a story could be told of the fanaticism of Adam and Eve. The civil power put an end to the executions.

Fox, the founder of the well known sect of Quakers, maintained what Graham Clarke Conley—that the Lord told him just what to do. Guy Simpson, felt that he was "moved of the Lord" to take off his clothing and preach in the streets, and history tell us that Sarah Goldsmith appeared naked in Bristol, England, to utter under the Lord's directions as to the wickedness of the people. Lydia Wardell went to the Newbury meeting house naked, explaining the action of the Lord's command—Deborah Wilson in Salem, Massachusetts, walked through the streets naked, saying the Lord wished it "to symbolize the naked truth to a wicked and corrupt generation.

"Were those women modest? Yes! "Were they sincere? Certainly. Just as modest and sincere as Paul was when he persecuted the Christians. In Isiah, xx, 3, we find that Isaiah "walked naked and barefoot three years as a sign and wonder upon Ethiopia and Egypt." The old seer was probably modest and sincere. At least, the Times never hazed him upon himself by Ghristians or of his being arrested for improper exposure, etc. Mrs. Marshfield, John Dunsen and Mary Ross stripped all the clothing and ornaments decided to Nudism—that is, all Mosaic elements were left off. Women and men discarded all the usual things "from the head to the foot." He thought the time was ripe for a social orgies; men and women half clad and with them pay what to do. That an application, enthusiasm and personal assurance of Gods.

The fanaticism of men who are known or familiarly known as "Mormon missionaries" are of a peculiar and intense character of religious fervor. The Prophet holds that the theory of a Divine Providence will eventually overcome in the conversion of folks of sense to a well and extravagant notion.

The word "fanatic" finds its appearance in the English language about 1641, but it is not true to state that the fanaticism is wholly modern. There have always been fanatics in religion, and the ultimate leading to the human race could have no end and to result. The followers of Mahomet in their first years, themselves ten years of flight, built themselves with knives and slaved the name of "Hosanna" on the points of their sword and cut themselves on Mount Carmel, three thousand years ago. The Hindu devotee measures by his yardage upon the earth and during a prayer, through his pilgrimage to the sacred shrine of Benares, to find pardon for his sins, dies, as he did in part ages. The records of barbarism and civilization alike show that fanaticism belongs to the one rather than to any particular nation, and that is synonymous to our enlightenment we shall be rid of it.

What a ghastly record fanaticism does! It has drenched the world with blood—The Inquisition with its horrors; Decius' edict of the Jews from Spain; their treatment by the church of Rome; the burning of heretics—100,000 in the York; orlando on the tree of Charles V.; and Philip II; the burning of the Scots in England; the burning, drowning and hanging of witches all over Christendom—these are workings of fanaticism.

Fanaticism, ignorance and superstition go hand in hand. The Germans had it before the Roman empire, and it crops up yearly in them. The Jews had the same, and their descendants have it. Greeks and Romans had their idiosyncrasies, and how well a story could be told of the fanaticism of Adam and Eve. The civil power put an end to the executions.

Fox, the founder of the well known sect of Quakers, maintained what Graham Clarke Conley—that the Lord told him just what to do. Guy Simpson, felt that he was "moved of the Lord" to take off his clothing and preach in the streets, and history tell us that Sarah Goldsmith appeared naked in Bristol, England, to utter under the Lord's directions as to the wickedness of the people. Lydia Wardell went to the Newbury meeting house naked, explaining the action of the Lord's command—Deborah Wilson in Salem, Massachusetts, walked through the streets naked, saying the Lord wished it "to symbolize the naked truth to a wicked and corrupt generation.

"Were those women modest? Yes! "Were they sincere? Certainly. Just as modest and sincere as Paul was when he persecuted the Christians. In Isiah, xx, 3, we find that Isaiah "walked naked and barefoot three years as a sign and wonder upon Ethiopia and Egypt." The old seer was probably modest and sincere. At least, the Times never hazed him upon himself by Ghristians or of his being arrested for improper exposure, etc. Mrs. Marshfield, John Dunsen and Mary Ross

Message Supplement.

THE NATION.

First Annual Message of President Arthur.

Allusion to the Death of President Garfield

Our Relations with Foreign Nations.

Home Affairs. Finances, The Indian Question, Polygamy, Etc.

Discussion of the Civil-Service Question.

Etc., Etc., Etc.

To the Senate and House of Representatives of the United States:

An appalling calamity has befallen the American people since their chosen Representatives last met in the halls where you are assembled. Words are powerless to express the grief with which we all mourn the untimely death of the President of the United States. We can only bow down in submission before the will of Him who holds in His hands the destinies of nations and of men.

In the midst of the national joy inspired by the recent restoration of peace between the United States and Chili, by the successful adjustment of the Panama question, by the prospect of an early settlement of the vexed fishery question with Great Britain, by the bright promise of future years, the hand of violence was raised against the life of the President, and he fell wounded as with a single blow. Prostrated by his side fell the Secretary of State, who had been the trusted friend and wise counselor of the President, and associated with him in the most cordial intercourse. Attempted murder became the instrument of removing from the high office of Secretary of State

CHARLEV

WILL

—It was to ...

—Cloth caps have been superseded in a Boston store by a mechanical arrangement for conveying purchasemoney from the salesclerks to the cashier's desk and returning the change. That device is essentially a pneumatic system of tubing and gearing, connecting the various stations of the counters with the cashier's desk, which is centrally located, and bullet tubes in which the money is placed the tube traversing the grooves by force of gravity.

—An institute has been formed by the employees of the Cambria Iron Works, Reading, Pa., in which is a library furnished by the company for the use of the employees free of charge. The proprietors of the works are organizing classes in mechanical drawing, steel engraving, mining, chemistry, and contemplate having lectures given throughout the winter on mineralogy and other sciences in which iron workers are interested.

—From silk-worms hatched in the vicinity and cocoons raised during the summer the ladies of the Philadelphia Silk Culture Association have raised sufficient raw material to weave a gown for Mrs. Garfield. The pattern will be made at Patterson, N. J., and will equal the best French designs.

—The comparative power and strength of Princes, as compared with the other States that compose the confederacy of the German Empire are shown in the returns and proportions to the Federal Council in relation to the imperial army. The army consists of 1 field-marshal, 2 generals and commanding-general officers, 19 lieutenant-generals, 40 officers and 18 commissioned officers of the active Saxon army, including Soldiers and non-commissioned officers, Prussia, 401,659; Bavaria, 84,329; Saxony, 23,453; Wurtemberg, 13,500.

—A new law with regard to the sentence in France, which was passed by the Senate after encountering serious opposition, is about to be put in force in the French Government Reform, as is well known, French counties have been divided into as many sections as there were cantons contained in the surrounding district, so that persons of different religions lived should not be forced together. By the new law this distinction is abolished, and the Christian ground in each canton will be open to all alike, irrespective of religious creed.

Charlevoix Sentinel.

Local News.

BREVITIES.

—The new Boyne City Pioneer was to hand the 20th inst.

—Prince Zeeb, of Hanbor Springs, has removed from the small pox.

—Mrs. O. A. Bufford received a present of Peacocks and Pigeon Spruce.

—Fred Sessin, of the Sentinel office is visiting his mother and sisters at Ellsworth.

—Miss Bess Nye has returned from Ann Arbor and her sister Mamie, the will still visit Detroit and other points before he returns.

—The Engle and Dove says the ladies prospect is "some big floods, wet rain" and snow.

—Charles Fox, a nephew of James Fox, of this place, died of small pox in Chicago recently.

—Joseph and Ed. Sawtelle received a telegram from South Haven yesterday announcing the death of their mother.

—Guess this? Why is the music in a fiddle like a good lawyer? Because it is a good fee-gee.

—We have some handsome leaf cards which we would like to print for some of the patrons that order cards.

—The Schooner Fleetwing, Capt. Bill Way, arrived last Friday afternoon from Little Traverse, where she took a load of lime from a vessel in the lower place.

—Last Friday the tug Mouse, Thomas Sinnott mate at the helm by her father and was compelled to go into winter quarters.

—The tug Rob Stevenson was pulled partially out, last Wednesday, of Lake Michigan from a dangerous position by the tug Mouse.

—Schuster Brothers are selling holiday turkey at Fort Lesley with his monthly goodies, sister and daughter. His wife and daughter will return with him.

—Peter Lamb and wife, of Hayes, are visited their son and family on Saturday last. A large circle of friends attended, and the occasion was an enjoyable one.

—Wm. Black's lecture before the Local Club, which was announced for this fall has been postponed until the next "Convention of Charlevoix".

—Judge Ramsdell evinces partiality that the January term of Circuit for the county is postponed till the third Tuesday of February.

—Wm. Barnard & Co. seem to have purchased Capt. Hart's interest already in the new Little Mouse. His name and Capt. Bliss will sail the vessel. Capt. Hart will not be interested.

—Mrs. Ann Arbor was in Petoskey last week and visited Dr. Lewis and family. She was accompanied by Miss Bessie Nye, who remained for a visit.

—Will See, of this place, has an account in a mining claim near Ishpeming which a partner wishes to give interest of "panning out" handsomely.

—J. B. Babcock broke through the ice and was a cold bath Tuesday night at East Jordan. He took was recovered. He loaned near Black River, and lost a valuable overcoat.

—A Grand Rapids man was here last week looking up some of his bonds appeared to consider the spendthrift place, but the Sentinel man was free.

—The schooner D Caulkin had been hauled out for winter and the most remaining was outfitted. Repairs on the hull and the making of two pairs will be promptly looked.

—South Arm is frozen over but the lake is still open, and a number of boats have rescued on the route to this town, and all have passed capsized which we think should have been done.

—In Justice Holland's court on Thursday Deputy Dicks was arraigned for assault and battery on the person of Harvey Cook, both of Horse Township. Fine $5.00 and costs.

—H. W. Heath, of Antrim has shipped from Norwood dock 100 head of ground hog to Harbor Springs, Petoskey and Traverse and expects to ship 100 more as soon as the weather continues favorable.

—Mr. Anderson, member of Congress from Kansas, proposes a bill to reduce letter postage to two cents. Mr. Anderson will be remembered as the genial Kansan who spent a portion of last Summer in Charlevoix.

—Dr. Leach has accumulated nearly four hundred pounds in the village and says he dispersed the needle three times very successfully. Dr. Lewis and Parmele have also done good service in this line.

—The Grand Traverse *Herald* is going marvelously well. We think it is making a good journal. It would keep a good paper, but somehow Tom has an easy fashion to many of the good things of life, and we wish him success in all he undertakes.

—A friend in Boyne writes us that Chas. Dennison died in Boyne City, and that Mrs. Sarah Sawtelle died a few days after. The latter of the case we do not believe. She was very much prostrated and died on the 19th of a general exhaustion.

—Mr. Quackenbush writes us since Dennison that Adams Express Co. takes the place of the U. S. Express Co., in the railroad depot there, and requests people ordering goods to come by express to have them send to Adams, and the will attend promptly to their transfer to the depot.

—The Post Lake Iron Company will pay a new advertisement in our next issue. The Company have added largely to improvements, and their facilities for supplying the trade is the greatest of their existence. Give them a call.

—The entire premises on the Traverse Bay Island Hotel, will be sold at auction, to the highest bidder, on Saturday, January 5th, 1884, at 2 o'clock p. m. Terms liberal. Apply to or address, W. S. Morgan, Agent for Agnes Morgan, Antrim Co. Mich. 1127-3

—Mrs. Ann Arbor has returned from a visit to Petoskey. She was accompanied by Miss Bessie Nye, who remained for a visit. Miss Nye is a general favorite in Petoskey.

THE SENTINEL.
CHARLES A. SHIPP, Editor and Proprietor.
CHARLEVOIX, MICHIGAN

NEWS SUMMARY.

Important Intelligence from All Parts

Congressional.

In the Senate on the 10th a bill was introduced by Mr. Lapham providing for an appropriation to improve the Des Moines River. Mr. Wilson, of Virginia, on Mr. Pendleton's motion, introduced a joint resolution requesting the President to furnish information upon the question of what effect will result from the proposed change in the method of reading the messages of the President to the Congress. It gives a detailed statement of the number of words in each of the messages of Presidents Jefferson, Madison, Monroe, Jackson, Van Buren, Polk, Taylor, Fillmore, Pierce, Buchanan, Lincoln, Johnson, Grant, Hayes, Garfield, Arthur, Cleveland and Harrison. Mr. Allen, of Nebraska, introduced a bill to prohibit the sale of intoxicating liquors in the Capitol building and grounds. Mr. Allen, Mr. Blair, Mr. Ingalls and Mr. Plumb spoke in favor of the bill, and Mr. Hoar opposed it. The bill was finally passed, and will now go before the House. Mr. Morgan introduced a bill to provide for the payment of the claim of the State of Alabama for moneys expended by that State in suppressing the Creek Indian war of 1836. Mr. Hoar introduced a bill to provide for the payment of the claim of the State of Massachusetts for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Rhode Island for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Connecticut for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of New Hampshire for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Maine for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Virginia for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Pennsylvania for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Delaware for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Maryland for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of North Carolina for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of South Carolina for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Georgia for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Florida for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Alabama for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Mississippi for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Louisiana for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Texas for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Arkansas for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Missouri for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Iowa for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Minnesota for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Kansas for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Nebraska for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Colorado for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Wyoming for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Idaho for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Montana for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Utah for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Nevada for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of California for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Oregon for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Washington for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Alaska for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Hawaii for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Porto Rico for moneys expended in defending the State against the Indians in 1675 and 1676. Mr. Hoar also introduced a bill to provide for the payment of the claim of the State of Cuba

Local News.

BREVITIES.

The new hotel at Petoskey will be called the Arlington.

Father Zorn, of Harbor Springs, has recovered from the small pox.

Mrs. B. A. Bedford is visiting friends at Petoskey and Harbor Springs.

—Fred Smith, of the SENTINEL office is visiting his mother and sisters at Flint.

Mrs. Byron See has returned from Ann Arbor with her eyes much improved.

—Augustus Alberts' house at Petoskey was burned Dec. 16th, and his two little children perished in the flames.

—Henry Cooper is in Pontiac visiting his sister Minnie. He will will visit Detroit and other places before he returns.

—The Bay City *Press* says the Indian prophecy is "some big frosts, not much snow," this winter.

—Charles Fox, a nephew of Amos Fox, of this place, died of small-pox in Chicago recently.

—Joseph and Ed. Swailes received a telegram from South Haven yesterday, announcing the death of their mother.

Guess this! Why is the store on the corner of Bridge and Clinton street a good place for chickens. Give it up?

—We have some handsome ball cards which we would like to print for some of the dances that are talked of.

—The Schooner Fleetwing, Capt. Dan Way, arrived last Friday evening from Little Traverse, where she took a load of hay from Norwood to the former place.

—Last Friday the tug Minnie Warren burned some of the flues to her boiler, and was compelled to go into winter quarters.

—The tug Rob Stevenson was pulled partially out, last Wednesday, to have her shoe replaced—it being lost by backing into the ice up the Arm.

—Senator Batters is eating holiday turkey at Port Austin with his mother brother, sister and daughter. His sister and daughter will return with him.

—Peter Kane and wife, of Hayes celebrated their tin wedding on Saturday last. A large circle of friends attended, and the occasion was an enjoyable one.

—Wm. Black's lecture before the Liberal Club, which was announced for Jan 2d, has been postponed until the 9th, "Formation of Character."

—Judge Ramsdell writes parties here that the January term of Circuit for this county is postponed till the third Tuesday of February.

—Wm. Blair and Ava Smith have purchased Capt. Blair's quarter interest in the scow Lottie Mason. This means that Capt. Blair will sail the schooner De Cordres next season.

—Will See, of this place, has an interest in a mining claim near Leadville, which a partner writes gives promise of "panning out" handsomly.

—J. B. Babcock broke through the ice and was drowned near Empey's dock, at East Jordan, Saturday. His body was recovered. He resided near Rock Elm, and leaves three orphan children.

—A Grand Rapids man was here last week inviting an effort to get his bonds approved for a saloon in the Spaulsbury place, but the Village Council said no sir-ee.

—The schooner DeCordres had her lows hauled out last week, and the only remaining leak caulked. Repairs on her hull and the making of her spars will go promptly forward.

—South Arm is frozen over but Pine Lake is still open, and a steamer could have remained on the route to this time, and at least payed expenses, which we think should have been done.

—In Justice McLeod's court on Thursday, Thomas Dake was arranged for an assult and battery on the person of Harvey Cook, both of Hayes Township. Fine $2,50 and costs.

—H. W. Beach, of Antrim has shipped from Norwood dock 100 tons of pressed hay to Harbor Springs, Petoskey and St. Ignace, and expects to ship 100 tons more, if the weather continues favorable.

—S. Anderson, member of Congress from Kansas, proposes a bill to reduce letter postage to two cents. Mr. Anderson will be remembered as the genial Kansas Congressman who spent a portion of last Summer in Charlevoix.

—Dr. Leach has vaccinated nearly four hundred people in the village and township and the results have been very satisfactory. Drs Lewis and Preston have also done good service in this line.

—The Grand Traverse *Herald* is improving marvelously in all that goes to make up a good journal. It was always a good paper, but somehow Tom has an ambition to scoop all the rest of us fellows, and we wish him well in it.

—A friend in Hayes writes us as follows. "In your last issue I saw that Mrs. Sarah Samanski died a horrible death. The facts of the case are far different. She passed away very peacefully and died in the hope of a glorious immortality."

—Mr. Quaintance writes us from Petoskey that the Adams Express Co. takes the place of the U. S. Express Co., at the railroad depot there, and requests people ordering goods to come by express to have them sent by Adams, and he will attend promptly to their transfer by stage.

—The Pine Lake Iron Company will have a new advertisement in our next issue. The Company have added largely to their stock, and their facilities for supplying the wants of the people of that vicinity are unexcelled. Give them a call.

—The annual prospectus of the Detroit *Post and Tribune* appears in full in issue.—In typography, form, editorial ability, and general worth as a family and political journal, the *Post and Tribune* is the leader of Michigan journals, and ranks among the best in the Northwest. Its excellence becomes more apparent with age.

—The six foot sidewalk on the east side of State street is about completed and is the best one in town. We assert without fear of contradiction, that Charlevoix is the best provided with sidewalks of any town of its size in the north half of the State, and it is because our people are wide-awake and enterprising.

—A. Fox and his chief clerk are preparing the manuscript for a new advertisement, setting forth the unprecedented enlargement of their stock, and the extraordinary inducements offered by them to the trading public. Every knows Geo. Miller's aptness in the art of pleasing the public, and now is a good time to call and see him.

—The Indians of Hayes Township had a meeting recently, and resolved to prevent any Indians from the infected Indian village from coming among them or passing through. Word was sent to the Indians at Elk Rapids to that effect. The cause of this step was the passing of several Indians through who came from Elk Rapids.

Everybody supposed navigation closed some time ago, but the schooner Sea Gem left port Tuesday last with a cargo for Milwaukee, arriving there Thursday morning in good shape and her return is hourly expected.

LATER—The Sea Gem arrived in port Sunday night, having made the run from Milwaukee in twenty six hours. When near Charlevoix piers a squall broke her fore-gaff and split her foresail. She brought supplies for the repair of the schooner De Cordres.

—Hon. John S. Dixon, of this Township has taken a departure in the conduct of his farm, which gives promise of proving profitable to him and of great benefit to lovers of early vegetables. He has built a forcing house 20x60 in which to start early vegetable plants. It is heated by a furnace, and well lighted from the roof. He has in his service Mr. W. B. Taylor, an experienced English gardener who will have charge of the forcing house and garden. Mr. Dixon proposes to furnish vegetables as early here as they are received in the cities from the "sunny south." Ripe tomatoes and asparagus in June! Just think of it!

—The Tug Rob Stevenson was launched Saturday, after undergoing repairs and started for the furnace apparently all right, when it was discovered that she was leaking badly. One syphon failed to keep her clear, and a second one was brought into use. She was brought back here and examined when it was discovered that her stem was knocked out of place, probably in launching her. Repairs were promptly made.

—Indian Agent Lee, of this State, is gaining a reputation for stopping over in his fatherly care of the swarthy denizens of the north. In his report of the small-pox at Fishwhitetown, he censures the local authorities for not doing more to alleviate their sufferings. Undoubtedly he expects the whites to leave their families, take their lives in their hands, and fly to the wigwams of the noble red men, and nurse them through their affliction. Gen. W. Lee, not only in this, but in other matters pertaining to the relation of the whites to the Indians, talks too much. Indian agents are nearly as bad as small-pox.

—The *Enterprise* of last week had authority for stating that the G. R. & I. R. R. are surveying a route, for a branch road from Boyne Falls to Ironton. If it is true, it means Charlevoix as well. We also get it from good authority, which we are not at liberty to disclose, that the same Company are beginning to talk about the extension of the Traverse City branch north to Elk Rapids and Charlevoix. One thing is certain, that under the new impetus which railroad building is receiving, railroad men are waking up to the feasibility of the route, and the profit which would without doubt accrue from a road to this point.

—A pleasant affair occurred at the Bridge Street House Saturday evening.—Squire Miller invited the editor to be present, and our entrance to the commodious dining room disclosed to our vision a beautiful Christmas tree, which touched the ceiling and was bending under its load of gifts. The room was filled with a happy and jovial party embracing Mr. and Mrs. Miller, Mr. and Mrs. B. W. Miller, other relatives, and the boarders and attaches of the house. The Squire himself distributed the gifts, no person in the room being omitted, and among the articles were several very costly and beautiful ones. The editor himself was substantially favored with a fat turkey, which, by dint of that inhabitiveness for which newspaper men are proverbially famous, we found out came from the happy landlord himself. There was candy and pop-corn for all, and unlimited enjoyment abounded.

—The following are the real estate transfers recorded up to this date, December 27th 1881.

John Rowell and wife to J. Milo Eaton, 164 acres in Norwood, consideration $400.

Lucy Tratash to Francis Covyou, 16 acres in Bear Lake, consideration $72.

John M. Petoskey to Helen Crane, 40 acres in Hayes, con. $160.

Auditor General to J. L. Newberry, 80 acres in Bear Lake, con. $24 06.

Daniel W. Marsh to Emma McCabe, 40 acres in Marion, con. $200.

James H. Myers and wife to Jessie C. Pollthorp, 160 acres in Melrose, consideration $1000.

United States to Henry Kahler, 82 6-100 acres in Evangeline.—Homestead.

Ormge S. Washburne and wife to Peleg S. Brown, lot in village of Charlevoix, consideration $8, Quit Claim.

Edmond J. Gifford and wife to George Gale, 40 acres in Bear Lake, con. $450.

David W. Walker to Edmond J. Gifford, 40 acres in Bear Lake, con. $175.

Peter Wahbeshahnequoon and wife to Charles Senges, 1 acre in Hayes, consideration $10.

Daniel Staley and wife to William Slade Stripp, 120 acres in Eveline, con. $2300.

John Staley and wife to William Slade Stripp, 80 acres in Eveline, con. $775.

Auditor General to E. M. Clark, 37 60-100 acres in Hayes, con. $42 69, Tax Deed.

—By mistake the following names of jurors were omitted from the list last week:

Hudson—Joseph C. Burch, Wm. A. Guerin, Henry A. Fisher.

Melrose—Wallace Weller.

Hayes—Thos. Dake, David Barbett.

Congress has agreed on an adjournment from Dec. 21st to January 5th.

Hon. James G. Blaine is selected to deliver the eulogy at the Garfield obsequies.

A dispatch from St. Paul gives the details of an extensive and peculiar land swindle being perpetrated by British subjects in Dakota, just south of the Manitoba line, by parties residing in Emerson, Manitoba. It is stated that these Canadians have by means of misrepresentations entered Government lands in Dakota and are cultivating them, and at the same time retaining their residence and allegiance as subjects of Queen Victoria. Their nice little game may, however, be interferred with.

THE SENTINEL.

WILLIAM A. SMITH, Editor and Proprietor.

CHARLEVOIX, . . MICHIGAN.

NEWS SUMMARY.

Important Intelligence from All Parts

Congressional.

In the Senate on the 11th bills were introduced: By Mr. Camden, providing for an appropriation to improve the Great Kanawha river, Virginia; by Mr. Plumb, making it mandatory upon the Secretary of the Treasury to issue certificates upon deposits of gold or silver bullion; by Mr. Sherman, to amend the act creating the Secretary of the Treasury for the relief of persons in South Carolina and Florida or in the insurrectionary districts. The Committee on Territories reported a bill to strengthen the northern boundary of Nebraska. Mr. Ingalls spoke in favor of the bill, and after debating and defeating the motion to postpone indefinitely, the bill was postponed. The bill relating to the Presidential succession was taken up and debated by Messrs. Brock, Mattox, Anthony and others. The bill provides a vote by the Senate and House into one assembly, and the counting of the votes of both bodies.

In the Senate on the 12th numerous petitions were presented for the repeal of the internal revenue taxes and for the abolition of taxes on bank deposits and checks. Mr. Sherman, from the Committee on Finance, reported back the bill providing for the issue of three-per-cent. bonds, and said he should ask that it be considered immediately after the holidays. A resolution was adopted calling for the correspondence between the late President of Liquorpool, Ind., said Mr. Lowe [Laughter.] "Yes," said Mr. Lowe, "the Life of Moses." He was apparently aware at that time. Mrs. B. R. Shipley, pastor of All Souls Church, Chicago, was married at the same house with Gutzon from April last until the 19th [Laughter.] Mr. Lowe read the correspondence with Mr. Dennison, formerly Governor of Ohio, relative to the Ohio claims, and insisted that the war record be made a matter in July, 1866. Mr. Sewell objected to her further testimony unless the original letter of Moses were shown, and the witness was likewise fully withdrawn. Mr. Yeomans, for the prosecution, insisted that the book itself was competent evidence, and that the letter was in his custody, and he would have it if necessary some additional time. General Joseph R. Reynolds, Col., said he had seen the prisoner in the jail twelve days after the assassination. Objected to. Mr. Aiken, for the prosecution, said he only wished to show that the defendant the act of killing the President. After some further talk, the court in evidence an application of the prisoner for a life insurance policy, which it was found that there had never been any insanity in the family. Mr. Lowe, for the defense, said he considered, and would not be willing to submit to the court that the witness was address to the prisoner, the appointment of the clerk the address was then read and duly enumerated as upon by Reynolds, Col., and the application General Reynolds said he had been paid by the prisoner for the services. Mr. Aiken then resumed the interrogatories in the direction of the examination the Court adjourned.

The trial of Guiteau was resumed on the morning of the 14th at the usual hour. Geo. G. Barnard, Deputy Clerk of the Supreme Court of Kings County, N. Y., testified in regard of the license of the prisoner from his former wife. He identified the license produced on the ground that it was not certified by the Clerk of the County, but Judge Cox overruled the objection, and Mr. Scoville asked an adjournment to look up the law. The prisoner was then called from the witness room and seated with Guiteau Mr. Garfield was living, and wit-

nessed his (the latter) being supplanted as a Mr. Theodore Roosevelt, Jr., was the counsel for the defense. He said that he worked with Chas. Conkling, Judge Robertson, Gen. Logan, Gen. Gibbon, Gen. Hancock, Gen. Sherman, Gen. Sheridan, Gen. Grant, Gen. Sherman, Gen. Sheridan, Gen. Grant, Gen. Sherman, Gen. Sheridan, Gen. Grant

Charlevoix Sentinel.

CHARLEVOIX, DECEMBER 27, 1867

WILLARD A. SMITH, EDITOR AND PROPRIETOR.

Hon. L. C. Washburn has been endorsed Master of the National Grange.

Are the Democrats to set the South going to follow the example of the Solid South and split?

There seems to be a certain gentleman absent among the Democrats from the Hon. N. J. Tilden has stood his ne for them again.

The paper-money circulation of this country now amounts to $728,000,000, not including silver certificates. There are $301,239,001 National bank notes, and $382,015,027 legal tenders.

The bill granted the banking privilege to the widow of the late President Garfield, is identical with those passed in the cases of the widows of Presidents Tyler, Polk and Lincoln.

Scoville thinks the trial of Guiteau will be concluded in about two weeks. The prisoner tells a newspaper reporter that in the main he is very well satisfied with the way Scoville has managed his case.

It is announced that the wife of Jefferson Davis, the President's Private Secretary, is to be the lady of the White House. She is a daughter of Mr. Frelinghuysen, the future Secretary of State.

Long John Wentworth, the veteran Chicago Republican, served at the battle of the Thames in which Tecumseh was killed on October 13, 1813, and believes that he is the last survivor of that contest.

Surviving members of the crew of the Jeannette have reached the mouth of the Siberian river Lena. The unfortunate vessel was crushed in the ice in latitude 77 and longitude 157 on the 11th day of June.

The Pontiac *Gazette* advocates Congressman Hubbell for the Senate, as Senator Ferry's successor, whereupon the Berrien *Record* wants to know why Mr. Ferry would not be a pretty good man to succeed himself.

Isaac Bassett, the Brooklyn ex-ex of the U. S. Senate, completed fifty years of public service on the 6th instant, he having been employed as page, on the recommendation of Daniel Webster, on the 6th of December, 1830.

War is threatened between Guatemala and Mexico, on account of alleged Mexican encroachments upon the rights of her Southern neighbor. Should war ensue, all the small Republics of Central America will join Guatemala against Mexico.

Friends of Bill Ryan, the convicted train-robber of Missouri, have repeatedly threatened the life of Governor Crittenden of that State, and are said to have conspired to abduct the daughter and hold her as a hostage for the pardon of the desperado.

Lesseps' ship canal scheme on the Isthmus of Panama has encountered a stronger enemy than either a lack of capital or the "Monroe doctrine." Fever has already carried off at least a quarter of the laboring force sent to work in connection with the enterprise.

Judge Christiancy relates to a newspaper correspondent a sorry story of the behavior of his wife on the journey to Peru, and during their stay in that country. He says the half has not been told about the actions of his wife, but that at the proper time he will tell it all.

The bar-rooms of Texas are now required by law to be closed from 2 to 7 o'clock on Sunday. This arrangement, says an advocate of the measure in the Legislature, "will give liquor and religion just about an even chance, and may the best of the two win."

A. B. Turner, of the Grand Rapids *Eagle*, is an applicant for the position of Government Printer, which will probably be vacant at no distant day by the retirement of the present incumbent. Mr. Turner's prospects for success are reported to be very flattering and we shall be pleased to see him appointed.

The fund for the Garfield monument at Cleveland had reached $71,197 on the 5th inst. Of this, $28,497 was from dollar subscriptions. The States of Ohio, Iowa and New York lead the list in the order named. Ohio has subscribed four-fifths of the total, and the city of Cleveland two-thirds of it, or about $48,000.

The New York *Tribune*, speaking of the loud hurrahing and boisterous and uncalled for demonstrations by the crowd in attendance of the so-called trial of Guiteau, says that Chief Justice Salmon P. Chase deserved the gallantry at one time during the impeachment trial of President Johnson, when the audience wantered to applaud, and said: "In the impeachment of a living President a more solemn ceremony than the trial of the murderer of a dead President."

Queen Isabella and the ex-Queen Mother of Pelham parlor and [illegible] at Montreal, after the latter had given [illegible] the local editor the attendance [illegible] ready to stand the status of the government in the Dominion, he being [illegible] as [illegible]

[illegible] being moved to the Dominion [illegible] with the Mercantile Agency [illegible] the holiday season. Dun, Bar-Wyman & Co. report that he will not think it would be [illegible] practicable to [illegible] to [illegible]

[illegible] will be [illegible] [illegible] [illegible]

The Citadel of Bourbonism Captured.

The importance of the late ante-Bourbon victory in Virginia will be fully appreciated when the relative position of that State in the Solid South is considered. Virginia was the backbone of the slaveholder's Confederacy, and it has been until lately the citadel of Bourbonism in the Solid South.

The persistance of Bourbon ideas in Virginia has been a remarkable fact in American politics. With the exception of a few years in the Reconstruction period, "the First Families," who from a rule of their being are most bigoted Bourbons, have always controlled the politics of the State. From the foundation of the Government until 1824, Virginia cast only for her own sons for President twice for Washington, three times for Jefferson, twice for Madison, twice for Monroe, and once for William H. Crawford (a native Virginian by birth, who removed to Georgia). From 1824 till 1880 the vote of the State was always cast for the Democratic candidate. Virginia voted twice for Jackson, twice for Van Buren, for Polk, for Cass, for Pierce, and for Buchanan. The pluralities in some years were small, but they were enough. Some of the votes were as follows:

For Majority for Van Buren	6,782
For Majority for Van Buren	4,906
For Majority for Polk	1,103
For Majority for Cass	4,000
For Majority for Pierce	5,000
For Majority for Buchanan	9,846

The growth of the plurality in 1856 was due to the candidacy of John Tyler, a native Virginian, for the Vice-Presidency, and that ticket had also the candidacy of General Taylor, a Southern soldier and statesman, who had come out of the Mexican war with honor, and was a very indifferent Whig, for the President. Even then, when the warring conditions Virginia was consumed faithful to the Democracy.
